[38555] KIAA1170 (Accession XP_045907.2) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1170 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1170, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1170 BINDING SITE, designated SEQ ID:7575, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38556] Another function of GAM1338 is therefore inhibition of KIAA1170 (Accession XP_045907.2) . Accordingly, utilities

of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1170.

[38557] KIAA1185 (Accession NP_065761.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1185 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1185, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1185 BINDING SITE, designated SEQ ID:9213, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38558] Another function of GAM1338 is therefore inhibition of KIAA1185 (Accession NP_065761.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1185.

[38559] KIAA1193 (Accession XP_041843.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1193 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1193, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1193 BINDING SITE, designated SEQ ID:1683, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38560] Another function of GAM1338 is therefore inhibition of KIAA1193 (Accession XP_041843.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1193.

[38561] KIAA1198 (Accession NP_065765.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1198 BINDING SITE1 through KIAA1198 BINDING SITE5 are target binding sites found in untranslated regions of mRNA encoded by KIAA1198, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1198 BINDING SITE1 through KIAA1198 BINDING SITE5, designated SEQ ID:17224, SEQ ID:17617, SEQ ID:17786, SEQ ID:8170 and SEQ ID:5522 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38562] Another function of GAM1338 is therefore inhibition of KIAA1198 (Accession NP_065765.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1198.

[38563] KIAA1209 (Accession XP_027307.2) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1209 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1209, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1209 BINDING SITE, designated SEQ ID:10878, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38564] Another function of GAM1338 is therefore inhibition of KIAA1209 (Accession XP_027307.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1209.

[38565] KIAA1210 (Accession XP_172801.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1210 BINDING SITE is a target binding site found in the 3` un-

translated region of mRNA encoded by KIAA1210, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1210 BINDING SITE, designated SEQ ID:1409, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38566] Another function of GAM1338 is therefore inhibition of KIAA1210 (Accession XP_172801.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1210.

[38567] KIAA1257 (Accession XP_031577.2) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1257 BINDING SITE1 through KIAA1257 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by KIAA1257, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1257 BINDING SITE1 through KIAA1257 BINDING SITE3, designated SEQ ID:14928, SEQ ID:3109 and SEQ ID:13137 respectively, to the nucleotide sequence of GAM1338 RNA, herein desig-

nated GAM RNA, also designated SEQ ID:360.

[38568] Another function of GAM1338 is therefore inhibition of KIAA1257 (Accession XP_031577.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1257.

[38569] KIAA1268 (Accession XP_291055.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1268 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1268, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1268 BINDING SITE, designated SEQ ID:6348, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38570] Another function of GAM1338 is therefore inhibition of KIAA1268 (Accession XP_291055.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1268.

[38571] KIAA1287 (Accession NP_065799.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1287

BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1287, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1287 BINDING SITE, designated SEQ ID:13685, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38572] Another function of GAM1338 is therefore inhibition of KIAA1287 (Accession NP_065799.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1287.

[38573] KIAA1393 (Accession XP_050793.2) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1393 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1393, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1393 BINDING SITE, designated SEQ ID:6495, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38574] Another function of GAM1338 is therefore inhibition of KIAA1393 (Accession XP_050793.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1393.

[38575] KIAA1465 (Accession XP_027396.4) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1465 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1465, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1465 BINDING SITE, designated SEQ ID:13306, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38576] Another function of GAM1338 is therefore inhibition of KIAA1465 (Accession XP_027396.4) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1465.

[38577] KIAA1493 (Accession XP_034415.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1493 BINDING SITE is a target binding site found in the 3` un-

translated region of mRNA encoded by KIAA1493, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1493 BINDING SITE, designated SEQ ID:11663, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38578] Another function of GAM1338 is therefore inhibition of KIAA1493 (Accession XP_034415.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1493.

[38579] KIAA1518 (Accession XP_170889.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1518 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by KIAA1518, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1518 BINDING SITE, designated SEQ ID:17375, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38580] Another function of GAM1338 is therefore inhibition of KIAA1518 (Accession XP_170889.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1518.

[38581] KIAA1530 (Accession XP_042661.5) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1530 BINDING SITE1 and KIAA1530 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by KIAA1530, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1530 BINDING SITE1 and KIAA1530 BINDING SITE2, designated SEQ ID:12345 and SEQ ID:6360 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38582] Another function of GAM1338 is therefore inhibition of KIAA1530 (Accession XP_042661.5) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1530.

[38583] KIAA1559 (Accession XP_054472.2) is another GAM1338

target gene, herein designated TARGET GENE. KIAA1559 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1559, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1559 BINDING SITE, designated SEQ ID:14408, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38584] Another function of GAM1338 is therefore inhibition of KIAA1559 (Accession XP_054472.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1559.

[38585] KIAA1571 (Accession XP_027744.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1571 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1571, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1571 BINDING SITE, designated SEQ ID:13037, to the nucleotide sequence of GAM1338 RNA, herein designated

GAM RNA, also designated SEQ ID:360.

[38586] Another function of GAM1338 is therefore inhibition of KIAA1571 (Accession XP_027744.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1571.

[38587] KIAA1615 (Accession NP_066002.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1615 BINDING SITE1 and KIAA1615 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by KIAA1615, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1615 BINDING SITE1 and KIAA1615 BINDING SITE2, designated SEQ ID:12534 and SEQ ID:8578 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38588] Another function of GAM1338 is therefore inhibition of KIAA1615 (Accession NP_066002.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1615.

[38589] KIAA1671 (Accession XP_037809.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1671 BINDING SITE1 and KIAA1671 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by KIAA1671, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1671 BINDING SITE1 and KIAA1671 BINDING SITE2, designated SEQ ID:17814 and SEQ ID:6490 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38590] Another function of GAM1338 is therefore inhibition of KIAA1671 (Accession XP_037809.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1671.

[38591] KIAA1712 (Accession NP_085136.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1712 BINDING SITE1 and KIAA1712 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by KIAA1712, corresponding to target binding sites such as BINDING SITE I, BINDING

SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1712 BINDING SITE1 and KIAA1712 BINDING SITE2, designated SEQ ID:12038 and SEQ ID:12038 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38592] Another function of GAM1338 is therefore inhibition of KIAA1712 (Accession NP_085136.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1712.

[38593] KIAA1712 (Accession NP_085136.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1712 BINDING SITE1 and KIAA1712 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by KIAA1712, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1712 BINDING SITE1 and KIAA1712 BINDING SITE2, designated SEQ ID:8796 and SEQ ID:8796 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38594] Another function of GAM1338 is therefore inhibition of KIAA1712 (Accession NP_085136.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1712.

[38595] KIAA1724 (Accession XP_040280.2) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1724 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by KIAA1724, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1724 BINDING SITE, designated SEQ ID:12049, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38596] Another function of GAM1338 is therefore inhibition of KIAA1724 (Accession XP_040280.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1724.

[38597] KIAA1737 (Accession NP_219494.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1737 BINDING SITE1 and KIAA1737 BINDING SITE2 are target

binding sites found in untranslated regions of mRNA encoded by KIAA1737, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1737 BINDING SITE1 and KIAA1737 BINDING SITE2, designated SEQ ID:12203 and SEQ ID:19235 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38598] Another function of GAM1338 is therefore inhibition of KIAA1737 (Accession NP_219494.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1737.

[38599] KIAA1784 (Accession NP_115820.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1784 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1784, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1784 BINDING SITE, designated SEQ ID:18884, to the nucleotide sequence of GAM1338 RNA, herein designated

GAM RNA, also designated SEQ ID:360.

[38600] Another function of GAM1338 is therefore inhibition of KIAA1784 (Accession NP_115820.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1784.

[38601] KIAA1822 (Accession XP_041566.2) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1822 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1822, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1822 BINDING SITE, designated SEQ ID:9237, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38602] Another function of GAM1338 is therefore inhibition of KIAA1822 (Accession XP_041566.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1822.

[38603] KIAA1827 (Accession XP_290834.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1827

BINDING SITE1 and KIAA1827 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by KIAA1827, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1827 BINDING SITE1 and KIAA1827 BINDING SITE2, designated SEQ ID:2385 and SEQ ID:19431 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38604] Another function of GAM1338 is therefore inhibition of KIAA1827 (Accession XP_290834.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1827.

[38605] KIAA1829 (Accession XP_030378.2) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1829 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1829, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1829 BINDING SITE, designated SEQ ID:12386, to the

nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38606] Another function of GAM1338 is therefore inhibition of KIAA1829 (Accession XP_030378.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1829.

[38607] KIAA1836 (Accession XP_114087.2) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1836 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1836, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1836 BINDING SITE, designated SEQ ID:17519, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38608] Another function of GAM1338 is therefore inhibition of KIAA1836 (Accession XP_114087.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1836.

[38609] KIAA1892 (Accession NP_056212.1) is another GAM1338

target gene, herein designated TARGET GENE. KIAA1892 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1892, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1892 BINDING SITE, designated SEQ ID:19465, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38610] Another function of GAM1338 is therefore inhibition of KIAA1892 (Accession NP_056212.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1892.

[38611] KIAA1922 (Accession XP_057040.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1922 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by KIAA1922, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1922 BINDING SITE, designated SEQ ID:18258, to the nucleotide sequence of GAM1338 RNA, herein designated

GAM RNA, also designated SEQ ID:360.

[38612] Another function of GAM1338 is therefore inhibition of KIAA1922 (Accession XP_057040.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1922.

[38613] KIAA1924 (Accession NP_694971.2) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1924 BINDING SITE1 and KIAA1924 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by KIAA1924, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1924 BINDING SITE1 and KIAA1924 BINDING SITE2, designated SEQ ID:12570 and SEQ ID:7825 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38614] Another function of GAM1338 is therefore inhibition of KIAA1924 (Accession NP_694971.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1924.

[38615] KIAA1971 (Accession XP_058720.4) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1971 BINDING SITE1 through KIAA1971 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by KIAA1971, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1971 BINDING SITE1 through KIAA1971 BINDING SITE3, designated SEQ ID:19552, SEQ ID:4023 and SEQ ID:13441 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38616] Another function of GAM1338 is therefore inhibition of KIAA1971 (Accession XP_058720.4) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1971.

[38617] KIAA1987 (Accession XP_113870.1) is another GAM1338 target gene, herein designated TARGET GENE. KIAA1987 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by KIAA1987, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of KIAA1987 BINDING SITE, designated SEQ ID:18263, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38618] Another function of GAM1338 is therefore inhibition of KIAA1987 (Accession XP_113870.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1987.

[38619] KIAA2028 (Accession XP_059415.2) is another GAM1338 target gene, herein designated TARGET GENE. KIAA2028 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA2028, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA2028 BINDING SITE, designated SEQ ID:11722, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38620] Another function of GAM1338 is therefore inhibition of KIAA2028 (Accession XP_059415.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

KIAA2028.

[38621] Kruppel-like factor 12 (KLF12, Accession NP_009180.3) is another GAM1338 target gene, herein designated TARGET GENE. KLF12 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by KLF12, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KLF12 BINDING SITE, designated SEQ ID:7570, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38622] Another function of GAM1338 is therefore inhibition of Kruppel-like factor 12 (KLF12, Accession NP_009180.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KLF12.

[38623] Killer cell lectin-like receptor subfamily d, member 1 (KLRD1, Accession NP_002253.1) is another GAM1338 target gene, herein designated TARGET GENE. KLRD1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by KLRD1, corresponding to a target binding site such as

BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KLRD1 BINDING SITE, designated SEQ ID:8689, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38624] Another function of GAM1338 is therefore inhibition of Killer cell lectin-like receptor subfamily d, member 1 (KLRD1, Accession NP_002253.1), a gene which is a receptor for the recognition of mhc class i hla- e molecules by nk cells and some cytotoxic t- cells. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KLRD1.

[38625] The function of KLRD1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Killer cell lectin-like receptor subfamily d, member 1 (KLRD1, Accession NP_031360.1) is another GAM1338 target gene, herein designated TARGET GENE. KLRD1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by KLRD1, corresponding to a target binding site

such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KLRD1 BINDING SITE, designated SEQ ID:8689, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38626] Another function of GAM1338 is therefore inhibition of Killer cell lectin-like receptor subfamily d, member 1 (KLRD1, Accession NP_031360.1), a gene which is a receptor for the recognition of mhc class i hla- e molecules by nk cells and some cytotoxic t- cells. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KLRD1.

[38627] The function of KLRD1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Kynurenine 3-monooxygenase (kynurenine 3-hydroxylase) (KMO, Accession NP_003670.1) is another GAM1338 target gene, herein designated TARGET GENE. KMO BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KMO, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KMO BINDING SITE, designated SEQ ID:5730, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38628] Another function of GAM1338 is therefore inhibition of Kynurenine 3-monooxygenase (kynurenine 3-hydroxylase) (KMO, Accession NP_003670.1), a gene which may play a role in encephalic photoreception. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KMO.

[38629] The function of KMO and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Kinase suppressor of ras (KSR, Accession XP_290793.1) is another GAM1338 target gene, herein designated TARGET GENE. KSR BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by KSR, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KSR BINDING SITE, designated

SEQ ID:15951, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38630] Another function of GAM1338 is therefore inhibition of Kinase suppressor of ras (KSR, Accession XP_290793.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KSR.

[38631] Lysosomal-associated membrane protein 3 (LAMP3, Accession NP_055213.1) is another GAM1338 target gene, herein designated TARGET GENE. LAMP3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LAMP3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LAMP3 BINDING SITE, designated SEQ ID:970, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38632] Another function of GAM1338 is therefore inhibition of Lysosomal-associated membrane protein 3 (LAMP3, Accession NP_055213.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases

and clinical conditions associated with LAMP3.

[38633] Lipocalin 7 (LCN7, Accession NP_071447.1) is another GAM1338 target gene, herein designated TARGET GENE. LCN7 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LCN7, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LCN7 BINDING SITE, designated SEQ ID:3972, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38634] Another function of GAM1338 is therefore inhibition of Lipocalin 7 (LCN7, Accession NP_071447.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LCN7.

[38635] LCX (Accession XP_167612.2) is another GAM1338 target gene, herein designated TARGET GENE. LCX BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LCX, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LCX BINDING

SITE, designated SEQ ID:7409, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38636] Another function of GAM1338 is therefore inhibition of LCX (Accession XP_167612.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LCX.

[38637] LGP1 (Accession NP_115873.1) is another GAM1338 target gene, herein designated TARGET GENE. LGP1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LGP1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LGP1 BINDING SITE, designated SEQ ID:20143, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38638] Another function of GAM1338 is therefore inhibition of LGP1 (Accession NP_115873.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LGP1.

[38639] LIN-28 (Accession NP_078950.1) is another GAM1338 target gene, herein designated TARGET GENE. LIN-28

BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LIN-28, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LIN-28 BINDING SITE, designated SEQ ID:6030, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38640] Another function of GAM1338 is therefore inhibition of LIN-28 (Accession NP_078950.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LIN-28.

[38641] LNK (Accession NP_005466.1) is another GAM1338 target gene, herein designated TARGET GENE. LNK BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LNK, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LNK BINDING SITE, designated SEQ ID:9510, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38642] Another function of GAM1338 is therefore inhibition of

LNK (Accession NP_005466.1), a gene which links T- cell receptor activation signal to phospholipase c- gamma- 1, grb- 2 and phosphatidylinositol 3- kinase (by similarity). Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LNK.

[38643] The function of LNK and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.LOC112687 (Accession XP_053145.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC112687 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC112687, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC112687 BINDING SITE, designated SEQ ID:4875, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38644] Another function of GAM1338 is therefore inhibition of LOC112687 (Accession XP_053145.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC112687.

[38645] LOC113444 (Accession NP_612437.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC113444 BINDING SITE1 through LOC113444 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC113444, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC113444 BINDING SITE1 through LOC113444 BINDING SITE3, designated SEQ ID:14262, SEQ ID:15369 and SEQ ID:15847 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38646] Another function of GAM1338 is therefore inhibition of LOC113444 (Accession NP_612437.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC113444.

[38647] LOC115123 (Accession XP_055276.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC115123 BINDING SITE is a target binding site found in

the 5` untranslated region of mRNA encoded by LOC115123, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC115123 BINDING SITE, designated SEQ ID:8312, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38648] Another function of GAM1338 is therefore inhibition of LOC115123 (Accession XP_055276.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC115123.

[38649] LOC115129 (Accession XP_055292.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC115129 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC115129, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC115129 BINDING SITE, designated SEQ ID:11459, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:360.

[38650] Another function of GAM1338 is therefore inhibition of LOC115129 (Accession XP_055292.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC115129.

[38651] LOC115648 (Accession NP_663299.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC115648 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC115648, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC115648 BINDING SITE, designated SEQ ID:6386, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38652] Another function of GAM1338 is therefore inhibition of LOC115648 (Accession NP_663299.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC115648.

[38653] LOC116411 (Accession XP_058095.1) is another

GAM1338 target gene, herein designated TARGET GENE. LOC116411 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC116411, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC116411 BINDING SITE, designated SEQ ID:1487, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38654] Another function of GAM1338 is therefore inhibition of LOC116411 (Accession XP_058095.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC116411.

[38655] LOC118490 (Accession XP_060981.3) is another GAM1338 target gene, herein designated TARGET GENE. LOC118490 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC118490, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC118490 BINDING SITE, desig-

nated SEQ ID:11022, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38656] Another function of GAM1338 is therefore inhibition of LOC118490 (Accession XP_060981.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC118490.

[38657] LOC118812 (Accession NP_849154.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC118812 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by LOC118812, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC118812 BINDING SITE, designated SEQ ID:7879, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38658] Another function of GAM1338 is therefore inhibition of LOC118812 (Accession NP_849154.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC118812.

[38659] LOC118812 (Accession XP_058346.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC118812 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by LOC118812, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC118812 BINDING SITE, designated SEQ ID:7879, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38660] Another function of GAM1338 is therefore inhibition of LOC118812 (Accession XP_058346.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC118812.

[38661] LOC120526 (Accession XP_058475.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC120526 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC120526, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC120526 BINDING SITE, designated SEQ ID:14215, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38662] Another function of GAM1338 is therefore inhibition of LOC120526 (Accession XP_058475.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC120526.

[38663] LOC121952 (Accession XP_062872.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC121952 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC121952, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC121952 BINDING SITE, designated SEQ ID:17591, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38664] Another function of GAM1338 is therefore inhibition of LOC121952 (Accession XP_062872.2) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC121952.

[38665] LOC124221 (Accession XP_058785.3) is another GAM1338 target gene, herein designated TARGET GENE. LOC124221 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC124221, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC124221 BINDING SITE, designated SEQ ID:14470, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38666] Another function of GAM1338 is therefore inhibition of LOC124221 (Accession XP_058785.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC124221.

[38667] LOC124871 (Accession XP_058857.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC124871 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC124871, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC124871 BINDING SITE, designated SEQ ID:1585, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38668] Another function of GAM1338 is therefore inhibition of LOC124871 (Accession XP_058857.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC124871.

[38669] LOC125061 (Accession XP_058889.3) is another GAM1338 target gene, herein designated TARGET GENE. LOC125061 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC125061, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC125061 BINDING SITE, designated SEQ ID:9098, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38670] Another function of GAM1338 is therefore inhibition of LOC125061 (Accession XP_058889.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC125061.

[38671] LOC126669 (Accession XP_060121.4) is another GAM1338 target gene, herein designated TARGET GENE. LOC126669 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC126669, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC126669 BINDING SITE, designated SEQ ID:8179, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38672] Another function of GAM1338 is therefore inhibition of LOC126669 (Accession XP_060121.4) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC126669.

[38673] LOC127253 (Accession XP_059122.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC127253 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC127253, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC127253 BINDING SITE, designated SEQ ID:2617, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38674] Another function of GAM1338 is therefore inhibition of LOC127253 (Accession XP_059122.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC127253.

[38675] LOC127841 (Accession XP_059184.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC127841 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC127841, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC127841 BINDING SITE, designated SEQ ID:5401, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38676] Another function of GAM1338 is therefore inhibition of LOC127841 (Accession XP_059184.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC127841.

[38677] LOC128387 (Accession XP_059243.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC128387 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC128387, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC128387 BINDING SITE, designated SEQ ID:2302, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38678] Another function of GAM1338 is therefore inhibition of LOC128387 (Accession XP_059243.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC128387.

[38679] LOC132241 (Accession XP_059583.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC132241 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC132241, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC132241 BINDING SITE, designated SEQ ID:13281, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38680] Another function of GAM1338 is therefore inhibition of LOC132241 (Accession XP_059583.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC132241.

[38681] LOC135293 (Accession XP_072402.4) is another GAM1338 target gene, herein designated TARGET GENE. LOC135293 BINDING SITE1 and LOC135293 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC135293, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the com-

plementarity of the nucleotide sequences of LOC135293 BINDING SITE1 and LOC135293 BINDING SITE2, designated SEQ ID:15178 and SEQ ID:11660 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38682] Another function of GAM1338 is therefore inhibition of LOC135293 (Accession XP_072402.4) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC135293.

[38683] LOC135763 (Accession NP_612639.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC135763 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC135763, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC135763 BINDING SITE, designated SEQ ID:14442, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38684] Another function of GAM1338 is therefore inhibition of LOC135763 (Accession NP_612639.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC135763.

[38685] LOC135818 (Accession XP_059804.4) is another GAM1338 target gene, herein designated TARGET GENE. LOC135818 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC135818, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC135818 BINDING SITE, designated SEQ ID:7348, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38686] Another function of GAM1338 is therefore inhibition of LOC135818 (Accession XP_059804.4) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC135818.

[38687] LOC137886 (Accession XP_059929.3) is another GAM1338 target gene, herein designated TARGET GENE. LOC137886 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC137886, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC137886 BINDING SITE, designated SEQ ID:18258, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38688] Another function of GAM1338 is therefore inhibition of LOC137886 (Accession XP_059929.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC137886.

[38689] LOC139422 (Accession XP_066687.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC139422 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC139422, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC139422 BINDING SITE, designated SEQ ID:17958, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38690] Another function of GAM1338 is therefore inhibition of LOC139422 (Accession XP_066687.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC139422.

[38691] LOC143241 (Accession NP_620167.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC143241 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC143241, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC143241 BINDING SITE, designated SEQ ID:13142, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38692] Another function of GAM1338 is therefore inhibition of LOC143241 (Accession NP_620167.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC143241.

[38693] LOC144404 (Accession XP_084852.6) is another GAM1338 target gene, herein designated TARGET GENE.

LOC144404 BINDING SITE1 and LOC144404 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC144404, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC144404 BINDING SITE1 and LOC144404 BINDING SITE2, designated SEQ ID:8561 and SEQ ID:11669 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38694] Another function of GAM1338 is therefore inhibition of LOC144404 (Accession XP_084852.6) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC144404.

[38695] LOC144481 (Accession XP_096611.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC144481 BINDING SITE1 and LOC144481 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC144481, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC144481

BINDING SITE1 and LOC144481 BINDING SITE2, designated SEQ ID:17022 and SEQ ID:16400 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38696] Another function of GAM1338 is therefore inhibition of LOC144481 (Accession XP_096611.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC144481.

[38697] LOC144742 (Accession XP_084949.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC144742 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC144742, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC144742 BINDING SITE, designated SEQ ID:15441, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38698] Another function of GAM1338 is therefore inhibition of LOC144742 (Accession XP_084949.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC144742.

[38699] LOC144766 (Accession XP_084963.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC144766 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC144766, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC144766 BINDING SITE, designated SEQ ID:19847, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38700] Another function of GAM1338 is therefore inhibition of LOC144766 (Accession XP_084963.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC144766.

[38701] LOC144776 (Accession XP_084964.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC144776 BINDING SITE1 and LOC144776 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC144776, corresponding to

target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC144776 BINDING SITE1 and LOC144776 BINDING SITE2, designated SEQ ID:14978 and SEQ ID:16958 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38702] Another function of GAM1338 is therefore inhibition of LOC144776 (Accession XP_084964.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC144776.

[38703] LOC144817 (Accession XP_084972.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC144817 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC144817, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC144817 BINDING SITE, designated SEQ ID:12382, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38704] Another function of GAM1338 is therefore inhibition of LOC144817 (Accession XP_084972.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC144817.

[38705] LOC144871 (Accession XP_096698.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC144871 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC144871, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC144871 BINDING SITE, designated SEQ ID:10644, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38706] Another function of GAM1338 is therefore inhibition of LOC144871 (Accession XP_096698.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC144871.

[38707] LOC145268 (Accession XP_085072.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC145268 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC145268, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC145268 BINDING SITE, designated SEQ ID:15408, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38708] Another function of GAM1338 is therefore inhibition of LOC145268 (Accession XP_085072.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC145268.

[38709] LOC145453 (Accession XP_085120.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC145453 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC145453, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC145453 BINDING SITE, designated SEQ ID:8486, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38710] Another function of GAM1338 is therefore inhibition of LOC145453 (Accession XP_085120.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC145453.

[38711] LOC145725 (Accession XP_085211.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC145725 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC145725, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC145725 BINDING SITE, designated SEQ ID:418, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38712] Another function of GAM1338 is therefore inhibition of LOC145725 (Accession XP_085211.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC145725.

[38713] LOC145757 (Accession XP_085227.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC145757 BINDING SITE1 and LOC145757 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC145757, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC145757 BINDING SITE1 and LOC145757 BINDING SITE2, designated SEQ ID:13797 and SEQ ID:3109 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38714] Another function of GAM1338 is therefore inhibition of LOC145757 (Accession XP_085227.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC145757.

[38715] LOC145842 (Accession XP_085254.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC145842 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC145842, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC145842 BINDING SITE, designated SEQ ID:16182, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38716] Another function of GAM1338 is therefore inhibition of LOC145842 (Accession XP_085254.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC145842.

[38717] LOC146177 (Accession NP_778229.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC146177 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC146177, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146177 BINDING SITE, designated SEQ ID:15157, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38718] Another function of GAM1338 is therefore inhibition of LOC146177 (Accession NP_778229.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146177.

[38719] LOC146229 (Accession XP_085387.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC146229 BINDING SITE1 through LOC146229 BINDING SITE4 are target binding sites found in untranslated regions of mRNA encoded by LOC146229, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146229 BINDING SITE1 through LOC146229 BINDING SITE4, designated SEQ ID:3109, SEQ ID:8345, SEQ ID:13931 and SEQ ID:5010 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38720] Another function of GAM1338 is therefore inhibition of LOC146229 (Accession XP_085387.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146229.

[38721] LOC146346 (Accession XP_085430.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC146346 BINDING SITE1 and LOC146346 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC146346, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146346 BINDING SITE1 and LOC146346 BINDING SITE2, designated SEQ ID:6781 and SEQ ID:16312 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38722] Another function of GAM1338 is therefore inhibition of LOC146346 (Accession XP_085430.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146346.

[38723] LOC146429 (Accession XP_096998.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC146429 BINDING SITE1 and LOC146429 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC146429, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146429

BINDING SITE1 and LOC146429 BINDING SITE2, designated SEQ ID:13213 and SEQ ID:8579 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38724] Another function of GAM1338 is therefore inhibition of LOC146429 (Accession XP_096998.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146429.

[38725] LOC146603 (Accession XP_085514.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC146603 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC146603, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146603 BINDING SITE, designated SEQ ID:3109, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38726] Another function of GAM1338 is therefore inhibition of LOC146603 (Accession XP_085514.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC146603.

[38727] LOC146784 (Accession XP_085588.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC146784 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC146784, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146784 BINDING SITE, designated SEQ ID:13452, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38728] Another function of GAM1338 is therefore inhibition of LOC146784 (Accession XP_085588.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146784.

[38729] LOC146839 (Accession XP_097107.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC146839 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC146839, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146839 BINDING SITE, designated SEQ ID:11661, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38730] Another function of GAM1338 is therefore inhibition of LOC146839 (Accession XP_097107.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146839.

[38731] LOC146894 (Accession NP_660316.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC146894 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC146894, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146894 BINDING SITE, designated SEQ ID:2386, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38732] Another function of GAM1338 is therefore inhibition of

LOC146894 (Accession NP_660316.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146894.

[38733] LOC146895 (Accession XP_097120.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC146895 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC146895, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146895 BINDING SITE, designated SEQ ID:8862, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38734] Another function of GAM1338 is therefore inhibition of LOC146895 (Accession XP_097120.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146895.

[38735] LOC146901 (Accession XP_097121.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC146901 BINDING SITE is a target binding site found in

the 3` untranslated region of mRNA encoded by LOC146901, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146901 BINDING SITE, designated SEQ ID:12152, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38736] Another function of GAM1338 is therefore inhibition of LOC146901 (Accession XP_097121.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146901.

[38737] LOC146909 (Accession XP_085634.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC146909 BINDING SITE1 and LOC146909 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC146909, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146909 BINDING SITE1 and LOC146909 BINDING SITE2, designated SEQ ID:14280 and SEQ ID:20010 respectively, to the

nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38738] Another function of GAM1338 is therefore inhibition of LOC146909 (Accession XP_085634.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146909.

[38739] LOC147071 (Accession XP_054031.5) is another GAM1338 target gene, herein designated TARGET GENE. LOC147071 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC147071, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC147071 BINDING SITE, designated SEQ ID:6735, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38740] Another function of GAM1338 is therefore inhibition of LOC147071 (Accession XP_054031.5) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC147071.

[38741] LOC147080 (Accession XP_097182.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC147080 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC147080, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC147080 BINDING SITE, designated SEQ ID:18093, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38742] Another function of GAM1338 is therefore inhibition of LOC147080 (Accession XP_097182.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC147080.

[38743] LOC147166 (Accession XP_085722.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC147166 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC147166, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC147166 BINDING SITE, designated SEQ ID:546, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38744] Another function of GAM1338 is therefore inhibition of LOC147166 (Accession XP_085722.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC147166.

[38745] LOC147343 (Accession XP_097225.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC147343 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC147343, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC147343 BINDING SITE, designated SEQ ID:15088, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38746] Another function of GAM1338 is therefore inhibition of LOC147343 (Accession XP_097225.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC147343.

[38747] LOC147407 (Accession XP_084000.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC147407 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC147407, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC147407 BINDING SITE, designated SEQ ID:12382, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38748] Another function of GAM1338 is therefore inhibition of LOC147407 (Accession XP_084000.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC147407.

[38749] LOC147622 (Accession XP_097255.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC147622 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC147622, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC147622 BINDING SITE, designated SEQ ID:10349, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38750] Another function of GAM1338 is therefore inhibition of LOC147622 (Accession XP_097255.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC147622.

[38751] LOC147841 (Accession XP_085924.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC147841 BINDING SITE1 and LOC147841 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC147841, corresponding to

target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC147841 BINDING SITE1 and LOC147841 BINDING SITE2, designated SEQ ID:18175 and SEQ ID:15453 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38752] Another function of GAM1338 is therefore inhibition of LOC147841 (Accession XP_085924.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC147841.

[38753] LOC147947 (Accession XP_085974.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC147947 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC147947, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC147947 BINDING SITE, designated SEQ ID:438, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38754] Another function of GAM1338 is therefore inhibition of LOC147947 (Accession XP_085974.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC147947.

[38755] LOC148137 (Accession NP_653293.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC148137 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC148137, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC148137 BINDING SITE, designated SEQ ID:13130, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38756] Another function of GAM1338 is therefore inhibition of LOC148137 (Accession NP_653293.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC148137.

[38757] LOC148198 (Accession XP_047554.4) is another GAM1338 target gene, herein designated TARGET GENE.

LOC148198 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC148198, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC148198 BINDING SITE, designated SEQ ID:7524, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38758] Another function of GAM1338 is therefore inhibition of LOC148198 (Accession XP_047554.4) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC148198.

[38759] LOC148708 (Accession XP_086286.4) is another GAM1338 target gene, herein designated TARGET GENE. LOC148708 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC148708, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC148708 BINDING SITE, designated SEQ ID:18164, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38760] Another function of GAM1338 is therefore inhibition of LOC148708 (Accession XP_086286.4) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC148708.

[38761] LOC148709 (Accession XP_086281.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC148709 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC148709, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC148709 BINDING SITE, designated SEQ ID:8427, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38762] Another function of GAM1338 is therefore inhibition of LOC148709 (Accession XP_086281.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC148709.

[38763] LOC149149 (Accession XP_097598.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC149149 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC149149, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC149149 BINDING SITE, designated SEQ ID:9725, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38764] Another function of GAM1338 is therefore inhibition of LOC149149 (Accession XP_097598.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC149149.

[38765] LOC149371 (Accession NP_787072.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC149371 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC149371, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC149371 BINDING SITE, designated SEQ ID:14762, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38766] Another function of GAM1338 is therefore inhibition of LOC149371 (Accession NP_787072.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC149371.

[38767] LOC149464 (Accession XP_097645.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC149464 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC149464, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC149464 BINDING SITE, designated SEQ ID:14821, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38768] Another function of GAM1338 is therefore inhibition of LOC149464 (Accession XP_097645.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC149464.

[38769] LOC149466 (Accession XP_086546.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC149466 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC149466, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC149466 BINDING SITE, designated SEQ ID:982, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38770] Another function of GAM1338 is therefore inhibition of LOC149466 (Accession XP_086546.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC149466.

[38771] LOC149478 (Accession XP_086536.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC149478 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC149478, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC149478 BINDING SITE, designated SEQ ID:2514, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38772] Another function of GAM1338 is therefore inhibition of LOC149478 (Accession XP_086536.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC149478.

[38773] LOC149506 (Accession XP_097661.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC149506 BINDING SITE1 and LOC149506 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC149506, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC149506 BINDING SITE1 and LOC149506 BINDING SITE2, designated SEQ ID:17503 and SEQ ID:5777 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38774] Another function of GAM1338 is therefore inhibition of LOC149506 (Accession XP_097661.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC149506.

[38775] LOC149692 (Accession XP_097706.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC149692 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC149692, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC149692 BINDING SITE, designated SEQ ID:13800, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38776] Another function of GAM1338 is therefore inhibition of LOC149692 (Accession XP_097706.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC149692.

[38777] LOC149703 (Accession XP_097719.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC149703 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC149703, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC149703 BINDING SITE, designated SEQ ID:19805, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38778] Another function of GAM1338 is therefore inhibition of LOC149703 (Accession XP_097719.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC149703.

[38779] LOC150054 (Accession XP_097797.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC150054 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC150054, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC150054 BINDING SITE, designated SEQ ID:18175, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38780] Another function of GAM1338 is therefore inhibition of LOC150054 (Accession XP_097797.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC150054.

[38781] LOC150225 (Accession XP_097870.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC150225 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC150225, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC150225 BINDING SITE, designated SEQ ID:1664, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38782] Another function of GAM1338 is therefore inhibition of LOC150225 (Accession XP_097870.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC150225.

[38783] LOC150356 (Accession XP_086884.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC150356 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC150356, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC150356 BINDING SITE, designated SEQ ID:19150, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38784] Another function of GAM1338 is therefore inhibition of LOC150356 (Accession XP_086884.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC150356.

[38785] LOC150407 (Accession XP_086906.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC150407 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC150407, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC150407 BINDING SITE, designated SEQ ID:2430, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38786] Another function of GAM1338 is therefore inhibition of LOC150407 (Accession XP_086906.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC150407.

[38787] LOC150587 (Accession XP_097917.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC150587 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC150587, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC150587 BINDING SITE, designated SEQ ID:8861, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38788] Another function of GAM1338 is therefore inhibition of LOC150587 (Accession XP_097917.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC150587.

[38789] LOC151057 (Accession XP_097998.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC151057 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC151057, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC151057 BINDING SITE, designated SEQ ID:5519, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38790] Another function of GAM1338 is therefore inhibition of LOC151057 (Accession XP_097998.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC151057.

[38791] LOC151124 (Accession XP_098006.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC151124 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC151124, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC151124 BINDING SITE, designated SEQ ID:13932, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38792] Another function of GAM1338 is therefore inhibition of LOC151124 (Accession XP_098006.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC151124.

[38793] LOC151196 (Accession XP_098019.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC151196 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC151196, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC151196 BINDING SITE, designated SEQ ID:12600, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38794] Another function of GAM1338 is therefore inhibition of

LOC151196 (Accession XP_098019.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC151196.

[38795] LOC151201 (Accession XP_098021.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC151201 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC151201, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC151201 BINDING SITE, designated SEQ ID:11934, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38796] Another function of GAM1338 is therefore inhibition of LOC151201 (Accession XP_098021.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC151201.

[38797] LOC151475 (Accession XP_098063.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC151475 BINDING SITE1 and LOC151475 BINDING

SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC151475, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC151475 BINDING SITE1 and LOC151475 BINDING SITE2, designated SEQ ID:7086 and SEQ ID:15680 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38798] Another function of GAM1338 is therefore inhibition of LOC151475 (Accession XP_098063.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC151475.

[38799] LOC151636 (Accession NP_612144.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC151636 BINDING SITE1 through LOC151636 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC151636, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC151636 BINDING SITE1 through LOC151636 BINDING SITE3, des-

ignated SEQ ID:19982, SEQ ID:896 and SEQ ID:2479 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38800] Another function of GAM1338 is therefore inhibition of LOC151636 (Accession NP_612144.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC151636.

[38801] LOC151979 (Accession XP_087354.5) is another GAM1338 target gene, herein designated TARGET GENE. LOC151979 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC151979, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC151979 BINDING SITE, designated SEQ ID:2865, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38802] Another function of GAM1338 is therefore inhibition of LOC151979 (Accession XP_087354.5) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC151979.

[38803] LOC152245 (Accession XP_098182.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC152245 BINDING SITE1 and LOC152245 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC152245, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC152245 BINDING SITE1 and LOC152245 BINDING SITE2, designated SEQ ID:19257 and SEQ ID:1714 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38804] Another function of GAM1338 is therefore inhibition of LOC152245 (Accession XP_098182.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC152245.

[38805] LOC152445 (Accession XP_098231.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC152445 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC152445, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC152445 BINDING SITE, designated SEQ ID:13905, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38806] Another function of GAM1338 is therefore inhibition of LOC152445 (Accession XP_098231.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC152445.

[38807] LOC152620 (Accession XP_011108.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC152620 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC152620, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC152620 BINDING SITE, designated SEQ ID:13870, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38808] Another function of GAM1338 is therefore inhibition of

LOC152620 (Accession XP_011108.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC152620.

[38809] LOC152719 (Accession XP_098257.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC152719 BINDING SITE1 and LOC152719 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC152719, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC152719 BINDING SITE1 and LOC152719 BINDING SITE2, designated SEQ ID:1141 and SEQ ID:7621 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38810] Another function of GAM1338 is therefore inhibition of LOC152719 (Accession XP_098257.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC152719.

[38811] LOC152794 (Accession XP_087525.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC152794 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC152794, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC152794 BINDING SITE, designated SEQ ID:3556, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38812] Another function of GAM1338 is therefore inhibition of LOC152794 (Accession XP_087525.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC152794.

[38813] LOC152804 (Accession XP_098266.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC152804 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC152804, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC152804 BINDING SITE, designated SEQ ID:8155, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38814] Another function of GAM1338 is therefore inhibition of LOC152804 (Accession XP_098266.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC152804.

[38815] LOC153077 (Accession XP_098307.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC153077 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC153077, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC153077 BINDING SITE, designated SEQ ID:19370, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38816] Another function of GAM1338 is therefore inhibition of LOC153077 (Accession XP_098307.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC153077.

[38817] LOC153811 (Accession XP_087779.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC153811 BINDING SITE1 through LOC153811 BINDING SITE4 are target binding sites found in untranslated regions of mRNA encoded by LOC153811, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC153811 BINDING SITE1 through LOC153811 BINDING SITE4, designated SEQ ID:15030, SEQ ID:10119, SEQ ID:6031 and SEQ ID:14281 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38818] Another function of GAM1338 is therefore inhibition of LOC153811 (Accession XP_087779.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC153811.

[38819] LOC153883 (Accession XP_087798.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC153883 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC153883, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC153883 BINDING SITE, designated SEQ ID:3293, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38820] Another function of GAM1338 is therefore inhibition of LOC153883 (Accession XP_087798.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC153883.

[38821] LOC153910 (Accession XP_087801.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC153910 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC153910, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC153910 BINDING SITE, designated SEQ ID:7292, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38822] Another function of GAM1338 is therefore inhibition of

LOC153910 (Accession XP_087801.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC153910.

[38823] LOC154282 (Accession XP_098505.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC154282 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC154282, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC154282 BINDING SITE, designated SEQ ID:14848, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38824] Another function of GAM1338 is therefore inhibition of LOC154282 (Accession XP_098505.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC154282.

[38825] LOC154822 (Accession XP_098618.3) is another GAM1338 target gene, herein designated TARGET GENE. LOC154822 BINDING SITE is a target binding site found in

the 5` untranslated region of mRNA encoded by LOC154822, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC154822 BINDING SITE, designated SEQ ID:3008, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38826] Another function of GAM1338 is therefore inhibition of LOC154822 (Accession XP_098618.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC154822.

[38827] LOC154877 (Accession XP_098626.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC154877 BINDING SITE1 through LOC154877 BINDING SITE4 are target binding sites found in untranslated regions of mRNA encoded by LOC154877, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC154877 BINDING SITE1 through LOC154877 BINDING SITE4, designated SEQ ID:3038, SEQ ID:15947, SEQ ID:14342 and

SEQ ID:14885 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38828] Another function of GAM1338 is therefore inhibition of LOC154877 (Accession XP_098626.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC154877.

[38829] LOC155066 (Accession XP_088142.4) is another GAM1338 target gene, herein designated TARGET GENE. LOC155066 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC155066, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC155066 BINDING SITE, designated SEQ ID:13906, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38830] Another function of GAM1338 is therefore inhibition of LOC155066 (Accession XP_088142.4) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC155066.

[38831] LOC158014 (Accession XP_088442.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC158014 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC158014, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC158014 BINDING SITE, designated SEQ ID:12285, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38832] Another function of GAM1338 is therefore inhibition of LOC158014 (Accession XP_088442.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC158014.

[38833] LOC158228 (Accession XP_098903.4) is another GAM1338 target gene, herein designated TARGET GENE. LOC158228 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC158228, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC158228 BINDING SITE, designated SEQ ID:8757, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38834] Another function of GAM1338 is therefore inhibition of LOC158228 (Accession XP_098903.4) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC158228.

[38835] LOC158310 (Accession XP_098919.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC158310 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC158310, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC158310 BINDING SITE, designated SEQ ID:18175, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38836] Another function of GAM1338 is therefore inhibition of LOC158310 (Accession XP_098919.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC158310.

[38837] LOC158402 (Accession XP_098936.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC158402 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC158402, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC158402 BINDING SITE, designated SEQ ID:1414, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38838] Another function of GAM1338 is therefore inhibition of LOC158402 (Accession XP_098936.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC158402.

[38839] LOC158436 (Accession XP_098942.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC158436 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC158436, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC158436 BINDING SITE, designated SEQ ID:7071, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38840] Another function of GAM1338 is therefore inhibition of LOC158436 (Accession XP_098942.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC158436.

[38841] LOC158476 (Accession XP_098955.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC158476 BINDING SITE1 and LOC158476 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC158476, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC158476 BINDING SITE1 and LOC158476 BINDING SITE2, designated SEQ ID:1355 and SEQ ID:436 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated

GAM RNA, also designated SEQ ID:360.

[38842] Another function of GAM1338 is therefore inhibition of LOC158476 (Accession XP_098955.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC158476.

[38843] LOC158668 (Accession XP_045161.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC158668 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC158668, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC158668 BINDING SITE, designated SEQ ID:19124, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38844] Another function of GAM1338 is therefore inhibition of LOC158668 (Accession XP_045161.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC158668.

[38845] LOC160897 (Accession XP_090573.3) is another

GAM1338 target gene, herein designated TARGET GENE. LOC160897 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC160897, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC160897 BINDING SITE, designated SEQ ID:14437, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38846] Another function of GAM1338 is therefore inhibition of LOC160897 (Accession XP_090573.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC160897.

[38847] LOC162427 (Accession NP_835227.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC162427 BINDING SITE1 and LOC162427 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by LOC162427, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC162427 BINDING SITE1 and LOC162427 BINDING SITE2, designated SEQ ID:1761 and SEQ ID:12386 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38848] Another function of GAM1338 is therefore inhibition of LOC162427 (Accession NP_835227.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC162427.

[38849] LOC162427 (Accession XP_091549.3) is another GAM1338 target gene, herein designated TARGET GENE. LOC162427 BINDING SITE1 and LOC162427 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by LOC162427, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC162427 BINDING SITE1 and LOC162427 BINDING SITE2, designated SEQ ID:1761 and SEQ ID:12386 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38850] Another function of GAM1338 is therefore inhibition of LOC162427 (Accession XP_091549.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC162427.

[38851] LOC162962 (Accession XP_091886.7) is another GAM1338 target gene, herein designated TARGET GENE. LOC162962 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC162962, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC162962 BINDING SITE, designated SEQ ID:4276, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38852] Another function of GAM1338 is therefore inhibition of LOC162962 (Accession XP_091886.7) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC162962.

[38853] LOC162967 (Accession XP_091890.6) is another GAM1338 target gene, herein designated TARGET GENE.

LOC162967 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC162967, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC162967 BINDING SITE, designated SEQ ID:3050, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38854] Another function of GAM1338 is therefore inhibition of LOC162967 (Accession XP_091890.6) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC162967.

[38855] LOC163227 (Accession NP_775802.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC163227 BINDING SITE1 and LOC163227 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC163227, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC163227 BINDING SITE1 and LOC163227 BINDING SITE2, desig-

nated SEQ ID:1413 and SEQ ID:9582 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38856] Another function of GAM1338 is therefore inhibition of LOC163227 (Accession NP_775802.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC163227.

[38857] LOC163233 (Accession XP_290865.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC163233 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC163233, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC163233 BINDING SITE, designated SEQ ID:12968, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38858] Another function of GAM1338 is therefore inhibition of LOC163233 (Accession XP_290865.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC163233.

[38859] LOC167454 (Accession XP_094496.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC167454 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC167454, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC167454 BINDING SITE, designated SEQ ID:10263, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38860] Another function of GAM1338 is therefore inhibition of LOC167454 (Accession XP_094496.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC167454.

[38861] LOC168451 (Accession XP_095114.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC168451 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC168451, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC168451 BINDING SITE, designated SEQ ID:7426, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38862] Another function of GAM1338 is therefore inhibition of LOC168451 (Accession XP_095114.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC168451.

[38863] LOC196264 (Accession XP_113683.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC196264 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC196264, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC196264 BINDING SITE, designated SEQ ID:8574, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38864] Another function of GAM1338 is therefore inhibition of LOC196264 (Accession XP_113683.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC196264.

[38865] LOC196337 (Accession XP_113696.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC196337 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC196337, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC196337 BINDING SITE, designated SEQ ID:6623, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38866] Another function of GAM1338 is therefore inhibition of LOC196337 (Accession XP_113696.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC196337.

[38867] LOC196540 (Accession XP_116933.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC196540 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC196540, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC196540 BINDING SITE, designated SEQ ID:12661, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38868] Another function of GAM1338 is therefore inhibition of LOC196540 (Accession XP_116933.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC196540.

[38869] LOC197358 (Accession XP_113872.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC197358 BINDING SITE1 and LOC197358 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC197358, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC197358 BINDING SITE1 and LOC197358 BINDING SITE2, designated SEQ ID:3887 and SEQ ID:5402 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated

GAM RNA, also designated SEQ ID:360.

[38870] Another function of GAM1338 is therefore inhibition of LOC197358 (Accession XP_113872.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC197358.

[38871] LOC199899 (Accession XP_117153.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC199899 BINDING SITE1 and LOC199899 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC199899, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC199899 BINDING SITE1 and LOC199899 BINDING SITE2, designated SEQ ID:17148 and SEQ ID:5955 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38872] Another function of GAM1338 is therefore inhibition of LOC199899 (Accession XP_117153.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC199899.

[38873] LOC199906 (Accession XP_114052.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC199906 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC199906, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC199906 BINDING SITE, designated SEQ ID:11637, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38874] Another function of GAM1338 is therefore inhibition of LOC199906 (Accession XP_114052.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC199906.

[38875] LOC200169 (Accession XP_117200.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC200169 BINDING SITE1 and LOC200169 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by LOC200169, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC200169 BINDING SITE1 and LOC200169 BINDING SITE2, designated SEQ ID:6517 and SEQ ID:5066 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38876] Another function of GAM1338 is therefore inhibition of LOC200169 (Accession XP_117200.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC200169.

[38877] LOC200860 (Accession XP_117289.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC200860 BINDING SITE1 and LOC200860 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC200860, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC200860 BINDING SITE1 and LOC200860 BINDING SITE2, designated SEQ ID:15491 and SEQ ID:18182 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38878] Another function of GAM1338 is therefore inhibition of LOC200860 (Accession XP_117289.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC200860.

[38879] LOC200895 (Accession NP_789785.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC200895 BINDING SITE1 and LOC200895 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC200895, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC200895 BINDING SITE1 and LOC200895 BINDING SITE2, designated SEQ ID:3376 and SEQ ID:17681 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38880] Another function of GAM1338 is therefore inhibition of LOC200895 (Accession NP_789785.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC200895.

[38881] LOC200916 (Accession XP_114317.3) is another

GAM1338 target gene, herein designated TARGET GENE. LOC200916 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC200916, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC200916 BINDING SITE, designated SEQ ID:873, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38882] Another function of GAM1338 is therefore inhibition of LOC200916 (Accession XP_114317.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC200916.

[38883] LOC201164 (Accession XP_290750.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC201164 BINDING SITE1 and LOC201164 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by LOC201164, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC201164 BINDING SITE1 and LOC201164 BINDING SITE2, designated SEQ ID:13530 and SEQ ID:18118 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38884] Another function of GAM1338 is therefore inhibition of LOC201164 (Accession XP_290750.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC201164.

[38885] LOC201292 (Accession NP_775818.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC201292 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC201292, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC201292 BINDING SITE, designated SEQ ID:19674, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38886] Another function of GAM1338 is therefore inhibition of LOC201292 (Accession NP_775818.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC201292.

[38887] LOC201562 (Accession XP_114343.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC201562 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC201562, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC201562 BINDING SITE, designated SEQ ID:9102, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38888] Another function of GAM1338 is therefore inhibition of LOC201562 (Accession XP_114343.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC201562.

[38889] LOC201725 (Accession XP_114370.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC201725 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC201725, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC201725 BINDING SITE, designated SEQ ID:18941, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38890] Another function of GAM1338 is therefore inhibition of LOC201725 (Accession XP_114370.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC201725.

[38891] LOC202400 (Accession XP_117397.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC202400 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC202400, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC202400 BINDING SITE, designated SEQ ID:436, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38892] Another function of GAM1338 is therefore inhibition of LOC202400 (Accession XP_117397.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC202400.

[38893] LOC202404 (Accession XP_114481.4) is another GAM1338 target gene, herein designated TARGET GENE. LOC202404 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC202404, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC202404 BINDING SITE, designated SEQ ID:15206, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38894] Another function of GAM1338 is therefore inhibition of LOC202404 (Accession XP_114481.4) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC202404.

[38895] LOC202460 (Accession XP_114493.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC202460 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC202460, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC202460 BINDING SITE, designated SEQ ID:1278, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38896] Another function of GAM1338 is therefore inhibition of LOC202460 (Accession XP_114493.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC202460.

[38897] LOC202934 (Accession XP_117486.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC202934 BINDING SITE1 and LOC202934 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC202934, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC202934 BINDING SITE1 and LOC202934 BINDING SITE2, desig-

nated SEQ ID:9097 and SEQ ID:6782 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38898] Another function of GAM1338 is therefore inhibition of LOC202934 (Accession XP_117486.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC202934.

[38899] LOC203076 (Accession XP_114621.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC203076 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC203076, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC203076 BINDING SITE, designated SEQ ID:8849, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38900] Another function of GAM1338 is therefore inhibition of LOC203076 (Accession XP_114621.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC203076.

[38901] LOC203547 (Accession XP_114719.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC203547 BINDING SITE1 and LOC203547 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC203547, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC203547 BINDING SITE1 and LOC203547 BINDING SITE2, designated SEQ ID:10631 and SEQ ID:2923 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38902] Another function of GAM1338 is therefore inhibition of LOC203547 (Accession XP_114719.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC203547.

[38903] LOC219293 (Accession XP_166599.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC219293 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC219293, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC219293 BINDING SITE, designated SEQ ID:12080, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38904] Another function of GAM1338 is therefore inhibition of LOC219293 (Accession XP_166599.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC219293.

[38905] LOC219731 (Accession XP_167596.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC219731 BINDING SITE1 and LOC219731 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC219731, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC219731 BINDING SITE1 and LOC219731 BINDING SITE2, designated SEQ ID:10264 and SEQ ID:3320 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38906] Another function of GAM1338 is therefore inhibition of LOC219731 (Accession XP_167596.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC219731.

[38907] LOC219735 (Accession XP_167601.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC219735 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC219735, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC219735 BINDING SITE, designated SEQ ID:3675, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38908] Another function of GAM1338 is therefore inhibition of LOC219735 (Accession XP_167601.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC219735.

[38909] LOC219894 (Accession XP_167782.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC219894 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC219894, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC219894 BINDING SITE, designated SEQ ID:7138, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38910] Another function of GAM1338 is therefore inhibition of LOC219894 (Accession XP_167782.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC219894.

[38911] LOC220074 (Accession NP_660352.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC220074 BINDING SITE1 through LOC220074 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC220074, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC220074 BINDING SITE1 through LOC220074 BINDING SITE3, des-

ignated SEQ ID:1413, SEQ ID:4396 and SEQ ID:2086 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38912] Another function of GAM1338 is therefore inhibition of LOC220074 (Accession NP_660352.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC220074.

[38913] LOC221362 (Accession XP_168093.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC221362 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC221362, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC221362 BINDING SITE, designated SEQ ID:15454, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38914] Another function of GAM1338 is therefore inhibition of LOC221362 (Accession XP_168093.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC221362.

[38915] LOC221663 (Accession XP_168131.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC221663 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC221663, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC221663 BINDING SITE, designated SEQ ID:10616, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38916] Another function of GAM1338 is therefore inhibition of LOC221663 (Accession XP_168131.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC221663.

[38917] LOC221946 (Accession XP_168340.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC221946 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC221946, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC221946 BINDING SITE, designated SEQ ID:3294, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38918] Another function of GAM1338 is therefore inhibition of LOC221946 (Accession XP_168340.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC221946.

[38919] LOC221964 (Accession XP_168342.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC221964 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC221964, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC221964 BINDING SITE, designated SEQ ID:5581, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38920] Another function of GAM1338 is therefore inhibition of LOC221964 (Accession XP_168342.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC221964.

[38921] LOC222057 (Accession XP_166594.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC222057 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC222057, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC222057 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38922] Another function of GAM1338 is therefore inhibition of LOC222057 (Accession XP_166594.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC222057.

[38923] LOC222159 (Accession XP_212100.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC222159 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of

mRNA encoded by LOC222159, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC222159 BINDING SITE, designated SEQ ID:563, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38924] Another function of GAM1338 is therefore inhibition of LOC222159 (Accession XP_212100.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC222159.

[38925] LOC253612 (Accession XP_172985.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC253612 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC253612, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC253612 BINDING SITE, designated SEQ ID:19268, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38926] Another function of GAM1338 is therefore inhibition of LOC253612 (Accession XP_172985.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC253612.

[38927] LOC253805 (Accession XP_172854.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC253805 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC253805, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC253805 BINDING SITE, designated SEQ ID:7275, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38928] Another function of GAM1338 is therefore inhibition of LOC253805 (Accession XP_172854.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC253805.

[38929] LOC254875 (Accession XP_171170.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC254875 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC254875, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC254875 BINDING SITE, designated SEQ ID:14560, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38930] Another function of GAM1338 is therefore inhibition of LOC254875 (Accession XP_171170.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC254875.

[38931] LOC255031 (Accession XP_173187.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC255031 BINDING SITE1 and LOC255031 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC255031, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC255031 BINDING SITE1 and LOC255031 BINDING SITE2, desig-

nated SEQ ID:11416 and SEQ ID:19099 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38932] Another function of GAM1338 is therefore inhibition of LOC255031 (Accession XP_173187.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC255031.

[38933] LOC255177 (Accession XP_172941.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC255177 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC255177, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC255177 BINDING SITE, designated SEQ ID:2303, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38934] Another function of GAM1338 is therefore inhibition of LOC255177 (Accession XP_172941.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC255177.

[38935] LOC255458 (Accession XP_173150.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC255458 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC255458, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC255458 BINDING SITE, designated SEQ ID:9251, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38936] Another function of GAM1338 is therefore inhibition of LOC255458 (Accession XP_173150.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC255458.

[38937] LOC255488 (Accession XP_172581.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC255488 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC255488, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC255488 BINDING SITE, designated SEQ ID:18594, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38938] Another function of GAM1338 is therefore inhibition of LOC255488 (Accession XP_172581.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC255488.

[38939] LOC255975 (Accession XP_171083.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC255975 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC255975, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC255975 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38940] Another function of GAM1338 is therefore inhibition of LOC255975 (Accession XP_171083.2) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC255975.

[38941] LOC256401 (Accession XP_171149.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC256401 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC256401, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC256401 BINDING SITE, designated SEQ ID:9741, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38942] Another function of GAM1338 is therefore inhibition of LOC256401 (Accession XP_171149.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC256401.

[38943] LOC256614 (Accession XP_172864.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC256614 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC256614, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC256614 BINDING SITE, designated SEQ ID:3106, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38944] Another function of GAM1338 is therefore inhibition of LOC256614 (Accession XP_172864.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC256614.

[38945] LOC282972 (Accession XP_210837.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC282972 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC282972, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC282972 BINDING SITE, designated SEQ ID:1691, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38946] Another function of GAM1338 is therefore inhibition of LOC282972 (Accession XP_210837.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC282972.

[38947] LOC282987 (Accession XP_210845.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC282987 BINDING SITE1 and LOC282987 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC282987, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC282987 BINDING SITE1 and LOC282987 BINDING SITE2, designated SEQ ID:12386 and SEQ ID:10460 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38948] Another function of GAM1338 is therefore inhibition of LOC282987 (Accession XP_210845.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC282987.

[38949] LOC282997 (Accession XP_208473.1) is another

GAM1338 target gene, herein designated TARGET GENE. LOC282997 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC282997, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC282997 BINDING SITE, designated SEQ ID:5482, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38950] Another function of GAM1338 is therefore inhibition of LOC282997 (Accession XP_208473.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC282997.

[38951] LOC283061 (Accession XP_210875.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283061 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283061, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283061 BINDING SITE, desig-

nated SEQ ID:18916, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38952] Another function of GAM1338 is therefore inhibition of LOC283061 (Accession XP_210875.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283061.

[38953] LOC283087 (Accession XP_208509.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283087 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283087, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283087 BINDING SITE, designated SEQ ID:6936, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38954] Another function of GAM1338 is therefore inhibition of LOC283087 (Accession XP_208509.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC283087.

[38955] LOC283089 (Accession XP_210885.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283089 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283089, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283089 BINDING SITE, designated SEQ ID:6866, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38956] Another function of GAM1338 is therefore inhibition of LOC283089 (Accession XP_210885.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283089.

[38957] LOC283119 (Accession XP_210895.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283119 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283119, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283119 BINDING SITE, designated SEQ ID:1505, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38958] Another function of GAM1338 is therefore inhibition of LOC283119 (Accession XP_210895.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283119.

[38959] LOC283130 (Accession XP_208525.3) is another GAM1338 target gene, herein designated TARGET GENE. LOC283130 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283130, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283130 BINDING SITE, designated SEQ ID:469, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38960] Another function of GAM1338 is therefore inhibition of LOC283130 (Accession XP_208525.3) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283130.

[38961] LOC283140 (Accession XP_210911.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283140 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283140, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283140 BINDING SITE, designated SEQ ID:15581, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38962] Another function of GAM1338 is therefore inhibition of LOC283140 (Accession XP_210911.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283140.

[38963] LOC283143 (Accession XP_210920.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283143 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC283143, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283143 BINDING SITE, designated SEQ ID:14843, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38964] Another function of GAM1338 is therefore inhibition of LOC283143 (Accession XP_210920.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283143.

[38965] LOC283152 (Accession XP_210917.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC283152 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283152, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283152 BINDING SITE, designated SEQ ID:17431, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38966] Another function of GAM1338 is therefore inhibition of LOC283152 (Accession XP_210917.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283152.

[38967] LOC283170 (Accession XP_208535.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283170 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283170, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283170 BINDING SITE, designated SEQ ID:19643, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38968] Another function of GAM1338 is therefore inhibition of LOC283170 (Accession XP_208535.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283170.

[38969] LOC283177 (Accession XP_210903.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC283177 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283177, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283177 BINDING SITE, designated SEQ ID:13142, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38970] Another function of GAM1338 is therefore inhibition of LOC283177 (Accession XP_210903.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283177.

[38971] LOC283215 (Accession XP_208555.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC283215 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283215, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283215 BINDING SITE, designated SEQ ID:15736, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38972] Another function of GAM1338 is therefore inhibition of LOC283215 (Accession XP_208555.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283215.

[38973] LOC283241 (Accession NP_787089.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283241 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283241, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283241 BINDING SITE, designated SEQ ID:10625, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38974] Another function of GAM1338 is therefore inhibition of LOC283241 (Accession NP_787089.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283241.

[38975] LOC283278 (Accession XP_210961.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283278 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283278, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283278 BINDING SITE, designated SEQ ID:13142, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38976] Another function of GAM1338 is therefore inhibition of LOC283278 (Accession XP_210961.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283278.

[38977] LOC283293 (Accession XP_210962.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283293 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283293, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC283293 BINDING SITE, designated SEQ ID:438, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38978] Another function of GAM1338 is therefore inhibition of LOC283293 (Accession XP_210962.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283293.

[38979] LOC283323 (Accession XP_210973.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283323 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283323, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283323 BINDING SITE, designated SEQ ID:2314, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38980] Another function of GAM1338 is therefore inhibition of LOC283323 (Accession XP_210973.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC283323.

[38981] LOC283335 (Accession XP_210981.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283335 BINDING SITE1 and LOC283335 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC283335, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283335 BINDING SITE1 and LOC283335 BINDING SITE2, designated SEQ ID:9238 and SEQ ID:10626 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38982] Another function of GAM1338 is therefore inhibition of LOC283335 (Accession XP_210981.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283335.

[38983] LOC283377 (Accession XP_208647.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283377 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC283377, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283377 BINDING SITE, designated SEQ ID:8862, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38984] Another function of GAM1338 is therefore inhibition of LOC283377 (Accession XP_208647.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283377.

[38985] LOC283387 (Accession XP_211007.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283387 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283387, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283387 BINDING SITE, designated SEQ ID:7011, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38986] Another function of GAM1338 is therefore inhibition of LOC283387 (Accession XP_211007.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283387.

[38987] LOC283394 (Accession XP_211021.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283394 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283394, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283394 BINDING SITE, designated SEQ ID:11655, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38988] Another function of GAM1338 is therefore inhibition of LOC283394 (Accession XP_211021.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283394.

[38989] LOC283395 (Accession XP_211020.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC283395 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283395, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283395 BINDING SITE, designated SEQ ID:13838, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38990] Another function of GAM1338 is therefore inhibition of LOC283395 (Accession XP_211020.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283395.

[38991] LOC283432 (Accession XP_211032.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283432 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283432, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283432 BINDING SITE, designated SEQ ID:6836, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38992] Another function of GAM1338 is therefore inhibition of LOC283432 (Accession XP_211032.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283432.

[38993] LOC283434 (Accession XP_211034.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283434 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283434, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283434 BINDING SITE, designated SEQ ID:16416, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38994] Another function of GAM1338 is therefore inhibition of LOC283434 (Accession XP_211034.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283434.

[38995] LOC283441 (Accession XP_211043.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283441 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283441, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283441 BINDING SITE, designated SEQ ID:5582, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38996] Another function of GAM1338 is therefore inhibition of LOC283441 (Accession XP_211043.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283441.

[38997] LOC283442 (Accession XP_211037.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283442 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283442, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC283442 BINDING SITE, designated SEQ ID:4817, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[38998] Another function of GAM1338 is therefore inhibition of LOC283442 (Accession XP_211037.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283442.

[38999] LOC283445 (Accession XP_211044.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283445 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283445, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283445 BINDING SITE, designated SEQ ID:9159, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39000] Another function of GAM1338 is therefore inhibition of LOC283445 (Accession XP_211044.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC283445.

[39001] LOC283452 (Accession XP_208679.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283452 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283452, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283452 BINDING SITE, designated SEQ ID:3497, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39002] Another function of GAM1338 is therefore inhibition of LOC283452 (Accession XP_208679.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283452.

[39003] LOC283454 (Accession XP_211049.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283454 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283454, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283454 BINDING SITE, designated SEQ ID:12385, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39004] Another function of GAM1338 is therefore inhibition of LOC283454 (Accession XP_211049.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283454.

[39005] LOC283467 (Accession XP_211050.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283467 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283467, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283467 BINDING SITE, designated SEQ ID:3857, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39006] Another function of GAM1338 is therefore inhibition of

LOC283467 (Accession XP_211050.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283467.

[39007] LOC283475 (Accession XP_211056.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283475 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283475, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283475 BINDING SITE, designated SEQ ID:12806, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39008] Another function of GAM1338 is therefore inhibition of LOC283475 (Accession XP_211056.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283475.

[39009] LOC283507 (Accession XP_211075.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283507 BINDING SITE is a target binding site found in

the 3` untranslated region of mRNA encoded by LOC283507, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283507 BINDING SITE, designated SEQ ID:18182, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39010] Another function of GAM1338 is therefore inhibition of LOC283507 (Accession XP_211075.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283507.

[39011] LOC283514 (Accession XP_210264.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC283514 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283514, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283514 BINDING SITE, designated SEQ ID:6317, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:360.

[39012] Another function of GAM1338 is therefore inhibition of LOC283514 (Accession XP_210264.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283514.

[39013] LOC283534 (Accession XP_211083.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283534 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283534, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283534 BINDING SITE, designated SEQ ID:13197, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39014] Another function of GAM1338 is therefore inhibition of LOC283534 (Accession XP_211083.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283534.

[39015] LOC283551 (Accession XP_211110.1) is another

GAM1338 target gene, herein designated TARGET GENE. LOC283551 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283551, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283551 BINDING SITE, designated SEQ ID:10790, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39016] Another function of GAM1338 is therefore inhibition of LOC283551 (Accession XP_211110.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283551.

[39017] LOC283575 (Accession XP_211095.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283575 BINDING SITE1 and LOC283575 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC283575, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283575

BINDING SITE1 and LOC283575 BINDING SITE2, designated SEQ ID:8540 and SEQ ID:13153 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39018] Another function of GAM1338 is therefore inhibition of LOC283575 (Accession XP_211095.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283575.

[39019] LOC283588 (Accession NP_787093.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283588 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283588, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283588 BINDING SITE, designated SEQ ID:14938, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39020] Another function of GAM1338 is therefore inhibition of LOC283588 (Accession NP_787093.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC283588.

[39021] LOC283624 (Accession XP_211126.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283624 BINDING SITE1 and LOC283624 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC283624, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283624 BINDING SITE1 and LOC283624 BINDING SITE2, designated SEQ ID:13972 and SEQ ID:1137 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39022] Another function of GAM1338 is therefore inhibition of LOC283624 (Accession XP_211126.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283624.

[39023] LOC283637 (Accession XP_211134.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283637 BINDING SITE1 and LOC283637 BINDING SITE2 are target binding sites found in untranslated re-

gions of mRNA encoded by LOC283637, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283637 BINDING SITE1 and LOC283637 BINDING SITE2, designated SEQ ID:3786 and SEQ ID:12382 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39024] Another function of GAM1338 is therefore inhibition of LOC283637 (Accession XP_211134.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283637.

[39025] LOC283641 (Accession XP_208764.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283641 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283641, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283641 BINDING SITE, designated SEQ ID:435, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:360.

[39026] Another function of GAM1338 is therefore inhibition of LOC283641 (Accession XP_208764.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283641.

[39027] LOC283672 (Accession XP_211152.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283672 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283672, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283672 BINDING SITE, designated SEQ ID:11655, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39028] Another function of GAM1338 is therefore inhibition of LOC283672 (Accession XP_211152.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283672.

[39029] LOC283693 (Accession XP_208788.1) is another

GAM1338 target gene, herein designated TARGET GENE. LOC283693 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283693, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283693 BINDING SITE, designated SEQ ID:16069, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39030] Another function of GAM1338 is therefore inhibition of LOC283693 (Accession XP_208788.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283693.

[39031] LOC283701 (Accession XP_211170.3) is another GAM1338 target gene, herein designated TARGET GENE. LOC283701 BINDING SITE1 and LOC283701 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC283701, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283701

BINDING SITE1 and LOC283701 BINDING SITE2, designated SEQ ID:777 and SEQ ID:6491 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39032] Another function of GAM1338 is therefore inhibition of LOC283701 (Accession XP_211170.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283701.

[39033] LOC283741 (Accession XP_208115.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283741 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283741, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283741 BINDING SITE, designated SEQ ID:3109, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39034] Another function of GAM1338 is therefore inhibition of LOC283741 (Accession XP_208115.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC283741.

[39035] LOC283767 (Accession XP_208835.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283767 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283767, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283767 BINDING SITE, designated SEQ ID:3888, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39036] Another function of GAM1338 is therefore inhibition of LOC283767 (Accession XP_208835.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283767.

[39037] LOC283778 (Accession XP_211199.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283778 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283778, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283778 BINDING SITE, designated SEQ ID:15679, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39038] Another function of GAM1338 is therefore inhibition of LOC283778 (Accession XP_211199.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283778.

[39039] LOC283801 (Accession XP_208122.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283801 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283801, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283801 BINDING SITE, designated SEQ ID:11237, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39040] Another function of GAM1338 is therefore inhibition of

LOC283801 (Accession XP_208122.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283801.

[39041] LOC283802 (Accession XP_208850.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283802 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283802, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283802 BINDING SITE, designated SEQ ID:16635, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39042] Another function of GAM1338 is therefore inhibition of LOC283802 (Accession XP_208850.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283802.

[39043] LOC283818 (Accession XP_211218.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283818 BINDING SITE is a target binding site found in

the 3` untranslated region of mRNA encoded by LOC283818, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283818 BINDING SITE, designated SEQ ID:3834, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39044] Another function of GAM1338 is therefore inhibition of LOC283818 (Accession XP_211218.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283818.

[39045] LOC283849 (Accession XP_208870.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283849 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by LOC283849, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283849 BINDING SITE, designated SEQ ID:2515, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA,

also designated SEQ ID:360.

[39046] Another function of GAM1338 is therefore inhibition of LOC283849 (Accession XP_208870.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283849.

[39047] LOC283849 (Accession NP_848611.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283849 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by LOC283849, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283849 BINDING SITE, designated SEQ ID:2515, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39048] Another function of GAM1338 is therefore inhibition of LOC283849 (Accession NP_848611.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283849.

[39049] LOC283851 (Accession XP_211229.1) is another

GAM1338 target gene, herein designated TARGET GENE. LOC283851 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283851, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283851 BINDING SITE, designated SEQ ID:12708, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39050] Another function of GAM1338 is therefore inhibition of LOC283851 (Accession XP_211229.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283851.

[39051] LOC283856 (Accession XP_211233.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283856 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283856, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283856 BINDING SITE, desig-

nated SEQ ID:11601, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39052] Another function of GAM1338 is therefore inhibition of LOC283856 (Accession XP_211233.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283856.

[39053] LOC283861 (Accession NP_787095.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283861 BINDING SITE1 and LOC283861 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC283861, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283861 BINDING SITE1 and LOC283861 BINDING SITE2, designated SEQ ID:8996 and SEQ ID:10879 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39054] Another function of GAM1338 is therefore inhibition of LOC283861 (Accession NP_787095.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC283861.

[39055] LOC283863 (Accession XP_208875.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283863 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283863, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283863 BINDING SITE, designated SEQ ID:14614, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39056] Another function of GAM1338 is therefore inhibition of LOC283863 (Accession XP_208875.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283863.

[39057] LOC283887 (Accession XP_211248.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC283887 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283887, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283887 BINDING SITE, designated SEQ ID:9775, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39058] Another function of GAM1338 is therefore inhibition of LOC283887 (Accession XP_211248.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283887.

[39059] LOC283888 (Accession XP_211249.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283888 BINDING SITE1 and LOC283888 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC283888, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283888 BINDING SITE1 and LOC283888 BINDING SITE2, designated SEQ ID:2692 and SEQ ID:5011 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39060] Another function of GAM1338 is therefore inhibition of LOC283888 (Accession XP_211249.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283888.

[39061] LOC283889 (Accession XP_208899.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC283889 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283889, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283889 BINDING SITE, designated SEQ ID:13686, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39062] Another function of GAM1338 is therefore inhibition of LOC283889 (Accession XP_208899.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283889.

[39063] LOC283928 (Accession XP_208909.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC283928 BINDING SITE1 and LOC283928 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC283928, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283928 BINDING SITE1 and LOC283928 BINDING SITE2, designated SEQ ID:13293 and SEQ ID:3604 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39064] Another function of GAM1338 is therefore inhibition of LOC283928 (Accession XP_208909.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283928.

[39065] LOC283929 (Accession XP_208905.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC283929 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283929, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283929 BINDING SITE, desig-

nated SEQ ID:10232, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39066] Another function of GAM1338 is therefore inhibition of LOC283929 (Accession XP_208905.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283929.

[39067] LOC283964 (Accession XP_208145.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC283964 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283964, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283964 BINDING SITE, designated SEQ ID:1384, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39068] Another function of GAM1338 is therefore inhibition of LOC283964 (Accession XP_208145.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC283964.

[39069] LOC284016 (Accession XP_211298.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284016 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284016, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284016 BINDING SITE, designated SEQ ID:795, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39070] Another function of GAM1338 is therefore inhibition of LOC284016 (Accession XP_211298.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284016.

[39071] LOC284017 (Accession XP_208961.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284017 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284017, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284017 BINDING SITE, designated SEQ ID:3858, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39072] Another function of GAM1338 is therefore inhibition of LOC284017 (Accession XP_208961.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284017.

[39073] LOC284019 (Accession XP_211302.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284019 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284019, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284019 BINDING SITE, designated SEQ ID:19482, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39074] Another function of GAM1338 is therefore inhibition of LOC284019 (Accession XP_211302.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284019.

[39075] LOC284023 (Accession XP_208983.3) is another GAM1338 target gene, herein designated TARGET GENE. LOC284023 BINDING SITE1 and LOC284023 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284023, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284023 BINDING SITE1 and LOC284023 BINDING SITE2, designated SEQ ID:5520 and SEQ ID:429 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39076] Another function of GAM1338 is therefore inhibition of LOC284023 (Accession XP_208983.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284023.

[39077] LOC284048 (Accession XP_208152.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284048 BINDING SITE is a target binding site found in

the 3` untranslated region of mRNA encoded by LOC284048, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284048 BINDING SITE, designated SEQ ID:17222, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39078] Another function of GAM1338 is therefore inhibition of LOC284048 (Accession XP_208152.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284048.

[39079] LOC284063 (Accession XP_208992.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284063 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284063, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284063 BINDING SITE, designated SEQ ID:17713, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:360.

[39080] Another function of GAM1338 is therefore inhibition of LOC284063 (Accession XP_208992.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284063.

[39081] LOC284074 (Accession XP_211321.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284074 BINDING SITE1 and LOC284074 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284074, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284074 BINDING SITE1 and LOC284074 BINDING SITE2, designated SEQ ID:18547 and SEQ ID:5751 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39082] Another function of GAM1338 is therefore inhibition of LOC284074 (Accession XP_211321.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284074.

[39083] LOC284082 (Accession XP_211323.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284082 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284082, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284082 BINDING SITE, designated SEQ ID:18527, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39084] Another function of GAM1338 is therefore inhibition of LOC284082 (Accession XP_211323.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284082.

[39085] LOC284095 (Accession XP_211324.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284095 BINDING SITE1 through LOC284095 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC284095, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the com-

plementarity of the nucleotide sequences of LOC284095 BINDING SITE1 through LOC284095 BINDING SITE3, designated SEQ ID:18259, SEQ ID:19595 and SEQ ID:16884 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39086] Another function of GAM1338 is therefore inhibition of LOC284095 (Accession XP_211324.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284095.

[39087] LOC284098 (Accession XP_209008.3) is another GAM1338 target gene, herein designated TARGET GENE. LOC284098 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284098, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284098 BINDING SITE, designated SEQ ID:18178, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39088] Another function of GAM1338 is therefore inhibition of

LOC284098 (Accession XP_209008.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284098.

[39089] LOC284100 (Accession XP_209015.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284100 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284100, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284100 BINDING SITE, designated SEQ ID:11656, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39090] Another function of GAM1338 is therefore inhibition of LOC284100 (Accession XP_209015.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284100.

[39091] LOC284101 (Accession XP_209019.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284101 BINDING SITE is a target binding site found in

the 5` untranslated region of mRNA encoded by LOC284101, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284101 BINDING SITE, designated SEQ ID:4581, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39092] Another function of GAM1338 is therefore inhibition of LOC284101 (Accession XP_209019.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284101.

[39093] LOC284102 (Accession XP_211327.3) is another GAM1338 target gene, herein designated TARGET GENE. LOC284102 BINDING SITE1 through LOC284102 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC284102, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284102 BINDING SITE1 through LOC284102 BINDING SITE3, designated SEQ ID:8270, SEQ ID:17111 and SEQ ID:6349 re-

spectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39094] Another function of GAM1338 is therefore inhibition of LOC284102 (Accession XP_211327.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284102.

[39095] LOC284117 (Accession XP_209024.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284117 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284117, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284117 BINDING SITE, designated SEQ ID:11347, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39096] Another function of GAM1338 is therefore inhibition of LOC284117 (Accession XP_209024.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284117.

[39097] LOC284128 (Accession XP_211342.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284128 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284128, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284128 BINDING SITE, designated SEQ ID:17271, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39098] Another function of GAM1338 is therefore inhibition of LOC284128 (Accession XP_211342.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284128.

[39099] LOC284135 (Accession XP_209032.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284135 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284135, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC284135 BINDING SITE, designated SEQ ID:5319, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39100] Another function of GAM1338 is therefore inhibition of LOC284135 (Accession XP_209032.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284135.

[39101] LOC284183 (Accession XP_209059.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284183 BINDING SITE1 and LOC284183 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284183, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284183 BINDING SITE1 and LOC284183 BINDING SITE2, designated SEQ ID:8524 and SEQ ID:11460 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39102] Another function of GAM1338 is therefore inhibition of LOC284183 (Accession XP_209059.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284183.

[39103] LOC284186 (Accession XP_209060.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC284186 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284186, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284186 BINDING SITE, designated SEQ ID:18182, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39104] Another function of GAM1338 is therefore inhibition of LOC284186 (Accession XP_209060.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284186.

[39105] LOC284286 (Accession XP_211419.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284286 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC284286, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284286 BINDING SITE, designated SEQ ID:5521, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39106] Another function of GAM1338 is therefore inhibition of LOC284286 (Accession XP_211419.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284286.

[39107] LOC284289 (Accession XP_209105.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284289 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284289, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284289 BINDING SITE, designated SEQ ID:7635, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39108] Another function of GAM1338 is therefore inhibition of LOC284289 (Accession XP_209105.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284289.

[39109] LOC284304 (Accession XP_211426.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284304 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284304, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284304 BINDING SITE, designated SEQ ID:16163, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39110] Another function of GAM1338 is therefore inhibition of LOC284304 (Accession XP_211426.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284304.

[39111] LOC284317 (Accession XP_209162.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC284317 BINDING SITE1 and LOC284317 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284317, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284317 BINDING SITE1 and LOC284317 BINDING SITE2, designated SEQ ID:5320 and SEQ ID:11486 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39112] Another function of GAM1338 is therefore inhibition of LOC284317 (Accession XP_209162.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284317.

[39113] LOC284325 (Accession XP_209143.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284325 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284325, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284325 BINDING SITE, desig-

nated SEQ ID:11657, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39114] Another function of GAM1338 is therefore inhibition of LOC284325 (Accession XP_209143.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284325.

[39115] LOC284362 (Accession XP_211435.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284362 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284362, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284362 BINDING SITE, designated SEQ ID:10666, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39116] Another function of GAM1338 is therefore inhibition of LOC284362 (Accession XP_211435.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC284362.

[39117] LOC284373 (Accession XP_211439.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284373 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284373, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284373 BINDING SITE, designated SEQ ID:3968, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39118] Another function of GAM1338 is therefore inhibition of LOC284373 (Accession XP_211439.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284373.

[39119] LOC284375 (Accession XP_209154.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284375 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284375, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284375 BINDING SITE, designated SEQ ID:13618, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39120] Another function of GAM1338 is therefore inhibition of LOC284375 (Accession XP_209154.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284375.

[39121] LOC284376 (Accession XP_209157.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284376 BINDING SITE1 and LOC284376 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284376, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284376 BINDING SITE1 and LOC284376 BINDING SITE2, designated SEQ ID:3410 and SEQ ID:9328 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39122] Another function of GAM1338 is therefore inhibition of

LOC284376 (Accession XP_209157.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284376.

[39123] LOC284379 (Accession XP_209163.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284379 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284379, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284379 BINDING SITE, designated SEQ ID:2198, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39124] Another function of GAM1338 is therefore inhibition of LOC284379 (Accession XP_209163.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284379.

[39125] LOC284396 (Accession XP_211452.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284396 BINDING SITE is a target binding site found in

the 3` untranslated region of mRNA encoded by LOC284396, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284396 BINDING SITE, designated SEQ ID:2360, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39126] Another function of GAM1338 is therefore inhibition of LOC284396 (Accession XP_211452.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284396.

[39127] LOC284408 (Accession XP_211443.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284408 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284408, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284408 BINDING SITE, designated SEQ ID:10732, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:360.

[39128] Another function of GAM1338 is therefore inhibition of LOC284408 (Accession XP_211443.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284408.

[39129] LOC284410 (Accession XP_211449.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284410 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284410, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284410 BINDING SITE, designated SEQ ID:7072, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39130] Another function of GAM1338 is therefore inhibition of LOC284410 (Accession XP_211449.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284410.

[39131] LOC284421 (Accession XP_209200.1) is another

GAM1338 target gene, herein designated TARGET GENE. LOC284421 BINDING SITE1 through LOC284421 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC284421, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284421 BINDING SITE1 through LOC284421 BINDING SITE3, designated SEQ ID:15524, SEQ ID:3295 and SEQ ID:2985 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39132] Another function of GAM1338 is therefore inhibition of LOC284421 (Accession XP_209200.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284421.

[39133] LOC284421 (Accession XP_209200.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284421 BINDING SITE1 through LOC284421 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC284421, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the com-

plementarity of the nucleotide sequences of LOC284421 BINDING SITE1 through LOC284421 BINDING SITE3, designated SEQ ID:3295, SEQ ID:932 and SEQ ID:19419 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39134] Another function of GAM1338 is therefore inhibition of LOC284421 (Accession XP_209200.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284421.

[39135] LOC284436 (Accession XP_290862.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284436 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284436, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284436 BINDING SITE, designated SEQ ID:6140, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39136] Another function of GAM1338 is therefore inhibition of LOC284436 (Accession XP_290862.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284436.

[39137] LOC284440 (Accession XP_209210.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284440 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284440, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284440 BINDING SITE, designated SEQ ID:12050, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39138] Another function of GAM1338 is therefore inhibition of LOC284440 (Accession XP_209210.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284440.

[39139] LOC284454 (Accession XP_209216.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284454 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by

LOC284454, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284454 BINDING SITE, designated SEQ ID:18896, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39140] Another function of GAM1338 is therefore inhibition of LOC284454 (Accession XP_209216.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284454.

[39141] LOC284456 (Accession XP_211470.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284456 BINDING SITE1 and LOC284456 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284456, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284456 BINDING SITE1 and LOC284456 BINDING SITE2, designated SEQ ID:10594 and SEQ ID:6643 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated

GAM RNA, also designated SEQ ID:360.

[39142] Another function of GAM1338 is therefore inhibition of LOC284456 (Accession XP_211470.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284456.

[39143] LOC284471 (Accession XP_209225.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284471 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284471, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284471 BINDING SITE, designated SEQ ID:4926, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39144] Another function of GAM1338 is therefore inhibition of LOC284471 (Accession XP_209225.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284471.

[39145] LOC284475 (Accession XP_211478.1) is another

GAM1338 target gene, herein designated TARGET GENE. LOC284475 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284475, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284475 BINDING SITE, designated SEQ ID:17171, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39146] Another function of GAM1338 is therefore inhibition of LOC284475 (Accession XP_211478.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284475.

[39147] LOC284512 (Accession XP_211500.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284512 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284512, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284512 BINDING SITE, desig-

nated SEQ ID:16234, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39148] Another function of GAM1338 is therefore inhibition of LOC284512 (Accession XP_211500.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284512.

[39149] LOC284513 (Accession XP_211502.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284513 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284513, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284513 BINDING SITE, designated SEQ ID:19066, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39150] Another function of GAM1338 is therefore inhibition of LOC284513 (Accession XP_211502.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC284513.

[39151] LOC284531 (Accession XP_211513.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284531 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284531, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284531 BINDING SITE, designated SEQ ID:2846, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39152] Another function of GAM1338 is therefore inhibition of LOC284531 (Accession XP_211513.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284531.

[39153] LOC284551 (Accession XP_211515.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284551 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284551, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284551 BINDING SITE, designated SEQ ID:17959, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39154] Another function of GAM1338 is therefore inhibition of LOC284551 (Accession XP_211515.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284551.

[39155] LOC284577 (Accession XP_211522.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284577 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284577, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284577 BINDING SITE, designated SEQ ID:11682, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39156] Another function of GAM1338 is therefore inhibition of LOC284577 (Accession XP_211522.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284577.

[39157] LOC284587 (Accession XP_209278.3) is another GAM1338 target gene, herein designated TARGET GENE. LOC284587 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284587, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284587 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39158] Another function of GAM1338 is therefore inhibition of LOC284587 (Accession XP_209278.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284587.

[39159] LOC284611 (Accession XP_211552.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284611 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC284611, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284611 BINDING SITE, designated SEQ ID:11652, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39160] Another function of GAM1338 is therefore inhibition of LOC284611 (Accession XP_211552.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284611.

[39161] LOC284628 (Accession XP_211561.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284628 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284628, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284628 BINDING SITE, designated SEQ ID:20050, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39162] Another function of GAM1338 is therefore inhibition of LOC284628 (Accession XP_211561.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284628.

[39163] LOC284668 (Accession XP_211583.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284668 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284668, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284668 BINDING SITE, designated SEQ ID:19894, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39164] Another function of GAM1338 is therefore inhibition of LOC284668 (Accession XP_211583.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284668.

[39165] LOC284675 (Accession XP_209319.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC284675 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284675, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284675 BINDING SITE, designated SEQ ID:8487, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39166] Another function of GAM1338 is therefore inhibition of LOC284675 (Accession XP_209319.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284675.

[39167] LOC284701 (Accession XP_294994.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284701 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284701, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284701 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39168] Another function of GAM1338 is therefore inhibition of LOC284701 (Accession XP_294994.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284701.

[39169] LOC284708 (Accession XP_209332.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284708 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284708, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284708 BINDING SITE, designated SEQ ID:12721, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39170] Another function of GAM1338 is therefore inhibition of LOC284708 (Accession XP_209332.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284708.

[39171] LOC284723 (Accession XP_211602.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284723 BINDING SITE1 and LOC284723 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284723, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284723 BINDING SITE1 and LOC284723 BINDING SITE2, designated SEQ ID:6492 and SEQ ID:17106 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39172] Another function of GAM1338 is therefore inhibition of LOC284723 (Accession XP_211602.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284723.

[39173] LOC284805 (Accession XP_209371.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284805 BINDING SITE1 through LOC284805 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC284805, corresponding to target binding sites such as BINDING SITE I, BINDING SITE

II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284805 BINDING SITE1 through LOC284805 BINDING SITE3, designated SEQ ID:18781, SEQ ID:11447 and SEQ ID:17164 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39174] Another function of GAM1338 is therefore inhibition of LOC284805 (Accession XP_209371.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284805.

[39175] LOC284839 (Accession XP_211661.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284839 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284839, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284839 BINDING SITE, designated SEQ ID:4527, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39176] Another function of GAM1338 is therefore inhibition of LOC284839 (Accession XP_211661.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284839.

[39177] LOC284865 (Accession XP_211672.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284865 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284865, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284865 BINDING SITE, designated SEQ ID:1299, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39178] Another function of GAM1338 is therefore inhibition of LOC284865 (Accession XP_211672.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284865.

[39179] LOC284874 (Accession XP_209394.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC284874 BINDING SITE1 and LOC284874 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284874, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284874 BINDING SITE1 and LOC284874 BINDING SITE2, designated SEQ ID:14015 and SEQ ID:2751 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39180] Another function of GAM1338 is therefore inhibition of LOC284874 (Accession XP_209394.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284874.

[39181] LOC284934 (Accession XP_211696.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284934 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284934, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284934 BINDING SITE, desig-

nated SEQ ID:17477, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39182] Another function of GAM1338 is therefore inhibition of LOC284934 (Accession XP_211696.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284934.

[39183] LOC284947 (Accession XP_211705.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284947 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284947, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284947 BINDING SITE, designated SEQ ID:5006, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39184] Another function of GAM1338 is therefore inhibition of LOC284947 (Accession XP_211705.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC284947.

[39185] LOC284950 (Accession XP_211703.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284950 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284950, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284950 BINDING SITE, designated SEQ ID:6753, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39186] Another function of GAM1338 is therefore inhibition of LOC284950 (Accession XP_211703.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284950.

[39187] LOC284960 (Accession XP_211715.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC284960 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284960, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284960 BINDING SITE, designated SEQ ID:8699, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39188] Another function of GAM1338 is therefore inhibition of LOC284960 (Accession XP_211715.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284960.

[39189] LOC285026 (Accession XP_209440.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285026 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285026, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285026 BINDING SITE, designated SEQ ID:14276, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39190] Another function of GAM1338 is therefore inhibition of LOC285026 (Accession XP_209440.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285026.

[39191] LOC285032 (Accession XP_211740.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285032 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285032, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285032 BINDING SITE, designated SEQ ID:5725, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39192] Another function of GAM1338 is therefore inhibition of LOC285032 (Accession XP_211740.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285032.

[39193] LOC285083 (Accession XP_209464.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285083 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC285083, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285083 BINDING SITE, designated SEQ ID:18085, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39194] Another function of GAM1338 is therefore inhibition of LOC285083 (Accession XP_209464.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285083.

[39195] LOC285088 (Accession XP_209465.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285088 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285088, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285088 BINDING SITE, designated SEQ ID:20100, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39196] Another function of GAM1338 is therefore inhibition of LOC285088 (Accession XP_209465.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285088.

[39197] LOC285123 (Accession XP_211773.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285123 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285123, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285123 BINDING SITE, designated SEQ ID:4218, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39198] Another function of GAM1338 is therefore inhibition of LOC285123 (Accession XP_211773.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285123.

[39199] LOC285127 (Accession XP_211771.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC285127 BINDING SITE1 and LOC285127 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC285127, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285127 BINDING SITE1 and LOC285127 BINDING SITE2, designated SEQ ID:19204 and SEQ ID:3106 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39200] Another function of GAM1338 is therefore inhibition of LOC285127 (Accession XP_211771.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285127.

[39201] LOC285166 (Accession XP_211791.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285166 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285166, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285166 BINDING SITE, desig-

nated SEQ ID:19378, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39202] Another function of GAM1338 is therefore inhibition of LOC285166 (Accession XP_211791.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285166.

[39203] LOC285176 (Accession XP_209500.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285176 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285176, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285176 BINDING SITE, designated SEQ ID:12167, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39204] Another function of GAM1338 is therefore inhibition of LOC285176 (Accession XP_209500.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC285176.

[39205] LOC285193 (Accession XP_209509.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285193 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285193, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285193 BINDING SITE, designated SEQ ID:13870, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39206] Another function of GAM1338 is therefore inhibition of LOC285193 (Accession XP_209509.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285193.

[39207] LOC285221 (Accession XP_209521.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285221 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285221, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285221 BINDING SITE, designated SEQ ID:15365, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39208] Another function of GAM1338 is therefore inhibition of LOC285221 (Accession XP_209521.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285221.

[39209] LOC285231 (Accession XP_211813.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285231 BINDING SITE1 and LOC285231 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC285231, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285231 BINDING SITE1 and LOC285231 BINDING SITE2, designated SEQ ID:11238 and SEQ ID:13069 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39210] Another function of GAM1338 is therefore inhibition of

LOC285231 (Accession XP_211813.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285231.

[39211] LOC285281 (Accession XP_211829.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285281 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285281, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285281 BINDING SITE, designated SEQ ID:7766, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39212] Another function of GAM1338 is therefore inhibition of LOC285281 (Accession XP_211829.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285281.

[39213] LOC285299 (Accession XP_209554.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285299 BINDING SITE is a target binding site found in

the 3` untranslated region of mRNA encoded by LOC285299, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285299 BINDING SITE, designated SEQ ID:15961, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39214] Another function of GAM1338 is therefore inhibition of LOC285299 (Accession XP_209554.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285299.

[39215] LOC285334 (Accession XP_211844.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285334 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285334, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285334 BINDING SITE, designated SEQ ID:17006, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:360.

[39216] Another function of GAM1338 is therefore inhibition of LOC285334 (Accession XP_211844.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285334.

[39217] LOC285345 (Accession XP_211854.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285345 BINDING SITE1 and LOC285345 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC285345, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285345 BINDING SITE1 and LOC285345 BINDING SITE2, designated SEQ ID:11821 and SEQ ID:13276 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39218] Another function of GAM1338 is therefore inhibition of LOC285345 (Accession XP_211854.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285345.

[39219] LOC285366 (Accession XP_209581.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285366 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285366, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285366 BINDING SITE, designated SEQ ID:4019, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39220] Another function of GAM1338 is therefore inhibition of LOC285366 (Accession XP_209581.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285366.

[39221] LOC285369 (Accession XP_211861.3) is another GAM1338 target gene, herein designated TARGET GENE. LOC285369 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285369, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC285369 BINDING SITE, designated SEQ ID:19816, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39222] Another function of GAM1338 is therefore inhibition of LOC285369 (Accession XP_211861.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285369.

[39223] LOC285389 (Accession XP_211873.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285389 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285389, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285389 BINDING SITE, designated SEQ ID:7025, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39224] Another function of GAM1338 is therefore inhibition of LOC285389 (Accession XP_211873.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC285389.

[39225] LOC285392 (Accession XP_211879.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285392 BINDING SITE1 and LOC285392 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC285392, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285392 BINDING SITE1 and LOC285392 BINDING SITE2, designated SEQ ID:6034 and SEQ ID:436 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39226] Another function of GAM1338 is therefore inhibition of LOC285392 (Accession XP_211879.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285392.

[39227] LOC285398 (Accession XP_209593.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285398 BINDING SITE1 and LOC285398 BINDING SITE2 are target binding sites found in untranslated re-

gions of mRNA encoded by LOC285398, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285398 BINDING SITE1 and LOC285398 BINDING SITE2, designated SEQ ID:4020 and SEQ ID:3701 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39228] Another function of GAM1338 is therefore inhibition of LOC285398 (Accession XP_209593.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285398.

[39229] LOC285429 (Accession XP_209607.3) is another GAM1338 target gene, herein designated TARGET GENE. LOC285429 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285429, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285429 BINDING SITE, designated SEQ ID:4870, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:360.

[39230] Another function of GAM1338 is therefore inhibition of LOC285429 (Accession XP_209607.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285429.

[39231] LOC285488 (Accession XP_211914.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285488 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285488, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285488 BINDING SITE, designated SEQ ID:11093, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39232] Another function of GAM1338 is therefore inhibition of LOC285488 (Accession XP_211914.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285488.

[39233] LOC285491 (Accession XP_211917.1) is another

GAM1338 target gene, herein designated TARGET GENE. LOC285491 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285491, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285491 BINDING SITE, designated SEQ ID:8951, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39234] Another function of GAM1338 is therefore inhibition of LOC285491 (Accession XP_211917.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285491.

[39235] LOC285509 (Accession XP_211923.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285509 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285509, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285509 BINDING SITE, desig-

nated SEQ ID:11997, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39236] Another function of GAM1338 is therefore inhibition of LOC285509 (Accession XP_211923.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285509.

[39237] LOC285540 (Accession XP_209654.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285540 BINDING SITE1 and LOC285540 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC285540, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285540 BINDING SITE1 and LOC285540 BINDING SITE2, designated SEQ ID:5384 and SEQ ID:19426 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39238] Another function of GAM1338 is therefore inhibition of LOC285540 (Accession XP_209654.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC285540.

[39239] LOC285560 (Accession XP_209660.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285560 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285560, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285560 BINDING SITE, designated SEQ ID:7821, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39240] Another function of GAM1338 is therefore inhibition of LOC285560 (Accession XP_209660.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285560.

[39241] LOC285589 (Accession XP_209671.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285589 BINDING SITE1 and LOC285589 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC285589, corresponding to

target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285589 BINDING SITE1 and LOC285589 BINDING SITE2, designated SEQ ID:3782 and SEQ ID:14069 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39242] Another function of GAM1338 is therefore inhibition of LOC285589 (Accession XP_209671.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285589.

[39243] LOC285626 (Accession XP_211959.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285626 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285626, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285626 BINDING SITE, designated SEQ ID:16288, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39244] Another function of GAM1338 is therefore inhibition of LOC285626 (Accession XP_211959.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285626.

[39245] LOC285638 (Accession XP_209693.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285638 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285638, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285638 BINDING SITE, designated SEQ ID:13619, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39246] Another function of GAM1338 is therefore inhibition of LOC285638 (Accession XP_209693.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285638.

[39247] LOC285678 (Accession XP_209717.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC285678 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285678, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285678 BINDING SITE, designated SEQ ID:16507, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39248] Another function of GAM1338 is therefore inhibition of LOC285678 (Accession XP_209717.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285678.

[39249] LOC285679 (Accession XP_209719.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC285679 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285679, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285679 BINDING SITE, designated SEQ ID:15031, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39250] Another function of GAM1338 is therefore inhibition of LOC285679 (Accession XP_209719.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285679.

[39251] LOC285683 (Accession XP_211980.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285683 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285683, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285683 BINDING SITE, designated SEQ ID:5151, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39252] Another function of GAM1338 is therefore inhibition of LOC285683 (Accession XP_211980.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285683.

[39253] LOC285687 (Accession XP_211985.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285687 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285687, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285687 BINDING SITE, designated SEQ ID:10580, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39254] Another function of GAM1338 is therefore inhibition of LOC285687 (Accession XP_211985.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285687.

[39255] LOC285689 (Accession XP_209724.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285689 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285689, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC285689 BINDING SITE, designated SEQ ID:4452, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39256] Another function of GAM1338 is therefore inhibition of LOC285689 (Accession XP_209724.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285689.

[39257] LOC285693 (Accession XP_211981.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285693 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285693, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285693 BINDING SITE, designated SEQ ID:7946, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39258] Another function of GAM1338 is therefore inhibition of LOC285693 (Accession XP_211981.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC285693.

[39259] LOC285713 (Accession XP_211992.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285713 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285713, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285713 BINDING SITE, designated SEQ ID:6411, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39260] Another function of GAM1338 is therefore inhibition of LOC285713 (Accession XP_211992.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285713.

[39261] LOC285722 (Accession XP_211997.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285722 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285722, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285722 BINDING SITE, designated SEQ ID:19494, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39262] Another function of GAM1338 is therefore inhibition of LOC285722 (Accession XP_211997.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285722.

[39263] LOC285744 (Accession XP_209743.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285744 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285744, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285744 BINDING SITE, designated SEQ ID:11603, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39264] Another function of GAM1338 is therefore inhibition of

LOC285744 (Accession XP_209743.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285744.

[39265] LOC285747 (Accession XP_209742.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285747 BINDING SITE1 and LOC285747 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC285747, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285747 BINDING SITE1 and LOC285747 BINDING SITE2, designated SEQ ID:13800 and SEQ ID:9553 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39266] Another function of GAM1338 is therefore inhibition of LOC285747 (Accession XP_209742.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285747.

[39267] LOC285760 (Accession XP_209750.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC285760 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285760, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285760 BINDING SITE, designated SEQ ID:13064, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39268] Another function of GAM1338 is therefore inhibition of LOC285760 (Accession XP_209750.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285760.

[39269] LOC285813 (Accession XP_212036.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285813 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285813, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285813 BINDING SITE, designated SEQ ID:17617, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39270] Another function of GAM1338 is therefore inhibition of LOC285813 (Accession XP_212036.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285813.

[39271] LOC285822 (Accession XP_209777.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285822 BINDING SITE1 and LOC285822 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC285822, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285822 BINDING SITE1 and LOC285822 BINDING SITE2, designated SEQ ID:6178 and SEQ ID:6011 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39272] Another function of GAM1338 is therefore inhibition of LOC285822 (Accession XP_209777.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC285822.

[39273] LOC285843 (Accession XP_212034.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285843 BINDING SITE1 and LOC285843 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC285843, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285843 BINDING SITE1 and LOC285843 BINDING SITE2, designated SEQ ID:1414 and SEQ ID:11782 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39274] Another function of GAM1338 is therefore inhibition of LOC285843 (Accession XP_212034.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285843.

[39275] LOC285847 (Accession XP_212045.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285847 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285847, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285847 BINDING SITE, designated SEQ ID:7212, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39276] Another function of GAM1338 is therefore inhibition of LOC285847 (Accession XP_212045.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285847.

[39277] LOC285872 (Accession XP_212061.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285872 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285872, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285872 BINDING SITE, designated SEQ ID:7986, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39278] Another function of GAM1338 is therefore inhibition of

LOC285872 (Accession XP_212061.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285872.

[39279] LOC285896 (Accession XP_209806.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285896 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285896, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285896 BINDING SITE, designated SEQ ID:4795, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39280] Another function of GAM1338 is therefore inhibition of LOC285896 (Accession XP_209806.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285896.

[39281] LOC285899 (Accession XP_209807.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285899 BINDING SITE is a target binding site found in

the 3` untranslated region of mRNA encoded by LOC285899, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285899 BINDING SITE, designated SEQ ID:10004, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39282] Another function of GAM1338 is therefore inhibition of LOC285899 (Accession XP_209807.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285899.

[39283] LOC285914 (Accession XP_209810.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285914 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285914, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285914 BINDING SITE, designated SEQ ID:14560, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:360.

[39284] Another function of GAM1338 is therefore inhibition of LOC285914 (Accession XP_209810.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285914.

[39285] LOC285922 (Accession XP_209822.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285922 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285922, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285922 BINDING SITE, designated SEQ ID:4795, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39286] Another function of GAM1338 is therefore inhibition of LOC285922 (Accession XP_209822.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285922.

[39287] LOC285923 (Accession XP_212104.1) is another

GAM1338 target gene, herein designated TARGET GENE. LOC285923 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285923, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285923 BINDING SITE, designated SEQ ID:16934, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39288] Another function of GAM1338 is therefore inhibition of LOC285923 (Accession XP_212104.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285923.

[39289] LOC285945 (Accession XP_212092.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285945 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285945, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285945 BINDING SITE, desig-

nated SEQ ID:12385, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39290] Another function of GAM1338 is therefore inhibition of LOC285945 (Accession XP_212092.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285945.

[39291] LOC285950 (Accession XP_212089.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285950 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285950, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285950 BINDING SITE, designated SEQ ID:11638, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39292] Another function of GAM1338 is therefore inhibition of LOC285950 (Accession XP_212089.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC285950.

[39293] LOC285952 (Accession XP_209821.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285952 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285952, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285952 BINDING SITE, designated SEQ ID:2758, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39294] Another function of GAM1338 is therefore inhibition of LOC285952 (Accession XP_209821.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285952.

[39295] LOC285961 (Accession XP_209833.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285961 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285961, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285961 BINDING SITE, designated SEQ ID:11621, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39296] Another function of GAM1338 is therefore inhibition of LOC285961 (Accession XP_209833.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285961.

[39297] LOC285972 (Accession XP_212105.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285972 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285972, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285972 BINDING SITE, designated SEQ ID:8156, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39298] Another function of GAM1338 is therefore inhibition of LOC285972 (Accession XP_212105.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285972.

[39299] LOC285979 (Accession XP_212117.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285979 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285979, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285979 BINDING SITE, designated SEQ ID:13228, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39300] Another function of GAM1338 is therefore inhibition of LOC285979 (Accession XP_212117.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285979.

[39301] LOC285989 (Accession XP_212111.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285989 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC285989, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285989 BINDING SITE, designated SEQ ID:19067, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39302] Another function of GAM1338 is therefore inhibition of LOC285989 (Accession XP_212111.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285989.

[39303] LOC285999 (Accession XP_212120.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC285999 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285999, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285999 BINDING SITE, designated SEQ ID:18120, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39304] Another function of GAM1338 is therefore inhibition of LOC285999 (Accession XP_212120.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285999.

[39305] LOC286030 (Accession XP_209868.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286030 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC286030, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286030 BINDING SITE, designated SEQ ID:10050, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39306] Another function of GAM1338 is therefore inhibition of LOC286030 (Accession XP_209868.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286030.

[39307] LOC286032 (Accession XP_209867.2) is another GAM1338 target gene, herein designated TARGET GENE.

LOC286032 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286032, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286032 BINDING SITE, designated SEQ ID:1208, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39308] Another function of GAM1338 is therefore inhibition of LOC286032 (Accession XP_209867.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286032.

[39309] LOC286039 (Accession XP_209873.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286039 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC286039, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286039 BINDING SITE, designated SEQ ID:17647, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39310] Another function of GAM1338 is therefore inhibition of LOC286039 (Accession XP_209873.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286039.

[39311] LOC286052 (Accession XP_212152.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286052 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286052, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286052 BINDING SITE, designated SEQ ID:14748, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39312] Another function of GAM1338 is therefore inhibition of LOC286052 (Accession XP_212152.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286052.

[39313] LOC286075 (Accession NP_776192.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286075 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC286075, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286075 BINDING SITE, designated SEQ ID:1410, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39314] Another function of GAM1338 is therefore inhibition of LOC286075 (Accession NP_776192.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286075.

[39315] LOC286077 (Accession XP_209892.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286077 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286077, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC286077 BINDING SITE, designated SEQ ID:3388, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39316] Another function of GAM1338 is therefore inhibition of LOC286077 (Accession XP_209892.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286077.

[39317] LOC286078 (Accession XP_212163.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286078 BINDING SITE1 through LOC286078 BINDING SITE4 are target binding sites found in untranslated regions of mRNA encoded by LOC286078, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286078 BINDING SITE1 through LOC286078 BINDING SITE4, designated SEQ ID:13798, SEQ ID:12045, SEQ ID:8139 and SEQ ID:9300 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39318] Another function of GAM1338 is therefore inhibition of

LOC286078 (Accession XP_212163.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286078.

[39319] LOC286103 (Accession NP_848630.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286103 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by LOC286103, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286103 BINDING SITE, designated SEQ ID:15670, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39320] Another function of GAM1338 is therefore inhibition of LOC286103 (Accession NP_848630.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286103.

[39321] LOC286103 (Accession XP_209897.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286103 BINDING SITE is a target binding site found in

the 3` untranslated region of multiple transcripts of mRNA encoded by LOC286103, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286103 BINDING SITE, designated SEQ ID:15670, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39322] Another function of GAM1338 is therefore inhibition of LOC286103 (Accession XP_209897.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286103.

[39323] LOC286121 (Accession XP_212184.3) is another GAM1338 target gene, herein designated TARGET GENE. LOC286121 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286121, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286121 BINDING SITE, designated SEQ ID:663, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:360.

[39324] Another function of GAM1338 is therefore inhibition of LOC286121 (Accession XP_212184.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286121.

[39325] LOC286126 (Accession XP_212185.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286126 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286126, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286126 BINDING SITE, designated SEQ ID:8950, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39326] Another function of GAM1338 is therefore inhibition of LOC286126 (Accession XP_212185.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286126.

[39327] LOC286132 (Accession XP_212194.1) is another

GAM1338 target gene, herein designated TARGET GENE. LOC286132 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC286132, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286132 BINDING SITE, designated SEQ ID:2266, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39328] Another function of GAM1338 is therefore inhibition of LOC286132 (Accession XP_212194.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286132.

[39329] LOC286166 (Accession XP_209925.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286166 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC286166, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286166 BINDING SITE, desig-

nated SEQ ID:1529, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39330] Another function of GAM1338 is therefore inhibition of LOC286166 (Accession XP_209925.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286166.

[39331] LOC286170 (Accession XP_212211.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286170 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC286170, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286170 BINDING SITE, designated SEQ ID:14196, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39332] Another function of GAM1338 is therefore inhibition of LOC286170 (Accession XP_212211.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC286170.

[39333] LOC286186 (Accession XP_212219.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286186 BINDING SITE1 and LOC286186 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC286186, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286186 BINDING SITE1 and LOC286186 BINDING SITE2, designated SEQ ID:15317 and SEQ ID:13117 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39334] Another function of GAM1338 is therefore inhibition of LOC286186 (Accession XP_212219.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286186.

[39335] LOC286206 (Accession XP_209953.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286206 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286206, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286206 BINDING SITE, designated SEQ ID:19418, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39336] Another function of GAM1338 is therefore inhibition of LOC286206 (Accession XP_209953.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286206.

[39337] LOC286207 (Accession XP_209941.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286207 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286207, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286207 BINDING SITE, designated SEQ ID:16987, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39338] Another function of GAM1338 is therefore inhibition of

LOC286207 (Accession XP_209941.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286207.

[39339] LOC286208 (Accession XP_212230.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286208 BINDING SITE1 through LOC286208 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC286208, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286208 BINDING SITE1 through LOC286208 BINDING SITE3, designated SEQ ID:16222, SEQ ID:12039 and SEQ ID:14347 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39340] Another function of GAM1338 is therefore inhibition of LOC286208 (Accession XP_212230.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286208.

[39341] LOC286223 (Accession XP_209956.1) is another

GAM1338 target gene, herein designated TARGET GENE. LOC286223 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286223, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286223 BINDING SITE, designated SEQ ID:13388, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39342] Another function of GAM1338 is therefore inhibition of LOC286223 (Accession XP_209956.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286223.

[39343] LOC286245 (Accession XP_212244.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286245 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC286245, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286245 BINDING SITE, desig-

nated SEQ ID:18995, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39344] Another function of GAM1338 is therefore inhibition of LOC286245 (Accession XP_212244.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286245.

[39345] LOC286341 (Accession XP_212278.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286341 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286341, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286341 BINDING SITE, designated SEQ ID:14403, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39346] Another function of GAM1338 is therefore inhibition of LOC286341 (Accession XP_212278.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC286341.

[39347] LOC286354 (Accession XP_212286.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286354 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC286354, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286354 BINDING SITE, designated SEQ ID:20172, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39348] Another function of GAM1338 is therefore inhibition of LOC286354 (Accession XP_212286.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286354.

[39349] LOC286356 (Accession XP_212290.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286356 BINDING SITE1 and LOC286356 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC286356, corresponding to target binding sites such as BINDING SITE I, BINDING SITE

II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286356 BINDING SITE1 and LOC286356 BINDING SITE2, designated SEQ ID:13800 and SEQ ID:3910 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39350] Another function of GAM1338 is therefore inhibition of LOC286356 (Accession XP_212290.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286356.

[39351] LOC286357 (Accession XP_212285.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286357 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC286357, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286357 BINDING SITE, designated SEQ ID:13894, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39352] Another function of GAM1338 is therefore inhibition of

LOC286357 (Accession XP_212285.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286357.

[39353] LOC286395 (Accession XP_212308.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286395 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC286395, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286395 BINDING SITE, designated SEQ ID:18548, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39354] Another function of GAM1338 is therefore inhibition of LOC286395 (Accession XP_212308.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286395.

[39355] LOC286404 (Accession XP_210036.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286404 BINDING SITE is a target binding site found in

the 3` untranslated region of multiple transcripts of mRNA encoded by LOC286404, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286404 BINDING SITE, designated SEQ ID:16900, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39356] Another function of GAM1338 is therefore inhibition of LOC286404 (Accession XP_210036.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286404.

[39357] LOC286441 (Accession XP_212319.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286441 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286441, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286441 BINDING SITE, designated SEQ ID:643, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:360.

[39358] Another function of GAM1338 is therefore inhibition of LOC286441 (Accession XP_212319.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286441.

[39359] LOC286467 (Accession XP_210063.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286467 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286467, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286467 BINDING SITE, designated SEQ ID:12807, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39360] Another function of GAM1338 is therefore inhibition of LOC286467 (Accession XP_210063.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286467.

[39361] LOC286553 (Accession XP_212340.1) is another

GAM1338 target gene, herein designated TARGET GENE. LOC286553 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286553, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286553 BINDING SITE, designated SEQ ID:17107, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39362] Another function of GAM1338 is therefore inhibition of LOC286553 (Accession XP_212340.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286553.

[39363] LOC286558 (Accession XP_210106.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286558 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286558, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286558 BINDING SITE, desig-

nated SEQ ID:14505, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39364] Another function of GAM1338 is therefore inhibition of LOC286558 (Accession XP_210106.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286558.

[39365] LOC286564 (Accession XP_210108.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC286564 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286564, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286564 BINDING SITE, designated SEQ ID:14505, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39366] Another function of GAM1338 is therefore inhibition of LOC286564 (Accession XP_210108.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC286564.

[39367] LOC338562 (Accession XP_294654.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC338562 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC338562, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC338562 BINDING SITE, designated SEQ ID:17586, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39368] Another function of GAM1338 is therefore inhibition of LOC338562 (Accession XP_294654.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC338562.

[39369] LOC338565 (Accession XP_294653.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC338565 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC338565, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC338565 BINDING SITE, designated SEQ ID:12519, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39370] Another function of GAM1338 is therefore inhibition of LOC338565 (Accession XP_294653.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC338565.

[39371] LOC338645 (Accession XP_290494.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC338645 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC338645, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC338645 BINDING SITE, designated SEQ ID:6141, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39372] Another function of GAM1338 is therefore inhibition of LOC338645 (Accession XP_290494.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC338645.

[39373] LOC338709 (Accession XP_211595.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC338709 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC338709, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC338709 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39374] Another function of GAM1338 is therefore inhibition of LOC338709 (Accession XP_211595.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC338709.

[39375] LOC338739 (Accession XP_294690.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC338739 BINDING SITE1 and LOC338739 BINDING SITE2 are target binding sites found in untranslated re-

gions of mRNA encoded by LOC338739, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC338739 BINDING SITE1 and LOC338739 BINDING SITE2, designated SEQ ID:17520 and SEQ ID:11661 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39376] Another function of GAM1338 is therefore inhibition of LOC338739 (Accession XP_294690.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC338739.

[39377] LOC338773 (Accession XP_290570.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC338773 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC338773, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC338773 BINDING SITE, designated SEQ ID:17388, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:360.

[39378] Another function of GAM1338 is therefore inhibition of LOC338773 (Accession XP_290570.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC338773.

[39379] LOC338817 (Accession XP_290588.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC338817 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC338817, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC338817 BINDING SITE, designated SEQ ID:11448, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39380] Another function of GAM1338 is therefore inhibition of LOC338817 (Accession XP_290588.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC338817.

[39381] LOC338923 (Accession XP_294742.1) is another

GAM1338 target gene, herein designated TARGET GENE. LOC338923 BINDING SITE1 and LOC338923 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC338923, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC338923 BINDING SITE1 and LOC338923 BINDING SITE2, designated SEQ ID:14847 and SEQ ID:3243 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39382] Another function of GAM1338 is therefore inhibition of LOC338923 (Accession XP_294742.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC338923.

[39383] LOC338991 (Accession XP_290663.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC338991 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC338991, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC338991 BINDING SITE, designated SEQ ID:3888, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39384] Another function of GAM1338 is therefore inhibition of LOC338991 (Accession XP_290663.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC338991.

[39385] LOC338999 (Accession XP_290659.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC338999 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC338999, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC338999 BINDING SITE, designated SEQ ID:3888, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39386] Another function of GAM1338 is therefore inhibition of LOC338999 (Accession XP_290659.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC338999.

[39387] LOC339044 (Accession XP_294781.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339044 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339044, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339044 BINDING SITE, designated SEQ ID:11283, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39388] Another function of GAM1338 is therefore inhibition of LOC339044 (Accession XP_294781.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339044.

[39389] LOC339078 (Accession XP_290692.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339078 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339078, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339078 BINDING SITE, designated SEQ ID:19426, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39390] Another function of GAM1338 is therefore inhibition of LOC339078 (Accession XP_290692.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339078.

[39391] LOC339146 (Accession XP_294825.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339146 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339146, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339146 BINDING SITE, designated SEQ ID:822, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39392] Another function of GAM1338 is therefore inhibition of

LOC339146 (Accession XP_294825.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339146.

[39393] LOC339192 (Accession XP_294848.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339192 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339192, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339192 BINDING SITE, designated SEQ ID:4453, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39394] Another function of GAM1338 is therefore inhibition of LOC339192 (Accession XP_294848.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339192.

[39395] LOC339201 (Accession XP_290756.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339201 BINDING SITE is a target binding site found in

the 3` untranslated region of mRNA encoded by LOC339201, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339201 BINDING SITE, designated SEQ ID:11830, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39396] Another function of GAM1338 is therefore inhibition of LOC339201 (Accession XP_290756.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339201.

[39397] LOC339216 (Accession XP_290762.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC339216 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339216, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339216 BINDING SITE, designated SEQ ID:4581, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:360.

[39398] Another function of GAM1338 is therefore inhibition of LOC339216 (Accession XP_290762.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339216.

[39399] LOC339282 (Accession XP_294900.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC339282 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339282, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339282 BINDING SITE, designated SEQ ID:4581, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39400] Another function of GAM1338 is therefore inhibition of LOC339282 (Accession XP_294900.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339282.

[39401] LOC339283 (Accession XP_294899.2) is another

GAM1338 target gene, herein designated TARGET GENE. LOC339283 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339283, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339283 BINDING SITE, designated SEQ ID:15442, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39402] Another function of GAM1338 is therefore inhibition of LOC339283 (Accession XP_294899.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339283.

[39403] LOC339324 (Accession XP_290838.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339324 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339324, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339324 BINDING SITE, desig-

nated SEQ ID:11623, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39404] Another function of GAM1338 is therefore inhibition of LOC339324 (Accession XP_290838.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339324.

[39405] LOC339325 (Accession XP_290830.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339325 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339325, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339325 BINDING SITE, designated SEQ ID:7946, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39406] Another function of GAM1338 is therefore inhibition of LOC339325 (Accession XP_290830.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC339325.

[39407] LOC339400 (Accession XP_294926.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339400 BINDING SITE1 and LOC339400 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC339400, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339400 BINDING SITE1 and LOC339400 BINDING SITE2, designated SEQ ID:14822 and SEQ ID:17314 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39408] Another function of GAM1338 is therefore inhibition of LOC339400 (Accession XP_294926.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339400.

[39409] LOC339417 (Accession XP_294944.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339417 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339417, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339417 BINDING SITE, designated SEQ ID:4497, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39410] Another function of GAM1338 is therefore inhibition of LOC339417 (Accession XP_294944.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339417.

[39411] LOC339458 (Accession XP_290911.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339458 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339458, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339458 BINDING SITE, designated SEQ ID:436, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39412] Another function of GAM1338 is therefore inhibition of

LOC339458 (Accession XP_290911.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339458.

[39413] LOC339459 (Accession XP_290907.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC339459 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339459, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339459 BINDING SITE, designated SEQ ID:13345, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39414] Another function of GAM1338 is therefore inhibition of LOC339459 (Accession XP_290907.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339459.

[39415] LOC339492 (Accession XP_290919.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339492 BINDING SITE1 and LOC339492 BINDING

SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC339492, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339492 BINDING SITE1 and LOC339492 BINDING SITE2, designated SEQ ID:13601 and SEQ ID:19744 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39416] Another function of GAM1338 is therefore inhibition of LOC339492 (Accession XP_290919.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339492.

[39417] LOC339577 (Accession XP_295005.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339577 BINDING SITE1 and LOC339577 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC339577, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339577 BINDING SITE1 and LOC339577 BINDING SITE2, desig-

nated SEQ ID:18182 and SEQ ID:9239 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39418] Another function of GAM1338 is therefore inhibition of LOC339577 (Accession XP_295005.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339577.

[39419] LOC339600 (Accession XP_295014.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339600 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339600, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339600 BINDING SITE, designated SEQ ID:15466, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39420] Another function of GAM1338 is therefore inhibition of LOC339600 (Accession XP_295014.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC339600.

[39421] LOC339659 (Accession XP_290981.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339659 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339659, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339659 BINDING SITE, designated SEQ ID:18371, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39422] Another function of GAM1338 is therefore inhibition of LOC339659 (Accession XP_290981.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339659.

[39423] LOC339685 (Accession XP_295032.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339685 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339685, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339685 BINDING SITE, designated SEQ ID:7793, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39424] Another function of GAM1338 is therefore inhibition of LOC339685 (Accession XP_295032.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339685.

[39425] LOC339711 (Accession XP_295038.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339711 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339711, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339711 BINDING SITE, designated SEQ ID:3106, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39426] Another function of GAM1338 is therefore inhibition of LOC339711 (Accession XP_295038.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339711.

[39427] LOC339720 (Accession XP_295041.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339720 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339720, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339720 BINDING SITE, designated SEQ ID:7943, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39428] Another function of GAM1338 is therefore inhibition of LOC339720 (Accession XP_295041.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339720.

[39429] LOC339803 (Accession XP_295072.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339803 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC339803, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339803 BINDING SITE, designated SEQ ID:2943, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39430] Another function of GAM1338 is therefore inhibition of LOC339803 (Accession XP_295072.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339803.

[39431] LOC339809 (Accession XP_291020.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339809 BINDING SITE1 and LOC339809 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC339809, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339809 BINDING SITE1 and LOC339809 BINDING SITE2, designated SEQ ID:8744 and SEQ ID:9098 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated

GAM RNA, also designated SEQ ID:360.

[39432] Another function of GAM1338 is therefore inhibition of LOC339809 (Accession XP_291020.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339809.

[39433] LOC339833 (Accession XP_291031.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339833 BINDING SITE1 and LOC339833 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC339833, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339833 BINDING SITE1 and LOC339833 BINDING SITE2, designated SEQ ID:8180 and SEQ ID:10061 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39434] Another function of GAM1338 is therefore inhibition of LOC339833 (Accession XP_291031.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339833.

[39435] LOC339834 (Accession XP_291033.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339834 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by LOC339834, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339834 BINDING SITE, designated SEQ ID:2474, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39436] Another function of GAM1338 is therefore inhibition of LOC339834 (Accession XP_291033.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339834.

[39437] LOC339834 (Accession NP_835467.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339834 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by LOC339834, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the comple-

mentarity of the nucleotide sequences of LOC339834 BINDING SITE, designated SEQ ID:2474, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39438] Another function of GAM1338 is therefore inhibition of LOC339834 (Accession NP_835467.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339834.

[39439] LOC339872 (Accession XP_291050.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339872 BINDING SITE1 through LOC339872 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC339872, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339872 BINDING SITE1 through LOC339872 BINDING SITE3, designated SEQ ID:15990, SEQ ID:6179 and SEQ ID:10908 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39440] Another function of GAM1338 is therefore inhibition of LOC339872 (Accession XP_291050.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339872.

[39441] LOC339894 (Accession XP_295095.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339894 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339894, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339894 BINDING SITE, designated SEQ ID:11426, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39442] Another function of GAM1338 is therefore inhibition of LOC339894 (Accession XP_295095.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339894.

[39443] LOC339896 (Accession XP_291059.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339896 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC339896, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339896 BINDING SITE, designated SEQ ID:11602, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39444] Another function of GAM1338 is therefore inhibition of LOC339896 (Accession XP_291059.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339896.

[39445] LOC339907 (Accession XP_291065.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339907 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339907, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339907 BINDING SITE, designated SEQ ID:1531, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39446] Another function of GAM1338 is therefore inhibition of LOC339907 (Accession XP_291065.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339907.

[39447] LOC339909 (Accession XP_291069.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339909 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339909, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339909 BINDING SITE, designated SEQ ID:9102, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39448] Another function of GAM1338 is therefore inhibition of LOC339909 (Accession XP_291069.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339909.

[39449] LOC339942 (Accession XP_295107.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC339942 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339942, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339942 BINDING SITE, designated SEQ ID:11079, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39450] Another function of GAM1338 is therefore inhibition of LOC339942 (Accession XP_295107.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339942.

[39451] LOC339970 (Accession XP_291095.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC339970 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339970, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339970 BINDING SITE, designated SEQ ID:8858, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39452] Another function of GAM1338 is therefore inhibition of LOC339970 (Accession XP_291095.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339970.

[39453] LOC340037 (Accession XP_295137.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC340037 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC340037, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC340037 BINDING SITE, designated SEQ ID:664, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39454] Another function of GAM1338 is therefore inhibition of LOC340037 (Accession XP_295137.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC340037.

[39455] LOC340125 (Accession XP_291150.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC340125 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC340125, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC340125 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39456] Another function of GAM1338 is therefore inhibition of LOC340125 (Accession XP_291150.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC340125.

[39457] LOC340156 (Accession XP_291158.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC340156 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC340156, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC340156 BINDING SITE, designated SEQ ID:8575, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39458] Another function of GAM1338 is therefore inhibition of LOC340156 (Accession XP_291158.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC340156.

[39459] LOC340227 (Accession XP_291203.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC340227 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC340227, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC340227 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39460] Another function of GAM1338 is therefore inhibition of LOC340227 (Accession XP_291203.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC340227.

[39461] LOC340290 (Accession XP_291214.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC340290 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC340290, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC340290 BINDING SITE, designated SEQ ID:15164, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39462] Another function of GAM1338 is therefore inhibition of LOC340290 (Accession XP_291214.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC340290.

[39463] LOC340390 (Accession XP_291269.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC340390 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC340390, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC340390 BINDING SITE, designated SEQ ID:3427, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39464] Another function of GAM1338 is therefore inhibition of LOC340390 (Accession XP_291269.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC340390.

[39465] LOC340408 (Accession XP_291274.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC340408 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC340408, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC340408 BINDING SITE, designated SEQ ID:564, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39466] Another function of GAM1338 is therefore inhibition of

LOC340408 (Accession XP_291274.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC340408.

[39467] LOC340414 (Accession XP_295240.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC340414 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC340414, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC340414 BINDING SITE, designated SEQ ID:11659, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39468] Another function of GAM1338 is therefore inhibition of LOC340414 (Accession XP_295240.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC340414.

[39469] LOC340450 (Accession XP_295252.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC340450 BINDING SITE is a target binding site found in

the 5` untranslated region of mRNA encoded by LOC340450, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC340450 BINDING SITE, designated SEQ ID:4971, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39470] Another function of GAM1338 is therefore inhibition of LOC340450 (Accession XP_295252.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC340450.

[39471] LOC342926 (Accession XP_292790.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC342926 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC342926, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC342926 BINDING SITE, designated SEQ ID:1413, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:360.

[39472] Another function of GAM1338 is therefore inhibition of LOC342926 (Accession XP_292790.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC342926.

[39473] LOC345275 (Accession NP_835236.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC345275 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by LOC345275, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC345275 BINDING SITE, designated SEQ ID:14511, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39474] Another function of GAM1338 is therefore inhibition of LOC345275 (Accession NP_835236.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC345275.

[39475] LOC346653 (Accession XP_294357.2) is another

GAM1338 target gene, herein designated TARGET GENE. LOC346653 BINDING SITE1 and LOC346653 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC346653, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC346653 BINDING SITE1 and LOC346653 BINDING SITE2, designated SEQ ID:4277 and SEQ ID:14945 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39476] Another function of GAM1338 is therefore inhibition of LOC346653 (Accession XP_294357.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC346653.

[39477] LOC347918 (Accession XP_300565.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC347918 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC347918, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC347918 BINDING SITE, designated SEQ ID:983, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39478] Another function of GAM1338 is therefore inhibition of LOC347918 (Accession XP_300565.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC347918.

[39479] LOC348075 (Accession XP_302653.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348075 BINDING SITE1 and LOC348075 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC348075, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348075 BINDING SITE1 and LOC348075 BINDING SITE2, designated SEQ ID:6491 and SEQ ID:777 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39480] Another function of GAM1338 is therefore inhibition of LOC348075 (Accession XP_302653.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348075.

[39481] LOC348113 (Accession XP_300623.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348113 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348113, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348113 BINDING SITE, designated SEQ ID:3888, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39482] Another function of GAM1338 is therefore inhibition of LOC348113 (Accession XP_300623.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348113.

[39483] LOC348115 (Accession XP_300626.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348115 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by

LOC348115, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348115 BINDING SITE, designated SEQ ID:12601, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39484] Another function of GAM1338 is therefore inhibition of LOC348115 (Accession XP_300626.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348115.

[39485] LOC348137 (Accession XP_300635.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348137 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348137, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348137 BINDING SITE, designated SEQ ID:3888, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39486] Another function of GAM1338 is therefore inhibition of LOC348137 (Accession XP_300635.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348137.

[39487] LOC348142 (Accession XP_300636.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348142 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348142, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348142 BINDING SITE, designated SEQ ID:3888, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39488] Another function of GAM1338 is therefore inhibition of LOC348142 (Accession XP_300636.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348142.

[39489] LOC348161 (Accession XP_208864.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC348161 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348161, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348161 BINDING SITE, designated SEQ ID:8803, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39490] Another function of GAM1338 is therefore inhibition of LOC348161 (Accession XP_208864.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348161.

[39491] LOC348235 (Accession XP_300670.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348235 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348235, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348235 BINDING SITE, designated SEQ ID:11248, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39492] Another function of GAM1338 is therefore inhibition of LOC348235 (Accession XP_300670.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348235.

[39493] LOC348262 (Accession XP_300683.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348262 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC348262, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348262 BINDING SITE, designated SEQ ID:7914, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39494] Another function of GAM1338 is therefore inhibition of LOC348262 (Accession XP_300683.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348262.

[39495] LOC348314 (Accession XP_302716.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348314 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC348314, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348314 BINDING SITE, designated SEQ ID:9161, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39496] Another function of GAM1338 is therefore inhibition of LOC348314 (Accession XP_302716.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348314.

[39497] LOC348326 (Accession XP_300696.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348326 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348326, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC348326 BINDING SITE, designated SEQ ID:1995, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39498] Another function of GAM1338 is therefore inhibition of LOC348326 (Accession XP_300696.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348326.

[39499] LOC348393 (Accession XP_302741.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348393 BINDING SITE1 and LOC348393 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC348393, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348393 BINDING SITE1 and LOC348393 BINDING SITE2, designated SEQ ID:16960 and SEQ ID:20185 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39500] Another function of GAM1338 is therefore inhibition of LOC348393 (Accession XP_302741.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348393.

[39501] LOC348396 (Accession XP_300729.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348396 BINDING SITE1 and LOC348396 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC348396, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348396 BINDING SITE1 and LOC348396 BINDING SITE2, designated SEQ ID:1615 and SEQ ID:10631 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39502] Another function of GAM1338 is therefore inhibition of LOC348396 (Accession XP_300729.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348396.

[39503] LOC348402 (Accession XP_300730.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348402 BINDING SITE1 and LOC348402 BINDING

SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC348402, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348402 BINDING SITE1 and LOC348402 BINDING SITE2, designated SEQ ID:13601 and SEQ ID:19744 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39504] Another function of GAM1338 is therefore inhibition of LOC348402 (Accession XP_300730.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348402.

[39505] LOC348445 (Accession XP_300738.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348445 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348445, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348445 BINDING SITE, designated SEQ ID:1995, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39506] Another function of GAM1338 is therefore inhibition of LOC348445 (Accession XP_300738.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348445.

[39507] LOC348455 (Accession XP_302760.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348455 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348455, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348455 BINDING SITE, designated SEQ ID:9100, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39508] Another function of GAM1338 is therefore inhibition of LOC348455 (Accession XP_302760.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348455.

[39509] LOC348460 (Accession XP_300743.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348460 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348460, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348460 BINDING SITE, designated SEQ ID:8756, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39510] Another function of GAM1338 is therefore inhibition of LOC348460 (Accession XP_300743.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348460.

[39511] LOC348474 (Accession XP_209299.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC348474 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348474, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC348474 BINDING SITE, designated SEQ ID:6597, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39512] Another function of GAM1338 is therefore inhibition of LOC348474 (Accession XP_209299.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348474.

[39513] LOC348503 (Accession XP_300762.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348503 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348503, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348503 BINDING SITE, designated SEQ ID:12080, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39514] Another function of GAM1338 is therefore inhibition of LOC348503 (Accession XP_300762.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC348503.

[39515] LOC348508 (Accession XP_302806.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348508 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC348508, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348508 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39516] Another function of GAM1338 is therefore inhibition of LOC348508 (Accession XP_302806.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348508.

[39517] LOC348525 (Accession XP_300778.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348525 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348525, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348525 BINDING SITE, designated SEQ ID:436, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39518] Another function of GAM1338 is therefore inhibition of LOC348525 (Accession XP_300778.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348525.

[39519] LOC348532 (Accession XP_302818.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348532 BINDING SITE1 and LOC348532 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC348532, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348532 BINDING SITE1 and LOC348532 BINDING SITE2, designated SEQ ID:16960 and SEQ ID:20185 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39520] Another function of GAM1338 is therefore inhibition of LOC348532 (Accession XP_302818.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348532.

[39521] LOC348702 (Accession XP_300808.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348702 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC348702, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348702 BINDING SITE, designated SEQ ID:3103, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39522] Another function of GAM1338 is therefore inhibition of LOC348702 (Accession XP_300808.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348702.

[39523] LOC348790 (Accession XP_300843.1) is another GAM1338 target gene, herein designated TARGET GENE.

LOC348790 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348790, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348790 BINDING SITE, designated SEQ ID:11124, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39524] Another function of GAM1338 is therefore inhibition of LOC348790 (Accession XP_300843.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348790.

[39525] LOC348797 (Accession XP_302888.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348797 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348797, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348797 BINDING SITE, designated SEQ ID:4796, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39526] Another function of GAM1338 is therefore inhibition of LOC348797 (Accession XP_302888.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348797.

[39527] LOC348798 (Accession XP_300845.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348798 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC348798, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348798 BINDING SITE, designated SEQ ID:5915, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39528] Another function of GAM1338 is therefore inhibition of LOC348798 (Accession XP_300845.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348798.

[39529] LOC348825 (Accession XP_300853.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348825 BINDING SITE1 and LOC348825 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC348825, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348825 BINDING SITE1 and LOC348825 BINDING SITE2, designated SEQ ID:2639 and SEQ ID:10307 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39530] Another function of GAM1338 is therefore inhibition of LOC348825 (Accession XP_300853.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348825.

[39531] LOC348842 (Accession XP_300861.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348842 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC348842, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348842 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39532] Another function of GAM1338 is therefore inhibition of LOC348842 (Accession XP_300861.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348842.

[39533] LOC348995 (Accession XP_300434.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC348995 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348995, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348995 BINDING SITE, designated SEQ ID:9379, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39534] Another function of GAM1338 is therefore inhibition of LOC348995 (Accession XP_300434.1) . Accordingly, utili-

ties of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348995.

[39535] LOC349024 (Accession XP_300250.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC349024 BINDING SITE1 and LOC349024 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC349024, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349024 BINDING SITE1 and LOC349024 BINDING SITE2, designated SEQ ID:4753 and SEQ ID:11653 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39536] Another function of GAM1338 is therefore inhibition of LOC349024 (Accession XP_300250.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349024.

[39537] LOC349075 (Accession XP_300932.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC349075 BINDING SITE is a target binding site found in

the 3` untranslated region of mRNA encoded by LOC349075, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349075 BINDING SITE, designated SEQ ID:9465, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39538] Another function of GAM1338 is therefore inhibition of LOC349075 (Accession XP_300932.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349075.

[39539] LOC349096 (Accession XP_300937.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC349096 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC349096, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349096 BINDING SITE, designated SEQ ID:14560, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:360.

[39540] Another function of GAM1338 is therefore inhibition of LOC349096 (Accession XP_300937.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349096.

[39541] LOC349114 (Accession XP_302960.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC349114 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC349114, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349114 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39542] Another function of GAM1338 is therefore inhibition of LOC349114 (Accession XP_302960.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349114.

[39543] LOC349170 (Accession XP_300969.1) is another

GAM1338 target gene, herein designated TARGET GENE. LOC349170 BINDING SITE1 through LOC349170 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC349170, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349170 BINDING SITE1 through LOC349170 BINDING SITE3, designated SEQ ID:19429, SEQ ID:4197 and SEQ ID:13839 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39544] Another function of GAM1338 is therefore inhibition of LOC349170 (Accession XP_300969.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349170.

[39545] LOC349360 (Accession XP_088528.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC349360 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC349360, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC349360 BINDING SITE, designated SEQ ID:13307, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39546] Another function of GAM1338 is therefore inhibition of LOC349360 (Accession XP_088528.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349360.

[39547] LOC349408 (Accession XP_303044.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC349408 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC349408, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349408 BINDING SITE, designated SEQ ID:12395, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39548] Another function of GAM1338 is therefore inhibition of LOC349408 (Accession XP_303044.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC349408.

[39549] LOC349440 (Accession XP_300513.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC349440 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC349440, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349440 BINDING SITE, designated SEQ ID:19505, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39550] Another function of GAM1338 is therefore inhibition of LOC349440 (Accession XP_300513.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349440.

[39551] LOC349613 (Accession XP_303409.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC349613 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC349613, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349613 BINDING SITE, designated SEQ ID:17346, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39552] Another function of GAM1338 is therefore inhibition of LOC349613 (Accession XP_303409.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349613.

[39553] LOC350106 (Accession XP_303810.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC350106 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC350106, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC350106 BINDING SITE, designated SEQ ID:20158, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39554] Another function of GAM1338 is therefore inhibition of

LOC350106 (Accession XP_303810.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC350106.

[39555] LOC51193 (Accession NP_057415.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC51193 BINDING SITE1 and LOC51193 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC51193, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC51193 BINDING SITE1 and LOC51193 BINDING SITE2, designated SEQ ID:6858 and SEQ ID:6812 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39556] Another function of GAM1338 is therefore inhibition of LOC51193 (Accession NP_057415.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC51193.

[39557] LOC51257 (Accession NP_057580.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC51257

BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC51257, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC51257 BINDING SITE, designated SEQ ID:18183, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39558] Another function of GAM1338 is therefore inhibition of LOC51257 (Accession NP_057580.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC51257.

[39559] LOC51334 (Accession NP_057728.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC51334 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC51334, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC51334 BINDING SITE, designated SEQ ID:7944, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39560] Another function of GAM1338 is therefore inhibition of LOC51334 (Accession NP_057728.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC51334.

[39561] LOC51336 (Accession NP_057730.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC51336 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC51336, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC51336 BINDING SITE, designated SEQ ID:18609, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39562] Another function of GAM1338 is therefore inhibition of LOC51336 (Accession NP_057730.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC51336.

[39563] LOC55954 (Accession NP_061976.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC55954 BINDING SITE is a target binding site found in the 5` un-

translated region of mRNA encoded by LOC55954, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC55954 BINDING SITE, designated SEQ ID:17853, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39564] Another function of GAM1338 is therefore inhibition of LOC55954 (Accession NP_061976.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC55954.

[39565] LOC56902 (Accession NP_064528.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC56902 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC56902, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC56902 BINDING SITE, designated SEQ ID:8077, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39566] Another function of GAM1338 is therefore inhibition of

LOC56902 (Accession NP_064528.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC56902.

[39567] LOC57107 (Accession NP_065114.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC57107 BINDING SITE1 and LOC57107 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC57107, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC57107 BINDING SITE1 and LOC57107 BINDING SITE2, designated SEQ ID:19749 and SEQ ID:12670 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39568] Another function of GAM1338 is therefore inhibition of LOC57107 (Accession NP_065114.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC57107.

[39569] LOC57146 (Accession NP_065155.2) is another GAM1338 target gene, herein designated TARGET GENE. LOC57146

BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC57146, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC57146 BINDING SITE, designated SEQ ID:17648, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39570] Another function of GAM1338 is therefore inhibition of LOC57146 (Accession NP_065155.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC57146.

[39571] LOC90408 (Accession XP_031517.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC90408 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC90408, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC90408 BINDING SITE, designated SEQ ID:2729, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39572] Another function of GAM1338 is therefore inhibition of LOC90408 (Accession XP_031517.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC90408.

[39573] LOC90485 (Accession XP_032059.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC90485 BINDING SITE1 and LOC90485 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC90485, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC90485 BINDING SITE1 and LOC90485 BINDING SITE2, designated SEQ ID:15525 and SEQ ID:10103 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39574] Another function of GAM1338 is therefore inhibition of LOC90485 (Accession XP_032059.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC90485.

[39575] LOC90999 (Accession XP_035410.1) is another GAM1338

target gene, herein designated TARGET GENE. LOC90999 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC90999, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC90999 BINDING SITE, designated SEQ ID:11655, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39576] Another function of GAM1338 is therefore inhibition of LOC90999 (Accession XP_035410.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC90999.

[39577] LOC91115 (Accession XP_036218.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC91115 BINDING SITE1 and LOC91115 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC91115, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC91115 BINDING SITE1 and LOC91115 BINDING SITE2, designated SEQ ID:17070

and SEQ ID:18042 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39578] Another function of GAM1338 is therefore inhibition of LOC91115 (Accession XP_036218.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC91115.

[39579] LOC91170 (Accession XP_036612.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC91170 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC91170, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC91170 BINDING SITE, designated SEQ ID:3969, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39580] Another function of GAM1338 is therefore inhibition of LOC91170 (Accession XP_036612.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC91170.

[39581] LOC91266 (Accession XP_037268.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC91266 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC91266, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC91266 BINDING SITE, designated SEQ ID:9160, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39582] Another function of GAM1338 is therefore inhibition of LOC91266 (Accession XP_037268.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC91266.

[39583] LOC91373 (Accession XP_038063.5) is another GAM1338 target gene, herein designated TARGET GENE. LOC91373 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC91373, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC91373 BINDING SITE, designated SEQ ID:5516, to the

nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39584] Another function of GAM1338 is therefore inhibition of LOC91373 (Accession XP_038063.5) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC91373.

[39585] LOC91663 (Accession NP_612382.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC91663 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC91663, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC91663 BINDING SITE, designated SEQ ID:13779, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39586] Another function of GAM1338 is therefore inhibition of LOC91663 (Accession NP_612382.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC91663.

[39587] LOC91893 (Accession XP_041340.1) is another GAM1338

target gene, herein designated TARGET GENE. LOC91893 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC91893, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC91893 BINDING SITE, designated SEQ ID:9129, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39588] Another function of GAM1338 is therefore inhibition of LOC91893 (Accession XP_041340.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC91893.

[39589] LOC92148 (Accession XP_043160.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC92148 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC92148, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC92148 BINDING SITE, designated SEQ ID:16536, to the nucleotide sequence of GAM1338 RNA, herein designated

GAM RNA, also designated SEQ ID:360.

[39590] Another function of GAM1338 is therefore inhibition of LOC92148 (Accession XP_043160.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC92148.

[39591] LOC92597 (Accession NP_775739.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC92597 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC92597, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC92597 BINDING SITE, designated SEQ ID:19028, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39592] Another function of GAM1338 is therefore inhibition of LOC92597 (Accession NP_775739.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC92597.

[39593] LOC93132 (Accession XP_049396.1) is another GAM1338 target gene, herein designated TARGET GENE. LOC93132

BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC93132, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC93132 BINDING SITE, designated SEQ ID:14290, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39594] Another function of GAM1338 is therefore inhibition of LOC93132 (Accession XP_049396.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC93132.

[39595] Leukotriene b4 receptor (LTB4R, Accession NP_000743.1) is another GAM1338 target gene, herein designated TARGET GENE. LTB4R BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LTB4R, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LTB4R BINDING SITE, designated SEQ ID:19595, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ

ID:360.

[39596] Another function of GAM1338 is therefore inhibition of Leukotriene b4 receptor (LTB4R, Accession NP_000743.1), a gene which may be the cardiac p2y receptor involved in the regulation of cardiac muscle contraction through modulation of l- type calcium currents. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LTB4R.

[39597] The function of LTB4R and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Lymphocyte antigen 75 (LY75, Accession NP_002340.1) is another GAM1338 target gene, herein designated TARGET GENE. LY75 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LY75, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LY75 BINDING SITE, designated SEQ ID:4451, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39598] Another function of GAM1338 is therefore inhibition of Lymphocyte antigen 75 (LY75, Accession NP_002340.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LY75.

[39599] Lysozyme (renal amyloidosis) (LYZ, Accession NP_000230.1) is another GAM1338 target gene, herein designated TARGET GENE. LYZ BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LYZ, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LYZ BINDING SITE, designated SEQ ID:3109, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39600] Another function of GAM1338 is therefore inhibition of Lysozyme (renal amyloidosis) (LYZ, Accession NP_000230.1), a gene which a bacteriolytic enzyme. and therefore may be associated with Renal amyloidosis. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Renal amyloidosis, and of other diseases and clinical conditions associated with LYZ.

[39601] The function of LYZ and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Leucine zipper, putative tumor suppressor 1 (LZTS1, Accession NP_066300.1) is another GAM1338 target gene, herein designated TARGET GENE. LZTS1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LZTS1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LZTS1 BINDING SITE, designated SEQ ID:13405, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39602] Another function of GAM1338 is therefore inhibition of Leucine zipper, putative tumor suppressor 1 (LZTS1, Accession NP_066300.1), a gene which is an essential component of the nucleoskeleton. potential role in crosslinking filaments or anchoring other molecules. it is essential for growth. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LZTS1.

[39603] The function of LZTS1 and its association with various

diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.MAC30 (Accession XP_031536.2) is another GAM1338 target gene, herein designated TARGET GENE. MAC30 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MAC30, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MAC30 BINDING SITE, designated SEQ ID:13959, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39604] Another function of GAM1338 is therefore inhibition of MAC30 (Accession XP_031536.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MAC30.

[39605] Male germ cell-associated kinase (MAK, Accession NP_005897.1) is another GAM1338 target gene, herein designated TARGET GENE. MAK BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MAK, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the

nucleotide sequences of MAK BINDING SITE, designated SEQ ID:11208, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39606] Another function of GAM1338 is therefore inhibition of Male germ cell-associated kinase (MAK, Accession NP_005897.1), a gene which plays an important role in spermatogenesis. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MAK.

[39607] The function of MAK and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Mastermind-like 1 (drosophila) (MAML1, Accession NP_055572.1) is another GAM1338 target gene, herein designated TARGET GENE. MAML1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MAML1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MAML1 BINDING SITE, designated SEQ ID:5648, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also des-

ignated SEQ ID:360.

[39608] Another function of GAM1338 is therefore inhibition of Mastermind-like 1 (drosophila) (MAML1, Accession NP_055572.1), a gene which MAML1 functions as a transcriptional coactivator for Notch signaling. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MAML1.

[39609] The function of MAML1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM65.1.Microtubule-associated protein, rp/eb family, member 1 (MAPRE1, Accession NP_036457.1) is another GAM1338 target gene, herein designated TARGET GENE. MAPRE1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MAPRE1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MAPRE1 BINDING SITE, designated SEQ ID:6409, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39610] Another function of GAM1338 is therefore inhibition of

Microtubule-associated protein, rp/eb family, member 1 (MAPRE1, Accession NP_036457.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MAPRE1.

[39611] MCLC (Accession NP_055942.1) is another GAM1338 target gene, herein designated TARGET GENE. MCLC BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MCLC, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MCLC BINDING SITE, designated SEQ ID:4526, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39612] Another function of GAM1338 is therefore inhibition of MCLC (Accession NP_055942.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MCLC.

[39613] Mcm10 minichromosome maintenance deficient 10 (s. cerevisiae) (MCM10, Accession NP_060988.2) is another GAM1338 target gene, herein designated TARGET GENE. MCM10 BINDING SITE is a target binding site found in the

3` untranslated region of mRNA encoded by MCM10, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MCM10 BINDING SITE, designated SEQ ID:4821, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39614] Another function of GAM1338 is therefore inhibition of Mcm10 minichromosome maintenance deficient 10 (s. cerevisiae) (MCM10, Accession NP_060988.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MCM10.

[39615] Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_002383.1) is another GAM1338 target gene, herein designated TARGET GENE. MDM2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MDM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MDM2 BINDING SITE, designated SEQ ID:6085, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39616] Another function of GAM1338 is therefore inhibition of Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_002383.1), a gene which binds to and downmodulates p53 (TP53) and retinoblastoma protein (RB1) function. and therefore may be associated with Tumors (including soft tissue sarcomas, osteosarcomas and gliomas). Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Tumors (including soft tissue sarcomas, osteosarcomas and gliomas)., and of other diseases and clinical conditions associated with MDM2.

[39617] The function of MDM2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006872.1) is another GAM1338 target gene, herein designated TARGET GENE. MDM2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MDM2, corresponding to a target binding site such as BINDING SITE I, BIND-

ING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MDM2 BINDING SITE, designated SEQ ID:6085, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39618] Another function of GAM1338 is therefore inhibition of Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006872.1), a gene which binds to and downmodulates p53 (TP53) and retinoblastoma protein (RB1) function. and therefore may be associated with Tumors (including soft tissue sarcomas, osteosarcomas and gliomas). Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Tumors (including soft tissue sarcomas, osteosarcomas and gliomas)., and of other diseases and clinical conditions associated with MDM2.

[39619] The function of MDM2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006869.1) is another GAM1338 target gene, herein designated TARGET GENE. MDM2 BINDING SITE is a target

binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MDM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MDM2 BINDING SITE, designated SEQ ID:6085, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39620] Another function of GAM1338 is therefore inhibition of Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006869.1), a gene which binds to and downmodulates p53 (TP53) and retinoblastoma protein (RB1) function. and therefore may be associated with Tumors (including soft tissue sarcomas, osteosarcomas and gliomas). Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Tumors (including soft tissue sarcomas, osteosarcomas and gliomas)., and of other diseases and clinical conditions associated with MDM2.

[39621] The function of MDM2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Mdm2, transformed 3t3 cell double minute

2, p53 binding protein (mouse) (MDM2, Accession NP_006871.1) is another GAM1338 target gene, herein designated TARGET GENE. MDM2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MDM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MDM2 BINDING SITE, designated SEQ ID:6085, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39622] Another function of GAM1338 is therefore inhibition of Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006871.1), a gene which binds to and downmodulates p53 (TP53) and retinoblastoma protein (RB1) function. and therefore may be associated with Tumors (including soft tissue sarcomas, osteosarcomas and gliomas). Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Tumors (including soft tissue sarcomas, osteosarcomas and gliomas)., and of other diseases and clinical conditions associated with MDM2.

[39623] The function of MDM2 and its association with various

diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006873.1) is another GAM1338 target gene, herein designated TARGET GENE. MDM2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MDM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MDM2 BINDING SITE, designated SEQ ID:6085, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39624] Another function of GAM1338 is therefore inhibition of Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006873.1), a gene which binds to and downmodulates p53 (TP53) and retinoblastoma protein (RB1) function. and therefore may be associated with Tumors (including soft tissue sarcomas, osteosarcomas and gliomas). Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Tumors (including soft tissue sarcomas, osteosarcomas

and gliomas)., and of other diseases and clinical conditions associated with MDM2.

[39625] The function of MDM2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006870.1) is another GAM1338 target gene, herein designated TARGET GENE. MDM2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MDM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MDM2 BINDING SITE, designated SEQ ID:6085, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39626] Another function of GAM1338 is therefore inhibition of Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006870.1), a gene which binds to and downmodulates p53 (TP53) and retinoblastoma protein (RB1) function. and therefore may be associated with Tumors (including soft tissue sarco-

mas, osteosarcomas and gliomas). Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Tumors (including soft tissue sarcomas, osteosarcomas and gliomas)., and of other diseases and clinical conditions associated with MDM2.

[39627] The function of MDM2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Mdm4, transformed 3t3 cell double minute 4, p53 binding protein (mouse) (MDM4, Accession NP_002384.1) is another GAM1338 target gene, herein designated TARGET GENE. MDM4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MDM4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MDM4 BINDING SITE, designated SEQ ID:19527, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39628] Another function of GAM1338 is therefore inhibition of Mdm4, transformed 3t3 cell double minute 4, p53 binding protein (mouse) (MDM4, Accession NP_002384.1), a gene

which Strongly similar to murine Mdm4; may interact with p53. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MDM4.

[39629] The function of MDM4 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Mediterranean fever (MEFV, Accession NP_000234.1) is another GAM1338 target gene, herein designated TARGET GENE. MEFV BINDING SITE1 and MEFV BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by MEFV, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MEFV BINDING SITE1 and MEFV BINDING SITE2, designated SEQ ID:12284 and SEQ ID:17376 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39630] Another function of GAM1338 is therefore inhibition of Mediterranean fever (MEFV, Accession NP_000234.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions as-

sociated with MEFV.

[39631] Mesoderm development candidate 2 (MESDC2, Accession XP_051854.1) is another GAM1338 target gene, herein designated TARGET GENE. MESDC2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MESDC2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MESDC2 BINDING SITE, designated SEQ ID:17209, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39632] Another function of GAM1338 is therefore inhibition of Mesoderm development candidate 2 (MESDC2, Accession XP_051854.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MESDC2.

[39633] MFTC (Accession NP_110407.2) is another GAM1338 target gene, herein designated TARGET GENE. MFTC BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MFTC, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the com-

plementarity of the nucleotide sequences of MFTC BINDING SITE, designated SEQ ID:10459, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39634] Another function of GAM1338 is therefore inhibition of MFTC (Accession NP_110407.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MFTC.

[39635] Mannosyl (alpha-1,6-)-glycoprotein beta-1,2-n-acetylglucosaminyltransferase (MGAT2, Accession NP_079374.1) is another GAM1338 target gene, herein designated TARGET GENE. MGAT2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MGAT2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGAT2 BINDING SITE, designated SEQ ID:18270, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39636] Another function of GAM1338 is therefore inhibition of Mannosyl (alpha-1,6-)-glycoprotein beta-1,2-n-acetylglucosaminyltransferase (MGAT2, Accession

NP_079374.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGAT2.

[39637] MGC10200 (Accession NP_659497.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC10200 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC10200, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC10200 BINDING SITE, designated SEQ ID:13048, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39638] Another function of GAM1338 is therefore inhibition of MGC10200 (Accession NP_659497.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC10200.

[39639] MGC11102 (Accession NP_115701.2) is another GAM1338 target gene, herein designated TARGET GENE. MGC11102 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC11102, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC11102 BINDING SITE, designated SEQ ID:14977, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39640] Another function of GAM1338 is therefore inhibition of MGC11102 (Accession NP_115701.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC11102.

[39641] MGC11115 (Accession NP_115686.2) is another GAM1338 target gene, herein designated TARGET GENE. MGC11115 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC11115, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC11115 BINDING SITE, designated SEQ ID:5608, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39642] Another function of GAM1338 is therefore inhibition of MGC11115 (Accession NP_115686.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with MGC11115.

[39643] MGC12262 (Accession NP_116085.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC12262 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MGC12262, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC12262 BINDING SITE, designated SEQ ID:6361, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39644] Another function of GAM1338 is therefore inhibition of MGC12262 (Accession NP_116085.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC12262.

[39645] MGC12518 (Accession NP_291026.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC12518 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC12518, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of MGC12518 BINDING SITE, designated SEQ ID:18251, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39646] Another function of GAM1338 is therefore inhibition of MGC12518 (Accession NP_291026.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC12518.

[39647] MGC12760 (Accession NP_116112.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC12760 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MGC12760, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC12760 BINDING SITE, designated SEQ ID:5586, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39648] Another function of GAM1338 is therefore inhibition of MGC12760 (Accession NP_116112.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

MGC12760.

[39649] MGC13017 (Accession NP_542387.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC13017 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC13017, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC13017 BINDING SITE, designated SEQ ID:18970, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39650] Another function of GAM1338 is therefore inhibition of MGC13017 (Accession NP_542387.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC13017.

[39651] MGC13024 (Accession NP_689501.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC13024 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC13024, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

MGC13024 BINDING SITE, designated SEQ ID:15630, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39652] Another function of GAM1338 is therefore inhibition of MGC13024 (Accession NP_689501.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC13024.

[39653] MGC13138 (Accession NP_219363.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC13138 BINDING SITE1 and MGC13138 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by MGC13138, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC13138 BINDING SITE1 and MGC13138 BINDING SITE2, designated SEQ ID:19426 and SEQ ID:14027 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39654] Another function of GAM1338 is therefore inhibition of MGC13138 (Accession NP_219363.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with MGC13138.

[39655] MGC13170 (Accession NP_116101.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC13170 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC13170, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC13170 BINDING SITE, designated SEQ ID:12394, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39656] Another function of GAM1338 is therefore inhibition of MGC13170 (Accession NP_116101.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC13170.

[39657] MGC13204 (Accession NP_113653.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC13204 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC13204, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of MGC13204 BINDING SITE, designated SEQ ID:17963, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39658] Another function of GAM1338 is therefore inhibition of MGC13204 (Accession NP_113653.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC13204.

[39659] MGC14289 (Accession NP_542391.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC14289 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC14289, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC14289 BINDING SITE, designated SEQ ID:1959, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39660] Another function of GAM1338 is therefore inhibition of MGC14289 (Accession NP_542391.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

MGC14289.

[39661] MGC14836 (Accession NP_219480.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC14836 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC14836, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC14836 BINDING SITE, designated SEQ ID:9102, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39662] Another function of GAM1338 is therefore inhibition of MGC14836 (Accession NP_219480.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC14836.

[39663] MGC15606 (Accession NP_659474.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC15606 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MGC15606, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

MGC15606 BINDING SITE, designated SEQ ID:6622, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39664] Another function of GAM1338 is therefore inhibition of MGC15606 (Accession NP_659474.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC15606.

[39665] MGC15668 (Accession NP_116145.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC15668 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC15668, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC15668 BINDING SITE, designated SEQ ID:15177, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39666] Another function of GAM1338 is therefore inhibition of MGC15668 (Accession NP_116145.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC15668.

[39667] MGC15705 (Accession NP_116146.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC15705 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC15705, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC15705 BINDING SITE, designated SEQ ID:6734, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39668] Another function of GAM1338 is therefore inhibition of MGC15705 (Accession NP_116146.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC15705.

[39669] MGC15873 (Accession NP_116309.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC15873 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MGC15873, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC15873 BINDING SITE, designated SEQ ID:9079, to the

nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39670] Another function of GAM1338 is therefore inhibition of MGC15873 (Accession NP_116309.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC15873.

[39671] MGC17839 (Accession NP_777586.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC17839 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MGC17839, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC17839 BINDING SITE, designated SEQ ID:18441, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39672] Another function of GAM1338 is therefore inhibition of MGC17839 (Accession NP_777586.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC17839.

[39673] MGC17919 (Accession NP_653222.2) is another GAM1338

target gene, herein designated TARGET GENE. MGC17919 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC17919, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC17919 BINDING SITE, designated SEQ ID:1588, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39674] Another function of GAM1338 is therefore inhibition of MGC17919 (Accession NP_653222.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC17919.

[39675] MGC1842 (Accession XP_037797.2) is another GAM1338 target gene, herein designated TARGET GENE. MGC1842 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC1842, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC1842 BINDING SITE, designated SEQ ID:11658, to the nucleotide sequence of GAM1338 RNA, herein designated

GAM RNA, also designated SEQ ID:360.

[39676] Another function of GAM1338 is therefore inhibition of MGC1842 (Accession XP_037797.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC1842.

[39677] MGC21675 (Accession NP_443093.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC21675 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC21675, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC21675 BINDING SITE, designated SEQ ID:19749, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39678] Another function of GAM1338 is therefore inhibition of MGC21675 (Accession NP_443093.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC21675.

[39679] MGC2474 (Accession NP_076420.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC2474

BINDING SITE1 and MGC2474 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by MGC2474, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC2474 BINDING SITE1 and MGC2474 BINDING SITE2, designated SEQ ID:18119 and SEQ ID:19749 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39680] Another function of GAM1338 is therefore inhibition of MGC2474 (Accession NP_076420.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC2474.

[39681] MGC2477 (Accession NP_077004.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC2477 BINDING SITE1 through MGC2477 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by MGC2477, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC2477 BINDING SITE1

through MGC2477 BINDING SITE3, designated SEQ ID:12048, SEQ ID:19729 and SEQ ID:3973 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39682] Another function of GAM1338 is therefore inhibition of MGC2477 (Accession NP_077004.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC2477.

[39683] MGC2603 (Accession NP_076942.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC2603 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC2603, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC2603 BINDING SITE, designated SEQ ID:17763, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39684] Another function of GAM1338 is therefore inhibition of MGC2603 (Accession NP_076942.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

MGC2603.

[39685] MGC26484 (Accession NP_689840.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC26484 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC26484, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC26484 BINDING SITE, designated SEQ ID:9741, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39686] Another function of GAM1338 is therefore inhibition of MGC26484 (Accession NP_689840.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC26484.

[39687] MGC26989 (Accession NP_689976.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC26989 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC26989, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

MGC26989 BINDING SITE, designated SEQ ID:14418, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39688] Another function of GAM1338 is therefore inhibition of MGC26989 (Accession NP_689976.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC26989.

[39689] MGC27345 (Accession XP_300964.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC27345 BINDING SITE1 and MGC27345 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by MGC27345, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC27345 BINDING SITE1 and MGC27345 BINDING SITE2, designated SEQ ID:7706 and SEQ ID:18352 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39690] Another function of GAM1338 is therefore inhibition of MGC27345 (Accession XP_300964.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with MGC27345.

[39691] MGC29891 (Accession NP_653219.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC29891 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC29891, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC29891 BINDING SITE, designated SEQ ID:18179, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39692] Another function of GAM1338 is therefore inhibition of MGC29891 (Accession NP_653219.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC29891.

[39693] MGC29898 (Accession NP_659485.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC29898 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC29898, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of MGC29898 BINDING SITE, designated SEQ ID:9164, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39694] Another function of GAM1338 is therefore inhibition of MGC29898 (Accession NP_659485.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC29898.

[39695] MGC3113 (Accession NP_076940.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC3113 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC3113, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC3113 BINDING SITE, designated SEQ ID:15946, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39696] Another function of GAM1338 is therefore inhibition of MGC3113 (Accession NP_076940.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

MGC3113.

[39697] MGC3195 (Accession NP_114111.2) is another GAM1338 target gene, herein designated TARGET GENE. MGC3195 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MGC3195, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC3195 BINDING SITE, designated SEQ ID:15735, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39698] Another function of GAM1338 is therefore inhibition of MGC3195 (Accession NP_114111.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC3195.

[39699] MGC3207 (Accession NP_115661.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC3207 BINDING SITE1 and MGC3207 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by MGC3207, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the

nucleotide sequences of MGC3207 BINDING SITE1 and MGC3207 BINDING SITE2, designated SEQ ID:12382 and SEQ ID:14723 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39700] Another function of GAM1338 is therefore inhibition of MGC3207 (Accession NP_115661.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC3207.

[39701] MGC3329 (Accession NP_076991.2) is another GAM1338 target gene, herein designated TARGET GENE. MGC3329 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC3329, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC3329 BINDING SITE, designated SEQ ID:4873, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39702] Another function of GAM1338 is therefore inhibition of MGC3329 (Accession NP_076991.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with MGC3329.

[39703] MGC33637 (Accession NP_689809.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC33637 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC33637, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC33637 BINDING SITE, designated SEQ ID:12383, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39704] Another function of GAM1338 is therefore inhibition of MGC33637 (Accession NP_689809.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC33637.

[39705] MGC34034 (Accession NP_694956.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC34034 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MGC34034, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of MGC34034 BINDING SITE, designated SEQ ID:9789, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39706] Another function of GAM1338 is therefore inhibition of MGC34034 (Accession NP_694956.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC34034.

[39707] MGC34079 (Accession NP_689688.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC34079 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC34079, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC34079 BINDING SITE, designated SEQ ID:19879, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39708] Another function of GAM1338 is therefore inhibition of MGC34079 (Accession NP_689688.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

MGC34079.

[39709] MGC34132 (Accession XP_291029.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC34132 BINDING SITE1 and MGC34132 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by MGC34132, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC34132 BINDING SITE1 and MGC34132 BINDING SITE2, designated SEQ ID:9188 and SEQ ID:8862 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39710] Another function of GAM1338 is therefore inhibition of MGC34132 (Accession XP_291029.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC34132.

[39711] MGC35440 (Accession NP_694952.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC35440 BINDING SITE1 and MGC35440 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by MGC35440, corresponding to target binding

sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC35440 BINDING SITE1 and MGC35440 BINDING SITE2, designated SEQ ID:15523 and SEQ ID:13796 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39712] Another function of GAM1338 is therefore inhibition of MGC35440 (Accession NP_694952.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC35440.

[39713] MGC35468 (Accession NP_694976.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC35468 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC35468, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC35468 BINDING SITE, designated SEQ ID:15490, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39714] Another function of GAM1338 is therefore inhibition of

MGC35468 (Accession NP_694976.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC35468.

[39715] MGC39320 (Accession NP_689642.2) is another GAM1338 target gene, herein designated TARGET GENE. MGC39320 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC39320, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC39320 BINDING SITE, designated SEQ ID:2691, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39716] Another function of GAM1338 is therefore inhibition of MGC39320 (Accession NP_689642.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC39320.

[39717] MGC40157 (Accession NP_689563.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC40157 BINDING SITE1 and MGC40157 BINDING SITE2 are target binding sites found in untranslated regions of mRNA en-

coded by MGC40157, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC40157 BINDING SITE1 and MGC40157 BINDING SITE2, designated SEQ ID:865 and SEQ ID:13547 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39718] Another function of GAM1338 is therefore inhibition of MGC40157 (Accession NP_689563.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC40157.

[39719] MGC40168 (Accession NP_714920.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC40168 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MGC40168, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC40168 BINDING SITE, designated SEQ ID:3717, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39720] Another function of GAM1338 is therefore inhibition of MGC40168 (Accession NP_714920.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC40168.

[39721] MGC40579 (Accession NP_689989.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC40579 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC40579, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC40579 BINDING SITE, designated SEQ ID:516, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39722] Another function of GAM1338 is therefore inhibition of MGC40579 (Accession NP_689989.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC40579.

[39723] MGC4248 (Accession NP_115709.2) is another GAM1338 target gene, herein designated TARGET GENE. MGC4248 BINDING SITE is a target binding site found in the 3` un-

translated region of mRNA encoded by MGC4248, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC4248 BINDING SITE, designated SEQ ID:8539, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39724] Another function of GAM1338 is therefore inhibition of MGC4248 (Accession NP_115709.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC4248.

[39725] MGC50452 (Accession NP_775733.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC50452 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC50452, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC50452 BINDING SITE, designated SEQ ID:8458, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39726] Another function of GAM1338 is therefore inhibition of

MGC50452 (Accession NP_775733.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC50452.

[39727] MGC50559 (Accession NP_776163.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC50559 BINDING SITE1 and MGC50559 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by MGC50559, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC50559 BINDING SITE1 and MGC50559 BINDING SITE2, designated SEQ ID:7831 and SEQ ID:5794 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39728] Another function of GAM1338 is therefore inhibition of MGC50559 (Accession NP_776163.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC50559.

[39729] MGC5149 (Accession XP_051200.2) is another GAM1338 target gene, herein designated TARGET GENE. MGC5149

BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC5149, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC5149 BINDING SITE, designated SEQ ID:17590, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39730] Another function of GAM1338 is therefore inhibition of MGC5149 (Accession XP_051200.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC5149.

[39731] MGC9912 (Accession NP_542395.1) is another GAM1338 target gene, herein designated TARGET GENE. MGC9912 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC9912, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC9912 BINDING SITE, designated SEQ ID:11391, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39732] Another function of GAM1338 is therefore inhibition of MGC9912 (Accession NP_542395.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC9912.

[39733] MGRN1 (Accession XP_048119.4) is another GAM1338 target gene, herein designated TARGET GENE. MGRN1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGRN1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGRN1 BINDING SITE, designated SEQ ID:13807, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39734] Another function of GAM1338 is therefore inhibition of MGRN1 (Accession XP_048119.4) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGRN1.

[39735] Mhc class ii transactivator (MHC2TA, Accession NP_000237.1) is another GAM1338 target gene, herein designated TARGET GENE. MHC2TA BINDING SITE1 through MHC2TA BINDING SITE3 are target binding sites

found in untranslated regions of mRNA encoded by MHC2TA, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MHC2TA BINDING SITE1 through MHC2TA BINDING SITE3, designated SEQ ID:4816, SEQ ID:6437 and SEQ ID:9987 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39736] Another function of GAM1338 is therefore inhibition of Mhc class ii transactivator (MHC2TA, Accession NP_000237.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MHC2TA.

[39737] MIRAB13 (Accession XP_039236.6) is another GAM1338 target gene, herein designated TARGET GENE. MIRAB13 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MIRAB13, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MIRAB13 BINDING SITE, designated SEQ ID:3109, to the nucleotide sequence of GAM1338

RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39738] Another function of GAM1338 is therefore inhibition of MIRAB13 (Accession XP_039236.6) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MIRAB13.

[39739] MIRAB13 (Accession NP_203744.1) is another GAM1338 target gene, herein designated TARGET GENE. MIRAB13 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MIRAB13, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MIRAB13 BINDING SITE, designated SEQ ID:3109, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39740] Another function of GAM1338 is therefore inhibition of MIRAB13 (Accession NP_203744.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MIRAB13.

[39741] Makorin, ring finger protein, 4 (MKRN4, Accession NP_110384.1) is another GAM1338 target gene, herein designated TARGET GENE. MKRN4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MKRN4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MKRN4 BINDING SITE, designated SEQ ID:12385, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39742] Another function of GAM1338 is therefore inhibition of Makorin, ring finger protein, 4 (MKRN4, Accession NP_110384.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MKRN4.

[39743] Melan-a (MLANA, Accession NP_005502.1) is another GAM1338 target gene, herein designated TARGET GENE. MLANA BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MLANA, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences

of MLANA BINDING SITE, designated SEQ ID:17276, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39744] Another function of GAM1338 is therefore inhibition of Melan-a (MLANA, Accession NP_005502.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MLANA.

[39745] Melanoma-derived leucine zipper, extra-nuclear factor (MLZE, Accession NP_113603.1) is another GAM1338 target gene, herein designated TARGET GENE. MLZE BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MLZE, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MLZE BINDING SITE, designated SEQ ID:11404, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39746] Another function of GAM1338 is therefore inhibition of Melanoma-derived leucine zipper, extra-nuclear factor (MLZE, Accession NP_113603.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of

diseases and clinical conditions associated with MLZE.

[39747] MMAB (Accession NP_443077.1) is another GAM1338 target gene, herein designated TARGET GENE. MMAB BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MMAB, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MMAB BINDING SITE, designated SEQ ID:11037, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39748] Another function of GAM1338 is therefore inhibition of MMAB (Accession NP_443077.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MMAB.

[39749] MO25 (Accession NP_057373.1) is another GAM1338 target gene, herein designated TARGET GENE. MO25 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MO25, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MO25 BINDING SITE, designated SEQ ID:6709, to the nucleotide se-

quence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39750] Another function of GAM1338 is therefore inhibition of MO25 (Accession NP_057373.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MO25.

[39751] Modulator of apoptosis 1 (MOAP1, Accession NP_071434.2) is another GAM1338 target gene, herein designated TARGET GENE. MOAP1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MOAP1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MOAP1 BINDING SITE, designated SEQ ID:11659, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39752] Another function of GAM1338 is therefore inhibition of Modulator of apoptosis 1 (MOAP1, Accession NP_071434.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MOAP1.

[39753] moblak (Accession NP_570719.1) is another GAM1338

target gene, herein designated TARGET GENE. moblak BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by moblak, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of moblak BINDING SITE, designated SEQ ID:2270, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39754] Another function of GAM1338 is therefore inhibition of moblak (Accession NP_570719.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with moblak.

[39755] Molybdenum cofactor synthesis 3 (MOCS3, Accession NP_055299.1) is another GAM1338 target gene, herein designated TARGET GENE. MOCS3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MOCS3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MOCS3 BINDING SITE, designated SEQ ID:6108, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ

ID:360.

[39756] Another function of GAM1338 is therefore inhibition of Molybdenum cofactor synthesis 3 (MOCS3, Accession NP_055299.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MOCS3.

[39757] Myeloproliferative leukemia virus oncogene (MPL, Accession NP_005364.1) is another GAM1338 target gene, herein designated TARGET GENE. MPL BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MPL, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MPL BINDING SITE, designated SEQ ID:11909, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39758] Another function of GAM1338 is therefore inhibition of Myeloproliferative leukemia virus oncogene (MPL, Accession NP_005364.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MPL.

[39759] Mitochondrial ribosomal protein l10 (MRPL10, Accession

NP_683685.1) is another GAM1338 target gene, herein designated TARGET GENE. MRPL10 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by MRPL10, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MRPL10 BINDING SITE, designated SEQ ID:3339, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39760] Another function of GAM1338 is therefore inhibition of Mitochondrial ribosomal protein l10 (MRPL10, Accession NP_683685.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MRPL10.

[39761] Mitochondrial ribosomal protein l35 (MRPL35, Accession NP_057706.2) is another GAM1338 target gene, herein designated TARGET GENE. MRPL35 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MRPL35, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

MRPL35 BINDING SITE, designated SEQ ID:10631, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39762] Another function of GAM1338 is therefore inhibition of Mitochondrial ribosomal protein l35 (MRPL35, Accession NP_057706.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MRPL35.

[39763] Mitochondrial ribosomal protein l44 (MRPL44, Accession NP_075066.1) is another GAM1338 target gene, herein designated TARGET GENE. MRPL44 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MRPL44, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MRPL44 BINDING SITE, designated SEQ ID:6410, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39764] Another function of GAM1338 is therefore inhibition of Mitochondrial ribosomal protein l44 (MRPL44, Accession NP_075066.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MRPL44.

[39765] Mitochondrial ribosomal protein l49 (MRPL49, Accession NP_004918.1) is another GAM1338 target gene, herein

designated TARGET GENE. MRPL49 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MRPL49, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MRPL49 BINDING SITE, designated SEQ ID:13534, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39766] Another function of GAM1338 is therefore inhibition of Mitochondrial ribosomal protein l49 (MRPL49, Accession NP_004918.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MRPL49.

[39767] Mitochondrial ribosomal protein s27 (MRPS27, Accession NP_055899.1) is another GAM1338 target gene, herein designated TARGET GENE. MRPS27 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MRPS27, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MRPS27 BINDING SITE, designated SEQ ID:13372, to the nucleotide se-

quence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39768] Another function of GAM1338 is therefore inhibition of Mitochondrial ribosomal protein s27 (MRPS27, Accession NP_055899.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MRPS27.

[39769] Male-specific lethal 3-like 1 (drosophila) (MSL3L1, Accession NP_523353.1) is another GAM1338 target gene, herein designated TARGET GENE. MSL3L1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MSL3L1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MSL3L1 BINDING SITE, designated SEQ ID:1303, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39770] Another function of GAM1338 is therefore inhibition of Male-specific lethal 3-like 1 (drosophila) (MSL3L1, Accession NP_523353.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MSL3L1.

[39771] Male-specific lethal 3-like 1 (drosophila) (MSL3L1, Accession NP_523354.1) is another GAM1338 target gene, herein designated TARGET GENE. MSL3L1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MSL3L1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MSL3L1 BINDING SITE, designated SEQ ID:1303, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39772] Another function of GAM1338 is therefore inhibition of Male-specific lethal 3-like 1 (drosophila) (MSL3L1, Accession NP_523354.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MSL3L1.

[39773] Male-specific lethal 3-like 1 (drosophila) (MSL3L1, Accession NP_006791.2) is another GAM1338 target gene, herein designated TARGET GENE. MSL3L1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MSL3L1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 il-

lustrates the complementarity of the nucleotide sequences of MSL3L1 BINDING SITE, designated SEQ ID:1303, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39774] Another function of GAM1338 is therefore inhibition of Male-specific lethal 3-like 1 (drosophila) (MSL3L1, Accession NP_006791.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MSL3L1.

[39775] MSTP028 (Accession NP_114160.1) is another GAM1338 target gene, herein designated TARGET GENE. MSTP028 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MSTP028, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MSTP028 BINDING SITE, designated SEQ ID:11359, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39776] Another function of GAM1338 is therefore inhibition of MSTP028 (Accession NP_114160.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

MSTP028.

[39777] MTH2 (Accession NP_060753.1) is another GAM1338 target gene, herein designated TARGET GENE. MTH2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MTH2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MTH2 BINDING SITE, designated SEQ ID:12462, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39778] Another function of GAM1338 is therefore inhibition of MTH2 (Accession NP_060753.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MTH2.

[39779] 5-methyltetrahydrofolate-homocysteine methyltransferase (MTR, Accession NP_000245.1) is another GAM1338 target gene, herein designated TARGET GENE. MTR BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MTR, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

MTR BINDING SITE, designated SEQ ID:13325, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39780] Another function of GAM1338 is therefore inhibition of 5-methyltetrahydrofolate-homocysteine methyltransferase (MTR, Accession NP_000245.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MTR.

[39781] Myosin id (MYO1D, Accession XP_050041.4) is another GAM1338 target gene, herein designated TARGET GENE. MYO1D BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MYO1D, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MYO1D BINDING SITE, designated SEQ ID:2339, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39782] Another function of GAM1338 is therefore inhibition of Myosin id (MYO1D, Accession XP_050041.4), a gene which is an unconventional myosin. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of

diseases and clinical conditions associated with MYO1D.

[39783] The function of MYO1D and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM227.1.Myosin 5c (MYO5C, Accession NP_061198.1) is another GAM1338 target gene, herein designated TARGET GENE. MYO5C BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MYO5C, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MYO5C BINDING SITE, designated SEQ ID:14846, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39784] Another function of GAM1338 is therefore inhibition of Myosin 5c (MYO5C, Accession NP_061198.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MYO5C.

[39785] Nanog (Accession NP_079141.1) is another GAM1338 target gene, herein designated TARGET GENE. Nanog BINDING SITE is a target binding site found in the 3` untrans-

lated region of mRNA encoded by Nanog, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of Nanog BINDING SITE, designated SEQ ID:3109, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39786] Another function of GAM1338 is therefore inhibition of Nanog (Accession NP_079141.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with Nanog.

[39787] NCAG1 (Accession NP_115536.1) is another GAM1338 target gene, herein designated TARGET GENE. NCAG1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NCAG1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NCAG1 BINDING SITE, designated SEQ ID:11436, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39788] Another function of GAM1338 is therefore inhibition of NCAG1 (Accession NP_115536.1) . Accordingly, utilities of

GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NCAG1.

[39789] Nuclear receptor coactivator 6 (NCOA6, Accession NP_054790.1) is another GAM1338 target gene, herein designated TARGET GENE. NCOA6 BINDING SITE1 and NCOA6 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by NCOA6, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NCOA6 BINDING SITE1 and NCOA6 BINDING SITE2, designated SEQ ID:6181 and SEQ ID:5484 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39790] Another function of GAM1338 is therefore inhibition of Nuclear receptor coactivator 6 (NCOA6, Accession NP_054790.1), a gene which activates gene transcription through ligand- dependent association with coactivators. and therefore may be associated with Breast cancer. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Breast cancer., and of other diseases and clinical conditions associated with NCOA6.

[39791] The function of NCOA6 and its association with various

diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM161.1.Nuclear receptor coactivator 6 interacting protein (NCOA6IP, Accession NP_079107.5) is another GAM1338 target gene, herein designated TARGET GENE. NCOA6IP BINDING SITE1 and NCOA6IP BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by NCOA6IP, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NCOA6IP BINDING SITE1 and NCOA6IP BINDING SITE2, designated SEQ ID:13249 and SEQ ID:3026 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39792] Another function of GAM1338 is therefore inhibition of Nuclear receptor coactivator 6 interacting protein (NCOA6IP, Accession NP_079107.5) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NCOA6IP.

[39793] Ndrg family member 3 (NDRG3, Accession NP_114402.1) is another GAM1338 target gene, herein designated TAR-

GET GENE. NDRG3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by NDRG3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NDRG3 BINDING SITE, designated SEQ ID:20109, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39794] Another function of GAM1338 is therefore inhibition of Ndrg family member 3 (NDRG3, Accession NP_114402.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NDRG3.

[39795] Nadh dehydrogenase (ubiquinone) 1, subcomplex unknown, 2, 14.5kda (NDUFC2, Accession NP_004540.1) is another GAM1338 target gene, herein designated TARGET GENE. NDUFC2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NDUFC2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NDUFC2 BINDING SITE, designated

SEQ ID:15362, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39796] Another function of GAM1338 is therefore inhibition of Nadh dehydrogenase (ubiquinone) 1, subcomplex unknown, 2, 14.5kda (NDUFC2, Accession NP_004540.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NDUFC2.

[39797] Nadh dehydrogenase (ubiquinone) fe-s protein 1, 75kda (nadh-coenzyme q reductase) (NDUFS1, Accession NP_004997.3) is another GAM1338 target gene, herein designated TARGET GENE. NDUFS1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NDUFS1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NDUFS1 BINDING SITE, designated SEQ ID:6109, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39798] Another function of GAM1338 is therefore inhibition of Nadh dehydrogenase (ubiquinone) fe-s protein 1, 75kda

(nadh-coenzyme q reductase) (NDUFS1, Accession NP_004997.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NDUFS1.

[39799] Sialidase 3 (membrane sialidase) (NEU3, Accession NP_006647.2) is another GAM1338 target gene, herein designated TARGET GENE. NEU3 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by NEU3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NEU3 BINDING SITE, designated SEQ ID:18182, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39800] Another function of GAM1338 is therefore inhibition of Sialidase 3 (membrane sialidase) (NEU3, Accession NP_006647.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NEU3.

[39801] Nucleolar protein 3 (apoptosis repressor with card domain) (NOL3, Accession NP_003937.1) is another GAM1338 target gene, herein designated TARGET GENE.

NOL3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NOL3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NOL3 BINDING SITE, designated SEQ ID:18676, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39802] Another function of GAM1338 is therefore inhibition of Nucleolar protein 3 (apoptosis repressor with card domain) (NOL3, Accession NP_003937.1), a gene which inhibits CASP2 and CASP8 and interacts with splicing factors. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NOL3.

[39803] The function of NOL3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM47.1.Non-pou domain containing, octamer-binding (NONO, Accession NP_031389.2) is another GAM1338 target gene, herein designated TARGET GENE. NONO BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NONO, corre-

sponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NONO BINDING SITE, designated SEQ ID:1412, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39804] Another function of GAM1338 is therefore inhibition of Non-pou domain containing, octamer-binding (NONO, Accession NP_031389.2), a gene which is a nuclear protein which contains RNA recognition motifs. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NONO.

[39805] The function of NONO and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.NOSIP (Accession NP_057037.1) is another GAM1338 target gene, herein designated TARGET GENE. NOSIP BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by NOSIP, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

NOSIP BINDING SITE, designated SEQ ID:8269, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39806] Another function of GAM1338 is therefore inhibition of NOSIP (Accession NP_057037.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NOSIP.

[39807] Nadph oxidase, ef hand calcium-binding domain 5 (NOX5, Accession NP_078781.2) is another GAM1338 target gene, herein designated TARGET GENE. NOX5 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by NOX5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NOX5 BINDING SITE, designated SEQ ID:7634, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39808] Another function of GAM1338 is therefore inhibition of Nadph oxidase, ef hand calcium-binding domain 5 (NOX5, Accession NP_078781.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NOX5.

[39809] Neuronal pentraxin receptor (NPTXR, Accession NP_478058.1) is another GAM1338 target gene, herein designated TARGET GENE. NPTXR BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by NPTXR, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NPTXR BINDING SITE, designated SEQ ID:17176, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39810] Another function of GAM1338 is therefore inhibition of Neuronal pentraxin receptor (NPTXR, Accession NP_478058.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NPTXR.

[39811] Neuronal pentraxin receptor (NPTXR, Accession NP_055108.2) is another GAM1338 target gene, herein designated TARGET GENE. NPTXR BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by NPTXR, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates

the complementarity of the nucleotide sequences of NPTXR BINDING SITE, designated SEQ ID:17176, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39812] Another function of GAM1338 is therefore inhibition of Neuronal pentraxin receptor (NPTXR, Accession NP_055108.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NPTXR.

[39813] Nad(p)h dehydrogenase, quinone 1 (NQO1, Accession NP_000894.1) is another GAM1338 target gene, herein designated TARGET GENE. NQO1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NQO1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NQO1 BINDING SITE, designated SEQ ID:18183, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39814] Another function of GAM1338 is therefore inhibition of Nad(p)h dehydrogenase, quinone 1 (NQO1, Accession NP_000894.1), a gene which is cytochrome b5 reductase

which reduces redox dyes and quinones. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NQO1.

[39815] The function of NQO1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.NRLN1 (Accession NP_660277.1) is another GAM1338 target gene, herein designated TARGET GENE. NRLN1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by NRLN1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NRLN1 BINDING SITE, designated SEQ ID:15192, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39816] Another function of GAM1338 is therefore inhibition of NRLN1 (Accession NP_660277.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NRLN1.

[39817] 5'-nucleotidase, cytosolic ii (NT5C2, Accession NP_036361.1) is another GAM1338 target gene, herein

designated TARGET GENE. NT5C2 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by NT5C2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NT5C2 BINDING SITE, designated SEQ ID:15388, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39818] Another function of GAM1338 is therefore inhibition of 5'-nucleotidase, cytosolic ii (NT5C2, Accession NP_036361.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NT5C2.

[39819] NUP43 (Accession NP_078923.2) is another GAM1338 target gene, herein designated TARGET GENE. NUP43 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NUP43, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NUP43 BINDING SITE, designated SEQ ID:9379, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA,

also designated SEQ ID:360.

[39820] Another function of GAM1338 is therefore inhibition of NUP43 (Accession NP_078923.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NUP43.

[39821] Nucleoredoxin (NXN, Accession NP_071908.1) is another GAM1338 target gene, herein designated TARGET GENE. NXN BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NXN, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NXN BINDING SITE, designated SEQ ID:436, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39822] Another function of GAM1338 is therefore inhibition of Nucleoredoxin (NXN, Accession NP_071908.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NXN.

[39823] OIP106 (Accession NP_055780.1) is another GAM1338 target gene, herein designated TARGET GENE. OIP106 BINDING SITE is a target binding site found in the 5` un-

translated region of mRNA encoded by OIP106, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of OIP106 BINDING SITE, designated SEQ ID:10262, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39824] Another function of GAM1338 is therefore inhibition of OIP106 (Accession NP_055780.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with OIP106.

[39825] Olfactory receptor, family 51, subfamily e, member 2 (OR51E2, Accession NP_110401.1) is another GAM1338 target gene, herein designated TARGET GENE. OR51E2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by OR51E2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of OR51E2 BINDING SITE, designated SEQ ID:8690, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39826] Another function of GAM1338 is therefore inhibition of

Olfactory receptor, family 51, subfamily e, member 2 (OR51E2, Accession NP_110401.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with OR51E2.

[39827] Origin recognition complex, subunit 1-like (yeast) (ORC1L, Accession NP_004144.1) is another GAM1338 target gene, herein designated TARGET GENE. ORC1L BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ORC1L, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ORC1L BINDING SITE, designated SEQ ID:436, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39828] Another function of GAM1338 is therefore inhibition of Origin recognition complex, subunit 1-like (yeast) (ORC1L, Accession NP_004144.1), a gene which may be required for initiation of DNA replication. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ORC1L.

[39829] The function of ORC1L and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.Oxysterol binding protein-like 2 (OSBPL2, Accession NP_055650.1) is another GAM1338 target gene, herein designated TARGET GENE. OSBPL2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by OSBPL2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of OSBPL2 BINDING SITE, designated SEQ ID:18258, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39830] Another function of GAM1338 is therefore inhibition of Oxysterol binding protein-like 2 (OSBPL2, Accession NP_055650.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with OSBPL2.

[39831] Oxysterol binding protein-like 2 (OSBPL2, Accession NP_653081.1) is another GAM1338 target gene, herein designated TARGET GENE. OSBPL2 BINDING SITE is a target binding site found in the 3` untranslated region of multi-

ple transcripts of mRNA encoded by OSBPL2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of OSBPL2 BINDING SITE, designated SEQ ID:18258, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39832] Another function of GAM1338 is therefore inhibition of Oxysterol binding protein-like 2 (OSBPL2, Accession NP_653081.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with OSBPL2.

[39833] Otoancorin (OTOA, Accession NP_733764.1) is another GAM1338 target gene, herein designated TARGET GENE. OTOA BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by OTOA, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of OTOA BINDING SITE, designated SEQ ID:9822, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39834] Another function of GAM1338 is therefore inhibition of Otoancorin (OTOA, Accession NP_733764.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with OTOA.

[39835] Purinergic receptor p2y, g-protein coupled, 11 (P2RY11, Accession NP_002557.2) is another GAM1338 target gene, herein designated TARGET GENE. P2RY11 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by P2RY11, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of P2RY11 BINDING SITE, designated SEQ ID:6710, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39836] Another function of GAM1338 is therefore inhibition of Purinergic receptor p2y, g-protein coupled, 11 (P2RY11, Accession NP_002557.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with P2RY11.

[39837] Phosphoribosylaminoimidazole carboxylase, phosphoribosylaminoimidazole succinocarboxamide synthetase

(PAICS, Accession NP_006443.1) is another GAM1338 target gene, herein designated TARGET GENE. PAICS BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PAICS, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PAICS BINDING SITE, designated SEQ ID:11127, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39838] Another function of GAM1338 is therefore inhibition of Phosphoribosylaminoimidazole carboxylase, phosphoribosylaminoimidazole succinocarboxamide synthetase (PAICS, Accession NP_006443.1), a gene which is required for purine biosynthesis. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PAICS.

[39839] The function of PAICS and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM96.1.Pantothenate kinase 3 (PANK3, Accession NP_078870.1) is another GAM1338 target gene, herein designated TARGET GENE. PANK3 BINDING SITE is a target

binding site found in the 3` untranslated region of mRNA encoded by PANK3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PANK3 BINDING SITE, designated SEQ ID:18008, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39840] Another function of GAM1338 is therefore inhibition of Pantothenate kinase 3 (PANK3, Accession NP_078870.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PANK3.

[39841] Pas domain containing serine/threonine kinase (PASK, Accession NP_055963.1) is another GAM1338 target gene, herein designated TARGET GENE. PASK BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by PASK, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PASK BINDING SITE, designated SEQ ID:3230, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:360.

[39842] Another function of GAM1338 is therefore inhibition of Pas domain containing serine/threonine kinase (PASK, Accession NP_055963.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PASK.

[39843] Protocadherin alpha 9 (PCDHA9, Accession NP_054724.1) is another GAM1338 target gene, herein designated TARGET GENE. PCDHA9 BINDING SITE1 and PCDHA9 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by PCDHA9, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PCDHA9 BINDING SITE1 and PCDHA9 BINDING SITE2, designated SEQ ID:10631 and SEQ ID:11879 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39844] Another function of GAM1338 is therefore inhibition of Protocadherin alpha 9 (PCDHA9, Accession NP_054724.1), a gene which is a calcium- dependent cell- adhesion protein. Accordingly, utilities of GAM1338 include diagnosis,

prevention and treatment of diseases and clinical conditions associated with PCDHA9.

[39845] The function of PCDHA9 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Protocadherin beta 16 (PCDHB16, Accession NP_066008.1) is another GAM1338 target gene, herein designated TARGET GENE. PCDHB16 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PCDHB16, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PCDHB16 BINDING SITE, designated SEQ ID:4753, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39846] Another function of GAM1338 is therefore inhibition of Protocadherin beta 16 (PCDHB16, Accession NP_066008.1), a gene which is a potential calcium- dependent cell- adhesion protein. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PCDHB16.

[39847] The function of PCDHB16 and its association with various

diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Protocadherin beta 9 (PCDHB9, Accession NP_061992.2) is another GAM1338 target gene, herein designated TARGET GENE. PCDHB9 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PCDHB9, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PCDHB9 BINDING SITE, designated SEQ ID:3109, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39848] Another function of GAM1338 is therefore inhibition of Protocadherin beta 9 (PCDHB9, Accession NP_061992.2), a gene which is a potential calcium- dependent cell- adhesion protein. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PCDHB9.

[39849] The function of PCDHB9 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM72.1.Phosphodiesterase 6b, cgmp-specific, rod,

beta (congenital stationary night blindness 3, autosomal dominant) (PDE6B, Accession NP_000274.1) is another GAM1338 target gene, herein designated TARGET GENE. PDE6B BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PDE6B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PDE6B BINDING SITE, designated SEQ ID:18070, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39850] Another function of GAM1338 is therefore inhibition of Phosphodiesterase 6b, cgmp-specific, rod, beta (congenital stationary night blindness 3, autosomal dominant) (PDE6B, Accession NP_000274.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PDE6B.

[39851] Platelet derived growth factor c (PDGFC, Accession NP_057289.1) is another GAM1338 target gene, herein designated TARGET GENE. PDGFC BINDING SITE1 and PDGFC BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by PDGFC, corre-

sponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PDGFC BINDING SITE1 and PDGFC BINDING SITE2, designated SEQ ID:19767 and SEQ ID:3930 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39852] Another function of GAM1338 is therefore inhibition of Platelet derived growth factor c (PDGFC, Accession NP_057289.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PDGFC.

[39853] Pdz and lim domain 2 (mystique) (PDLIM2, Accession NP_789847.1) is another GAM1338 target gene, herein designated TARGET GENE. PDLIM2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PDLIM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PDLIM2 BINDING SITE, designated SEQ ID:4874, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39854] Another function of GAM1338 is therefore inhibition of Pdz and lim domain 2 (mystique) (PDLIM2, Accession NP_789847.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PDLIM2.

[39855] Pdz domain containing 1 (PDZK1, Accession NP_002605.2) is another GAM1338 target gene, herein designated TARGET GENE. PDZK1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by PDZK1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PDZK1 BINDING SITE, designated SEQ ID:11598, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39856] Another function of GAM1338 is therefore inhibition of Pdz domain containing 1 (PDZK1, Accession NP_002605.2), a gene which is a contains PDZ interaction domains, interacts with MAP17, a protein involved in control of cell proliferation. and therefore may be associated with Autosomal dominant hypophosphatemic rickets. Accordingly, utilities of GAM1338 include diagnosis, preven-

tion and treatment of Autosomal dominant hypophosphatemic rickets, and of other diseases and clinical conditions associated with PDZK1.

[39857] The function of PDZK1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.PDZRN1 (Accession NP_699202.1) is another GAM1338 target gene, herein designated TARGET GENE. PDZRN1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PDZRN1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PDZRN1 BINDING SITE, designated SEQ ID:17567, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39858] Another function of GAM1338 is therefore inhibition of PDZRN1 (Accession NP_699202.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PDZRN1.

[39859] Pellino homolog 1 (drosophila) (PELI1, Accession NP_065702.2) is another GAM1338 target gene, herein

designated TARGET GENE. PELI1 BINDING SITE1 through PELI1 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by PELI1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PELI1 BINDING SITE1 through PELI1 BINDING SITE3, designated SEQ ID:18182, SEQ ID:430 and SEQ ID:13801 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39860] Another function of GAM1338 is therefore inhibition of Pellino homolog 1 (drosophila) (PELI1, Accession NP_065702.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PELI1.

[39861] Period homolog 2 (drosophila) (PER2, Accession NP_073728.1) is another GAM1338 target gene, herein designated TARGET GENE. PER2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PER2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PER2

BINDING SITE, designated SEQ ID:6602, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39862] Another function of GAM1338 is therefore inhibition of Period homolog 2 (drosophila) (PER2, Accession NP_073728.1), a gene which Period homolog 2; putative circadian clock protein; has a PAS dimerization domain and therefore may be associated with Familial advanced sleep- phase syndrome. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Familial advanced sleep- phase syndrome, and of other diseases and clinical conditions associated with PER2.

[39863] The function of PER2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Peroxisome biogenesis factor 10 (PEX10, Accession NP_722540.1) is another GAM1338 target gene, herein designated TARGET GENE. PEX10 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PEX10, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

PEX10 BINDING SITE, designated SEQ ID:7262, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39864] Another function of GAM1338 is therefore inhibition of Peroxisome biogenesis factor 10 (PEX10, Accession NP_722540.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PEX10.

[39865] Peroxisome biogenesis factor 10 (PEX10, Accession NP_002608.1) is another GAM1338 target gene, herein designated TARGET GENE. PEX10 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PEX10, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PEX10 BINDING SITE, designated SEQ ID:7262, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39866] Another function of GAM1338 is therefore inhibition of Peroxisome biogenesis factor 10 (PEX10, Accession NP_002608.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clini-

cal conditions associated with PEX10.

[39867] PHAX (Accession NP_115553.1) is another GAM1338 target gene, herein designated TARGET GENE. PHAX BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PHAX, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PHAX BINDING SITE, designated SEQ ID:12387, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39868] Another function of GAM1338 is therefore inhibition of PHAX (Accession NP_115553.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PHAX.

[39869] Polymeric immunoglobulin receptor (PIGR, Accession NP_002635.2) is another GAM1338 target gene, herein designated TARGET GENE. PIGR BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PIGR, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PIGR BINDING SITE, designated

SEQ ID:8350, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39870] Another function of GAM1338 is therefore inhibition of Polymeric immunoglobulin receptor (PIGR, Accession NP_002635.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PIGR.

[39871] Phosphoinositide-3-kinase, class 2, beta polypeptide (PIK3C2B, Accession NP_002637.2) is another GAM1338 target gene, herein designated TARGET GENE. PIK3C2B BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PIK3C2B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PIK3C2B BINDING SITE, designated SEQ ID:15277, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39872] Another function of GAM1338 is therefore inhibition of Phosphoinositide-3-kinase, class 2, beta polypeptide (PIK3C2B, Accession NP_002637.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with PIK3C2B.

[39873] Phosphoinositide-3-kinase, catalytic, delta polypeptide (PIK3CD, Accession NP_005017.2) is another GAM1338 target gene, herein designated TARGET GENE. PIK3CD BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PIK3CD, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PIK3CD BINDING SITE, designated SEQ ID:4771, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39874] Another function of GAM1338 is therefore inhibition of Phosphoinositide-3-kinase, catalytic, delta polypeptide (PIK3CD, Accession NP_005017.2), a gene which regulating cell growth. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PIK3CD.

[39875] The function of PIK3CD and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.Pbx/knotted 1 homeobox 1 (PKNOX1, Ac-

cession NP_004562.2) is another GAM1338 target gene, herein designated TARGET GENE. PKNOX1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PKNOX1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PKNOX1 BINDING SITE, designated SEQ ID:11464, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39876] Another function of GAM1338 is therefore inhibition of Pbx/knotted 1 homeobox 1 (PKNOX1, Accession NP_004562.2), a gene which may regulate gene expression and control cell differentiation. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PKNOX1.

[39877] The function of PKNOX1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM55.1.Pro-melanin-concentrating hormone-like 1 (PMCHL1, Accession NP_114093.1) is another GAM1338 target gene, herein designated TARGET GENE. PMCHL1

BINDING SITE1 and PMCHL1 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by PMCHL1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PMCHL1 BINDING SITE1 and PMCHL1 BINDING SITE2, designated SEQ ID:12367 and SEQ ID:982 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39878] Another function of GAM1338 is therefore inhibition of Pro-melanin-concentrating hormone-like 1 (PMCHL1, Accession NP_114093.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PMCHL1.

[39879] Pro-melanin-concentrating hormone-like 2 (PMCHL2, Accession NP_114094.1) is another GAM1338 target gene, herein designated TARGET GENE. PMCHL2 BINDING SITE1 and PMCHL2 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by PMCHL2, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide se-

quences of PMCHL2 BINDING SITE1 and PMCHL2 BINDING SITE2, designated SEQ ID:12367 and SEQ ID:982 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39880] Another function of GAM1338 is therefore inhibition of Pro-melanin-concentrating hormone-like 2 (PMCHL2, Accession NP_114094.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PMCHL2.

[39881] PMPCA (Accession NP_055975.1) is another GAM1338 target gene, herein designated TARGET GENE. PMPCA BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PMPCA, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PMPCA BINDING SITE, designated SEQ ID:7152, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39882] Another function of GAM1338 is therefore inhibition of PMPCA (Accession NP_055975.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PMPCA.

[39883] Paraneoplastic antigen ma2 (PNMA2, Accession NP_009188.1) is another GAM1338 target gene, herein designated TARGET GENE. PNMA2 BINDING SITE1 and PNMA2 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by PNMA2, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PNMA2 BINDING SITE1 and PNMA2 BINDING SITE2, designated SEQ ID:11236 and SEQ ID:11189 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39884] Another function of GAM1338 is therefore inhibition of Paraneoplastic antigen ma2 (PNMA2, Accession NP_009188.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PNMA2.

[39885] Protein o-fucosyltransferase 1 (POFUT1, Accession NP_056167.1) is another GAM1338 target gene, herein designated TARGET GENE. POFUT1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by POFUT1, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of POFUT1 BINDING SITE, designated SEQ ID:1760, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39886] Another function of GAM1338 is therefore inhibition of Protein o-fucosyltransferase 1 (POFUT1, Accession NP_056167.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with POFUT1.

[39887] Polymerase (dna directed), epsilon 3 (p17 subunit) (POLE3, Accession NP_059139.2) is another GAM1338 target gene, herein designated TARGET GENE. POLE3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by POLE3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of POLE3 BINDING SITE, designated SEQ ID:5665, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39888] Another function of GAM1338 is therefore inhibition of Polymerase (dna directed), epsilon 3 (p17 subunit) (POLE3,

Accession NP_059139.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with POLE3.

[39889] Polymerase (rna) ii (dna directed) polypeptide d (POLR2D, Accession NP_004796.1) is another GAM1338 target gene, herein designated TARGET GENE. POLR2D BINDING SITE1 and POLR2D BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by POLR2D, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of POLR2D BINDING SITE1 and POLR2D BINDING SITE2, designated SEQ ID:850 and SEQ ID:11282 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39890] Another function of GAM1338 is therefore inhibition of Polymerase (rna) ii (dna directed) polypeptide d (POLR2D, Accession NP_004796.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with POLR2D.

[39891] Paraoxonase 1 (PON1, Accession NP_000437.3) is another GAM1338 target gene, herein designated TARGET GENE. PON1 BINDING SITE is a target binding site found in the 3`

untranslated region of mRNA encoded by PON1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PON1 BINDING SITE, designated SEQ ID:19429, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39892] Another function of GAM1338 is therefore inhibition of Paraoxonase 1 (PON1, Accession NP_000437.3), a gene which hydrolyzes the toxic metabolites of a variety of organophosphorus insecticides. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PON1.

[39893] The function of PON1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Pou domain, class 2, associating factor 1 (POU2AF1, Accession NP_006226.1) is another GAM1338 target gene, herein designated TARGET GENE. POU2AF1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by POU2AF1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of POU2AF1 BINDING SITE, designated SEQ ID:4674, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39894] Another function of GAM1338 is therefore inhibition of Pou domain, class 2, associating factor 1 (POU2AF1, Accession NP_006226.1), a gene which is a transcriptional coactivator that specifically associates with either oct1 or oct2 and therefore may be associated with A form of b-cell leukemia. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of A form of b- cell leukemia, and of other diseases and clinical conditions associated with POU2AF1.

[39895] The function of POU2AF1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Pou domain, class 2, transcription factor 3 (POU2F3, Accession NP_055167.1) is another GAM1338 target gene, herein designated TARGET GENE. POU2F3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by POU2F3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of POU2F3 BINDING SITE, designated SEQ ID:7036, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39896] Another function of GAM1338 is therefore inhibition of Pou domain, class 2, transcription factor 3 (POU2F3, Accession NP_055167.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with POU2F3.

[39897] Pou domain, class 3, transcription factor 1 (POU3F1, Accession NP_002690.2) is another GAM1338 target gene, herein designated TARGET GENE. POU3F1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by POU3F1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of POU3F1 BINDING SITE, designated SEQ ID:7918, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39898] Another function of GAM1338 is therefore inhibition of Pou domain, class 3, transcription factor 1 (POU3F1, Accession NP_002690.2), a gene which involves in early em-

bryogenesis and neurogenesis. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with POU3F1.

[39899] The function of POU3F1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM281.1.PP3856 (Accession NP_660202.1) is another GAM1338 target gene, herein designated TARGET GENE. PP3856 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by PP3856, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PP3856 BINDING SITE, designated SEQ ID:6293, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39900] Another function of GAM1338 is therefore inhibition of PP3856 (Accession NP_660202.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PP3856.

[39901] Protein phosphatase, ef hand calcium-binding domain 2 (PPEF2, Accession NP_690911.1) is another GAM1338 target gene, herein designated TARGET GENE. PPEF2 BINDING

SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PPEF2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPEF2 BINDING SITE, designated SEQ ID:568, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39902] Another function of GAM1338 is therefore inhibition of Protein phosphatase, ef hand calcium-binding domain 2 (PPEF2, Accession NP_690911.1), a gene which is a homolog of Drosophila rdgC. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPEF2.

[39903] The function of PPEF2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM66.2.Protein phosphatase, ef hand calcium-binding domain 2 (PPEF2, Accession NP_690910.1) is another GAM1338 target gene, herein designated TARGET GENE. PPEF2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PPEF2, corresponding to a target binding site

such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPEF2 BINDING SITE, designated SEQ ID:568, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39904] Another function of GAM1338 is therefore inhibition of Protein phosphatase, ef hand calcium-binding domain 2 (PPEF2, Accession NP_690910.1), a gene which is a homolog of Drosophila rdgC. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPEF2.

[39905] The function of PPEF2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM66.2.Protein phosphatase, ef hand calcium-binding domain 2 (PPEF2, Accession NP_006230.2) is another GAM1338 target gene, herein designated TARGET GENE. PPEF2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PPEF2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPEF2 BINDING SITE, designated

SEQ ID:568, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39906] Another function of GAM1338 is therefore inhibition of Protein phosphatase, ef hand calcium-binding domain 2 (PPEF2, Accession NP_006230.2), a gene which is a homolog of Drosophila rdgC. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPEF2.

[39907] The function of PPEF2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM66.2.Protein tyrosine phosphatase, receptor type, f polypeptide (ptprf), interacting protein (liprin), alpha 4 (PPFIA4, Accession XP_046751.3) is another GAM1338 target gene, herein designated TARGET GENE. PPFIA4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PPFIA4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPFIA4 BINDING SITE, designated SEQ ID:10102, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39908] Another function of GAM1338 is therefore inhibition of Protein tyrosine phosphatase, receptor type, f polypeptide (ptprf), interacting protein (liprin), alpha 4 (PPFIA4, Accession XP_046751.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPFIA4.

[39909] Ptprf interacting protein, binding protein 1 (liprin beta 1) (PPFIBP1, Accession NP_003613.2) is another GAM1338 target gene, herein designated TARGET GENE. PPFIBP1 BINDING SITE1 and PPFIBP1 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by PPFIBP1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPFIBP1 BINDING SITE1 and PPFIBP1 BINDING SITE2, designated SEQ ID:8861 and SEQ ID:5523 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39910] Another function of GAM1338 is therefore inhibition of Ptprf interacting protein, binding protein 1 (liprin beta 1) (PPFIBP1, Accession NP_003613.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with PP-FIBP1.

[39911] Peptidylprolyl isomerase d (cyclophilin d) (PPID, Accession NP_005029.1) is another GAM1338 target gene, herein designated TARGET GENE. PPID BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PPID, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPID BINDING SITE, designated SEQ ID:3110, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39912] Another function of GAM1338 is therefore inhibition of Peptidylprolyl isomerase d (cyclophilin d) (PPID, Accession NP_005029.1), a gene which catalyzes the cis- trans isomerization of proline imidic peptide bonds in oligopeptides. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPID.

[39913] The function of PPID and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference

to GAM136.1.Peptidylprolyl isomerase (cyclophilin)-like 2 (PPIL2, Accession NP_055152.1) is another GAM1338 target gene, herein designated TARGET GENE. PPIL2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PPIL2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPIL2 BINDING SITE, designated SEQ ID:18677, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39914] Another function of GAM1338 is therefore inhibition of Peptidylprolyl isomerase (cyclophilin)-like 2 (PPIL2, Accession NP_055152.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPIL2.

[39915] Protein phosphatase 1, regulatory (inhibitor) subunit 12b (PPP1R12B, Accession NP_115288.1) is another GAM1338 target gene, herein designated TARGET GENE. PPP1R12B BINDING SITE1 and PPP1R12B BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by PPP1R12B, corresponding to target binding sites such as BINDING SITE I, BINDING

SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPP1R12B BINDING SITE1 and PPP1R12B BINDING SITE2, designated SEQ ID:17555 and SEQ ID:14820 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39916] Another function of GAM1338 is therefore inhibition of Protein phosphatase 1, regulatory (inhibitor) subunit 12b (PPP1R12B, Accession NP_115288.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPP1R12B.

[39917] Protein phosphatase 1, regulatory (inhibitor) subunit 12b (PPP1R12B, Accession NP_002472.1) is another GAM1338 target gene, herein designated TARGET GENE. PPP1R12B BINDING SITE1 and PPP1R12B BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by PPP1R12B, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPP1R12B BINDING SITE1 and PPP1R12B BINDING SITE2, designated SEQ ID:17555 and SEQ ID:14820 respectively, to the nu-

cleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39918] Another function of GAM1338 is therefore inhibition of Protein phosphatase 1, regulatory (inhibitor) subunit 12b (PPP1R12B, Accession NP_002472.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPP1R12B.

[39919] Primase, polypeptide 2a, 58kda (PRIM2A, Accession NP_000938.1) is another GAM1338 target gene, herein designated TARGET GENE. PRIM2A BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PRIM2A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PRIM2A BINDING SITE, designated SEQ ID:12707, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39920] Another function of GAM1338 is therefore inhibition of Primase, polypeptide 2a, 58kda (PRIM2A, Accession NP_000938.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clini-

cal conditions associated with PRIM2A.

[39921] Protein kinase, interferon-inducible double stranded rna dependent (PRKR, Accession NP_002750.1) is another GAM1338 target gene, herein designated TARGET GENE. PRKR BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PRKR, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PRKR BINDING SITE, designated SEQ ID:17566, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39922] Another function of GAM1338 is therefore inhibition of Protein kinase, interferon-inducible double stranded rna dependent (PRKR, Accession NP_002750.1), a gene which catalyze the phosphorylation of the alpha subunit of eif2. and therefore may be associated with Huntington's disease. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Huntington's disease, and of other diseases and clinical conditions associated with PRKR.

[39923] The function of PRKR and its association with various diseases and clinical conditions, has been established by

previous studies, as described hereinabove with reference to GAM136.1.Protein kinase, lysine deficient 3 (PRKWNK3, Accession NP_065973.1) is another GAM1338 target gene, herein designated TARGET GENE. PRKWNK3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PRKWNK3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PRKWNK3 BINDING SITE, designated SEQ ID:5524, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39924] Another function of GAM1338 is therefore inhibition of Protein kinase, lysine deficient 3 (PRKWNK3, Accession NP_065973.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PRKWNK3.

[39925] Prion protein 2 (dublet) (PRND, Accession NP_036541.1) is another GAM1338 target gene, herein designated TARGET GENE. PRND BINDING SITE1 and PRND BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by PRND, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING

SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PRND BINDING SITE1 and PRND BINDING SITE2, designated SEQ ID:5776 and SEQ ID:7084 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39926] Another function of GAM1338 is therefore inhibition of Prion protein 2 (dublet) (PRND, Accession NP_036541.1), a gene which is similar to prion protein PRNP. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PRND.

[39927] The function of PRND and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM116.1.PRO0297 (Accession NP_054800.1) is another GAM1338 target gene, herein designated TARGET GENE. PRO0297 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by PRO0297, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PRO0297 BINDING SITE, designated

SEQ ID:1504, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39928] Another function of GAM1338 is therefore inhibition of PRO0297 (Accession NP_054800.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PRO0297.

[39929] PRO0365 (Accession NP_054845.1) is another GAM1338 target gene, herein designated TARGET GENE. PRO0365 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by PRO0365, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PRO0365 BINDING SITE, designated SEQ ID:7958, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39930] Another function of GAM1338 is therefore inhibition of PRO0365 (Accession NP_054845.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PRO0365.

[39931] PRO1048 (Accession NP_060967.1) is another GAM1338 target gene, herein designated TARGET GENE. PRO1048 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PRO1048, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PRO1048 BINDING SITE, designated SEQ ID:2738, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39932] Another function of GAM1338 is therefore inhibition of PRO1048 (Accession NP_060967.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PRO1048.

[39933] PROM2 (Accession NP_653308.1) is another GAM1338 target gene, herein designated TARGET GENE. PROM2 BINDING SITE1 and PROM2 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by PROM2, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PROM2 BINDING SITE1 and PROM2

BINDING SITE2, designated SEQ ID:19427 and SEQ ID:6958 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39934] Another function of GAM1338 is therefore inhibition of PROM2 (Accession NP_653308.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PROM2.

[39935] Proteasome (prosome, macropain) 26s subunit, non-atpase, 9 (PSMD9, Accession NP_002804.2) is another GAM1338 target gene, herein designated TARGET GENE. PSMD9 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PSMD9, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PSMD9 BINDING SITE, designated SEQ ID:11654, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39936] Another function of GAM1338 is therefore inhibition of Proteasome (prosome, macropain) 26s subunit, non-atpase, 9 (PSMD9, Accession NP_002804.2), a gene which acts as a regulatory subunit of the 26 proteasome. Ac-

cordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PSMD9.

[39937] The function of PSMD9 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Phosphoserine phosphatase (PSPH, Accession NP_004568.1) is another GAM1338 target gene, herein designated TARGET GENE. PSPH BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PSPH, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PSPH BINDING SITE, designated SEQ ID:9102, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39938] Another function of GAM1338 is therefore inhibition of Phosphoserine phosphatase (PSPH, Accession NP_004568.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PSPH.

[39939] Proline-serine-threonine phosphatase interacting protein

2 (PSTPIP2, Accession NP_077748.2) is another GAM1338 target gene, herein designated TARGET GENE. PSTPIP2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PSTPIP2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PSTPIP2 BINDING SITE, designated SEQ ID:14086, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39940] Another function of GAM1338 is therefore inhibition of Proline-serine-threonine phosphatase interacting protein 2 (PSTPIP2, Accession NP_077748.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PSTPIP2.

[39941] Prostaglandin e synthase (PTGES, Accession NP_004869.1) is another GAM1338 target gene, herein designated TARGET GENE. PTGES BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PTGES, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of PTGES BINDING SITE, designated SEQ ID:11575, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39942] Another function of GAM1338 is therefore inhibition of Prostaglandin e synthase (PTGES, Accession NP_004869.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PTGES.

[39943] Prostaglandin i2 (prostacyclin) synthase (PTGIS, Accession NP_000952.1) is another GAM1338 target gene, herein designated TARGET GENE. PTGIS BINDING SITE1 and PTGIS BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by PTGIS, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PTGIS BINDING SITE1 and PTGIS BINDING SITE2, designated SEQ ID:11917 and SEQ ID:13582 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39944] Another function of GAM1338 is therefore inhibition of Prostaglandin i2 (prostacyclin) synthase (PTGIS, Accession

NP_000952.1), a gene which catalyzes the isomerization of prostaglandin h2 to prostacyclin (= prostaglandin i2). Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PTGIS.

[39945] The function of PTGIS and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Ptk2 protein tyrosine kinase 2 (PTK2, Accession NP_005598.3) is another GAM1338 target gene, herein designated TARGET GENE. PTK2 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by PTK2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PTK2 BINDING SITE, designated SEQ ID:17374, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39946] Another function of GAM1338 is therefore inhibition of Ptk2 protein tyrosine kinase 2 (PTK2, Accession NP_005598.3), a gene which involves in intracellular signal transduction pathway and is a putative homolog of

chicken focal adhesion associated kinase. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PTK2.

[39947] The function of PTK2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM65.2.Phosphorylase, glycogen; muscle (mcardle syndrome, glycogen storage disease type v) (PYGM, Accession NP_005600.1) is another GAM1338 target gene, herein designated TARGET GENE. PYGM BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by PYGM, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PYGM BINDING SITE, designated SEQ ID:4024, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39948] Another function of GAM1338 is therefore inhibition of Phosphorylase, glycogen; muscle (mcardle syndrome, glycogen storage disease type v) (PYGM, Accession NP_005600.1) . Accordingly, utilities of GAM1338 include

diagnosis, prevention and treatment of diseases and clinical conditions associated with PYGM.

[39949] RAB11-FIP4 (Accession NP_116321.2) is another GAM1338 target gene, herein designated TARGET GENE. RAB11-FIP4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RAB11-FIP4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAB11-FIP4 BINDING SITE, designated SEQ ID:5406, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39950] Another function of GAM1338 is therefore inhibition of RAB11-FIP4 (Accession NP_116321.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAB11-FIP4.

[39951] Rab31, member ras oncogene family (RAB31, Accession NP_006859.1) is another GAM1338 target gene, herein designated TARGET GENE. RAB31 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RAB31, corresponding to a target binding site

such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAB31 BINDING SITE, designated SEQ ID:536, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39952] Another function of GAM1338 is therefore inhibition of Rab31, member ras oncogene family (RAB31, Accession NP_006859.1), a gene which is an GTP- binding protein of the RAB family. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAB31.

[39953] The function of RAB31 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM145.1.Rab33b, member ras oncogene family (RAB33B, Accession NP_112586.1) is another GAM1338 target gene, herein designated TARGET GENE. RAB33B BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RAB33B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAB33B BINDING SITE, designated SEQ ID:15333, to the

nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39954] Another function of GAM1338 is therefore inhibition of Rab33b, member ras oncogene family (RAB33B, Accession NP_112586.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAB33B.

[39955] Rab36, member ras oncogene family (RAB36, Accession NP_004905.1) is another GAM1338 target gene, herein designated TARGET GENE. RAB36 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RAB36, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAB36 BINDING SITE, designated SEQ ID:15649, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39956] Another function of GAM1338 is therefore inhibition of Rab36, member ras oncogene family (RAB36, Accession NP_004905.1), a gene which is involved in protein transport. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical condi-

tions associated with RAB36.

[39957] The function of RAB36 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Rab39, member ras oncogene family (RAB39, Accession XP_084662.1) is another GAM1338 target gene, herein designated TARGET GENE. RAB39 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RAB39, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAB39 BINDING SITE, designated SEQ ID:2158, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39958] Another function of GAM1338 is therefore inhibition of Rab39, member ras oncogene family (RAB39, Accession XP_084662.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAB39.

[39959] Rab, member of ras oncogene family-like 2a (RABL2A, Accession NP_038198.1) is another GAM1338 target gene, herein designated TARGET GENE. RABL2A BINDING SITE is

a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by RABL2A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RABL2A BINDING SITE, designated SEQ ID:14847, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39960] Another function of GAM1338 is therefore inhibition of Rab, member of ras oncogene family-like 2a (RABL2A, Accession NP_038198.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RABL2A.

[39961] Rab, member of ras oncogene family-like 2b (RABL2B, Accession NP_009012.1) is another GAM1338 target gene, herein designated TARGET GENE. RABL2B BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RABL2B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RABL2B BINDING SITE, designated SEQ ID:14847, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA,

also designated SEQ ID:360.

[39962] Another function of GAM1338 is therefore inhibition of Rab, member of ras oncogene family-like 2b (RABL2B, Accession NP_009012.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RABL2B.

[39963] RAI (Accession NP_006654.1) is another GAM1338 target gene, herein designated TARGET GENE. RAI BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by RAI, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAI BINDING SITE, designated SEQ ID:17223, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39964] Another function of GAM1338 is therefore inhibition of RAI (Accession NP_006654.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAI.

[39965] Retinoic acid induced 3 (RAI3, Accession NP_003970.1) is another GAM1338 target gene, herein designated TARGET GENE. RAI3 BINDING SITE is a target binding site found in

the 3` untranslated region of mRNA encoded by RAI3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAI3 BINDING SITE, designated SEQ ID:16116, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39966] Another function of GAM1338 is therefore inhibition of Retinoic acid induced 3 (RAI3, Accession NP_003970.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAI3.

[39967] RAP140 (Accession NP_056039.1) is another GAM1338 target gene, herein designated TARGET GENE. RAP140 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RAP140, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAP140 BINDING SITE, designated SEQ ID:9663, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39968] Another function of GAM1338 is therefore inhibition of

RAP140 (Accession NP_056039.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAP140.

[39969] Retinoic acid receptor, gamma (RARG, Accession NP_000957.1) is another GAM1338 target gene, herein designated TARGET GENE. RARG BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by RARG, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RARG BINDING SITE, designated SEQ ID:18678, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39970] Another function of GAM1338 is therefore inhibition of Retinoic acid receptor, gamma (RARG, Accession NP_000957.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RARG.

[39971] Ras association (ralgds/af-6) domain family 2 (RASSF2, Accession NP_739579.1) is another GAM1338 target gene, herein designated TARGET GENE. RASSF2 BINDING SITE is

a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by RASSF2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RASSF2 BINDING SITE, designated SEQ ID:7664, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39972] Another function of GAM1338 is therefore inhibition of Ras association (ralgds/af-6) domain family 2 (RASSF2, Accession NP_739579.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RASSF2.

[39973] Ras association (ralgds/af-6) domain family 2 (RASSF2, Accession NP_739580.1) is another GAM1338 target gene, herein designated TARGET GENE. RASSF2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by RASSF2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RASSF2 BINDING SITE, designated SEQ ID:7664, to the nucleotide sequence of GAM1338 RNA, herein designated

GAM RNA, also designated SEQ ID:360.

[39974] Another function of GAM1338 is therefore inhibition of Ras association (ralgds/af-6) domain family 2 (RASSF2, Accession NP_739580.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RASSF2.

[39975] Ras association (ralgds/af-6) domain family 2 (RASSF2, Accession NP_055552.1) is another GAM1338 target gene, herein designated TARGET GENE. RASSF2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by RASSF2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RASSF2 BINDING SITE, designated SEQ ID:7664, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39976] Another function of GAM1338 is therefore inhibition of Ras association (ralgds/af-6) domain family 2 (RASSF2, Accession NP_055552.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RASSF2.

[39977] Retinoblastoma binding protein 9 (RBBP9, Accession

NP_006597.2) is another GAM1338 target gene, herein designated TARGET GENE. RBBP9 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by RBBP9, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RBBP9 BINDING SITE, designated SEQ ID:2397, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39978] Another function of GAM1338 is therefore inhibition of Retinoblastoma binding protein 9 (RBBP9, Accession NP_006597.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RBBP9.

[39979] RCBTB1 (Accession NP_060661.2) is another GAM1338 target gene, herein designated TARGET GENE. RCBTB1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by RCBTB1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RCBTB1 BINDING SITE, designated SEQ ID:3049, to the nu-

cleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39980] Another function of GAM1338 is therefore inhibition of RCBTB1 (Accession NP_060661.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RCBTB1.

[39981] RDH13 (Accession NP_612421.1) is another GAM1338 target gene, herein designated TARGET GENE. RDH13 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by RDH13, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RDH13 BINDING SITE, designated SEQ ID:11485, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39982] Another function of GAM1338 is therefore inhibition of RDH13 (Accession NP_612421.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RDH13.

[39983] Arginine-glutamic acid dipeptide (re) repeats (RERE, Accession NP_036234.2) is another GAM1338 target gene,

herein designated TARGET GENE. RERE BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RERE, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RERE BINDING SITE, designated SEQ ID:8833, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39984] Another function of GAM1338 is therefore inhibition of Arginine-glutamic acid dipeptide (re) repeats (RERE, Accession NP_036234.2), a gene which binds DRPLA and locates in the nucleus and therefore may be associated with Dentatorubral- pallidoluysian atrophy. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Dentatorubral- pallidoluysian atrophy, and of other diseases and clinical conditions associated with RERE.

[39985] The function of RERE and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM47.1.Regulator of g-protein signalling 3 (RGS3, Accession NP_570613.1) is another GAM1338 target gene,

herein designated TARGET GENE. RGS3 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by RGS3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RGS3 BINDING SITE, designated SEQ ID:3826, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39986] Another function of GAM1338 is therefore inhibition of Regulator of g-protein signalling 3 (RGS3, Accession NP_570613.1), a gene which negatively regulates G protein- coupled receptor signalling. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RGS3.

[39987] The function of RGS3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM146.1.Rhesus blood group, d antigen (RHD, Accession NP_057208.2) is another GAM1338 target gene, herein designated TARGET GENE. RHD BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by RHD, corre-

sponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RHD BINDING SITE, designated SEQ ID:8756, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39988] Another function of GAM1338 is therefore inhibition of Rhesus blood group, d antigen (RHD, Accession NP_057208.2), a gene which Major antigen of the RH system. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RHD.

[39989] The function of RHD and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM161.1.Rhesus blood group, d antigen (RHD, Accession NP_057309.2) is another GAM1338 target gene, herein designated TARGET GENE. RHD BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by RHD, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

RHD BINDING SITE, designated SEQ ID:8756, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39990] Another function of GAM1338 is therefore inhibition of Rhesus blood group, d antigen (RHD, Accession NP_057309.2), a gene which Major antigen of the RH system. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RHD.

[39991] The function of RHD and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM161.1.RHPN2 (Accession NP_149094.2) is another GAM1338 target gene, herein designated TARGET GENE. RHPN2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RHPN2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RHPN2 BINDING SITE, designated SEQ ID:5481, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39992] Another function of GAM1338 is therefore inhibition of

RHPN2 (Accession NP_149094.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RHPN2.

[39993] RNAC (Accession NP_005763.2) is another GAM1338 target gene, herein designated TARGET GENE. RNAC BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RNAC, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RNAC BINDING SITE, designated SEQ ID:18459, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39994] Another function of GAM1338 is therefore inhibition of RNAC (Accession NP_005763.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RNAC.

[39995] RNF137 (Accession NP_060543.4) is another GAM1338 target gene, herein designated TARGET GENE. RNF137 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RNF137, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of RNF137 BINDING SITE, designated SEQ ID:8861, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39996] Another function of GAM1338 is therefore inhibition of RNF137 (Accession NP_060543.4) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RNF137.

[39997] Ring finger protein (c3hc4 type) 8 (RNF8, Accession NP_003949.1) is another GAM1338 target gene, herein designated TARGET GENE. RNF8 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RNF8, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RNF8 BINDING SITE, designated SEQ ID:14570, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[39998] Another function of GAM1338 is therefore inhibition of Ring finger protein (c3hc4 type) 8 (RNF8, Accession NP_003949.1) . Accordingly, utilities of GAM1338 include

diagnosis, prevention and treatment of diseases and clinical conditions associated with RNF8.

[39999] Retinitis pigmentosa 2 (x-linked recessive) (RP2, Accession NP_008846.1) is another GAM1338 target gene, herein designated TARGET GENE. RP2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RP2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RP2 BINDING SITE, designated SEQ ID:6575, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40000] Another function of GAM1338 is therefore inhibition of Retinitis pigmentosa 2 (x-linked recessive) (RP2, Accession NP_008846.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RP2.

[40001] Rabphilin 3a-like (without c2 domains) (RPH3AL, Accession NP_008918.1) is another GAM1338 target gene, herein designated TARGET GENE. RPH3AL BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RPH3AL, corresponding to a target

binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RPH3AL BINDING SITE, designated SEQ ID:467, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40002] Another function of GAM1338 is therefore inhibition of Rabphilin 3a-like (without c2 domains) (RPH3AL, Accession NP_008918.1), a gene which is a protein transporter. could play a role in neurotransmitter release by regulating membrane flow in the nerve terminal. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RPH3AL.

[40003] The function of RPH3AL and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.RPP30 (Accession NP_006404.1) is another GAM1338 target gene, herein designated TARGET GENE. RPP30 BINDING SITE1 and RPP30 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by RPP30, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III

of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RPP30 BINDING SITE1 and RPP30 BINDING SITE2, designated SEQ ID:3259 and SEQ ID:13376 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40004] Another function of GAM1338 is therefore inhibition of RPP30 (Accession NP_006404.1), a gene which is a component of ribonuclease p that processes 5' ends of precursor tRNAs. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RPP30.

[40005] The function of RPP30 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.S100A15 (Accession NP_789793.1) is another GAM1338 target gene, herein designated TARGET GENE. S100A15 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by S100A15, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of S100A15 BINDING SITE, designated

SEQ ID:18561, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40006] Another function of GAM1338 is therefore inhibition of S100A15 (Accession NP_789793.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with S100A15.

[40007] SARM1 (Accession NP_055892.1) is another GAM1338 target gene, herein designated TARGET GENE. SARM1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SARM1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SARM1 BINDING SITE, designated SEQ ID:16324, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40008] Another function of GAM1338 is therefore inhibition of SARM1 (Accession NP_055892.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SARM1.

[40009] Sarcoma amplified sequence (SAS, Accession

NP_005972.1) is another GAM1338 target gene, herein designated TARGET GENE. SAS BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SAS, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SAS BINDING SITE, designated SEQ ID:1301, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40010] Another function of GAM1338 is therefore inhibition of Sarcoma amplified sequence (SAS, Accession NP_005972.1), a gene which is a member of the trans-membrane 4 superfamily (TM4SF) and may be involved in growth- related cellular processes T. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SAS.

[40011] The function of SAS and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM88.1.SBLF (Accession NP_006864.2) is another GAM1338 target gene, herein designated TARGET GENE. SBLF BINDING SITE is a target binding site found in the 3`

untranslated region of mRNA encoded by SBLF, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SBLF BINDING SITE, designated SEQ ID:14250, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40012] Another function of GAM1338 is therefore inhibition of SBLF (Accession NP_006864.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SBLF.

[40013] SCAMP-4 (Accession NP_524558.1) is another GAM1338 target gene, herein designated TARGET GENE. SCAMP-4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SCAMP-4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SCAMP-4 BINDING SITE, designated SEQ ID:19434, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40014] Another function of GAM1338 is therefore inhibition of SCAMP-4 (Accession NP_524558.1) . Accordingly, utilities

of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SCAMP-4.

[40015] Scan domain containing 2 (SCAND2, Accession NP_071333.2) is another GAM1338 target gene, herein designated TARGET GENE. SCAND2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SCAND2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SCAND2 BINDING SITE, designated SEQ ID:16790, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40016] Another function of GAM1338 is therefore inhibition of Scan domain containing 2 (SCAND2, Accession NP_071333.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SCAND2.

[40017] Scavenger receptor class f, member 1 (SCARF1, Accession NP_003684.1) is another GAM1338 target gene, herein designated TARGET GENE. SCARF1 BINDING SITE1 and SCARF1 BINDING SITE2 are target binding sites found in

untranslated regions of mRNA encoded by SCARF1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SCARF1 BINDING SITE1 and SCARF1 BINDING SITE2, designated SEQ ID:9540 and SEQ ID:12384 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40018] Another function of GAM1338 is therefore inhibition of Scavenger receptor class f, member 1 (SCARF1, Accession NP_003684.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SCARF1.

[40019] SCMH1 (Accession NP_036368.1) is another GAM1338 target gene, herein designated TARGET GENE. SCMH1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SCMH1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SCMH1 BINDING SITE, designated SEQ ID:9755, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40020] Another function of GAM1338 is therefore inhibition of SCMH1 (Accession NP_036368.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SCMH1.

[40021] Sex comb on midleg-like 2 (drosophila) (SCML2, Accession NP_006080.1) is another GAM1338 target gene, herein designated TARGET GENE. SCML2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SCML2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SCML2 BINDING SITE, designated SEQ ID:9058, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40022] Another function of GAM1338 is therefore inhibition of Sex comb on midleg-like 2 (drosophila) (SCML2, Accession NP_006080.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SCML2.

[40023] SCN3B (Accession NP_060870.1) is another GAM1338 target gene, herein designated TARGET GENE. SCN3B BINDING SITE1 and SCN3B BINDING SITE2 are target binding

sites found in untranslated regions of mRNA encoded by SCN3B, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SCN3B BINDING SITE1 and SCN3B BINDING SITE2, designated SEQ ID:9932 and SEQ ID:1471 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40024] Another function of GAM1338 is therefore inhibition of SCN3B (Accession NP_060870.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SCN3B.

[40025] SDS-RS1 (Accession NP_612441.1) is another GAM1338 target gene, herein designated TARGET GENE. SDS-RS1 BINDING SITE1 and SDS-RS1 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by SDS-RS1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SDS-RS1 BINDING SITE1 and SDS-RS1 BINDING SITE2, designated SEQ ID:2100 and SEQ ID:6910 respectively, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40026] Another function of GAM1338 is therefore inhibition of SDS-RS1 (Accession NP_612441.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SDS-RS1.

[40027] SDS3 (Accession XP_045014.1) is another GAM1338 target gene, herein designated TARGET GENE. SDS3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SDS3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SDS3 BINDING SITE, designated SEQ ID:8869, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40028] Another function of GAM1338 is therefore inhibition of SDS3 (Accession XP_045014.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SDS3.

[40029] Spondyloepiphyseal dysplasia, late (SEDL, Accession NP_055378.1) is another GAM1338 target gene, herein

designated TARGET GENE. SEDL BINDING SITE1 through SEDL BINDING SITE4 are target binding sites found in untranslated regions of mRNA encoded by SEDL, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SEDL BINDING SITE1 through SEDL BINDING SITE4, designated SEQ ID:13872, SEQ ID:16842, SEQ ID:7261 and SEQ ID:13400 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40030] Another function of GAM1338 is therefore inhibition of Spondyloepiphyseal dysplasia, late (SEDL, Accession NP_055378.1), a gene which may play role in vesicular transport from endoplasmic reticulum to golgi. and therefore may be associated with Spondyloepiphyseal dysplasia. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Spondyloepiphyseal dysplasia, and of other diseases and clinical conditions associated with SEDL.

[40031] The function of SEDL and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference

to GAM30.1.Small edrk-rich factor 1a (telomeric) (SERF1A, Accession NP_068802.1) is another GAM1338 target gene, herein designated TARGET GENE. SERF1A BINDING SITE1 and SERF1A BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by SERF1A, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SERF1A BINDING SITE1 and SERF1A BINDING SITE2, designated SEQ ID:14767 and SEQ ID:11123 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40032] Another function of GAM1338 is therefore inhibition of Small edrk-rich factor 1a (telomeric) (SERF1A, Accession NP_068802.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SERF1A.

[40033] Small edrk-rich factor 1b (centromeric) (SERF1B, Accession NP_075267.1) is another GAM1338 target gene, herein designated TARGET GENE. SERF1B BINDING SITE1 and SERF1B BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by SERF1B, corresponding to target binding sites such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SERF1B BINDING SITE1 and SERF1B BINDING SITE2, designated SEQ ID:11123 and SEQ ID:14767 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40034] Another function of GAM1338 is therefore inhibition of Small edrk-rich factor 1b (centromeric) (SERF1B, Accession NP_075267.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SERF1B.

[40035] Small edrk-rich factor 2 (SERF2, Accession NP_005761.2) is another GAM1338 target gene, herein designated TARGET GENE. SERF2 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by SERF2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SERF2 BINDING SITE, designated SEQ ID:13138, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40036] Another function of GAM1338 is therefore inhibition of

Small edrk-rich factor 2 (SERF2, Accession NP_005761.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SERF2.

[40037] Serine (or cysteine) proteinase inhibitor, clade b (ovalbumin), member 9 (SERPINB9, Accession NP_004146.1) is another GAM1338 target gene, herein designated TARGET GENE. SERPINB9 BINDING SITE1 and SERPINB9 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by SERPINB9, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SERPINB9 BINDING SITE1 and SERPINB9 BINDING SITE2, designated SEQ ID:4057 and SEQ ID:437 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40038] Another function of GAM1338 is therefore inhibition of Serine (or cysteine) proteinase inhibitor, clade b (ovalbumin), member 9 (SERPINB9, Accession NP_004146.1), a gene which may be a serpin serine protease inhibitor that interacts with granzyme B (GZMB). Accordingly, utilities of GAM1338 include diagnosis, preven-

tion and treatment of diseases and clinical conditions associated with SERPINB9.

[40039] The function of SERPINB9 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM88.2.Sideroflexin 2 (SFXN2, Accession XP_058359.2) is another GAM1338 target gene, herein designated TARGET GENE. SFXN2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SFXN2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SFXN2 BINDING SITE, designated SEQ ID:1960, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40040] Another function of GAM1338 is therefore inhibition of Sideroflexin 2 (SFXN2, Accession XP_058359.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SFXN2.

[40041] Sideroflexin 2 (SFXN2, Accession NP_849189.1) is another GAM1338 target gene, herein designated TARGET GENE.

SFXN2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SFXN2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SFXN2 BINDING SITE, designated SEQ ID:1960, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40042] Another function of GAM1338 is therefore inhibition of Sideroflexin 2 (SFXN2, Accession NP_849189.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SFXN2.

[40043] Sideroflexin 4 (SFXN4, Accession NP_849198.1) is another GAM1338 target gene, herein designated TARGET GENE. SFXN4 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SFXN4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SFXN4 BINDING SITE, designated SEQ ID:6466, to the nucleotide sequence of GAM1338

RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40044] Another function of GAM1338 is therefore inhibition of Sideroflexin 4 (SFXN4, Accession NP_849198.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SFXN4.

[40045] Sideroflexin 4 (SFXN4, Accession XP_058406.1) is another GAM1338 target gene, herein designated TARGET GENE. SFXN4 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SFXN4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SFXN4 BINDING SITE, designated SEQ ID:6466, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40046] Another function of GAM1338 is therefore inhibition of Sideroflexin 4 (SFXN4, Accession XP_058406.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SFXN4.

[40047] Sh3-domain binding protein 2 (SH3BP2, Accession NP_003014.2) is another GAM1338 target gene, herein designated TARGET GENE. SH3BP2 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by SH3BP2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SH3BP2 BINDING SITE, designated SEQ ID:18716, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40048] Another function of GAM1338 is therefore inhibition of Sh3-domain binding protein 2 (SH3BP2, Accession NP_003014.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SH3BP2.

[40049] Short stature homeobox (SHOX, Accession NP_000442.1) is another GAM1338 target gene, herein designated TARGET GENE. SHOX BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SHOX, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the comple-

mentarity of the nucleotide sequences of SHOX BINDING SITE, designated SEQ ID:3808, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40050] Another function of GAM1338 is therefore inhibition of Short stature homeobox (SHOX, Accession NP_000442.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SHOX.

[40051] Sialic acid binding ig-like lectin 8 (SIGLEC8, Accession NP_055257.1) is another GAM1338 target gene, herein designated TARGET GENE. SIGLEC8 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SIGLEC8, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SIGLEC8 BINDING SITE, designated SEQ ID:3441, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40052] Another function of GAM1338 is therefore inhibition of Sialic acid binding ig-like lectin 8 (SIGLEC8, Accession NP_055257.1), a gene which is a cell adhesion molecule

for postnatal neural development. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SIGLEC8.

[40053] The function of SIGLEC8 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM63.1.Src-like-adaptor 2 (SLA2, Accession NP_778252.1) is another GAM1338 target gene, herein designated TARGET GENE. SLA2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SLA2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLA2 BINDING SITE, designated SEQ ID:15357, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40054] Another function of GAM1338 is therefore inhibition of Src-like-adaptor 2 (SLA2, Accession NP_778252.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLA2.

[40055] Src-like-adaptor 2 (SLA2, Accession NP_115590.1) is an-

other GAM1338 target gene, herein designated TARGET GENE. SLA2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SLA2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLA2 BINDING SITE, designated SEQ ID:15357, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40056] Another function of GAM1338 is therefore inhibition of Src-like-adaptor 2 (SLA2, Accession NP_115590.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLA2.

[40057] Solute carrier family 11 (proton-coupled divalent metal ion transporters), member 2 (SLC11A2, Accession NP_000608.1) is another GAM1338 target gene, herein designated TARGET GENE. SLC11A2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SLC11A2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the comple-

mentarity of the nucleotide sequences of SLC11A2 BINDING SITE, designated SEQ ID:16731, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40058] Another function of GAM1338 is therefore inhibition of Solute carrier family 11 (proton-coupled divalent metal ion transporters), member 2 (SLC11A2, Accession NP_000608.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC11A2.

[40059] Solute carrier family 12 (potassium/chloride transporters), member 8 (SLC12A8, Accession NP_078904.1) is another GAM1338 target gene, herein designated TARGET GENE. SLC12A8 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SLC12A8, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC12A8 BINDING SITE, designated SEQ ID:18425, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40060] Another function of GAM1338 is therefore inhibition of Solute carrier family 12 (potassium/chloride transporters),

member 8 (SLC12A8, Accession NP_078904.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC12A8.

[40061] Solute carrier family 13 (sodium/sulfate symporters), member 1 (SLC13A1, Accession NP_071889.2) is another GAM1338 target gene, herein designated TARGET GENE. SLC13A1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SLC13A1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC13A1 BINDING SITE, designated SEQ ID:15679, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40062] Another function of GAM1338 is therefore inhibition of Solute carrier family 13 (sodium/sulfate symporters), member 1 (SLC13A1, Accession NP_071889.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC13A1.

[40063] Solute carrier family 15 (oligopeptide transporter), member 1 (SLC15A1, Accession NP_005064.1) is another

GAM1338 target gene, herein designated TARGET GENE. SLC15A1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SLC15A1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC15A1 BINDING SITE, designated SEQ ID:20019, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40064] Another function of GAM1338 is therefore inhibition of Solute carrier family 15 (oligopeptide transporter), member 1 (SLC15A1, Accession NP_005064.1), a gene which is a H(+)- coupled peptide transporter. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC15A1.

[40065] The function of SLC15A1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Solute carrier family 16 (monocarboxylic acid transporters), member 4 (SLC16A4, Accession NP_004687.1) is another GAM1338 target gene, herein designated TARGET GENE. SLC16A4 BINDING SITE is a tar-

get binding site found in the 3` untranslated region of mRNA encoded by SLC16A4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC16A4 BINDING SITE, designated SEQ ID:20157, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40066] Another function of GAM1338 is therefore inhibition of Solute carrier family 16 (monocarboxylic acid transporters), member 4 (SLC16A4, Accession NP_004687.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC16A4.

[40067] Solute carrier family 16 (monocarboxylic acid transporters), member 6 (SLC16A6, Accession NP_004685.1) is another GAM1338 target gene, herein designated TARGET GENE. SLC16A6 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by SLC16A6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC16A6 BINDING SITE, designated

SEQ ID:517, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40068] Another function of GAM1338 is therefore inhibition of Solute carrier family 16 (monocarboxylic acid transporters), member 6 (SLC16A6, Accession NP_004685.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC16A6.

[40069] Solute carrier family 24 (sodium/potassium/calcium exchanger), member 1 (SLC24A1, Accession NP_004718.1) is another GAM1338 target gene, herein designated TARGET GENE. SLC24A1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SLC24A1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC24A1 BINDING SITE, designated SEQ ID:7931, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40070] Another function of GAM1338 is therefore inhibition of Solute carrier family 24 (sodium/potassium/calcium exchanger), member 1 (SLC24A1, Accession NP_004718.1),

a gene which is a critical component of the visual transduction cascade, controlling the calcium concentration of outer segments during light and darkness. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC24A1.

[40071] The function of SLC24A1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Solute carrier family 25 (mitochondrial carrier; dicarboxylate transporter), member 10 (SLC25A10, Accession NP_036272.2) is another GAM1338 target gene, herein designated TARGET GENE. SLC25A10 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SLC25A10, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC25A10 BINDING SITE, designated SEQ ID:1937, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40072] Another function of GAM1338 is therefore inhibition of Solute carrier family 25 (mitochondrial carrier; dicarboxy-

late transporter), member 10 (SLC25A10, Accession NP_036272.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC25A10.

[40073] SLC30A5 (Accession NP_076960.1) is another GAM1338 target gene, herein designated TARGET GENE. SLC30A5 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SLC30A5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC30A5 BINDING SITE, designated SEQ ID:1341, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40074] Another function of GAM1338 is therefore inhibition of SLC30A5 (Accession NP_076960.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC30A5.

[40075] SLC30A6 (Accession NP_060434.2) is another GAM1338 target gene, herein designated TARGET GENE. SLC30A6 BINDING SITE is a target binding site found in the 3` un-

translated region of mRNA encoded by SLC30A6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC30A6 BINDING SITE, designated SEQ ID:11622, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40076] Another function of GAM1338 is therefore inhibition of SLC30A6 (Accession NP_060434.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC30A6.

[40077] SLC35E2 (Accession XP_049733.6) is another GAM1338 target gene, herein designated TARGET GENE. SLC35E2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SLC35E2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC35E2 BINDING SITE, designated SEQ ID:12300, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40078] Another function of GAM1338 is therefore inhibition of

SLC35E2 (Accession XP_049733.6) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC35E2.

[40079] Solute carrier family 39 (zinc transporter), member 1 (SLC39A1, Accession NP_055252.2) is another GAM1338 target gene, herein designated TARGET GENE. SLC39A1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by SLC39A1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC39A1 BINDING SITE, designated SEQ ID:19430, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40080] Another function of GAM1338 is therefore inhibition of Solute carrier family 39 (zinc transporter), member 1 (SLC39A1, Accession NP_055252.2), a gene which is a divalent (zinc/iron) metal ion transporter. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC39A1.

[40081] The function of SLC39A1 and its association with various

diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM175.1.Solute carrier family 6 (neurotransmitter transporter), member 14 (SLC6A14, Accession NP_009162.1) is another GAM1338 target gene, herein designated TARGET GENE. SLC6A14 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SLC6A14, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC6A14 BINDING SITE, designated SEQ ID:16741, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40082] Another function of GAM1338 is therefore inhibition of Solute carrier family 6 (neurotransmitter transporter), member 14 (SLC6A14, Accession NP_009162.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC6A14.

[40083] SMAC (Accession NP_620308.1) is another GAM1338 target gene, herein designated TARGET GENE. SMAC BINDING SITE1 and SMAC BINDING SITE2 are target binding sites

found in untranslated regions of multiple transcripts of mRNA encoded by SMAC, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SMAC BINDING SITE1 and SMAC BINDING SITE2, designated SEQ ID:15275 and SEQ ID:1245 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40084] Another function of GAM1338 is therefore inhibition of SMAC (Accession NP_620308.1), a gene which promotes apoptosis via caspase activation. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SMAC.

[40085] The function of SMAC and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.Synaptosomal-associated protein, 23kda (SNAP23, Accession NP_003816.2) is another GAM1338 target gene, herein designated TARGET GENE. SNAP23 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SNAP23, corresponding to a target binding site such as

BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SNAP23 BINDING SITE, designated SEQ ID:14270, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40086] Another function of GAM1338 is therefore inhibition of Synaptosomal-associated protein, 23kda (SNAP23, Accession NP_003816.2), a gene which is essential component of the high affinity receptor for the general membrane fusion machinery. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SNAP23.

[40087] The function of SNAP23 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Synaptosomal-associated protein, 23kda (SNAP23, Accession NP_570710.1) is another GAM1338 target gene, herein designated TARGET GENE. SNAP23 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SNAP23, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SNAP23 BINDING SITE, designated SEQ ID:14270, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40088] Another function of GAM1338 is therefore inhibition of Synaptosomal-associated protein, 23kda (SNAP23, Accession NP_570710.1), a gene which is essential component of the high affinity receptor for the general membrane fusion machinery. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SNAP23.

[40089] The function of SNAP23 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Syntaphilin (SNPH, Accession NP_055538.1) is another GAM1338 target gene, herein designated TARGET GENE. SNPH BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SNPH, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SNPH BINDING SITE, designated SEQ ID:1354,

to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40090] Another function of GAM1338 is therefore inhibition of Syntaphilin (SNPH, Accession NP_055538.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SNPH.

[40091] Sorting nexin 15 (SNX15, Accession NP_037438.2) is another GAM1338 target gene, herein designated TARGET GENE. SNX15 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SNX15, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SNX15 BINDING SITE, designated SEQ ID:2728, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40092] Another function of GAM1338 is therefore inhibition of Sorting nexin 15 (SNX15, Accession NP_037438.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SNX15.

[40093] Sorting nexin 15 (SNX15, Accession NP_680086.1) is another GAM1338 target gene, herein designated TARGET GENE. SNX15 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SNX15, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SNX15 BINDING SITE, designated SEQ ID:2728, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40094] Another function of GAM1338 is therefore inhibition of Sorting nexin 15 (SNX15, Accession NP_680086.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SNX15.

[40095] SNX22 (Accession NP_079074.1) is another GAM1338 target gene, herein designated TARGET GENE. SNX22 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SNX22, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SNX22

BINDING SITE, designated SEQ ID:11205, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40096] Another function of GAM1338 is therefore inhibition of SNX22 (Accession NP_079074.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SNX22.

[40097] SNX27 (Accession NP_112180.4) is another GAM1338 target gene, herein designated TARGET GENE. SNX27 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SNX27, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SNX27 BINDING SITE, designated SEQ ID:8857, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40098] Another function of GAM1338 is therefore inhibition of SNX27 (Accession NP_112180.4) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SNX27.

[40099] Speckle-type poz protein (SPOP, Accession NP_003554.1) is another GAM1338 target gene, herein designated TAR-

GET GENE. SPOP BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by SPOP, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SPOP BINDING SITE, designated SEQ ID:7212, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40100] Another function of GAM1338 is therefore inhibition of Speckle-type poz protein (SPOP, Accession NP_003554.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SPOP.

[40101] SQV7L (Accession XP_047287.1) is another GAM1338 target gene, herein designated TARGET GENE. SQV7L BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by SQV7L, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SQV7L BINDING SITE, designated SEQ ID:15016, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40102] Another function of GAM1338 is therefore inhibition of SQV7L (Accession XP_047287.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SQV7L.

[40103] SRISNF2L (Accession NP_055921.1) is another GAM1338 target gene, herein designated TARGET GENE. SRISNF2L BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SRISNF2L, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SRISNF2L BINDING SITE, designated SEQ ID:9707, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40104] Another function of GAM1338 is therefore inhibition of SRISNF2L (Accession NP_055921.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SRISNF2L.

[40105] Sarcalumenin (SRL, Accession XP_064152.3) is another GAM1338 target gene, herein designated TARGET GENE. SRL BINDING SITE1 and SRL BINDING SITE2 are target binding sites found in untranslated regions of mRNA en-

coded by SRL, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SRL BINDING SITE1 and SRL BINDING SITE2, designated SEQ ID:7583 and SEQ ID:9910 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40106] Another function of GAM1338 is therefore inhibition of Sarcalumenin (SRL, Accession XP_064152.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SRL.

[40107] Serine/arginine repetitive matrix 2 (SRRM2, Accession NP_057417.2) is another GAM1338 target gene, herein designated TARGET GENE. SRRM2 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by SRRM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SRRM2 BINDING SITE, designated SEQ ID:18975, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40108] Another function of GAM1338 is therefore inhibition of Serine/arginine repetitive matrix 2 (SRRM2, Accession NP_057417.2), a gene which RELATED NUCLEAR MATRIX PROTEIN. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SRRM2.

[40109] The function of SRRM2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Synovial sarcoma translocation, chromosome 18 (SS18, Accession NP_005628.1) is another GAM1338 target gene, herein designated TARGET GENE. SS18 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SS18, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SS18 BINDING SITE, designated SEQ ID:10975, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40110] Another function of GAM1338 is therefore inhibition of Synovial sarcoma translocation, chromosome 18 (SS18, Accession NP_005628.1), a gene which is a putative tran-

scriptional activator. and therefore is associated with Human synovial sarcomas. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Human synovial sarcomas., and of other diseases and clinical conditions associated with SS18.

[40111] The function of SS18 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Signal transducing adaptor molecule (sh3 domain and itam motif) 2 (STAM2, Accession NP_005834.3) is another GAM1338 target gene, herein designated TARGET GENE. STAM2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by STAM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of STAM2 BINDING SITE, designated SEQ ID:5920, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40112] Another function of GAM1338 is therefore inhibition of Signal transducing adaptor molecule (sh3 domain and itam motif) 2 (STAM2, Accession NP_005834.3) . Accord-

ingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with STAM2.

[40113] Start domain containing 4, sterol regulated (STARD4, Accession NP_631903.1) is another GAM1338 target gene, herein designated TARGET GENE. STARD4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by STARD4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of STARD4 BINDING SITE, designated SEQ ID:14279, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40114] Another function of GAM1338 is therefore inhibition of Start domain containing 4, sterol regulated (STARD4, Accession NP_631903.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with STARD4.

[40115] Staufen, rna binding protein (drosophila) (STAU, Accession NP_004593.1) is another GAM1338 target gene, herein designated TARGET GENE. STAU BINDING SITE is a target binding site found in the 5` untranslated region of multi-

ple transcripts of mRNA encoded by STAU, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of STAU BINDING SITE, designated SEQ ID:9365, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40116] Another function of GAM1338 is therefore inhibition of Staufen, rna binding protein (drosophila) (STAU, Accession NP_004593.1), a gene which may play a role in specific positioning of mrnas at given sites in the cell and in stimulating their translation at the site. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with STAU.

[40117] The function of STAU and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM37.1.Sulfotransferase, estrogen-preferring (STE, Accession NP_005411.1) is another GAM1338 target gene, herein designated TARGET GENE. STE BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by STE, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING

SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of STE BINDING SITE, designated SEQ ID:13898, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40118] Another function of GAM1338 is therefore inhibition of Sulfotransferase, estrogen-preferring (STE, Accession NP_005411.1), a gene which sulfates estrone and dehydroepiandrosterone, but not dopamine. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with STE.

[40119] The function of STE and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Six transmembrane epithelial antigen of prostate 2 (STEAP2, Accession NP_694544.1) is another GAM1338 target gene, herein designated TARGET GENE. STEAP2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by STEAP2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences

of STEAP2 BINDING SITE, designated SEQ ID:1413, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40120] Another function of GAM1338 is therefore inhibition of Six transmembrane epithelial antigen of prostate 2 (STEAP2, Accession NP_694544.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with STEAP2.

[40121] Stomatin (STOM, Accession NP_004090.3) is another GAM1338 target gene, herein designated TARGET GENE. STOM BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by STOM, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of STOM BINDING SITE, designated SEQ ID:4144, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40122] Another function of GAM1338 is therefore inhibition of Stomatin (STOM, Accession NP_004090.3) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated

with STOM.

[40123] Syntaxin binding protein 6 (amisyn) (STXBP6, Accession NP_054897.4) is another GAM1338 target gene, herein designated TARGET GENE. STXBP6 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by STXBP6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of STXBP6 BINDING SITE, designated SEQ ID:11916, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40124] Another function of GAM1338 is therefore inhibition of Syntaxin binding protein 6 (amisyn) (STXBP6, Accession NP_054897.4) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with STXBP6.

[40125] Synaptotagmin xi (SYT11, Accession NP_689493.2) is another GAM1338 target gene, herein designated TARGET GENE. SYT11 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SYT11, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4

illustrates the complementarity of the nucleotide sequences of SYT11 BINDING SITE, designated SEQ ID:1690, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40126] Another function of GAM1338 is therefore inhibition of Synaptotagmin xi (SYT11, Accession NP_689493.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SYT11.

[40127] Synaptotagmin xiii (SYT13, Accession NP_065877.1) is another GAM1338 target gene, herein designated TARGET GENE. SYT13 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SYT13, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SYT13 BINDING SITE, designated SEQ ID:19065, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40128] Another function of GAM1338 is therefore inhibition of Synaptotagmin xiii (SYT13, Accession NP_065877.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions as-

sociated with SYT13.

[40129] TADA3L (Accession NP_597814.1) is another GAM1338 target gene, herein designated TARGET GENE. TADA3L BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TADA3L, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TADA3L BINDING SITE, designated SEQ ID:10415, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40130] Another function of GAM1338 is therefore inhibition of TADA3L (Accession NP_597814.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TADA3L.

[40131] T-cell acute lymphocytic leukemia 1 (TAL1, Accession NP_003180.1) is another GAM1338 target gene, herein designated TARGET GENE. TAL1 BINDING SITE1 and TAL1 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by TAL1, corresponding to target binding sites such as BINDING SITE I, BINDING

SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TAL1 BINDING SITE1 and TAL1 BINDING SITE2, designated SEQ ID:7347 and SEQ ID:19155 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40132] Another function of GAM1338 is therefore inhibition of T-cell acute lymphocytic leukemia 1 (TAL1, Accession NP_003180.1), a gene which may help control cell growth and differentiation. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TAL1.

[40133] The function of TAL1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Tap binding protein (tapasin) (TAPBP, Accession NP_003181.3) is another GAM1338 target gene, herein designated TARGET GENE. TAPBP BINDING SITE1 through TAPBP BINDING SITE3 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by TAPBP, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of

the nucleotide sequences of TAPBP BINDING SITE1 through TAPBP BINDING SITE3, designated SEQ ID:6086, SEQ ID:8861 and SEQ ID:3109 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40134] Another function of GAM1338 is therefore inhibition of Tap binding protein (tapasin) (TAPBP, Accession NP_003181.3), a gene which is involved in MHC class I-restricted antigen processing. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TAPBP.

[40135] The function of TAPBP and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.Tyrosine aminotransferase (TAT, Accession NP_000344.1) is another GAM1338 target gene, herein designated TARGET GENE. TAT BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TAT, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TAT BINDING SITE, designated SEQ ID:20161, to the nucleotide sequence of GAM1338

RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40136] Another function of GAM1338 is therefore inhibition of Tyrosine aminotransferase (TAT, Accession NP_000344.1), a gene which is tyrosine aminotransferase and strongly similar to rat Rn.9947, which plays a role in gluconeogenesis. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TAT.

[40137] The function of TAT and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Tafazzin (cardiomyopathy, dilated 3a (x-linked); endocardial fibroelastosis 2; barth syndrome) (TAZ, Accession NP_851831.1) is another GAM1338 target gene, herein designated TARGET GENE. TAZ BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TAZ, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TAZ BINDING SITE, designated SEQ ID:14872, to the nucleotide sequence of GAM1338 RNA, herein des-

ignated GAM RNA, also designated SEQ ID:360.

[40138] Another function of GAM1338 is therefore inhibition of Tafazzin (cardiomyopathy, dilated 3a (x-linked); endocardial fibroelastosis 2; barth syndrome) (TAZ, Accession NP_851831.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TAZ.

[40139] Tbc1 domain family, member 5 (TBC1D5, Accession NP_055559.1) is another GAM1338 target gene, herein designated TARGET GENE. TBC1D5 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by TBC1D5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TBC1D5 BINDING SITE, designated SEQ ID:12382, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40140] Another function of GAM1338 is therefore inhibition of Tbc1 domain family, member 5 (TBC1D5, Accession NP_055559.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TBC1D5.

[40141] Titin-cap (telethonin) (TCAP, Accession NP_003664.1) is another GAM1338 target gene, herein designated TARGET GENE. TCAP BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TCAP, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TCAP BINDING SITE, designated SEQ ID:19403, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40142] Another function of GAM1338 is therefore inhibition of Titin-cap (telethonin) (TCAP, Accession NP_003664.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TCAP.

[40143] Transcription factor 2, hepatic; lf-b3; variant hepatic nuclear factor (TCF2, Accession NP_006472.1) is another GAM1338 target gene, herein designated TARGET GENE. TCF2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TCF2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the

nucleotide sequences of TCF2 BINDING SITE, designated SEQ ID:401, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40144] Another function of GAM1338 is therefore inhibition of Transcription factor 2, hepatic; lf-b3; variant hepatic nuclear factor (TCF2, Accession NP_006472.1), a gene which probably binds to the inverted palindrome 5'- gttaatnattaac- 3'. and therefore is associated with Maturity- onset diabetes of the young type 5 (mody5), familial hypoplastic glomerulocystic kidney disease (gckd). Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Maturity- onset diabetes of the young type 5 (mody5), familial hypoplastic glomerulocystic kidney disease (gckd), and of other diseases and clinical conditions associated with TCF2.

[40145] The function of TCF2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM144.1.T-cell, immune regulator 1, atpase, h+ transporting, lysosomal v0 protein a isoform 3 (TCIRG1, Accession NP_006010.2) is another GAM1338 target gene, herein designated TARGET GENE. TCIRG1 BINDING SITE is a target binding site found in the 5` untranslated region

of multiple transcripts of mRNA encoded by TCIRG1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TCIRG1 BINDING SITE, designated SEQ ID:7780, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40146] Another function of GAM1338 is therefore inhibition of T-cell, immune regulator 1, atpase, h+ transporting, lysosomal v0 protein a isoform 3 (TCIRG1, Accession NP_006010.2), a gene which seems to be directly involved in t cell activation. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TCIRG1.

[40147] The function of TCIRG1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM223.1.T-cell leukemia/lymphoma 6 (TCL6, Accession NP_036600.2) is another GAM1338 target gene, herein designated TARGET GENE. TCL6 BINDING SITE1 and TCL6 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by TCL6, corresponding to target binding sites

such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TCL6 BINDING SITE1 and TCL6 BINDING SITE2, designated SEQ ID:12973 and SEQ ID:12973 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40148] Another function of GAM1338 is therefore inhibition of T-cell leukemia/lymphoma 6 (TCL6, Accession NP_036600.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TCL6.

[40149] T-cell leukemia/lymphoma 6 (TCL6, Accession NP_065579.2) is another GAM1338 target gene, herein designated TARGET GENE. TCL6 BINDING SITE1 and TCL6 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by TCL6, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TCL6 BINDING SITE1 and TCL6 BINDING SITE2, designated SEQ ID:6911 and SEQ ID:12973 respectively, to the nucleotide sequence of GAM1338 RNA, herein desig-

nated GAM RNA, also designated SEQ ID:360.

[40150] Another function of GAM1338 is therefore inhibition of T-cell leukemia/lymphoma 6 (TCL6, Accession NP_065579.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TCL6.

[40151] T-cell leukemia/lymphoma 6 (TCL6, Accession NP_065578.2) is another GAM1338 target gene, herein designated TARGET GENE. TCL6 BINDING SITE1 and TCL6 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by TCL6, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TCL6 BINDING SITE1 and TCL6 BINDING SITE2, designated SEQ ID:6911 and SEQ ID:12973 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40152] Another function of GAM1338 is therefore inhibition of T-cell leukemia/lymphoma 6 (TCL6, Accession NP_065578.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TCL6.

[40153] TERA (Accession NP_067061.1) is another GAM1338 target gene, herein designated TARGET GENE. TERA BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TERA, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TERA BINDING SITE, designated SEQ ID:971, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40154] Another function of GAM1338 is therefore inhibition of TERA (Accession NP_067061.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TERA.

[40155] Telomeric repeat binding factor (nima-interacting) 1 (TERF1, Accession NP_003209.1) is another GAM1338 target gene, herein designated TARGET GENE. TERF1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TERF1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TERF1 BINDING SITE, designated

SEQ ID:13870, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40156] Another function of GAM1338 is therefore inhibition of Telomeric repeat binding factor (nima-interacting) 1 (TERF1, Accession NP_003209.1), a gene which negatively regulates telomere length, involves in regulation of the mitotic spindle. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TERF1.

[40157] The function of TERF1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Telomeric repeat binding factor (nima-interacting) 1 (TERF1, Accession NP_059523.1) is another GAM1338 target gene, herein designated TARGET GENE. TERF1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TERF1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TERF1 BINDING SITE, designated SEQ ID:13870, to the nucleotide sequence of

GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40158] Another function of GAM1338 is therefore inhibition of Telomeric repeat binding factor (nima-interacting) 1 (TERF1, Accession NP_059523.1), a gene which negatively regulates telomere length, involves in regulation of the mitotic spindle. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TERF1.

[40159] The function of TERF1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Telomeric repeat binding factor 2 (TERF2, Accession NP_005643.1) is another GAM1338 target gene, herein designated TARGET GENE. TERF2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TERF2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TERF2 BINDING SITE, designated SEQ ID:11659, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40160] Another function of GAM1338 is therefore inhibition of Telomeric repeat binding factor 2 (TERF2, Accession NP_005643.1), a gene which plays a key role in the protective activity of telomeres. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TERF2.

[40161] The function of TERF2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM133.2.Tgfb-induced factor 2 (tale family homeobox) (TGIF2, Accession NP_068581.1) is another GAM1338 target gene, herein designated TARGET GENE. TGIF2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TGIF2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TGIF2 BINDING SITE, designated SEQ ID:7274, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40162] Another function of GAM1338 is therefore inhibition of Tgfb-induced factor 2 (tale family homeobox) (TGIF2, Accession NP_068581.1) . Accordingly, utilities of GAM1338

include diagnosis, prevention and treatment of diseases and clinical conditions associated with TGIF2.

[40163] Tigger transposable element derived 6 (TIGD6, Accession NP_112215.1) is another GAM1338 target gene, herein designated TARGET GENE. TIGD6 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TIGD6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TIGD6 BINDING SITE, designated SEQ ID:17302, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40164] Another function of GAM1338 is therefore inhibition of Tigger transposable element derived 6 (TIGD6, Accession NP_112215.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TIGD6.

[40165] TIM50L (Accession XP_053074.2) is another GAM1338 target gene, herein designated TARGET GENE. TIM50L BINDING SITE1 and TIM50L BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by TIM50L, corresponding to target binding sites such as

BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TIM50L BINDING SITE1 and TIM50L BINDING SITE2, designated SEQ ID:7201 and SEQ ID:7571 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40166] Another function of GAM1338 is therefore inhibition of TIM50L (Accession XP_053074.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TIM50L.

[40167] Toll-like receptor 5 (TLR5, Accession NP_003259.2) is another GAM1338 target gene, herein designated TARGET GENE. TLR5 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by TLR5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TLR5 BINDING SITE, designated SEQ ID:16358, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40168] Another function of GAM1338 is therefore inhibition of Toll-like receptor 5 (TLR5, Accession NP_003259.2), a

gene which participates in the innate immune response to bacterial flagellins. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TLR5.

[40169] The function of TLR5 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM40.1.Transmembrane, cochlear expressed, 1 (TMC1, Accession NP_619636.2) is another GAM1338 target gene, herein designated TARGET GENE. TMC1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by TMC1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TMC1 BINDING SITE, designated SEQ ID:19429, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40170] Another function of GAM1338 is therefore inhibition of Transmembrane, cochlear expressed, 1 (TMC1, Accession NP_619636.2), a gene which is required for normal function of cochlear hair cells and therefore may be associated with Autosomal recessive nonsyndromic neurosensory

deafness and autosomal dominant nonsyndromic sensorineural hearing loss . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Autosomal recessive nonsyndromic neurosensory deafness and autosomal dominant nonsyndromic sensorineural hearing loss ., and of other diseases and clinical conditions associated with TMC1.

[40171] The function of TMC1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.TMEM14A (Accession NP_054770.1) is another GAM1338 target gene, herein designated TARGET GENE. TMEM14A BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by TMEM14A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TMEM14A BINDING SITE, designated SEQ ID:7622, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40172] Another function of GAM1338 is therefore inhibition of TMEM14A (Accession NP_054770.1) . Accordingly, utilities

of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TMEM14A.

[40173] Transmembrane protease, serine 3 (TMPRSS3, Accession NP_115780.1) is another GAM1338 target gene, herein designated TARGET GENE. TMPRSS3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TMPRSS3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TMPRSS3 BINDING SITE, designated SEQ ID:15133, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40174] Another function of GAM1338 is therefore inhibition of Transmembrane protease, serine 3 (TMPRSS3, Accession NP_115780.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TMPRSS3.

[40175] Transmembrane protease, serine 3 (TMPRSS3, Accession NP_076927.1) is another GAM1338 target gene, herein designated TARGET GENE. TMPRSS3 BINDING SITE is a target binding site found in the 3` untranslated region of

multiple transcripts of mRNA encoded by TMPRSS3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TMPRSS3 BINDING SITE, designated SEQ ID:15133, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40176] Another function of GAM1338 is therefore inhibition of Transmembrane protease, serine 3 (TMPRSS3, Accession NP_076927.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TMPRSS3.

[40177] Transmembrane protease, serine 3 (TMPRSS3, Accession NP_115777.1) is another GAM1338 target gene, herein designated TARGET GENE. TMPRSS3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TMPRSS3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TMPRSS3 BINDING SITE, designated SEQ ID:15133, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40178] Another function of GAM1338 is therefore inhibition of Transmembrane protease, serine 3 (TMPRSS3, Accession NP_115777.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TMPRSS3.

[40179] Tumor necrosis factor, alpha-induced protein 2 (TNFAIP2, Accession NP_006282.2) is another GAM1338 target gene, herein designated TARGET GENE. TNFAIP2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TNFAIP2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TNFAIP2 BINDING SITE, designated SEQ ID:14228, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40180] Another function of GAM1338 is therefore inhibition of Tumor necrosis factor, alpha-induced protein 2 (TNFAIP2, Accession NP_006282.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TNFAIP2.

[40181] Tumor necrosis factor receptor superfamily, member 10b (TNFRSF10B, Accession NP_003833.3) is another

GAM1338 target gene, herein designated TARGET GENE. TNFRSF10B BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TNFRSF10B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TNFRSF10B BINDING SITE, designated SEQ ID:9933, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40182] Another function of GAM1338 is therefore inhibition of Tumor necrosis factor receptor superfamily, member 10b (TNFRSF10B, Accession NP_003833.3), a gene which forms complex that induces apoptosis. and therefore may be associated with Squamous cell carcinoma . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Squamous cell carcinoma ., and of other diseases and clinical conditions associated with TNFRSF10B.

[40183] The function of TNFRSF10B and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Tumor necrosis factor receptor superfamily, member 10b (TNFRSF10B, Accession NP_671716.1)

is another GAM1338 target gene, herein designated TARGET GENE. TNFRSF10B BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TNFRSF10B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TNFRSF10B BINDING SITE, designated SEQ ID:9933, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40184] Another function of GAM1338 is therefore inhibition of Tumor necrosis factor receptor superfamily, member 10b (TNFRSF10B, Accession NP_671716.1), a gene which forms complex that induces apoptosis. and therefore may be associated with Squamous cell carcinoma . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Squamous cell carcinoma ., and of other diseases and clinical conditions associated with TNFRSF10B.

[40185] The function of TNFRSF10B and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Tumor necrosis factor receptor superfamily, member 11a, activator of nfkb (TNFRSF11A, Ac-

cession NP_003830.1) is another GAM1338 target gene, herein designated TARGET GENE. TNFRSF11A BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TNFRSF11A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TNFRSF11A BINDING SITE, designated SEQ ID:11190, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40186] Another function of GAM1338 is therefore inhibition of Tumor necrosis factor receptor superfamily, member 11a, activator of nfkb (TNFRSF11A, Accession NP_003830.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TNFRSF11A.

[40187] Tumor necrosis factor receptor superfamily, member 9 (TNFRSF9, Accession NP_001552.2) is another GAM1338 target gene, herein designated TARGET GENE. TNFRSF9 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TNFRSF9, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of TNFRSF9 BINDING SITE, designated SEQ ID:438, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40188] Another function of GAM1338 is therefore inhibition of Tumor necrosis factor receptor superfamily, member 9 (TNFRSF9, Accession NP_001552.2), a gene which inhibits proliferation of activated T lymphocytes. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TNFRSF9.

[40189] The function of TNFRSF9 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Torsin family 1, member b (torsin b) (TOR1B, Accession NP_055321.1) is another GAM1338 target gene, herein designated TARGET GENE. TOR1B BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TOR1B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TOR1B BINDING SITE, designated SEQ ID:2429, to the nu-

cleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40190] Another function of GAM1338 is therefore inhibition of Torsin family 1, member b (torsin b) (TOR1B, Accession NP_055321.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TOR1B.

[40191] Tumor protein p53 (li-fraumeni syndrome) (TP53, Accession NP_000537.2) is another GAM1338 target gene, herein designated TARGET GENE. TP53 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TP53, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TP53 BINDING SITE, designated SEQ ID:2118, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40192] Another function of GAM1338 is therefore inhibition of Tumor protein p53 (li-fraumeni syndrome) (TP53, Accession NP_000537.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TP53.

[40193] Thiopurine s-methyltransferase (TPMT, Accession NP_000358.1) is another GAM1338 target gene, herein designated TARGET GENE. TPMT BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TPMT, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TPMT BINDING SITE, designated SEQ ID:10218, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40194] Another function of GAM1338 is therefore inhibition of Thiopurine s-methyltransferase (TPMT, Accession NP_000358.1), a gene which catalyzes the s- methylation of thiopurine drugs such as 6- mercaptopurine. and therefore may be associated with Thiopurine s- methyl-transferase polymorphism. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Thiopurine s- methyltransferase polymorphism, and of other diseases and clinical conditions associated with TPMT.

[40195] The function of TPMT and its association with various diseases and clinical conditions, has been established by

previous studies, as described hereinabove with reference to GAM130.1.Tnf receptor-associated factor 5 (TRAF5, Accession NP_665702.1) is another GAM1338 target gene, herein designated TARGET GENE. TRAF5 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TRAF5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRAF5 BINDING SITE, designated SEQ ID:10175, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40196] Another function of GAM1338 is therefore inhibition of Tnf receptor-associated factor 5 (TRAF5, Accession NP_665702.1), a gene which Member of a family of proteins that interact with TNF receptors; binds the lymphotoxin beta receptor (LTBR). Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TRAF5.

[40197] The function of TRAF5 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM69.2.Tnf receptor-associated factor 5 (TRAF5, Ac-

cession NP_004610.1) is another GAM1338 target gene, herein designated TARGET GENE. TRAF5 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TRAF5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRAF5 BINDING SITE, designated SEQ ID:10175, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40198] Another function of GAM1338 is therefore inhibition of Tnf receptor-associated factor 5 (TRAF5, Accession NP_004610.1), a gene which Member of a family of proteins that interact with TNF receptors; binds the lymphotoxin beta receptor (LTBR). Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TRAF5.

[40199] The function of TRAF5 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM69.2.Tripartite motif-containing 16 (TRIM16, Accession NP_006461.2) is another GAM1338 target gene, herein designated TARGET GENE. TRIM16 BINDING SITE is

a target binding site found in the 3` untranslated region of mRNA encoded by TRIM16, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRIM16 BINDING SITE, designated SEQ ID:13321, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40200] Another function of GAM1338 is therefore inhibition of Tripartite motif-containing 16 (TRIM16, Accession NP_006461.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TRIM16.

[40201] Tripartite motif-containing 5 (TRIM5, Accession NP_149023.1) is another GAM1338 target gene, herein designated TARGET GENE. TRIM5 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TRIM5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRIM5 BINDING SITE, designated SEQ ID:9916, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA,

also designated SEQ ID:360.

[40202] Another function of GAM1338 is therefore inhibition of Tripartite motif-containing 5 (TRIM5, Accession NP_149023.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TRIM5.

[40203] Transient receptor potential cation channel, subfamily v, member 1 (TRPV1, Accession NP_542437.1) is another GAM1338 target gene, herein designated TARGET GENE. TRPV1 BINDING SITE1 and TRPV1 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by TRPV1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRPV1 BINDING SITE1 and TRPV1 BINDING SITE2, designated SEQ ID:1587 and SEQ ID:15897 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40204] Another function of GAM1338 is therefore inhibition of Transient receptor potential cation channel, subfamily v, member 1 (TRPV1, Accession NP_542437.1), a gene which functions as a receptor for capsaicin. Accordingly, utilities

of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TRPV1.

[40205] The function of TRPV1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Transient receptor potential cation channel, subfamily v, member 1 (TRPV1, Accession NP_542437.1) is another GAM1338 target gene, herein designated TARGET GENE. TRPV1 BINDING SITE1 and TRPV1 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by TRPV1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRPV1 BINDING SITE1 and TRPV1 BINDING SITE2, designated SEQ ID:15897 and SEQ ID:15897 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40206] Another function of GAM1338 is therefore inhibition of Transient receptor potential cation channel, subfamily v, member 1 (TRPV1, Accession NP_542437.1), a gene which functions as a receptor for capsaicin. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with TRPV1.

[40207] The function of TRPV1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Transient receptor potential cation channel, subfamily v, member 1 (TRPV1, Accession NP_061197.3) is another GAM1338 target gene, herein designated TARGET GENE. TRPV1 BINDING SITE1 and TRPV1 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by TRPV1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRPV1 BINDING SITE1 and TRPV1 BINDING SITE2, designated SEQ ID:15897 and SEQ ID:1587 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40208] Another function of GAM1338 is therefore inhibition of Transient receptor potential cation channel, subfamily v, member 1 (TRPV1, Accession NP_061197.3), a gene which functions as a receptor for capsaicin. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TRPV1.

[40209] The function of TRPV1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Transient receptor potential cation channel, subfamily v, member 1 (TRPV1, Accession NP_542436.1) is another GAM1338 target gene, herein designated TARGET GENE. TRPV1 BINDING SITE1 and TRPV1 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by TRPV1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRPV1 BINDING SITE1 and TRPV1 BINDING SITE2, designated SEQ ID:1587 and SEQ ID:1587 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40210] Another function of GAM1338 is therefore inhibition of Transient receptor potential cation channel, subfamily v, member 1 (TRPV1, Accession NP_542436.1), a gene which functions as a receptor for capsaicin. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TRPV1.

[40211] The function of TRPV1 and its association with various

diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Tspy-like (TSPYL, Accession XP_166325.1) is another GAM1338 target gene, herein designated TARGET GENE. TSPYL BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TSPYL, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TSPYL BINDING SITE, designated SEQ ID:9101, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40212] Another function of GAM1338 is therefore inhibition of Tspy-like (TSPYL, Accession XP_166325.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TSPYL.

[40213] TTY7 (Accession NP_114132.1) is another GAM1338 target gene, herein designated TARGET GENE. TTY7 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by TTY7, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the comple-

mentarity of the nucleotide sequences of TTY7 BINDING SITE, designated SEQ ID:16664, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40214] Another function of GAM1338 is therefore inhibition of TTY7 (Accession NP_114132.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TTY7.

[40215] TU12B1-TY (Accession NP_057659.1) is another GAM1338 target gene, herein designated TARGET GENE. TU12B1-TY BINDING SITE1 through TU12B1-TY BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by TU12B1-TY, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TU12B1-TY BINDING SITE1 through TU12B1-TY BINDING SITE3, designated SEQ ID:7327, SEQ ID:12270 and SEQ ID:17849 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40216] Another function of GAM1338 is therefore inhibition of TU12B1-TY (Accession NP_057659.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with TU12B1-TY.

[40217] Tubby homolog (mouse) (TUB, Accession NP_813977.1) is another GAM1338 target gene, herein designated TARGET GENE. TUB BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TUB, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TUB BINDING SITE, designated SEQ ID:10826, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40218] Another function of GAM1338 is therefore inhibition of Tubby homolog (mouse) (TUB, Accession NP_813977.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TUB.

[40219] Tubby homolog (mouse) (TUB, Accession NP_003311.2) is another GAM1338 target gene, herein designated TARGET GENE. TUB BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TUB, corresponding to a target binding

site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TUB BINDING SITE, designated SEQ ID:10826, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40220] Another function of GAM1338 is therefore inhibition of Tubby homolog (mouse) (TUB, Accession NP_003311.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TUB.

[40221] TUCAN (Accession NP_055774.1) is another GAM1338 target gene, herein designated TARGET GENE. TUCAN BINDING SITE1 and TUCAN BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by TUCAN, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TUCAN BINDING SITE1 and TUCAN BINDING SITE2, designated SEQ ID:2265 and SEQ ID:10630 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40222] Another function of GAM1338 is therefore inhibition of TUCAN (Accession NP_055774.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TUCAN.

[40223] Tuftelin 1 (TUFT1, Accession NP_064512.1) is another GAM1338 target gene, herein designated TARGET GENE. TUFT1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TUFT1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TUFT1 BINDING SITE, designated SEQ ID:19342, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40224] Another function of GAM1338 is therefore inhibition of Tuftelin 1 (TUFT1, Accession NP_064512.1), a gene which appears to play a role in cytokinesis, cell shape, and specialized functions such as secretion and capping. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TUFT1.

[40225] The function of TUFT1 and its association with various diseases and clinical conditions, has been established by

previous studies, as described hereinabove with reference to GAM136.1.TXL-2 (Accession NP_835231.1) is another GAM1338 target gene, herein designated TARGET GENE. TXL-2 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by TXL-2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TXL-2 BINDING SITE, designated SEQ ID:7572, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40226] Another function of GAM1338 is therefore inhibition of TXL-2 (Accession NP_835231.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TXL-2.

[40227] Thioredoxin-like 2 (TXNL2, Accession NP_006532.1) is another GAM1338 target gene, herein designated TARGET GENE. TXNL2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TXNL2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TXNL2 BINDING SITE, designated SEQ ID:1413,

to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40228] Another function of GAM1338 is therefore inhibition of Thioredoxin-like 2 (TXNL2, Accession NP_006532.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TXNL2.

[40229] U1SNRNPBP (Accession NP_851034.1) is another GAM1338 target gene, herein designated TARGET GENE. U1SNRNPBP BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by U1SNRNPBP, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of U1SNRNPBP BINDING SITE, designated SEQ ID:18791, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40230] Another function of GAM1338 is therefore inhibition of U1SNRNPBP (Accession NP_851034.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with U1SNRNPBP.

[40231] U1SNRNPBP (Accession NP_851030.1) is another GAM1338 target gene, herein designated TARGET GENE. U1SNRNPBP BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by U1SNRNPBP, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of U1SNRNPBP BINDING SITE, designated SEQ ID:18791, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40232] Another function of GAM1338 is therefore inhibition of U1SNRNPBP (Accession NP_851030.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with U1SNRNPBP.

[40233] U1SNRNPBP (Accession NP_008951.1) is another GAM1338 target gene, herein designated TARGET GENE. U1SNRNPBP BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by U1SNRNPBP, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the comple-

mentarity of the nucleotide sequences of U1SNRNPBP BINDING SITE, designated SEQ ID:18791, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40234] Another function of GAM1338 is therefore inhibition of U1SNRNPBP (Accession NP_008951.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with U1SNRNPBP.

[40235] UBCE7IP5 (Accession NP_055763.1) is another GAM1338 target gene, herein designated TARGET GENE. UBCE7IP5 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by UBCE7IP5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of UBCE7IP5 BINDING SITE, designated SEQ ID:2287, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40236] Another function of GAM1338 is therefore inhibition of UBCE7IP5 (Accession NP_055763.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

UBCE7IP5.

[40237] Ubiquitin-conjugating enzyme e2l 3 (UBE2L3, Accession NP_003338.1) is another GAM1338 target gene, herein designated TARGET GENE. UBE2L3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by UBE2L3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of UBE2L3 BINDING SITE, designated SEQ ID:11811, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40238] Another function of GAM1338 is therefore inhibition of Ubiquitin-conjugating enzyme e2l 3 (UBE2L3, Accession NP_003338.1), a gene which catalyzes the covalent attachment of ubiquitin to other proteins. and therefore may be associated with Parkinson disease. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Parkinson disease, and of other diseases and clinical conditions associated with UBE2L3.

[40239] The function of UBE2L3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference

to GAM169.1.Udp-glucose dehydrogenase (UGDH, Accession NP_003350.1) is another GAM1338 target gene, herein designated TARGET GENE. UGDH BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by UGDH, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of UGDH BINDING SITE, designated SEQ ID:12092, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40240] Another function of GAM1338 is therefore inhibition of Udp-glucose dehydrogenase (UGDH, Accession NP_003350.1), a gene which is an UDP- glucose dehydrogenase. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with UGDH.

[40241] The function of UGDH and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM69.2.Uridine monophosphate synthetase (orotate phosphoribosyl transferase and orotidine-5'-decarboxylase) (UMPS, Accession NP_000364.1) is an-

other GAM1338 target gene, herein designated TARGET GENE. UMPS BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by UMPS, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of UMPS BINDING SITE, designated SEQ ID:19428, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40242] Another function of GAM1338 is therefore inhibition of Uridine monophosphate synthetase (orotate phosphoribosyl transferase and orotidine-5'-decarboxylase) (UMPS, Accession NP_000364.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with UMPS.

[40243] Ubiquitin specific protease 22 (USP22, Accession XP_042698.2) is another GAM1338 target gene, herein designated TARGET GENE. USP22 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by USP22, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of USP22 BINDING SITE, designated

SEQ ID:20055, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40244] Another function of GAM1338 is therefore inhibition of Ubiquitin specific protease 22 (USP22, Accession XP_042698.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with USP22.

[40245] VDU1 (Accession NP_055832.2) is another GAM1338 target gene, herein designated TARGET GENE. VDU1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by VDU1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of VDU1 BINDING SITE, designated SEQ ID:794, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40246] Another function of GAM1338 is therefore inhibition of VDU1 (Accession NP_055832.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with VDU1.

[40247] Von hippel-lindau syndrome (VHL, Accession

NP_000542.1) is another GAM1338 target gene, herein designated TARGET GENE. VHL BINDING SITE1 and VHL BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by VHL, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of VHL BINDING SITE1 and VHL BINDING SITE2, designated SEQ ID:19946 and SEQ ID:969 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40248] Another function of GAM1338 is therefore inhibition of Von hippel-lindau syndrome (VHL, Accession NP_000542.1), a gene which may control rna stability through the selective degradation of rna- bound proteins. and therefore is associated with Von hippel- lindau disease. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Von hippel- lindau disease, and of other diseases and clinical conditions associated with VHL.

[40249] The function of VHL and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference

to GAM72.1.Vasoactive intestinal peptide receptor 2 (VIPR2, Accession NP_003373.2) is another GAM1338 target gene, herein designated TARGET GENE. VIPR2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by VIPR2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of VIPR2 BINDING SITE, designated SEQ ID:861, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40250] Another function of GAM1338 is therefore inhibition of Vasoactive intestinal peptide receptor 2 (VIPR2, Accession NP_003373.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with VIPR2.

[40251] Vesicle transport through interaction with t-snares homolog 1a (yeast) (VTI1A, Accession NP_660207.1) is another GAM1338 target gene, herein designated TARGET GENE. VTI1A BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by VTI1A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4

illustrates the complementarity of the nucleotide sequences of VTI1A BINDING SITE, designated SEQ ID:1472, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40252] Another function of GAM1338 is therefore inhibition of Vesicle transport through interaction with t-snares homolog 1a (yeast) (VTI1A, Accession NP_660207.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with VTI1A.

[40253] Williams beuren syndrome chromosome region 18 (WBSCR18, Accession NP_115693.2) is another GAM1338 target gene, herein designated TARGET GENE. WBSCR18 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by WBSCR18, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of WBSCR18 BINDING SITE, designated SEQ ID:10631, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40254] Another function of GAM1338 is therefore inhibition of Williams beuren syndrome chromosome region 18

(WBSCR18, Accession NP_115693.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with WB-SCR18.

[40255] Wolf-hirschhorn syndrome candidate 1 (WHSC1, Accession NP_579889.1) is another GAM1338 target gene, herein designated TARGET GENE. WHSC1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by WHSC1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of WHSC1 BINDING SITE, designated SEQ ID:12602, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40256] Another function of GAM1338 is therefore inhibition of Wolf-hirschhorn syndrome candidate 1 (WHSC1, Accession NP_579889.1), a gene which binds covalently to and repairs g/t mismatches. and therefore may be associated with Wolf- hirschhorn syndrome. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of Wolf- hirschhorn syndrome, and of other diseases and clinical conditions associated with WHSC1.

[40257] The function of WHSC1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.X-ray repair complementing defective repair in chinese hamster cells 2 (XRCC2, Accession NP_005422.1) is another GAM1338 target gene, herein designated TARGET GENE. XRCC2 BINDING SITE1 through XRCC2 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by XRCC2, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of XRCC2 BINDING SITE1 through XRCC2 BINDING SITE3, designated SEQ ID:16920, SEQ ID:19967 and SEQ ID:6034 respectively, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40258] Another function of GAM1338 is therefore inhibition of X-ray repair complementing defective repair in chinese hamster cells 2 (XRCC2, Accession NP_005422.1), a gene which involves in the homologous recombination repair (hrr) pathway of double- stranded dna. Accordingly, utilities of GAM1338 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with XRCC2.

[40259] The function of XRCC2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM72.1.V-yes-1 yamaguchi sarcoma viral oncogene homolog 1 (YES1, Accession NP_005424.1) is another GAM1338 target gene, herein designated TARGET GENE. YES1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by YES1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of YES1 BINDING SITE, designated SEQ ID:18699, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40260] Another function of GAM1338 is therefore inhibition of V-yes-1 yamaguchi sarcoma viral oncogene homolog 1 (YES1, Accession NP_005424.1), a gene which is a putative protein- tyrosine kinase. Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with YES1.

[40261] The function of YES1 and its association with various dis-

eases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.ZAP (Accession NP_064504.2) is another GAM1338 target gene, herein designated TARGET GENE. ZAP BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ZAP, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZAP BINDING SITE, designated SEQ ID:19083, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40262] Another function of GAM1338 is therefore inhibition of ZAP (Accession NP_064504.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZAP.

[40263] ZFP30 (Accession NP_055713.1) is another GAM1338 target gene, herein designated TARGET GENE. ZFP30 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZFP30, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZFP30

BINDING SITE, designated SEQ ID:432, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40264] Another function of GAM1338 is therefore inhibition of ZFP30 (Accession NP_055713.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZFP30.

[40265] ZFP42 (Accession NP_777560.1) is another GAM1338 target gene, herein designated TARGET GENE. ZFP42 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZFP42, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZFP42 BINDING SITE, designated SEQ ID:6576, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40266] Another function of GAM1338 is therefore inhibition of ZFP42 (Accession NP_777560.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZFP42.

[40267] Zinc finger protein 64 homolog (mouse) (ZFP64, Accession NP_071371.2) is another GAM1338 target gene, herein

designated TARGET GENE. ZFP64 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ZFP64, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZFP64 BINDING SITE, designated SEQ ID:13869, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40268] Another function of GAM1338 is therefore inhibition of Zinc finger protein 64 homolog (mouse) (ZFP64, Accession NP_071371.2) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZFP64.

[40269] Zinc finger protein 64 homolog (mouse) (ZFP64, Accession NP_060667.1) is another GAM1338 target gene, herein designated TARGET GENE. ZFP64 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ZFP64, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZFP64 BINDING SITE, designated SEQ ID:13869, to the nucleotide

sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40270] Another function of GAM1338 is therefore inhibition of Zinc finger protein 64 homolog (mouse) (ZFP64, Accession NP_060667.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZFP64.

[40271] ZMYND17 (Accession NP_848546.1) is another GAM1338 target gene, herein designated TARGET GENE. ZMYND17 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZMYND17, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZMYND17 BINDING SITE, designated SEQ ID:11022, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40272] Another function of GAM1338 is therefore inhibition of ZMYND17 (Accession NP_848546.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZMYND17.

[40273] Zinc finger protein 264 (ZNF264, Accession NP_003408.1)

is another GAM1338 target gene, herein designated TARGET GENE. ZNF264 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZNF264, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF264 BINDING SITE, designated SEQ ID:438, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40274] Another function of GAM1338 is therefore inhibition of Zinc finger protein 264 (ZNF264, Accession NP_003408.1). Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF264.

[40275] Zinc finger protein 273 (ZNF273, Accession XP_088082.1) is another GAM1338 target gene, herein designated TARGET GENE. ZNF273 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZNF273, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF273 BINDING SITE, designated SEQ ID:19693, to the nucleotide sequence of GAM1338

RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40276] Another function of GAM1338 is therefore inhibition of Zinc finger protein 273 (ZNF273, Accession XP_088082.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF273.

[40277] Zinc finger protein 339 (ZNF339, Accession NP_067043.1) is another GAM1338 target gene, herein designated TARGET GENE. ZNF339 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZNF339, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF339 BINDING SITE, designated SEQ ID:9097, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40278] Another function of GAM1338 is therefore inhibition of Zinc finger protein 339 (ZNF339, Accession NP_067043.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF339.

[40279] Zinc finger protein 345 (ZNF345, Accession NP_003410.1) is another GAM1338 target gene, herein designated TARGET GENE. ZNF345 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZNF345, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF345 BINDING SITE, designated SEQ ID:11758, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40280] Another function of GAM1338 is therefore inhibition of Zinc finger protein 345 (ZNF345, Accession NP_003410.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF345.

[40281] Zinc finger protein 398 (ZNF398, Accession NP_065832.1) is another GAM1338 target gene, herein designated TARGET GENE. ZNF398 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by ZNF398, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the comple-

mentarity of the nucleotide sequences of ZNF398 BINDING SITE, designated SEQ ID:9774, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40282] Another function of GAM1338 is therefore inhibition of Zinc finger protein 398 (ZNF398, Accession NP_065832.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF398.

[40283] ZNF432 (Accession NP_055465.1) is another GAM1338 target gene, herein designated TARGET GENE. ZNF432 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZNF432, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF432 BINDING SITE, designated SEQ ID:7826, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40284] Another function of GAM1338 is therefore inhibition of ZNF432 (Accession NP_055465.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

ZNF432.

[40285] ZNF440 (Accession NP_689570.1) is another GAM1338 target gene, herein designated TARGET GENE. ZNF440 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZNF440, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF440 BINDING SITE, designated SEQ ID:11659, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40286] Another function of GAM1338 is therefore inhibition of ZNF440 (Accession NP_689570.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF440.

[40287] Zinc finger protein 70 (cos17) (ZNF70, Accession NP_852101.1) is another GAM1338 target gene, herein designated TARGET GENE. ZNF70 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ZNF70, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates

the complementarity of the nucleotide sequences of ZNF70 BINDING SITE, designated SEQ ID:18371, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40288] Another function of GAM1338 is therefore inhibition of Zinc finger protein 70 (cos17) (ZNF70, Accession NP_852101.1) . Accordingly, utilities of GAM1338 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF70.

[40289] Zinc finger protein 70 (cos17) (ZNF70, Accession NP_068735.1) is another GAM1338 target gene, herein designated TARGET GENE. ZNF70 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ZNF70, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF70 BINDING SITE, designated SEQ ID:18371, to the nucleotide sequence of GAM1338 RNA, herein designated GAM RNA, also designated SEQ ID:360.

[40290] Another function of GAM1338 is therefore inhibition of Zinc finger protein 70 (cos17) (ZNF70, Accession NP_068735.1) . Accordingly, utilities of GAM1338 include

diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF70.

[40291]

[40292] Fig. 8 further provides a conceptual description of a novel bioinformatically detected of the present invention, referred to here as Genomic Address Messenger 2033 (GAM2033), which modulates expression of respective target genes thereof, the function and utility of which target genes is known in the art.

[40293] GAM2033 is a novel bioinformatically detected regulatory, non protein coding, micro RNA (miRNA) gene. The method by which GAM2033 was detected is described hereinabove with reference to Figs. 8-15.

[40294] GAM2033 gene, herein designated GAM GENE, and GAM2033 target gene, herein designated TARGET GENE, are human genes contained in the human genome.

[40295] GAM2033 gene encodes a GAM2033 precursor RNA, herein designated GAM PRECURSOR RNA. Similar to other miRNA genes, and unlike most ordinary genes, GAM2033 precursor RNA does not encode a protein. A nucleotide sequence identical or highly similar to the nucleotide sequence of GAM2033 precursor RNA is designated SEQ ID:117, and is provided hereinbelow with reference to the

sequence listing part.

[40296] GAM2033 precursor RNA folds onto itself, forming GAM2033 folded precursor RNA, herein designated GAM FOLDED PRECURSOR RNA, which has a two-dimensional `hairpin structure`. As is well known in the art, this `hairpin structure`, is typical of RNA encoded by miRNA genes, and is due to the fact that the nucleotide sequence of the first half of the RNA encoded by a miRNA gene is an accurate or partial inversed-reversed sequence of the nucleotide sequence of the second half thereof.

[40297] GAM2033 precursor RNA folds onto itself, forming GAM2033 folded precursor RNA, herein designated GAM FOLDED PRECURSOR RNA, which has a two-dimensional `hairpin structure`. As is well known in the art, this `hairpin structure`, is typical of RNA encoded by miRNA genes, and is due to the fact that the nucleotide sequence of the first half of the RNA encoded by a miRNA gene is an accurate or partial reverse-complementary sequence of the nucleotide sequence of the second half thereof.

[40298] Nucleotide sequence of GAM2033 precursor RNA, designated SEQ-ID: 117, and a schematic representation of a predicted secondary folding of GAM2033 folded precursor RNA are further described with reference to Table 2,

hereby incorporated by reference.

[40299] An enzyme complex designated DICER COMPLEX, `dices` the GAM2033 folded precursor RNA into GAM2033 RNA, herein designated GAM RNA, a single stranded ~22 nt long RNA segment. As is known in the art, `dicing` of a hairpin structured RNA precursor product into a short ~22nt RNA segment is catalyzed by an enzyme complex comprising an enzyme called Dicer together with other necessary proteins. A probable (GAM Prediction Accuracy Group: C) nucleotide sequence of GAM2033 RNA is designated SEQ ID:305, and is provided hereinbelow with references to the sequence listing part and Table 3, hereby incorporated by reference.

[40300] GAM2033 target gene, herein designated TARGET GENE, encodes a corresponding messenger RNA, GAM2033 target RNA, herein designated GAM TARGET RNA. GAM2033 target RNA comprises three regions, as is typical of mRNA of a protein coding gene: a 5` untranslated region, a protein coding region and a 3` untranslated region, designated 5`UTR, PROTEIN CODING and 3`UTR respectively.

[40301] GAM2033 RNA, herein designated GAM RNA, binds complementarily to one or more target binding sites located in untranslated regions of GAM2033 target RNA, herein des-

ignated GAM TARGET RNA. This complementary binding is due to the fact that the nucleotide sequence of GAM2033 RNA is an accurate or a partial inversed-reversed sequence of the nucleotide sequence of each of the target binding sites. As an illustration, Fig. 8 shows three such target binding sites, designated BINDING SITE I, BINDING SITE II and BINDING SITE III respectively. It is appreciated that the number of target binding sites shown in Fig. 8 is meant as an illustration only, and is not meant to be limiting GAM2033 RNA may have a different number of target binding sites in untranslated regions of a GAM2033 target RNA. It is further appreciated that while Fig. 8 depicts target binding sites in the 3`UTR region, this is meant as an example only these target binding sites may be located in the 3`UTR region, the 5`UTR region, or in both 3`UTR and 5`UTR regions.

[40302] The complementary binding of GAM2033 RNA, herein designated GAM RNA, to target binding sites on GAM2033 target RNA, herein designated GAM TARGET RNA, such as BINDING SITE I, BINDING SITE II and BINDING SITE III, inhibits translation of GAM2033 target RNA into GAM2033 target protein, herein designated GAM TARGET PROTEIN. GAM target protein is therefore outlined by a broken line.

[40303] It is appreciated that GAM2033 target gene, herein designated TARGET GENE, in fact represents a plurality of GAM2033 target genes. The mRNA of each one of this plurality of GAM2033 target genes comprises one or more target binding sites, each having a nucleotide sequence which is at least partly complementary to GAM2033 RNA, herein designated GAM RNA, and which when bound by GAM2033 RNA causes inhibition of translation of respective one or more GAM2033 target proteins.

[40304] It is further appreciated by one skilled in the art that the mode of translational inhibition illustrated by Fig. 8 with specific reference to translational inhibition exerted by GAM2033 gene, herein designated GAM GENE, on one or more GAM2033 target genes, herein collectively designated TARGET GENE, is common to other known miRNA genes. As mentioned hereinabove with reference to the background section, although a specific complementary binding site has been demonstrated only for some of the known miRNA genes (primarily Lin-4 and Let-7), all other recently discovered miRNA genes are also believed by those skilled in the art to modulate expression of other genes by complementary binding, although specific complementary binding sites of these other miRNA genes have

not yet been found (Ruvkun G., Perspective: Glimpses of a tiny RNA world, Science 294,779 (2001)).

[40305] It is appreciated that specific functions and accordingly utilities of GAM2033 correlate with, and may be deduced from, the identity of the target genes which GAM2033 binds and inhibits, and the function of these target genes, as elaborated hereinbelow.

[40306]

[40307]

[40308] AGS3 (Accession XP_054763.1) is a GAM2033 target gene, herein designated TARGET GENE. AGS3 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by AGS3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of AGS3 BINDING SITE, designated SEQ ID:749, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40309] A function of GAM2033 is therefore inhibition of AGS3 (Accession XP_054763.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of

diseases and clinical conditions associated with AGS3.

[40310] Adenylate kinase 5 (AK5, Accession NP_036225.2) is another GAM2033 target gene, herein designated TARGET GENE. AK5 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by AK5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of AK5 BINDING SITE, designated SEQ ID:8265, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40311] Another function of GAM2033 is therefore inhibition of Adenylate kinase 5 (AK5, Accession NP_036225.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with AK5.

[40312] Amyotrophic lateral sclerosis 2 (juvenile) chromosome region, candidate 3 (ALS2CR3, Accession NP_055864.1) is another GAM2033 target gene, herein designated TARGET GENE. ALS2CR3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ALS2CR3, corresponding to a target binding site such as

BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ALS2CR3 BINDING SITE, designated SEQ ID:735, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40313] Another function of GAM2033 is therefore inhibition of Amyotrophic lateral sclerosis 2 (juvenile) chromosome region, candidate 3 (ALS2CR3, Accession NP_055864.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ALS2CR3.

[40314] Angiopoietin 1 (ANGPT1, Accession NP_001137.2) is another GAM2033 target gene, herein designated TARGET GENE. ANGPT1 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by ANGPT1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ANGPT1 BINDING SITE, designated SEQ ID:19390, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40315] Another function of GAM2033 is therefore inhibition of

Angiopoietin 1 (ANGPT1, Accession NP_001137.2), a gene which binds and activates tie2 receptor by inducing its tyrosine phosphorylation. and therefore may be associated with Tumor. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of Tumor., and of other diseases and clinical conditions associated with ANGPT1.

[40316] The function of ANGPT1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM205.2.Angiopoietin 1 (ANGPT1, Accession NP_647451.1) is another GAM2033 target gene, herein designated TARGET GENE. ANGPT1 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by ANGPT1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ANGPT1 BINDING SITE, designated SEQ ID:19390, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40317] Another function of GAM2033 is therefore inhibition of Angiopoietin 1 (ANGPT1, Accession NP_647451.1), a gene which binds and activates tie2 receptor by inducing its ty-

rosine phosphorylation. and therefore may be associated with Tumor. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of Tumor., and of other diseases and clinical conditions associated with ANGPT1.

[40318] The function of ANGPT1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM205.2.ANKFY1 (Accession NP_057460.2) is another GAM2033 target gene, herein designated TARGET GENE. ANKFY1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ANKFY1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ANKFY1 BINDING SITE, designated SEQ ID:1403, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40319] Another function of GAM2033 is therefore inhibition of ANKFY1 (Accession NP_057460.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ANKFY1.

[40320] Aquaporin 6, kidney specific (AQP6, Accession NP_001643.1) is another GAM2033 target gene, herein designated TARGET GENE. AQP6 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by AQP6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of AQP6 BINDING SITE, designated SEQ ID:1506, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40321] Another function of GAM2033 is therefore inhibition of Aquaporin 6, kidney specific (AQP6, Accession NP_001643.1), a gene which participates in distinct physiologic function such as glomerular filtration, tubular endocytosis, and acid- base metabolism. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with AQP6.

[40322] The function of AQP6 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM51.1.Aquaporin 6, kidney specific (AQP6, Acces-

sion NP_445738.1) is another GAM2033 target gene, herein designated TARGET GENE. AQP6 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by AQP6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of AQP6 BINDING SITE, designated SEQ ID:1506, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40323] Another function of GAM2033 is therefore inhibition of Aquaporin 6, kidney specific (AQP6, Accession NP_445738.1), a gene which participates in distinct physiologic function such as glomerular filtration, tubular endocytosis, and acid- base metabolism. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with AQP6.

[40324] The function of AQP6 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM51.1.B7-H4 (Accession NP_078902.1) is another GAM2033 target gene, herein designated TARGET GENE.

B7-H4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by B7-H4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of B7-H4 BINDING SITE, designated SEQ ID:13436, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40325] Another function of GAM2033 is therefore inhibition of B7-H4 (Accession NP_078902.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with B7-H4.

[40326] Breast carcinoma amplified sequence 1 (BCAS1, Accession NP_003648.1) is another GAM2033 target gene, herein designated TARGET GENE. BCAS1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by BCAS1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BCAS1 BINDING SITE, designated SEQ ID:8961, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40327] Another function of GAM2033 is therefore inhibition of Breast carcinoma amplified sequence 1 (BCAS1, Accession NP_003648.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with BCAS1.

[40328] Basic, immunoglobulin-like variable motif containing (BIVM, Accession NP_060163.2) is another GAM2033 target gene, herein designated TARGET GENE. BIVM BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by BIVM, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BIVM BINDING SITE, designated SEQ ID:19466, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40329] Another function of GAM2033 is therefore inhibition of Basic, immunoglobulin-like variable motif containing (BIVM, Accession NP_060163.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with BIVM.

[40330] C13orf17 (Accession NP_060655.1) is another GAM2033 target gene, herein designated TARGET GENE. C13orf17

BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C13orf17, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C13orf17 BINDING SITE, designated SEQ ID:5972, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40331] Another function of GAM2033 is therefore inhibition of C13orf17 (Accession NP_060655.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C13orf17.

[40332] Chromosome 20 open reading frame 110 (C20orf110, Accession XP_086728.2) is another GAM2033 target gene, herein designated TARGET GENE. C20orf110 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C20orf110, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C20orf110 BINDING SITE, designated SEQ ID:2658, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA,

also designated SEQ ID:305.

[40333] Another function of GAM2033 is therefore inhibition of Chromosome 20 open reading frame 110 (C20orf110, Accession XP_086728.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C20orf110.

[40334] Chromosome 2 open reading frame 7 (C2orf7, Accession NP_115695.1) is another GAM2033 target gene, herein designated TARGET GENE. C2orf7 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C2orf7, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C2orf7 BINDING SITE, designated SEQ ID:7328, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40335] Another function of GAM2033 is therefore inhibition of Chromosome 2 open reading frame 7 (C2orf7, Accession NP_115695.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C2orf7.

[40336] C6orf69 (Accession NP_775833.1) is another GAM2033

target gene, herein designated TARGET GENE. C6orf69 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C6orf69, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C6orf69 BINDING SITE, designated SEQ ID:2839, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40337] Another function of GAM2033 is therefore inhibition of C6orf69 (Accession NP_775833.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C6orf69.

[40338] C6orf76 (Accession NP_079083.1) is another GAM2033 target gene, herein designated TARGET GENE. C6orf76 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C6orf76, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C6orf76 BINDING SITE, designated SEQ ID:6766, to the nucleotide sequence of GAM2033 RNA, herein designated

GAM RNA, also designated SEQ ID:305.

[40339] Another function of GAM2033 is therefore inhibition of C6orf76 (Accession NP_079083.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C6orf76.

[40340] Reserved (C8orf6, Accession NP_663631.1) is another GAM2033 target gene, herein designated TARGET GENE. C8orf6 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by C8orf6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C8orf6 BINDING SITE, designated SEQ ID:2293, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40341] Another function of GAM2033 is therefore inhibition of Reserved (C8orf6, Accession NP_663631.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C8orf6.

[40342] Cas-br-m (murine) ecotropic retroviral transforming sequence (CBL, Accession NP_005179.1) is another

GAM2033 target gene, herein designated TARGET GENE. CBL BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CBL, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CBL BINDING SITE, designated SEQ ID:1024, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40343] Another function of GAM2033 is therefore inhibition of Cas-br-m (murine) ecotropic retroviral transforming sequence (CBL, Accession NP_005179.1), a gene which may modify receptor tyrosine kinase- mediated signal transduction. and therefore may be associated with B- lineage lymphomas. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of B- lineage lymphomas., and of other diseases and clinical conditions associated with CBL.

[40344] The function of CBL and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM767.1.Chromobox homolog 8 (pc class homolog, drosophila) (CBX8, Accession NP_065700.1) is another

GAM2033 target gene, herein designated TARGET GENE. CBX8 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CBX8, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CBX8 BINDING SITE, designated SEQ ID:14537, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40345] Another function of GAM2033 is therefore inhibition of Chromobox homolog 8 (pc class homolog, drosophila) (CBX8, Accession NP_065700.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CBX8.

[40346] Cholecystokinin a receptor (CCKAR, Accession NP_000721.1) is another GAM2033 target gene, herein designated TARGET GENE. CCKAR BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by CCKAR, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CCKAR BINDING SITE, designated SEQ ID:7362, to the nucleotide sequence of GAM2033

RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40347] Another function of GAM2033 is therefore inhibition of Cholecystokinin a receptor (CCKAR, Accession NP_000721.1), a gene which Cholecystokinin A receptor, a G protein- coupled receptor; regulates gallbladder contraction and secretion of pancreatic enzymes. and therefore may be associated with Diabetes and obesity. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of Diabetes and obesity., and of other diseases and clinical conditions associated with CCKAR.

[40348] The function of CCKAR and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM401.1.Cd8 antigen, beta polypeptide 1 (p37) (CD8B1, Accession NP_742097.1) is another GAM2033 target gene, herein designated TARGET GENE. CD8B1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CD8B1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CD8B1 BINDING SITE, designated

SEQ ID:16062, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40349] Another function of GAM2033 is therefore inhibition of Cd8 antigen, beta polypeptide 1 (p37) (CD8B1, Accession NP_742097.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CD8B1.

[40350] Cd8 antigen, beta polypeptide 1 (p37) (CD8B1, Accession NP_004922.1) is another GAM2033 target gene, herein designated TARGET GENE. CD8B1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CD8B1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CD8B1 BINDING SITE, designated SEQ ID:16062, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40351] Another function of GAM2033 is therefore inhibition of Cd8 antigen, beta polypeptide 1 (p37) (CD8B1, Accession NP_004922.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clini-

cal conditions associated with CD8B1.

[40352] Cadherin 3, type 1, p-cadherin (placental) (CDH3, Accession NP_001784.2) is another GAM2033 target gene, herein designated TARGET GENE. CDH3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CDH3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CDH3 BINDING SITE, designated SEQ ID:19023, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40353] Another function of GAM2033 is therefore inhibition of Cadherin 3, type 1, p-cadherin (placental) (CDH3, Accession NP_001784.2), a gene which is a calcium dependent cell adhesion protein. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CDH3.

[40354] The function of CDH3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM385.2.Cadherin 6, type 2, k-cadherin (fetal kidney) (CDH6, Accession NP_004923.1) is another GAM2033 tar-

get gene, herein designated TARGET GENE. CDH6 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by CDH6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CDH6 BINDING SITE, designated SEQ ID:19553, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40355] Another function of GAM2033 is therefore inhibition of Cadherin 6, type 2, k-cadherin (fetal kidney) (CDH6, Accession NP_004923.1), a gene which is a calcium dependent cell adhesion protein. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CDH6.

[40356] The function of CDH6 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM282.2.CG012 (Accession XP_096710.1) is another GAM2033 target gene, herein designated TARGET GENE. CG012 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by CG012, corresponding to a target binding site such as BINDING SITE

I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CG012 BINDING SITE, designated SEQ ID:7096, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40357] Another function of GAM2033 is therefore inhibition of CG012 (Accession XP_096710.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CG012.

[40358] CGI-19 (Accession NP_057032.2) is another GAM2033 target gene, herein designated TARGET GENE. CGI-19 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by CGI-19, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CGI-19 BINDING SITE, designated SEQ ID:12830, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40359] Another function of GAM2033 is therefore inhibition of CGI-19 (Accession NP_057032.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CGI-19.

[40360] CGI-37 (Accession NP_057185.1) is another GAM2033 target gene, herein designated TARGET GENE. CGI-37 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CGI-37, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CGI-37 BINDING SITE, designated SEQ ID:13579, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40361] Another function of GAM2033 is therefore inhibition of CGI-37 (Accession NP_057185.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CGI-37.

[40362] Claudin 14 (CLDN14, Accession NP_652763.1) is another GAM2033 target gene, herein designated TARGET GENE. CLDN14 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by CLDN14, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CLDN14 BINDING SITE, designated SEQ ID:13780, to the nucleotide sequence of

GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40363] Another function of GAM2033 is therefore inhibition of Claudin 14 (CLDN14, Accession NP_652763.1), a gene which provides structural support for the auditory neuroepithelium. and therefore is associated with Deafness. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of Deafness., and of other diseases and clinical conditions associated with CLDN14.

[40364] The function of CLDN14 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM94.1.Contactin 5 (CNTN5, Accession NP_055176.1) is another GAM2033 target gene, herein designated TARGET GENE. CNTN5 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CNTN5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CNTN5 BINDING SITE, designated SEQ ID:14059, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40365] Another function of GAM2033 is therefore inhibition of Contactin 5 (CNTN5, Accession NP_055176.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CNTN5.

[40366] Contactin 5 (CNTN5, Accession NP_780775.1) is another GAM2033 target gene, herein designated TARGET GENE. CNTN5 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CNTN5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CNTN5 BINDING SITE, designated SEQ ID:14059, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40367] Another function of GAM2033 is therefore inhibition of Contactin 5 (CNTN5, Accession NP_780775.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CNTN5.

[40368] Dihydrolipoamide branched chain transacylase (e2 component of branched chain keto acid dehydrogenase com-

plex; maple syrup urine disease) (DBT, Accession NP_001909.1) is another GAM2033 target gene, herein designated TARGET GENE. DBT BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DBT, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DBT BINDING SITE, designated SEQ ID:4072, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40369] Another function of GAM2033 is therefore inhibition of Dihydrolipoamide branched chain transacylase (e2 component of branched chain keto acid dehydrogenase complex; maple syrup urine disease) (DBT, Accession NP_001909.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DBT.

[40370] Doublecortin and cam kinase-like 1 (DCAMKL1, Accession NP_004725.1) is another GAM2033 target gene, herein designated TARGET GENE. DCAMKL1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DCAMKL1, corresponding to a target

binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DCAMKL1 BINDING SITE, designated SEQ ID:17620, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40371] Another function of GAM2033 is therefore inhibition of Doublecortin and cam kinase-like 1 (DCAMKL1, Accession NP_004725.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DCAMKL1.

[40372] DKFZp434F1719 (Accession NP_115624.1) is another GAM2033 target gene, herein designated TARGET GENE. DKFZp434F1719 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZp434F1719, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp434F1719 BINDING SITE, designated SEQ ID:12168, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40373] Another function of GAM2033 is therefore inhibition of

DKFZp434F1719 (Accession NP_115624.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp434F1719.

[40374] DKFZp434H247 (Accession XP_290829.1) is another GAM2033 target gene, herein designated TARGET GENE. DKFZp434H247 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZp434H247, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp434H247 BINDING SITE, designated SEQ ID:5311, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40375] Another function of GAM2033 is therefore inhibition of DKFZp434H247 (Accession XP_290829.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp434H247.

[40376] DKFZP566M114 (Accession NP_115504.1) is another GAM2033 target gene, herein designated TARGET GENE. DKFZP566M114 BINDING SITE is a target binding site

found in the 5` untranslated region of mRNA encoded by DKFZP566M114, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZP566M114 BINDING SITE, designated SEQ ID:4512, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40377] Another function of GAM2033 is therefore inhibition of DKFZP566M114 (Accession NP_115504.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZP566M114.

[40378] DPCR1 (Accession NP_543146.1) is another GAM2033 target gene, herein designated TARGET GENE. DPCR1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DPCR1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DPCR1 BINDING SITE, designated SEQ ID:18332, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40379] Another function of GAM2033 is therefore inhibition of DPCR1 (Accession NP_543146.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DPCR1.

[40380] Eh-domain containing 3 (EHD3, Accession NP_055415.1) is another GAM2033 target gene, herein designated TARGET GENE. EHD3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by EHD3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EHD3 BINDING SITE, designated SEQ ID:11360, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40381] Another function of GAM2033 is therefore inhibition of Eh-domain containing 3 (EHD3, Accession NP_055415.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EHD3.

[40382] V-erb-b2 erythroblastic leukemia viral oncogene homolog 3 (avian) (ERBB3, Accession NP_001973.1) is another GAM2033 target gene, herein designated TARGET GENE. ERBB3 BINDING SITE is a target binding site found in the

3` untranslated region of mRNA encoded by ERBB3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ERBB3 BINDING SITE, designated SEQ ID:2087, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40383] Another function of GAM2033 is therefore inhibition of V-erb-b2 erythroblastic leukemia viral oncogene homolog 3 (avian) (ERBB3, Accession NP_001973.1), a gene which binds and is activated by neuregulins and ntak. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ERBB3.

[40384] The function of ERBB3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM63.1.ERdj5 (Accession NP_061854.1) is another GAM2033 target gene, herein designated TARGET GENE. ERdj5 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by ERdj5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of ERdj5 BINDING SITE, designated SEQ ID:7721, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40385] Another function of GAM2033 is therefore inhibition of ERdj5 (Accession NP_061854.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ERdj5.

[40386] Estrogen-related receptor beta (ESRRB, Accession NP_004443.2) is another GAM2033 target gene, herein designated TARGET GENE. ESRRB BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by ESRRB, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ESRRB BINDING SITE, designated SEQ ID:8932, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40387] Another function of GAM2033 is therefore inhibition of Estrogen-related receptor beta (ESRRB, Accession NP_004443.2), a gene which Estrogen- related receptor beta; member of the nuclear hormone receptor family.

Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ESRRB.

[40388] The function of ESRRB and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM607.2.F-box and leucine-rich repeat protein 7 (FBXL7, Accession NP_036436.1) is another GAM2033 target gene, herein designated TARGET GENE. FBXL7 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FBXL7, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FBXL7 BINDING SITE, designated SEQ ID:3073, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40389] Another function of GAM2033 is therefore inhibition of F-box and leucine-rich repeat protein 7 (FBXL7, Accession NP_036436.1), a gene which may be involved in in phosphorylation- dependent ubiquitination. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

FBXL7.

[40390] The function of FBXL7 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM40.1.FLJ10618 (Accession NP_060625.1) is another GAM2033 target gene, herein designated TARGET GENE. FLJ10618 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ10618, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ10618 BINDING SITE, designated SEQ ID:12018, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40391] Another function of GAM2033 is therefore inhibition of FLJ10618 (Accession NP_060625.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ10618.

[40392] FLJ10916 (Accession NP_060741.1) is another GAM2033 target gene, herein designated TARGET GENE. FLJ10916 BINDING SITE is a target binding site found in the 5` un-

translated region of mRNA encoded by FLJ10916, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ10916 BINDING SITE, designated SEQ ID:976, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40393] Another function of GAM2033 is therefore inhibition of FLJ10916 (Accession NP_060741.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ10916.

[40394] FLJ10996 (Accession NP_061917.2) is another GAM2033 target gene, herein designated TARGET GENE. FLJ10996 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ10996, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ10996 BINDING SITE, designated SEQ ID:12447, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40395] Another function of GAM2033 is therefore inhibition of

FLJ10996 (Accession NP_061917.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ10996.

[40396] FLJ11565 (Accession NP_078933.2) is another GAM2033 target gene, herein designated TARGET GENE. FLJ11565 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ11565, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ11565 BINDING SITE, designated SEQ ID:7659, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40397] Another function of GAM2033 is therefore inhibition of FLJ11565 (Accession NP_078933.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ11565.

[40398] FLJ13491 (Accession NP_078899.1) is another GAM2033 target gene, herein designated TARGET GENE. FLJ13491 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ13491, corre-

sponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ13491 BINDING SITE, designated SEQ ID:8459, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40399] Another function of GAM2033 is therefore inhibition of FLJ13491 (Accession NP_078899.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ13491.

[40400] FLJ14167 (Accession XP_042704.1) is another GAM2033 target gene, herein designated TARGET GENE. FLJ14167 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ14167, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ14167 BINDING SITE, designated SEQ ID:3447, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40401] Another function of GAM2033 is therefore inhibition of FLJ14167 (Accession XP_042704.1) . Accordingly, utilities

of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ14167.

[40402] FLJ14260 (Accession NP_079303.2) is another GAM2033 target gene, herein designated TARGET GENE. FLJ14260 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ14260, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ14260 BINDING SITE, designated SEQ ID:18009, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40403] Another function of GAM2033 is therefore inhibition of FLJ14260 (Accession NP_079303.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ14260.

[40404] FLJ14442 (Accession NP_116174.1) is another GAM2033 target gene, herein designated TARGET GENE. FLJ14442 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ14442, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ14442 BINDING SITE, designated SEQ ID:7173, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40405] Another function of GAM2033 is therefore inhibition of FLJ14442 (Accession NP_116174.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ14442.

[40406] FLJ14871 (Accession NP_116243.1) is another GAM2033 target gene, herein designated TARGET GENE. FLJ14871 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ14871, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ14871 BINDING SITE, designated SEQ ID:13495, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40407] Another function of GAM2033 is therefore inhibition of FLJ14871 (Accession NP_116243.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with FLJ14871.

[40408] FLJ20139 (Accession NP_060155.1) is another GAM2033 target gene, herein designated TARGET GENE. FLJ20139 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ20139, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ20139 BINDING SITE, designated SEQ ID:12404, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40409] Another function of GAM2033 is therefore inhibition of FLJ20139 (Accession NP_060155.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ20139.

[40410] FLJ20232 (Accession NP_061881.2) is another GAM2033 target gene, herein designated TARGET GENE. FLJ20232 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ20232, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of FLJ20232 BINDING SITE, designated SEQ ID:17612, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40411] Another function of GAM2033 is therefore inhibition of FLJ20232 (Accession NP_061881.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ20232.

[40412] FLJ20625 (Accession NP_060377.1) is another GAM2033 target gene, herein designated TARGET GENE. FLJ20625 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ20625, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ20625 BINDING SITE, designated SEQ ID:9074, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40413] Another function of GAM2033 is therefore inhibition of FLJ20625 (Accession NP_060377.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

FLJ20625.

[40414] FLJ23309 (Accession XP_291315.1) is another GAM2033 target gene, herein designated TARGET GENE. FLJ23309 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ23309, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ23309 BINDING SITE, designated SEQ ID:19596, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40415] Another function of GAM2033 is therefore inhibition of FLJ23309 (Accession XP_291315.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ23309.

[40416] FLJ31951 (Accession NP_653327.1) is another GAM2033 target gene, herein designated TARGET GENE. FLJ31951 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ31951, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

FLJ31951 BINDING SITE, designated SEQ ID:18405, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40417] Another function of GAM2033 is therefore inhibition of FLJ31951 (Accession NP_653327.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ31951.

[40418] GALNACT-2 (Accession NP_061060.3) is another GAM2033 target gene, herein designated TARGET GENE. GALNACT-2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GALNACT-2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GALNACT-2 BINDING SITE, designated SEQ ID:14291, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40419] Another function of GAM2033 is therefore inhibition of GALNACT-2 (Accession NP_061060.3) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

GALNACT-2.

[40420] Gata binding protein 5 (GATA5, Accession NP_536721.1) is another GAM2033 target gene, herein designated TARGET GENE. GATA5 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GATA5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GATA5 BINDING SITE, designated SEQ ID:18782, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40421] Another function of GAM2033 is therefore inhibition of Gata binding protein 5 (GATA5, Accession NP_536721.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GATA5.

[40422] Glia maturation factor, beta (GMFB, Accession NP_004115.1) is another GAM2033 target gene, herein designated TARGET GENE. GMFB BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GMFB, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III

of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GMFB BINDING SITE, designated SEQ ID:7743, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40423] Another function of GAM2033 is therefore inhibition of Glia maturation factor, beta (GMFB, Accession NP_004115.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GMFB.

[40424] Guanine nucleotide binding protein (g protein), beta polypeptide 1 (GNB1, Accession NP_002065.1) is another GAM2033 target gene, herein designated TARGET GENE. GNB1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by GNB1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GNB1 BINDING SITE, designated SEQ ID:18436, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40425] Another function of GAM2033 is therefore inhibition of Guanine nucleotide binding protein (g protein), beta

polypeptide 1 (GNB1, Accession NP_002065.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GNB1.

[40426] Glutamate receptor, ionotropic, n-methyl d-aspartate 2b (GRIN2B, Accession NP_000825.1) is another GAM2033 target gene, herein designated TARGET GENE. GRIN2B BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GRIN2B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GRIN2B BINDING SITE, designated SEQ ID:13520, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40427] Another function of GAM2033 is therefore inhibition of Glutamate receptor, ionotropic, n-methyl d-aspartate 2b (GRIN2B, Accession NP_000825.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GRIN2B.

[40428] General transcription factor iie, polypeptide 1, alpha 56kda (GTF2E1, Accession NP_005504.1) is another

GAM2033 target gene, herein designated TARGET GENE. GTF2E1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GTF2E1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GTF2E1 BINDING SITE, designated SEQ ID:994, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40429] Another function of GAM2033 is therefore inhibition of General transcription factor iie, polypeptide 1, alpha 56kda (GTF2E1, Accession NP_005504.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GTF2E1.

[40430] Host cell factor c1 (vp16-accessory protein) (HCFC1, Accession NP_005325.1) is another GAM2033 target gene, herein designated TARGET GENE. HCFC1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by HCFC1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HCFC1 BINDING

SITE, designated SEQ ID:18043, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40431] Another function of GAM2033 is therefore inhibition of Host cell factor c1 (vp16-accessory protein) (HCFC1, Accession NP_005325.1), a gene which is a host cell factor, has a role in cell proliferation and can form a complex with HSV VP16. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HCFC1.

[40432] The function of HCFC1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM385.2.Hexokinase 2 (HK2, Accession NP_000180.2) is another GAM2033 target gene, herein designated TARGET GENE. HK2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by HK2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HK2 BINDING SITE, designated SEQ ID:11683, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ

ID:305.

[40433] Another function of GAM2033 is therefore inhibition of Hexokinase 2 (HK2, Accession NP_000180.2), a gene which plays an important role in intracellular glucose metabolism by catalyzing the conversion of glucose to glucose- 6- phosphate. and therefore may be associated with Noninsulin- dependent diabetes mellitus . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of Noninsulin- dependent diabetes mellitus ., and of other diseases and clinical conditions associated with HK2.

[40434] The function of HK2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM1664.1.Homeo box c4 (HOXC4, Accession NP_055435.2) is another GAM2033 target gene, herein designated TARGET GENE. HOXC4 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by HOXC4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HOXC4 BINDING SITE, designated SEQ ID:19800, to the

nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40435] Another function of GAM2033 is therefore inhibition of Homeo box c4 (HOXC4, Accession NP_055435.2), a gene which is part of a developmental regulatory system that provides cells with specific positional identities on the anterior- posterior axis. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HOXC4.

[40436] The function of HOXC4 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM94.1.Homeo box c6 (HOXC6, Accession NP_710160.1) is another GAM2033 target gene, herein designated TARGET GENE. HOXC6 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by HOXC6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HOXC6 BINDING SITE, designated SEQ ID:19800, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40437] Another function of GAM2033 is therefore inhibition of Homeo box c6 (HOXC6, Accession NP_710160.1), a gene which is part of a developmental regulatory system. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HOXC6.

[40438] The function of HOXC6 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM94.1.Harakiri, bcl2 interacting protein (contains only bh3 domain) (HRK, Accession NP_003797.1) is another GAM2033 target gene, herein designated TARGET GENE. HRK BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by HRK, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HRK BINDING SITE, designated SEQ ID:11032, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40439] Another function of GAM2033 is therefore inhibition of Harakiri, bcl2 interacting protein (contains only bh3 domain) (HRK, Accession NP_003797.1) . Accordingly, utili-

ties of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HRK.

[40440] Heat shock 70kda protein 9b (mortalin-2) (HSPA9B, Accession NP_004125.3) is another GAM2033 target gene, herein designated TARGET GENE. HSPA9B BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by HSPA9B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HSPA9B BINDING SITE, designated SEQ ID:9911, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40441] Another function of GAM2033 is therefore inhibition of Heat shock 70kda protein 9b (mortalin-2) (HSPA9B, Accession NP_004125.3) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HSPA9B.

[40442] Inhibin, beta a (activin a, activin ab alpha polypeptide) (INHBA, Accession NP_002183.1) is another GAM2033 target gene, herein designated TARGET GENE. INHBA BINDING SITE is a target binding site found in the 3` untrans-

lated region of mRNA encoded by INHBA, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of INHBA BINDING SITE, designated SEQ ID:18996, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40443] Another function of GAM2033 is therefore inhibition of Inhibin, beta a (activin a, activin ab alpha polypeptide) (INHBA, Accession NP_002183.1), a gene which inhibit respectively the secretion of follitropin by the pituitary gland. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with INHBA.

[40444] The function of INHBA and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM1033.2.Potassium voltage-gated channel, shaker-related subfamily, member 7 (KCNA7, Accession NP_114092.2) is another GAM2033 target gene, herein designated TARGET GENE. KCNA7 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KCNA7, corresponding to a target binding site

such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KCNA7 BINDING SITE, designated SEQ ID:8004, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40445] Another function of GAM2033 is therefore inhibition of Potassium voltage-gated channel, shaker-related subfamily, member 7 (KCNA7, Accession NP_114092.2), a gene which allows nerve cells to efficiently repolarize following an action potential. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KCNA7.

[40446] The function of KCNA7 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM72.1.KIAA0711 (Accession NP_055682.1) is another GAM2033 target gene, herein designated TARGET GENE. KIAA0711 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0711, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of KIAA0711 BINDING SITE, designated SEQ ID:10051, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40447] Another function of GAM2033 is therefore inhibition of KIAA0711 (Accession NP_055682.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0711.

[40448] KIAA1237 (Accession XP_087386.3) is another GAM2033 target gene, herein designated TARGET GENE. KIAA1237 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1237, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1237 BINDING SITE, designated SEQ ID:17086, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40449] Another function of GAM2033 is therefore inhibition of KIAA1237 (Accession XP_087386.3) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

KIAA1237.

[40450] KIAA1240 (Accession XP_039676.1) is another GAM2033 target gene, herein designated TARGET GENE. KIAA1240 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1240, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1240 BINDING SITE, designated SEQ ID:3069, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40451] Another function of GAM2033 is therefore inhibition of KIAA1240 (Accession XP_039676.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1240.

[40452] KIAA1399 (Accession XP_046685.4) is another GAM2033 target gene, herein designated TARGET GENE. KIAA1399 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1399, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

KIAA1399 BINDING SITE, designated SEQ ID:18176, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40453] Another function of GAM2033 is therefore inhibition of KIAA1399 (Accession XP_046685.4) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1399.

[40454] KIAA1518 (Accession NP_056308.2) is another GAM2033 target gene, herein designated TARGET GENE. KIAA1518 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by KIAA1518, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1518 BINDING SITE, designated SEQ ID:1300, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40455] Another function of GAM2033 is therefore inhibition of KIAA1518 (Accession NP_056308.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

KIAA1518.

[40456] KIAA1706 (Accession NP_085139.1) is another GAM2033 target gene, herein designated TARGET GENE. KIAA1706 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1706, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1706 BINDING SITE, designated SEQ ID:17708, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40457] Another function of GAM2033 is therefore inhibition of KIAA1706 (Accession NP_085139.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1706.

[40458] KIAA1728 (Accession XP_043492.2) is another GAM2033 target gene, herein designated TARGET GENE. KIAA1728 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1728, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

KIAA1728 BINDING SITE, designated SEQ ID:6209, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40459] Another function of GAM2033 is therefore inhibition of KIAA1728 (Accession XP_043492.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1728.

[40460] Laminin, gamma 2 (LAMC2, Accession NP_061486.1) is another GAM2033 target gene, herein designated TARGET GENE. LAMC2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by LAMC2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LAMC2 BINDING SITE, designated SEQ ID:15830, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40461] Another function of GAM2033 is therefore inhibition of Laminin, gamma 2 (LAMC2, Accession NP_061486.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions as-

sociated with LAMC2.

[40462] LOC116228 (Accession XP_300752.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC116228 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC116228, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC116228 BINDING SITE, designated SEQ ID:878, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40463] Another function of GAM2033 is therefore inhibition of LOC116228 (Accession XP_300752.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC116228.

[40464] LOC130026 (Accession NP_612477.3) is another GAM2033 target gene, herein designated TARGET GENE. LOC130026 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC130026, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC130026 BINDING SITE, designated SEQ ID:9829, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40465] Another function of GAM2033 is therefore inhibition of LOC130026 (Accession NP_612477.3) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC130026.

[40466] LOC143381 (Accession XP_084501.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC143381 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC143381, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC143381 BINDING SITE, designated SEQ ID:8460, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40467] Another function of GAM2033 is therefore inhibition of LOC143381 (Accession XP_084501.1) . Accordingly, utili-

ties of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC143381.

[40468] LOC146013 (Accession XP_096919.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC146013 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC146013, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146013 BINDING SITE, designated SEQ ID:7781, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40469] Another function of GAM2033 is therefore inhibition of LOC146013 (Accession XP_096919.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146013.

[40470] LOC146599 (Accession XP_085517.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC146599 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by

LOC146599, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146599 BINDING SITE, designated SEQ ID:15848, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40471] Another function of GAM2033 is therefore inhibition of LOC146599 (Accession XP_085517.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146599.

[40472] LOC150311 (Accession XP_086858.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC150311 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC150311, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC150311 BINDING SITE, designated SEQ ID:6767, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40473] Another function of GAM2033 is therefore inhibition of LOC150311 (Accession XP_086858.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC150311.

[40474] LOC150397 (Accession XP_086907.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC150397 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC150397, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC150397 BINDING SITE, designated SEQ ID:9075, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40475] Another function of GAM2033 is therefore inhibition of LOC150397 (Accession XP_086907.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC150397.

[40476] LOC151636 (Accession NP_612144.1) is another GAM2033 target gene, herein designated TARGET GENE.

LOC151636 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC151636, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC151636 BINDING SITE, designated SEQ ID:18792, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40477] Another function of GAM2033 is therefore inhibition of LOC151636 (Accession NP_612144.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC151636.

[40478] LOC152794 (Accession XP_087525.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC152794 BINDING SITE1 and LOC152794 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC152794, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC152794 BINDING SITE1 and LOC152794 BINDING SITE2, desig-

nated SEQ ID:11273 and SEQ ID:13308 respectively, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40479] Another function of GAM2033 is therefore inhibition of LOC152794 (Accession XP_087525.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC152794.

[40480] LOC153442 (Accession XP_098373.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC153442 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC153442, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC153442 BINDING SITE, designated SEQ ID:482, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40481] Another function of GAM2033 is therefore inhibition of LOC153442 (Accession XP_098373.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC153442.

[40482] LOC154222 (Accession XP_098497.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC154222 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC154222, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC154222 BINDING SITE, designated SEQ ID:16834, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40483] Another function of GAM2033 is therefore inhibition of LOC154222 (Accession XP_098497.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC154222.

[40484] LOC220038 (Accession XP_166257.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC220038 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC220038, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC220038 BINDING SITE, designated SEQ ID:3435, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40485] Another function of GAM2033 is therefore inhibition of LOC220038 (Accession XP_166257.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC220038.

[40486] LOC220739 (Accession XP_167548.3) is another GAM2033 target gene, herein designated TARGET GENE. LOC220739 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC220739, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC220739 BINDING SITE, designated SEQ ID:4991, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40487] Another function of GAM2033 is therefore inhibition of LOC220739 (Accession XP_167548.3) . Accordingly, utili-

ties of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC220739.

[40488] LOC221889 (Accession XP_166513.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC221889 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC221889, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC221889 BINDING SITE, designated SEQ ID:12817, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40489] Another function of GAM2033 is therefore inhibition of LOC221889 (Accession XP_166513.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC221889.

[40490] LOC254826 (Accession XP_173188.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC254826 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC254826, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC254826 BINDING SITE, designated SEQ ID:647, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40491] Another function of GAM2033 is therefore inhibition of LOC254826 (Accession XP_173188.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC254826.

[40492] LOC283050 (Accession XP_210872.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC283050 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283050, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283050 BINDING SITE, designated SEQ ID:10331, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40493] Another function of GAM2033 is therefore inhibition of LOC283050 (Accession XP_210872.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283050.

[40494] LOC283386 (Accession XP_208656.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC283386 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283386, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283386 BINDING SITE, designated SEQ ID:6632, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40495] Another function of GAM2033 is therefore inhibition of LOC283386 (Accession XP_208656.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283386.

[40496] LOC283403 (Accession XP_211028.1) is another GAM2033 target gene, herein designated TARGET GENE.

LOC283403 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283403, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283403 BINDING SITE, designated SEQ ID:5737, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40497] Another function of GAM2033 is therefore inhibition of LOC283403 (Accession XP_211028.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283403.

[40498] LOC283452 (Accession XP_208679.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC283452 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283452, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283452 BINDING SITE, designated SEQ ID:10804, to the nucleotide sequence of

GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40499] Another function of GAM2033 is therefore inhibition of LOC283452 (Accession XP_208679.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283452.

[40500] LOC283588 (Accession NP_787093.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC283588 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283588, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283588 BINDING SITE, designated SEQ ID:1881, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40501] Another function of GAM2033 is therefore inhibition of LOC283588 (Accession NP_787093.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283588.

[40502] LOC283818 (Accession XP_211218.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC283818 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283818, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283818 BINDING SITE, designated SEQ ID:11219, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40503] Another function of GAM2033 is therefore inhibition of LOC283818 (Accession XP_211218.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283818.

[40504] LOC284117 (Accession XP_209024.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC284117 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284117, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC284117 BINDING SITE, designated SEQ ID:3307, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40505] Another function of GAM2033 is therefore inhibition of LOC284117 (Accession XP_209024.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284117.

[40506] LOC284515 (Accession XP_208210.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC284515 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284515, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284515 BINDING SITE, designated SEQ ID:13346, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40507] Another function of GAM2033 is therefore inhibition of LOC284515 (Accession XP_208210.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC284515.

[40508] LOC285123 (Accession XP_211773.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC285123 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285123, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285123 BINDING SITE, designated SEQ ID:18981, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40509] Another function of GAM2033 is therefore inhibition of LOC285123 (Accession XP_211773.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285123.

[40510] LOC285399 (Accession XP_211880.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC285399 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285399, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285399 BINDING SITE, designated SEQ ID:9690, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40511] Another function of GAM2033 is therefore inhibition of LOC285399 (Accession XP_211880.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285399.

[40512] LOC285735 (Accession XP_212002.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC285735 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285735, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285735 BINDING SITE, designated SEQ ID:11051, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40513] Another function of GAM2033 is therefore inhibition of

LOC285735 (Accession XP_212002.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285735.

[40514] LOC285805 (Accession XP_212027.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC285805 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285805, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285805 BINDING SITE, designated SEQ ID:16704, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40515] Another function of GAM2033 is therefore inhibition of LOC285805 (Accession XP_212027.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285805.

[40516] LOC285950 (Accession XP_212089.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC285950 BINDING SITE is a target binding site found in

the 5` untranslated region of mRNA encoded by LOC285950, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285950 BINDING SITE, designated SEQ ID:19398, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40517] Another function of GAM2033 is therefore inhibition of LOC285950 (Accession XP_212089.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285950.

[40518] LOC286184 (Accession XP_212216.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC286184 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286184, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286184 BINDING SITE, designated SEQ ID:12741, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:305.

[40519] Another function of GAM2033 is therefore inhibition of LOC286184 (Accession XP_212216.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286184.

[40520] LOC286197 (Accession XP_209940.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC286197 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286197, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286197 BINDING SITE, designated SEQ ID:17366, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40521] Another function of GAM2033 is therefore inhibition of LOC286197 (Accession XP_209940.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286197.

[40522] LOC286211 (Accession XP_209949.1) is another

GAM2033 target gene, herein designated TARGET GENE. LOC286211 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286211, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286211 BINDING SITE, designated SEQ ID:9029, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40523] Another function of GAM2033 is therefore inhibition of LOC286211 (Accession XP_209949.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286211.

[40524] LOC286438 (Accession XP_208421.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC286438 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286438, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286438 BINDING SITE, desig-

nated SEQ ID:14291, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40525] Another function of GAM2033 is therefore inhibition of LOC286438 (Accession XP_208421.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286438.

[40526] LOC339212 (Accession XP_290271.2) is another GAM2033 target gene, herein designated TARGET GENE. LOC339212 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339212, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339212 BINDING SITE, designated SEQ ID:19779, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40527] Another function of GAM2033 is therefore inhibition of LOC339212 (Accession XP_290271.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC339212.

[40528] LOC339414 (Accession XP_170914.2) is another GAM2033 target gene, herein designated TARGET GENE. LOC339414 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339414, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339414 BINDING SITE, designated SEQ ID:16199, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40529] Another function of GAM2033 is therefore inhibition of LOC339414 (Accession XP_170914.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339414.

[40530] LOC339846 (Accession XP_295084.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC339846 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339846, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339846 BINDING SITE, designated SEQ ID:1411, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40531] Another function of GAM2033 is therefore inhibition of LOC339846 (Accession XP_295084.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339846.

[40532] LOC339865 (Accession XP_295089.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC339865 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339865, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339865 BINDING SITE, designated SEQ ID:3018, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40533] Another function of GAM2033 is therefore inhibition of LOC339865 (Accession XP_295089.1) . Accordingly, utili-

ties of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339865.

[40534] LOC339894 (Accession XP_295095.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC339894 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339894, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339894 BINDING SITE, designated SEQ ID:3796, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40535] Another function of GAM2033 is therefore inhibition of LOC339894 (Accession XP_295095.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339894.

[40536] LOC339975 (Accession XP_295115.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC339975 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by

LOC339975, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339975 BINDING SITE, designated SEQ ID:1577, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40537] Another function of GAM2033 is therefore inhibition of LOC339975 (Accession XP_295115.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339975.

[40538] LOC348259 (Accession XP_302702.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC348259 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC348259, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348259 BINDING SITE, designated SEQ ID:562, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40539] Another function of GAM2033 is therefore inhibition of LOC348259 (Accession XP_302702.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348259.

[40540] LOC348442 (Accession XP_057659.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC348442 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348442, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348442 BINDING SITE, designated SEQ ID:878, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40541] Another function of GAM2033 is therefore inhibition of LOC348442 (Accession XP_057659.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348442.

[40542] LOC349059 (Accession XP_302946.1) is another GAM2033 target gene, herein designated TARGET GENE.

LOC349059 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC349059, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349059 BINDING SITE, designated SEQ ID:16834, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40543] Another function of GAM2033 is therefore inhibition of LOC349059 (Accession XP_302946.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349059.

[40544] LOC83468 (Accession NP_112592.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC83468 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC83468, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC83468 BINDING SITE, designated SEQ ID:17323, to the nucleotide sequence of GAM2033 RNA, herein designated

GAM RNA, also designated SEQ ID:305.

[40545] Another function of GAM2033 is therefore inhibition of LOC83468 (Accession NP_112592.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC83468.

[40546] LOC84549 (Accession NP_115898.2) is another GAM2033 target gene, herein designated TARGET GENE. LOC84549 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC84549, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC84549 BINDING SITE, designated SEQ ID:19084, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40547] Another function of GAM2033 is therefore inhibition of LOC84549 (Accession NP_115898.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC84549.

[40548] LOC90110 (Accession XP_029046.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC90110

BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC90110, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC90110 BINDING SITE, designated SEQ ID:19624, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40549] Another function of GAM2033 is therefore inhibition of LOC90110 (Accession XP_029046.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC90110.

[40550] LOC91565 (Accession XP_039231.1) is another GAM2033 target gene, herein designated TARGET GENE. LOC91565 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC91565, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC91565 BINDING SITE, designated SEQ ID:12984, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40551] Another function of GAM2033 is therefore inhibition of LOC91565 (Accession XP_039231.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC91565.

[40552] LOC92235 (Accession XP_043739.2) is another GAM2033 target gene, herein designated TARGET GENE. LOC92235 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC92235, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC92235 BINDING SITE, designated SEQ ID:11714, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40553] Another function of GAM2033 is therefore inhibition of LOC92235 (Accession XP_043739.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC92235.

[40554] Loss of heterozygosity, 11, chromosomal region 2, gene a (LOH11CR2A, Accession NP_055437.1) is another GAM2033 target gene, herein designated TARGET GENE.

LOH11CR2A BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOH11CR2A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOH11CR2A BINDING SITE, designated SEQ ID:9708, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40555] Another function of GAM2033 is therefore inhibition of Loss of heterozygosity, 11, chromosomal region 2, gene a (LOH11CR2A, Accession NP_055437.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOH11CR2A.

[40556] LRP15 (Accession NP_443185.1) is another GAM2033 target gene, herein designated TARGET GENE. LRP15 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LRP15, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LRP15 BINDING SITE, designated SEQ ID:18470, to the nucleotide

sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40557] Another function of GAM2033 is therefore inhibition of LRP15 (Accession NP_443185.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LRP15.

[40558] MGC10765 (Accession NP_077321.1) is another GAM2033 target gene, herein designated TARGET GENE. MGC10765 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC10765, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC10765 BINDING SITE, designated SEQ ID:4067, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40559] Another function of GAM2033 is therefore inhibition of MGC10765 (Accession NP_077321.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC10765.

[40560] MGC13017 (Accession NP_542387.1) is another GAM2033 target gene, herein designated TARGET GENE. MGC13017

BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC13017, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC13017 BINDING SITE, designated SEQ ID:878, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40561] Another function of GAM2033 is therefore inhibition of MGC13017 (Accession NP_542387.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC13017.

[40562] MGC39662 (Accession NP_689607.1) is another GAM2033 target gene, herein designated TARGET GENE. MGC39662 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MGC39662, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC39662 BINDING SITE, designated SEQ ID:12535, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40563] Another function of GAM2033 is therefore inhibition of MGC39662 (Accession NP_689607.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC39662.

[40564] MGC46336 (Accession XP_290712.1) is another GAM2033 target gene, herein designated TARGET GENE. MGC46336 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MGC46336, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC46336 BINDING SITE, designated SEQ ID:20034, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40565] Another function of GAM2033 is therefore inhibition of MGC46336 (Accession XP_290712.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC46336.

[40566] MGC46680 (Accession NP_776169.1) is another GAM2033 target gene, herein designated TARGET GENE. MGC46680 BINDING SITE is a target binding site found in the 3` un-

translated region of mRNA encoded by MGC46680, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC46680 BINDING SITE, designated SEQ ID:3484, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40567] Another function of GAM2033 is therefore inhibition of MGC46680 (Accession NP_776169.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC46680.

[40568] Mov10, moloney leukemia virus 10, homolog (mouse) (MOV10, Accession NP_066014.1) is another GAM2033 target gene, herein designated TARGET GENE. MOV10 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MOV10, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MOV10 BINDING SITE, designated SEQ ID:13490, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40569] Another function of GAM2033 is therefore inhibition of Mov10, moloney leukemia virus 10, homolog (mouse) (MOV10, Accession NP_066014.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MOV10.

[40570] Mitochondrial ribosomal protein s15 (MRPS15, Accession NP_112570.2) is another GAM2033 target gene, herein designated TARGET GENE. MRPS15 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MRPS15, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MRPS15 BINDING SITE, designated SEQ ID:14750, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40571] Another function of GAM2033 is therefore inhibition of Mitochondrial ribosomal protein s15 (MRPS15, Accession NP_112570.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MRPS15.

[40572] N-deacetylase/n-sulfotransferase (heparan glucosaminyl)

2 (NDST2, Accession NP_003626.1) is another GAM2033 target gene, herein designated TARGET GENE. NDST2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NDST2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NDST2 BINDING SITE, designated SEQ ID:17608, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40573] Another function of GAM2033 is therefore inhibition of N-deacetylase/n-sulfotransferase (heparan glucosaminyl) 2 (NDST2, Accession NP_003626.1), a gene which catalyses the n- sulfation and n- deacetylation of glucosamine of the glycosaminoglycan in heparin sulfate. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NDST2.

[40574] The function of NDST2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM282.2.Nima (never in mitosis gene a)-related kinase 3 (NEK3, Accession NP_002489.1) is another

GAM2033 target gene, herein designated TARGET GENE. NEK3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by NEK3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NEK3 BINDING SITE, designated SEQ ID:3534, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40575] Another function of GAM2033 is therefore inhibition of Nima (never in mitosis gene a)-related kinase 3 (NEK3, Accession NP_002489.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NEK3.

[40576] Nima (never in mitosis gene a)-related kinase 3 (NEK3, Accession NP_689933.1) is another GAM2033 target gene, herein designated TARGET GENE. NEK3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by NEK3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

NEK3 BINDING SITE, designated SEQ ID:3534, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40577] Another function of GAM2033 is therefore inhibition of Nima (never in mitosis gene a)-related kinase 3 (NEK3, Accession NP_689933.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NEK3.

[40578] Nescient helix loop helix 1 (NHLH1, Accession NP_005589.1) is another GAM2033 target gene, herein designated TARGET GENE. NHLH1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NHLH1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NHLH1 BINDING SITE, designated SEQ ID:2657, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40579] Another function of GAM2033 is therefore inhibition of Nescient helix loop helix 1 (NHLH1, Accession NP_005589.1), a gene which may have a role in development of the nervous system. Accordingly, utilities of

GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NHLH1.

[40580] The function of NHLH1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM354.1.NYD-SP15 (Accession NP_112173.1) is another GAM2033 target gene, herein designated TARGET GENE. NYD-SP15 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NYD-SP15, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NYD-SP15 BINDING SITE, designated SEQ ID:12731, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40581] Another function of GAM2033 is therefore inhibition of NYD-SP15 (Accession NP_112173.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NYD-SP15.

[40582] Opiate receptor-like 1 (OPRL1, Accession NP_000904.1) is another GAM2033 target gene, herein designated TARGET

GENE. OPRL1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by OPRL1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of OPRL1 BINDING SITE, designated SEQ ID:6428, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40583] Another function of GAM2033 is therefore inhibition of Opiate receptor-like 1 (OPRL1, Accession NP_000904.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with OPRL1.

[40584] OS4 (Accession NP_005721.2) is another GAM2033 target gene, herein designated TARGET GENE. OS4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by OS4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of OS4 BINDING SITE, designated SEQ ID:16829, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40585] Another function of GAM2033 is therefore inhibition of OS4 (Accession NP_005721.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with OS4.

[40586] Pyrimidinergic receptor p2y, g-protein coupled, 6 (P2RY6, Accession NP_004145.1) is another GAM2033 target gene, herein designated TARGET GENE. P2RY6 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by P2RY6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of P2RY6 BINDING SITE, designated SEQ ID:999, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40587] Another function of GAM2033 is therefore inhibition of Pyrimidinergic receptor p2y, g-protein coupled, 6 (P2RY6, Accession NP_004145.1), a gene which mediates cellular responses to nucleotides. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with P2RY6.

[40588] The function of P2RY6 and its association with various diseases and clinical conditions, has been established by

previous studies, as described hereinabove with reference to GAM72.1.Protocadherin 10 (PCDH10, Accession NP_116586.1) is another GAM2033 target gene, herein designated TARGET GENE. PCDH10 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by PCDH10, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PCDH10 BINDING SITE, designated SEQ ID:12871, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40589] Another function of GAM2033 is therefore inhibition of Protocadherin 10 (PCDH10, Accession NP_116586.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PCDH10.

[40590] Protocadherin 10 (PCDH10, Accession NP_065866.1) is another GAM2033 target gene, herein designated TARGET GENE. PCDH10 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by PCDH10, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or

BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PCDH10 BINDING SITE, designated SEQ ID:12871, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40591] Another function of GAM2033 is therefore inhibition of Protocadherin 10 (PCDH10, Accession NP_065866.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PCDH10.

[40592] PJA2 (Accession NP_055634.1) is another GAM2033 target gene, herein designated TARGET GENE. PJA2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PJA2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PJA2 BINDING SITE, designated SEQ ID:8114, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40593] Another function of GAM2033 is therefore inhibition of PJA2 (Accession NP_055634.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of

diseases and clinical conditions associated with PJA2.

[40594] Peripheral myelin protein 2 (PMP2, Accession NP_002668.1) is another GAM2033 target gene, herein designated TARGET GENE. PMP2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PMP2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PMP2 BINDING SITE, designated SEQ ID:3068, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40595] Another function of GAM2033 is therefore inhibition of Peripheral myelin protein 2 (PMP2, Accession NP_002668.1), a gene which is a lipid transport protein in schwann cells. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PMP2.

[40596] The function of PMP2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM402.1.Pou domain, class 2, associating factor 1 (POU2AF1, Accession NP_006226.1) is another GAM2033

target gene, herein designated TARGET GENE. POU2AF1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by POU2AF1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of POU2AF1 BINDING SITE, designated SEQ ID:17878, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40597] Another function of GAM2033 is therefore inhibition of Pou domain, class 2, associating factor 1 (POU2AF1, Accession NP_006226.1), a gene which is a transcriptional coactivator that specifically associates with either oct1 or oct2 and therefore may be associated with A form of b-cell leukemia. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of A form of b- cell leukemia, and of other diseases and clinical conditions associated with POU2AF1.

[40598] The function of POU2AF1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Protein phosphatase 1, regulatory subunit 10 (PPP1R10, Accession NP_002705.2) is another GAM2033

target gene, herein designated TARGET GENE. PPP1R10 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PPP1R10, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPP1R10 BINDING SITE, designated SEQ ID:17303, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40599] Another function of GAM2033 is therefore inhibition of Protein phosphatase 1, regulatory subunit 10 (PPP1R10, Accession NP_002705.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPP1R10.

[40600] Protein phosphatase 1, regulatory (inhibitor) subunit 12b (PPP1R12B, Accession NP_002472.1) is another GAM2033 target gene, herein designated TARGET GENE. PPP1R12B BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PPP1R12B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPP1R12B BINDING SITE, designated

SEQ ID:18058, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40601] Another function of GAM2033 is therefore inhibition of Protein phosphatase 1, regulatory (inhibitor) subunit 12b (PPP1R12B, Accession NP_002472.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPP1R12B.

[40602] Protein phosphatase 1, regulatory (inhibitor) subunit 12b (PPP1R12B, Accession NP_115288.1) is another GAM2033 target gene, herein designated TARGET GENE. PPP1R12B BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PPP1R12B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPP1R12B BINDING SITE, designated SEQ ID:18058, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40603] Another function of GAM2033 is therefore inhibition of Protein phosphatase 1, regulatory (inhibitor) subunit 12b

(PPP1R12B, Accession NP_115288.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPP1R12B.

[40604] Rab13, member ras oncogene family (RAB13, Accession NP_002861.1) is another GAM2033 target gene, herein designated TARGET GENE. RAB13 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RAB13, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAB13 BINDING SITE, designated SEQ ID:5259, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40605] Another function of GAM2033 is therefore inhibition of Rab13, member ras oncogene family (RAB13, Accession NP_002861.1), a gene which is a member of the RAB family of small GTPases. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAB13.

[40606] The function of RAB13 and its association with various diseases and clinical conditions, has been established by

previous studies, as described hereinabove with reference to GAM94.1.Rab7, member ras oncogene family-like 1 (RAB7L1, Accession NP_003920.1) is another GAM2033 target gene, herein designated TARGET GENE. RAB7L1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RAB7L1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAB7L1 BINDING SITE, designated SEQ ID:9099, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40607] Another function of GAM2033 is therefore inhibition of Rab7, member ras oncogene family-like 1 (RAB7L1, Accession NP_003920.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAB7L1.

[40608] RBT1 (Accession NP_037500.2) is another GAM2033 target gene, herein designated TARGET GENE. RBT1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by RBT1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the comple-

mentarity of the nucleotide sequences of RBT1 BINDING SITE, designated SEQ ID:11335, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40609] Another function of GAM2033 is therefore inhibition of RBT1 (Accession NP_037500.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RBT1.

[40610] Rho-related btb domain containing 2 (RHOBTB2, Accession NP_055993.1) is another GAM2033 target gene, herein designated TARGET GENE. RHOBTB2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RHOBTB2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RHOBTB2 BINDING SITE, designated SEQ ID:4604, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40611] Another function of GAM2033 is therefore inhibition of Rho-related btb domain containing 2 (RHOBTB2, Accession NP_055993.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and

clinical conditions associated with RHOBTB2.

[40612] Receptor tyrosine kinase-like orphan receptor 1 (ROR1, Accession NP_005003.1) is another GAM2033 target gene, herein designated TARGET GENE. ROR1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by ROR1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ROR1 BINDING SITE, designated SEQ ID:5888, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40613] Another function of GAM2033 is therefore inhibition of Receptor tyrosine kinase-like orphan receptor 1 (ROR1, Accession NP_005003.1), a gene which is of unknown function. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ROR1.

[40614] The function of ROR1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM767.2.Reticulon 2 (RTN2, Accession NP_005610.1) is another GAM2033 target gene, herein designated TAR-

GET GENE. RTN2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RTN2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RTN2 BINDING SITE, designated SEQ ID:8997, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40615] Another function of GAM2033 is therefore inhibition of Reticulon 2 (RTN2, Accession NP_005610.1), a gene which is a member of the reticulon (neuroendocrine- specific, NSP) family. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RTN2.

[40616] The function of RTN2 has been established by previous studies. Roebroek et al. (1998) identified 3 novel homologs of RTN1 (OMIM Ref. No. 600865) in DNA sequence databases. RTN2 sequences were found in a 106- kb genomic region around the ERCC1 (OMIM Ref. No. 126380) locus sequenced by Martin- Gallardo et al. (1992); thus, the RTN2 gene is localized to human chromosome 19q13.3. The gene consists of 11 exons spanning approximately 12 kb. Northern blots of several cell lines

showed RTN2 expression as mRNAs of 1.3 and 2.3 kb. RT- PCR analysis demonstrated that these bands are produced by 3 alternatively spliced cDNA variants: RTN2A (545 amino acids), RTN2B (472 amino acids), and RTN2C (205 amino acids). Northern blot analysis of human tissues revealed that the RTN2 gene is expressed in a variety of tissues, with strikingly high expression of the 1.3- kb mRNA in skeletal muscle

[40617]

[40618] Full details of the abovementioned studies are described in the following publications, the disclosure of which are hereby incorporated by reference:

[40619] Roebroek, A. J. M.; Contreras, B.; Pauli, I. G. L.; Van de Ven, W. J. M. : cDNA cloning, genomic organization, and expression of the human RTN2 gene, a member of a gene family encoding reticulons. Genomics 51: 98- 106, 1998. ; and

[40620] Martin- Gallardo, A.; McCombie, W. R.; Gocayne, J. D.; FitzGerald, M. G.; Wallace, S.; Lee, B. M. B.; Lamerdin, J.; Trapp, S.; Kelley, J. M.; Liu, L.- I.; Dubnick, M.; Johnston-Dow, L. A.; Ke.

[40621] Further studies establishing the function and utilities of RTN2 are found in John Hopkins OMIM database record ID

603183, and in cited publications listed in Table 5, which are hereby incorporated by reference.Splicing factor 3b, subunit 1, 155kda (SF3B1, Accession NP_036565.1) is another GAM2033 target gene, herein designated TARGET GENE. SF3B1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SF3B1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SF3B1 BINDING SITE, designated SEQ ID:13074, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40622] Another function of GAM2033 is therefore inhibition of Splicing factor 3b, subunit 1, 155kda (SF3B1, Accession NP_036565.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SF3B1.

[40623] Surfactant, pulmonary-associated protein a2 (SFTPA2, Accession NP_008857.1) is another GAM2033 target gene, herein designated TARGET GENE. SFTPA2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SFTPA2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or

BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SFTPA2 BINDING SITE, designated SEQ ID:11609, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40624] Another function of GAM2033 is therefore inhibition of Surfactant, pulmonary-associated protein a2 (SFTPA2, Accession NP_008857.1), a gene which plays a role in innate host defense in the lung. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SFTPA2.

[40625] The function of SFTPA2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM240.1.N-sulfoglucosamine sulfohydrolase (sulfamidase) (SGSH, Accession NP_000190.1) is another GAM2033 target gene, herein designated TARGET GENE. SGSH BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SGSH, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SGSH BINDING SITE, designated SEQ ID:2077, to the nu-

cleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40626] Another function of GAM2033 is therefore inhibition of N-sulfoglucosamine sulfohydrolase (sulfamidase) (SGSH, Accession NP_000190.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SGSH.

[40627] Solute carrier family 26, member 7 (SLC26A7, Accession NP_439897.1) is another GAM2033 target gene, herein designated TARGET GENE. SLC26A7 BINDING SITE1 and SLC26A7 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by SLC26A7, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC26A7 BINDING SITE1 and SLC26A7 BINDING SITE2, designated SEQ ID:1641 and SEQ ID:16968 respectively, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40628] Another function of GAM2033 is therefore inhibition of Solute carrier family 26, member 7 (SLC26A7, Accession NP_439897.1) . Accordingly, utilities of GAM2033 include

diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC26A7.

[40629] Solute carrier family 2 (facilitated glucose transporter), member 6 (SLC2A6, Accession NP_060055.1) is another GAM2033 target gene, herein designated TARGET GENE. SLC2A6 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SLC2A6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC2A6 BINDING SITE, designated SEQ ID:10370, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40630] Another function of GAM2033 is therefore inhibition of Solute carrier family 2 (facilitated glucose transporter), member 6 (SLC2A6, Accession NP_060055.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC2A6.

[40631] SMYD2 (Accession NP_064582.1) is another GAM2033 target gene, herein designated TARGET GENE. SMYD2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SMYD2, corre-

sponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SMYD2 BINDING SITE, designated SEQ ID:8651, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40632] Another function of GAM2033 is therefore inhibition of SMYD2 (Accession NP_064582.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SMYD2.

[40633] Surfeit 5 (SURF5, Accession NP_852468.1) is another GAM2033 target gene, herein designated TARGET GENE. SURF5 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SURF5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SURF5 BINDING SITE, designated SEQ ID:16437, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40634] Another function of GAM2033 is therefore inhibition of Surfeit 5 (SURF5, Accession NP_852468.1) . Accordingly,

utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SURF5.

[40635] Surfeit 6 (SURF6, Accession NP_006744.2) is another GAM2033 target gene, herein designated TARGET GENE. SURF6 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SURF6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SURF6 BINDING SITE, designated SEQ ID:16547, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40636] Another function of GAM2033 is therefore inhibition of Surfeit 6 (SURF6, Accession NP_006744.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SURF6.

[40637] Tyrosyl-dna phosphodiesterase 1 (TDP1, Accession NP_060789.2) is another GAM2033 target gene, herein designated TARGET GENE. TDP1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by TDP1, corresponding to a target binding site

such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TDP1 BINDING SITE, designated SEQ ID:12885, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40638] Another function of GAM2033 is therefore inhibition of Tyrosyl-dna phosphodiesterase 1 (TDP1, Accession NP_060789.2) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TDP1.

[40639] Telomerase-associated protein 1 (TEP1, Accession NP_009041.2) is another GAM2033 target gene, herein designated TARGET GENE. TEP1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TEP1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TEP1 BINDING SITE, designated SEQ ID:10717, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40640] Another function of GAM2033 is therefore inhibition of

Telomerase-associated protein 1 (TEP1, Accession NP_009041.2), a gene which interacts with active telomerase RNA. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TEP1.

[40641] The function of TEP1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM72.1.Transforming growth factor, alpha (TGFA, Accession NP_003227.1) is another GAM2033 target gene, herein designated TARGET GENE. TGFA BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TGFA, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TGFA BINDING SITE, designated SEQ ID:16678, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40642] Another function of GAM2033 is therefore inhibition of Transforming growth factor, alpha (TGFA, Accession NP_003227.1), a gene which is able to bind to the egf receptor and to act synergistically with tgf beta to promote

anchorage- independent cell proliferation in soft agar. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TGFA.

[40643] The function of TGFA and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM94.1.Transforming growth factor, beta 3 (TGFB3, Accession NP_003230.1) is another GAM2033 target gene, herein designated TARGET GENE. TGFB3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TGFB3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TGFB3 BINDING SITE, designated SEQ ID:16004, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40644] Another function of GAM2033 is therefore inhibition of Transforming growth factor, beta 3 (TGFB3, Accession NP_003230.1), a gene which is involved in embryogenesis and cell differentiation. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases

and clinical conditions associated with TGFB3.

[40645] The function of TGFB3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM483.1.Tousled-like kinase 2 (TLK2, Accession NP_006843.1) is another GAM2033 target gene, herein designated TARGET GENE. TLK2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TLK2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TLK2 BINDING SITE, designated SEQ ID:19779, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40646] Another function of GAM2033 is therefore inhibition of Tousled-like kinase 2 (TLK2, Accession NP_006843.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TLK2.

[40647] Tumor necrosis factor (ligand) superfamily, member 4 (tax-transcriptionally activated glycoprotein 1, 34kda) (TNFSF4, Accession NP_003317.1) is another GAM2033

target gene, herein designated TARGET GENE. TNFSF4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TNFSF4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TNFSF4 BINDING SITE, designated SEQ ID:1426, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40648] Another function of GAM2033 is therefore inhibition of Tumor necrosis factor (ligand) superfamily, member 4 (tax-transcriptionally activated glycoprotein 1, 34kda) (TNFSF4, Accession NP_003317.1), a gene which co-stimulates t cell proliferation and cytokine production. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TNFSF4.

[40649] The function of TNFSF4 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM841.1.Tumor protein p53 inducible nuclear protein 1 (TP53INP1, Accession NP_150601.1) is another GAM2033 target gene, herein designated TARGET GENE.

TP53INP1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TP53INP1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TP53INP1 BINDING SITE, designated SEQ ID:15816, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40650] Another function of GAM2033 is therefore inhibition of Tumor protein p53 inducible nuclear protein 1 (TP53INP1, Accession NP_150601.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TP53INP1.

[40651] TRA16 (Accession NP_795361.1) is another GAM2033 target gene, herein designated TARGET GENE. TRA16 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TRA16, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRA16 BINDING SITE, designated SEQ ID:1186, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA,

also designated SEQ ID:305.

[40652] Another function of GAM2033 is therefore inhibition of TRA16 (Accession NP_795361.1) . Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TRA16.

[40653] Tripartite motif-containing 9 (TRIM9, Accession NP_055978.2) is another GAM2033 target gene, herein designated TARGET GENE. TRIM9 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TRIM9, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRIM9 BINDING SITE, designated SEQ ID:1798, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40654] Another function of GAM2033 is therefore inhibition of Tripartite motif-containing 9 (TRIM9, Accession NP_055978.2), a gene which may function as a positive regulator for mannosylphosphate transferase and is required to mediate mannosylphosphate transfer in both the core and outer chain portions of n- linked. oligosaccharides. Accordingly, utilities of GAM2033 include diagnosis,

prevention and treatment of diseases and clinical conditions associated with TRIM9.

[40655] The function of TRIM9 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM72.1.Translin (TSN, Accession NP_004613.1) is another GAM2033 target gene, herein designated TARGET GENE. TSN BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TSN, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TSN BINDING SITE, designated SEQ ID:7612, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40656] Another function of GAM2033 is therefore inhibition of Translin (TSN, Accession NP_004613.1), a gene which is a DNA binding protein and involved in DNA repair, replication, or recombination. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TSN.

[40657] The function of TSN and its association with various diseases and clinical conditions, has been established by

previous studies, as described hereinabove with reference to GAM72.1.Williams-beuren syndrome chromosome region 1 (WBSCR1, Accession NP_114381.1) is another GAM2033 target gene, herein designated TARGET GENE. WBSCR1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by WBSCR1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of WBSCR1 BINDING SITE, designated SEQ ID:12817, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40658] Another function of GAM2033 is therefore inhibition of Williams-beuren syndrome chromosome region 1 (WBSCR1, Accession NP_114381.1), a gene which stimulates protein translation and therefore may be associated with Williams syndrome. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of Williams syndrome, and of other diseases and clinical conditions associated with WBSCR1.

[40659] The function of WBSCR1 and its association with various diseases and clinical conditions, has been established by

previous studies, as described hereinabove with reference to GAM47.1.Williams-beuren syndrome chromosome region 1 (WBSCR1, Accession NP_071496.1) is another GAM2033 target gene, herein designated TARGET GENE. WBSCR1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by WBSCR1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of WBSCR1 BINDING SITE, designated SEQ ID:12817, to the nucleotide sequence of GAM2033 RNA, herein designated GAM RNA, also designated SEQ ID:305.

[40660] Another function of GAM2033 is therefore inhibition of Williams-beuren syndrome chromosome region 1 (WBSCR1, Accession NP_071496.1), a gene which stimulates protein translation and therefore may be associated with Williams syndrome. Accordingly, utilities of GAM2033 include diagnosis, prevention and treatment of Williams syndrome, and of other diseases and clinical conditions associated with WBSCR1.

[40661] The function of WBSCR1 and its association with various diseases and clinical conditions, has been established by

previous studies, as described hereinabove with reference to GAM47.1.

[40662] Fig. 8 further provides a conceptual description of a novel bioinformatically detected of the present invention, referred to here as Genomic Address Messenger 2071 (GAM2071), which modulates expression of respective target genes thereof, the function and utility of which target genes is known in the art.

[40663] GAM2071 is a novel bioinformatically detected regulatory, non protein coding, micro RNA (miRNA) gene. The method by which GAM2071 was detected is described hereinabove with reference to Figs. 8-15.

[40664] GAM2071 gene, herein designated GAM GENE, and GAM2071 target gene, herein designated TARGET GENE, are human genes contained in the human genome.

[40665] GAM2071 gene encodes a GAM2071 precursor RNA, herein designated GAM PRECURSOR RNA. Similar to other miRNA genes, and unlike most ordinary genes, GAM2071 precursor RNA does not encode a protein. A nucleotide sequence identical or highly similar to the nucleotide sequence of GAM2071 precursor RNA is designated SEQ ID:102, and is provided hereinbelow with reference to the sequence listing part.

[40666] GAM2071 precursor RNA folds onto itself, forming GAM2071 folded precursor RNA, herein designated GAM FOLDED PRECURSOR RNA, which has a two-dimensional `hairpin structure`. As is well known in the art, this `hairpin structure`, is typical of RNA encoded by miRNA genes, and is due to the fact that the nucleotide sequence of the first half of the RNA encoded by a miRNA gene is an accurate or partial inversed-reversed sequence of the nucleotide sequence of the second half thereof.

[40667] GAM2071 precursor RNA folds onto itself, forming GAM2071 folded precursor RNA, herein designated GAM FOLDED PRECURSOR RNA, which has a two-dimensional `hairpin structure`. As is well known in the art, this `hairpin structure`, is typical of RNA encoded by miRNA genes, and is due to the fact that the nucleotide sequence of the first half of the RNA encoded by a miRNA gene is an accurate or partial reverse-complementary sequence of the nucleotide sequence of the second half thereof.

[40668] Nucleotide sequence of GAM2071 precursor RNA, designated SEQ-ID: 102, and a schematic representation of a predicted secondary folding of GAM2071 folded precursor RNA are further described with reference to Table 2, hereby incorporated by reference.

[40669] An enzyme complex designated DICER COMPLEX, `dices` the GAM2071 folded precursor RNA into GAM2071 RNA, herein designated GAM RNA, a single stranded ~22 nt long RNA segment. As is known in the art, `dicing` of a hairpin structured RNA precursor product into a short ~22nt RNA segment is catalyzed by an enzyme complex comprising an enzyme called Dicer together with other necessary proteins. A probable (GAM Prediction Accuracy Group: B) nucleotide sequence of GAM2071 RNA is designated SEQ ID:371, and is provided hereinbelow with references to the sequence listing part and Table 3, hereby incorporated by reference.

[40670] GAM2071 target gene, herein designated TARGET GENE, encodes a corresponding messenger RNA, GAM2071 target RNA, herein designated GAM TARGET RNA. GAM2071 target RNA comprises three regions, as is typical of mRNA of a protein coding gene: a 5` untranslated region, a protein coding region and a 3` untranslated region, designated 5`UTR, PROTEIN CODING and 3`UTR respectively.

[40671] GAM2071 RNA, herein designated GAM RNA, binds complementarily to one or more target binding sites located in untranslated regions of GAM2071 target RNA, herein designated GAM TARGET RNA. This complementary binding is

due to the fact that the nucleotide sequence of GAM2071 RNA is an accurate or a partial inversed-reversed sequence of the nucleotide sequence of each of the target binding sites. As an illustration, Fig. 8 shows three such target binding sites, designated BINDING SITE I, BINDING SITE II and BINDING SITE III respectively. It is appreciated that the number of target binding sites shown in Fig. 8 is meant as an illustration only, and is not meant to be limiting GAM2071 RNA may have a different number of target binding sites in untranslated regions of a GAM2071 target RNA. It is further appreciated that while Fig. 8 depicts target binding sites in the 3`UTR region, this is meant as an example only these target binding sites may be located in the 3`UTR region, the 5`UTR region, or in both 3`UTR and 5`UTR regions.

[40672] The complementary binding of GAM2071 RNA, herein designated GAM RNA, to target binding sites on GAM2071 target RNA, herein designated GAM TARGET RNA, such as BINDING SITE I, BINDING SITE II and BINDING SITE III, inhibits translation of GAM2071 target RNA into GAM2071 target protein, herein designated GAM TARGET PROTEIN. GAM target protein is therefore outlined by a broken line.

[40673] It is appreciated that GAM2071 target gene, herein desig-

nated TARGET GENE, in fact represents a plurality of GAM2071 target genes. The mRNA of each one of this plurality of GAM2071 target genes comprises one or more target binding sites, each having a nucleotide sequence which is at least partly complementary to GAM2071 RNA, herein designated GAM RNA, and which when bound by GAM2071 RNA causes inhibition of translation of respective one or more GAM2071 target proteins.

[40674] It is further appreciated by one skilled in the art that the mode of translational inhibition illustrated by Fig. 8 with specific reference to translational inhibition exerted by GAM2071 gene, herein designated GAM GENE, on one or more GAM2071 target genes, herein collectively designated TARGET GENE, is common to other known miRNA genes. As mentioned hereinabove with reference to the background section, although a specific complementary binding site has been demonstrated only for some of the known miRNA genes (primarily Lin-4 and Let-7), all other recently discovered miRNA genes are also believed by those skilled in the art to modulate expression of other genes by complementary binding, although specific complementary binding sites of these other miRNA genes have not yet been found (Ruvkun G., Perspective: Glimpses of a

tiny RNA world, Science 294,779 (2001)).

[40675] It is appreciated that specific functions and accordingly utilities of GAM2071 correlate with, and may be deduced from, the identity of the target genes which GAM2071 binds and inhibits, and the function of these target genes, as elaborated hereinbelow.

[40676]

[40677]

[40678] 15E1.2 (Accession XP_290596.1) is a GAM2071 target gene, herein designated TARGET GENE. 15E1.2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by 15E1.2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of 15E1.2 BINDING SITE, designated SEQ ID:13885, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40679] A function of GAM2071 is therefore inhibition of 15E1.2 (Accession XP_290596.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with 15E1.2.

[40680] Alpha-1-b glycoprotein (A1BG, Accession NP_570602.2) is another GAM2071 target gene, herein designated TARGET GENE. A1BG BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by A1BG, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of A1BG BINDING SITE, designated SEQ ID:10791, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40681] Another function of GAM2071 is therefore inhibition of Alpha-1-b glycoprotein (A1BG, Accession NP_570602.2), a gene which a plasma protein of unknown function. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with A1BG.

[40682] The function of A1BG and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Aminoadipate-semialdehyde synthase (AASS, Accession NP_005754.2) is another GAM2071 target gene, herein designated TARGET GENE. AASS BINDING SITE is a target binding site found in the 3` untranslated

region of mRNA encoded by AASS, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of AASS BINDING SITE, designated SEQ ID:18163, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40683] Another function of GAM2071 is therefore inhibition of Aminoadipate-semialdehyde synthase (AASS, Accession NP_005754.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with AASS.

[40684] ABCA13 (Accession NP_689914.2) is another GAM2071 target gene, herein designated TARGET GENE. ABCA13 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ABCA13, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ABCA13 BINDING SITE, designated SEQ ID:13800, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40685] Another function of GAM2071 is therefore inhibition of

ABCA13 (Accession NP_689914.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ABCA13.

[40686] Actin binding lim protein 1 (ABLIM1, Accession NP_006710.2) is another GAM2071 target gene, herein designated TARGET GENE. ABLIM1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ABLIM1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ABLIM1 BINDING SITE, designated SEQ ID:13022, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40687] Another function of GAM2071 is therefore inhibition of Actin binding lim protein 1 (ABLIM1, Accession NP_006710.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ABLIM1.

[40688] Actin binding lim protein 1 (ABLIM1, Accession NP_002304.2) is another GAM2071 target gene, herein designated TARGET GENE. ABLIM1 BINDING SITE is a target

binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ABLIM1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ABLIM1 BINDING SITE, designated SEQ ID:13022, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40689] Another function of GAM2071 is therefore inhibition of Actin binding lim protein 1 (ABLIM1, Accession NP_002304.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ABLIM1.

[40690] Actin binding lim protein 1 (ABLIM1, Accession NP_006711.2) is another GAM2071 target gene, herein designated TARGET GENE. ABLIM1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ABLIM1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ABLIM1 BINDING SITE, designated SEQ ID:13022, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[40691] Another function of GAM2071 is therefore inhibition of Actin binding lim protein 1 (ABLIM1, Accession NP_006711.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ABLIM1.

[40692] Acyl-coenzyme a dehydrogenase, short/branched chain (ACADSB, Accession NP_001600.1) is another GAM2071 target gene, herein designated TARGET GENE. ACADSB BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ACADSB, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ACADSB BINDING SITE, designated SEQ ID:14907, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40693] Another function of GAM2071 is therefore inhibition of Acyl-coenzyme a dehydrogenase, short/branched chain (ACADSB, Accession NP_001600.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ACADSB.

[40694] A disintegrin-like and metalloprotease (reprolysin type) with thrombospondin type 1 motif, 4 (ADAMTS4, Accession NP_005090.1) is another GAM2071 target gene, herein designated TARGET GENE. ADAMTS4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ADAMTS4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ADAMTS4 BINDING SITE, designated SEQ ID:1318, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40695] Another function of GAM2071 is therefore inhibition of A disintegrin-like and metalloprotease (reprolysin type) with thrombospondin type 1 motif, 4 (ADAMTS4, Accession NP_005090.1), a gene which cleaves aggrecan, a cartilage proteoglycan, and may be involved in its turnover. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ADAMTS4.

[40696] The function of ADAMTS4 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference

to GAM189.1.Adenylate cyclase 5 (ADCY5, Accession XP_171048.2) is another GAM2071 target gene, herein designated TARGET GENE. ADCY5 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ADCY5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ADCY5 BINDING SITE, designated SEQ ID:19656, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40697] Another function of GAM2071 is therefore inhibition of Adenylate cyclase 5 (ADCY5, Accession XP_171048.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ADCY5.

[40698] Adenylate cyclase 6 (ADCY6, Accession NP_056085.1) is another GAM2071 target gene, herein designated TARGET GENE. ADCY6 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by ADCY6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the comple-

mentarity of the nucleotide sequences of ADCY6 BINDING SITE, designated SEQ ID:14908, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40699] Another function of GAM2071 is therefore inhibition of Adenylate cyclase 6 (ADCY6, Accession NP_056085.1), a gene which this a membrane- bound, ca(2+)- inhibitable adenylyl cyclase (by similarity). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ADCY6.

[40700] The function of ADCY6 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM67.2.Agmatine ureohydrolase (agmatinase) (AGMAT, Accession NP_079034.2) is another GAM2071 target gene, herein designated TARGET GENE. AGMAT BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by AGMAT, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of AGMAT BINDING SITE, designated SEQ ID:2112, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[40701] Another function of GAM2071 is therefore inhibition of Agmatine ureohydrolase (agmatinase) (AGMAT, Accession NP_079034.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with AGMAT.

[40702] Aryl hydrocarbon receptor (AHR, Accession NP_001612.1) is another GAM2071 target gene, herein designated TARGET GENE. AHR BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by AHR, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of AHR BINDING SITE, designated SEQ ID:9011, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40703] Another function of GAM2071 is therefore inhibition of Aryl hydrocarbon receptor (AHR, Accession NP_001612.1), a gene which plays a role in modulating carcinogenesis through the induction of xenobiotic- metabolizing enzymes and therefore may be associated with Stomach tumors. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Stomach tumors, and of

other diseases and clinical conditions associated with AHR.

[40704] The function of AHR and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Absent in melanoma 1 (AIM1, Accession XP_166300.1) is another GAM2071 target gene, herein designated TARGET GENE. AIM1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by AIM1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of AIM1 BINDING SITE, designated SEQ ID:1383, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40705] Another function of GAM2071 is therefore inhibition of Absent in melanoma 1 (AIM1, Accession XP_166300.1), a gene which is altered in association with tumor suppression in a model of human melanoma and therefore may be associated with Malignant melanoma. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Malignant melanoma, and of other diseases and clinical

conditions associated with AIM1.

[40706] The function of AIM1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.Aldehyde dehydrogenase 1 family, member b1 (ALDH1B1, Accession NP_000683.3) is another GAM2071 target gene, herein designated TARGET GENE. ALDH1B1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ALDH1B1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ALDH1B1 BINDING SITE, designated SEQ ID:19434, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40707] Another function of GAM2071 is therefore inhibition of Aldehyde dehydrogenase 1 family, member b1 (ALDH1B1, Accession NP_000683.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ALDH1B1.

[40708] Arachidonate 15-lipoxygenase (ALOX15, Accession NP_001131.1) is another GAM2071 target gene, herein

designated TARGET GENE. ALOX15 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ALOX15, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ALOX15 BINDING SITE, designated SEQ ID:18901, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40709] Another function of GAM2071 is therefore inhibition of Arachidonate 15-lipoxygenase (ALOX15, Accession NP_001131.1), a gene which converts arachidonic acid to 15s- hydroperoxyeicosatetraenoic acid. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ALOX15.

[40710] The function of ALOX15 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.AMID (Accession NP_116186.1) is another GAM2071 target gene, herein designated TARGET GENE. AMID BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by AMID, corre-

sponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of AMID BINDING SITE, designated SEQ ID:2328, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40711] Another function of GAM2071 is therefore inhibition of AMID (Accession NP_116186.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with AMID.

[40712] Angiomotin like 1 (AMOTL1, Accession NP_570899.1) is another GAM2071 target gene, herein designated TARGET GENE. AMOTL1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by AMOTL1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of AMOTL1 BINDING SITE, designated SEQ ID:18210, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40713] Another function of GAM2071 is therefore inhibition of Angiomotin like 1 (AMOTL1, Accession NP_570899.1) .

Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with AMOTL1.

[40714] Ankyrin repeat domain 6 (ANKRD6, Accession NP_055757.1) is another GAM2071 target gene, herein designated TARGET GENE. ANKRD6 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ANKRD6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ANKRD6 BINDING SITE, designated SEQ ID:11653, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40715] Another function of GAM2071 is therefore inhibition of Ankyrin repeat domain 6 (ANKRD6, Accession NP_055757.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ANKRD6.

[40716] AP1S3 (Accession XP_291023.1) is another GAM2071 target gene, herein designated TARGET GENE. AP1S3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by

AP1S3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of AP1S3 BINDING SITE, designated SEQ ID:15779, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40717] Another function of GAM2071 is therefore inhibition of AP1S3 (Accession XP_291023.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with AP1S3.

[40718] Adaptor-related protein complex 3, sigma 2 subunit (AP3S2, Accession NP_005820.1) is another GAM2071 target gene, herein designated TARGET GENE. AP3S2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by AP3S2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of AP3S2 BINDING SITE, designated SEQ ID:6113, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40719] Another function of GAM2071 is therefore inhibition of

Adaptor-related protein complex 3, sigma 2 subunit (AP3S2, Accession NP_005820.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with AP3S2.

[40720] Apoptotic protease activating factor (APAF1, Accession NP_001151.1) is another GAM2071 target gene, herein designated TARGET GENE. APAF1 BINDING SITE1 and APAF1 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by APAF1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of APAF1 BINDING SITE1 and APAF1 BINDING SITE2, designated SEQ ID:1306 and SEQ ID:803 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40721] Another function of GAM2071 is therefore inhibition of Apoptotic protease activating factor (APAF1, Accession NP_001151.1), a gene which functions in the mitochondrial apoptotic pathway that leads to caspase 9 dependent activation of caspase 3 and therefore may be associated with Cancer. Accordingly, utilities of GAM2071 include di-

agnosis, prevention and treatment of Cancer, and of other diseases and clinical conditions associated with APAF1.

[40722] The function of APAF1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Apoptotic protease activating factor (APAF1, Accession NP_001151.1) is another GAM2071 target gene, herein designated TARGET GENE. APAF1 BINDING SITE1 and APAF1 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by APAF1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of APAF1 BINDING SITE1 and APAF1 BINDING SITE2, designated SEQ ID:803 and SEQ ID:1306 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40723] Another function of GAM2071 is therefore inhibition of Apoptotic protease activating factor (APAF1, Accession NP_001151.1), a gene which functions in the mitochondrial apoptotic pathway that leads to caspase 9 dependent activation of caspase 3 and therefore may be associated

with Cancer. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Cancer, and of other diseases and clinical conditions associated with APAF1.

[40724] The function of APAF1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.APM1 (Accession NP_004788.1) is another GAM2071 target gene, herein designated TARGET GENE. APM1 BINDING SITE1 and APM1 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by APM1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of APM1 BINDING SITE1 and APM1 BINDING SITE2, designated SEQ ID:13551 and SEQ ID:1962 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40725] Another function of GAM2071 is therefore inhibition of APM1 (Accession NP_004788.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with APM1.

[40726] Apolipoprotein b mrna editing enzyme, catalytic polypep-

tide-like 3f (APOBEC3F, Accession NP_660341.2) is another GAM2071 target gene, herein designated TARGET GENE. APOBEC3F BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by APOBEC3F, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of APOBEC3F BINDING SITE, designated SEQ ID:5126, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40727] Another function of GAM2071 is therefore inhibition of Apolipoprotein b mrna editing enzyme, catalytic polypeptide-like 3f (APOBEC3F, Accession NP_660341.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with APOBEC3F.

[40728] Apolipoprotein l, 2 (APOL2, Accession NP_112092.1) is another GAM2071 target gene, herein designated TARGET GENE. APOL2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by APOL2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BIND-

ING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of APOL2 BINDING SITE, designated SEQ ID:16087, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40729] Another function of GAM2071 is therefore inhibition of Apolipoprotein l, 2 (APOL2, Accession NP_112092.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with APOL2.

[40730] Apolipoprotein l, 2 (APOL2, Accession NP_663612.1) is another GAM2071 target gene, herein designated TARGET GENE. APOL2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by APOL2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of APOL2 BINDING SITE, designated SEQ ID:16087, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40731] Another function of GAM2071 is therefore inhibition of Apolipoprotein l, 2 (APOL2, Accession NP_663612.1) . Ac-

cordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with APOL2.

[40732] APPL (Accession NP_036228.1) is another GAM2071 target gene, herein designated TARGET GENE. APPL BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by APPL, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of APPL BINDING SITE, designated SEQ ID:12386, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40733] Another function of GAM2071 is therefore inhibition of APPL (Accession NP_036228.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with APPL.

[40734] Aquaporin 6, kidney specific (AQP6, Accession NP_001643.1) is another GAM2071 target gene, herein designated TARGET GENE. AQP6 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by AQP6, corresponding to a target binding site such as BINDING SITE I, BINDING

SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of AQP6 BINDING SITE, designated SEQ ID:2103, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40735] Another function of GAM2071 is therefore inhibition of Aquaporin 6, kidney specific (AQP6, Accession NP_001643.1), a gene which participates in distinct physiologic function such as glomerular filtration, tubular endocytosis, and acid- base metabolism. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with AQP6.

[40736] The function of AQP6 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM51.1.Aquaporin 6, kidney specific (AQP6, Accession NP_445738.1) is another GAM2071 target gene, herein designated TARGET GENE. AQP6 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by AQP6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of AQP6 BINDING SITE, designated SEQ ID:2103, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40737] Another function of GAM2071 is therefore inhibition of Aquaporin 6, kidney specific (AQP6, Accession NP_445738.1), a gene which participates in distinct physiologic function such as glomerular filtration, tubular endocytosis, and acid- base metabolism. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with AQP6.

[40738] The function of AQP6 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM51.1.Adp-ribosylation factor 4-like (ARF4L, Accession NP_001652.1) is another GAM2071 target gene, herein designated TARGET GENE. ARF4L BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ARF4L, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ARF4L BINDING SITE,

designated SEQ ID:16932, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40739] Another function of GAM2071 is therefore inhibition of Adp-ribosylation factor 4-like (ARF4L, Accession NP_001652.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ARF4L.

[40740] Ras homolog gene family, member a (ARHA, Accession NP_001655.1) is another GAM2071 target gene, herein designated TARGET GENE. ARHA BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ARHA, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ARHA BINDING SITE, designated SEQ ID:2467, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40741] Another function of GAM2071 is therefore inhibition of Ras homolog gene family, member a (ARHA, Accession NP_001655.1), a gene which regulates remodeling of the actin cytoskeleton during cell morphogenesis and motility.

Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ARHA.

[40742] The function of ARHA and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM223.1.Ras homolog gene family, member f (in filopodia) (ARHF, Accession NP_061907.1) is another GAM2071 target gene, herein designated TARGET GENE. ARHF BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ARHF, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ARHF BINDING SITE, designated SEQ ID:3172, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40743] Another function of GAM2071 is therefore inhibition of Ras homolog gene family, member f (in filopodia) (ARHF, Accession NP_061907.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ARHF.

[40744] Rho gtpase activating protein 1 (ARHGAP1, Accession

NP_004299.1) is another GAM2071 target gene, herein designated TARGET GENE. ARHGAP1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ARHGAP1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ARHGAP1 BINDING SITE, designated SEQ ID:8690, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40745] Another function of GAM2071 is therefore inhibition of Rho gtpase activating protein 1 (ARHGAP1, Accession NP_004299.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ARHGAP1.

[40746] ARHGAP11A (Accession NP_055598.1) is another GAM2071 target gene, herein designated TARGET GENE. ARHGAP11A BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ARHGAP11A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ARHGAP11A BINDING SITE, desig-

nated SEQ ID:7085, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40747] Another function of GAM2071 is therefore inhibition of ARHGAP11A (Accession NP_055598.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ARHGAP11A.

[40748] ARPP-19 (Accession NP_006619.1) is another GAM2071 target gene, herein designated TARGET GENE. ARPP-19 BINDING SITE1 and ARPP-19 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by ARPP-19, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ARPP-19 BINDING SITE1 and ARPP-19 BINDING SITE2, designated SEQ ID:18664 and SEQ ID:5121 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40749] Another function of GAM2071 is therefore inhibition of ARPP-19 (Accession NP_006619.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with ARPP-19.

[40750] Ankyrin repeat and socs box-containing 16 (ASB16, Accession NP_543139.4) is another GAM2071 target gene, herein designated TARGET GENE. ASB16 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ASB16, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ASB16 BINDING SITE, designated SEQ ID:11661, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40751] Another function of GAM2071 is therefore inhibition of Ankyrin repeat and socs box-containing 16 (ASB16, Accession NP_543139.4) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ASB16.

[40752] Ankyrin repeat and socs box-containing 6 (ASB6, Accession NP_060343.1) is another GAM2071 target gene, herein designated TARGET GENE. ASB6 BINDING SITE1 and ASB6 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA en-

coded by ASB6, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ASB6 BINDING SITE1 and ASB6 BINDING SITE2, designated SEQ ID:20186 and SEQ ID:1654 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40753] Another function of GAM2071 is therefore inhibition of Ankyrin repeat and socs box-containing 6 (ASB6, Accession NP_060343.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ASB6.

[40754] Ankyrin repeat and socs box-containing 6 (ASB6, Accession NP_821066.1) is another GAM2071 target gene, herein designated TARGET GENE. ASB6 BINDING SITE1 and ASB6 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by ASB6, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ASB6 BINDING SITE1 and ASB6 BINDING SITE2, designated SEQ ID:20186 and SEQ ID:1654

respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40755] Another function of GAM2071 is therefore inhibition of Ankyrin repeat and socs box-containing 6 (ASB6, Accession NP_821066.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ASB6.

[40756] ASE-1 (Accession NP_036231.1) is another GAM2071 target gene, herein designated TARGET GENE. ASE-1 BINDING SITE1 and ASE-1 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by ASE-1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ASE-1 BINDING SITE1 and ASE-1 BINDING SITE2, designated SEQ ID:9101 and SEQ ID:9988 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40757] Another function of GAM2071 is therefore inhibition of ASE-1 (Accession NP_036231.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of

diseases and clinical conditions associated with ASE-1.

[40758] Atpase, (na+)/k+ transporting, beta 4 polypeptide (ATP1B4, Accession NP_036201.1) is another GAM2071 target gene, herein designated TARGET GENE. ATP1B4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ATP1B4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ATP1B4 BINDING SITE, designated SEQ ID:15678, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40759] Another function of GAM2071 is therefore inhibition of Atpase, (na+)/k+ transporting, beta 4 polypeptide (ATP1B4, Accession NP_036201.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ATP1B4.

[40760] Atpase, ca++ transporting, type 2c, member 1 (ATP2C1, Accession NP_055197.1) is another GAM2071 target gene, herein designated TARGET GENE. ATP2C1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by ATP2C1, corresponding to a target

binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ATP2C1 BINDING SITE, designated SEQ ID:4782, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40761] Another function of GAM2071 is therefore inhibition of Atpase, ca++ transporting, type 2c, member 1 (ATP2C1, Accession NP_055197.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ATP2C1.

[40762] Atpase, h+ transporting, lysosomal 38kda, v0 subunit d isoform 2 (ATP6V0D2, Accession NP_689778.1) is another GAM2071 target gene, herein designated TARGET GENE. ATP6V0D2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ATP6V0D2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ATP6V0D2 BINDING SITE, designated SEQ ID:7490, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40763] Another function of GAM2071 is therefore inhibition of Atpase, h+ transporting, lysosomal 38kda, v0 subunit d isoform 2 (ATP6V0D2, Accession NP_689778.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ATP6V0D2.

[40764] Atpase, cu++ transporting, alpha polypeptide (menkes syndrome) (ATP7A, Accession NP_000043.1) is another GAM2071 target gene, herein designated TARGET GENE. ATP7A BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ATP7A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ATP7A BINDING SITE, designated SEQ ID:19505, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40765] Another function of GAM2071 is therefore inhibition of Atpase, cu++ transporting, alpha polypeptide (menkes syndrome) (ATP7A, Accession NP_000043.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ATP7A.

[40766] Axl receptor tyrosine kinase (AXL, Accession NP_068713.2) is another GAM2071 target gene, herein designated TARGET GENE. AXL BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by AXL, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of AXL BINDING SITE, designated SEQ ID:5485, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40767] Another function of GAM2071 is therefore inhibition of Axl receptor tyrosine kinase (AXL, Accession NP_068713.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with AXL.

[40768] Axl receptor tyrosine kinase (AXL, Accession NP_001690.2) is another GAM2071 target gene, herein designated TARGET GENE. AXL BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by AXL, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the

complementarity of the nucleotide sequences of AXL BINDING SITE, designated SEQ ID:5485, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40769] Another function of GAM2071 is therefore inhibition of Axl receptor tyrosine kinase (AXL, Accession NP_001690.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with AXL.

[40770] Udp-gal:betaglcnac beta 1,4- galactosyltransferase, polypeptide 5 (B4GALT5, Accession NP_004767.1) is another GAM2071 target gene, herein designated TARGET GENE. B4GALT5 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by B4GALT5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of B4GALT5 BINDING SITE, designated SEQ ID:10889, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40771] Another function of GAM2071 is therefore inhibition of Udp-gal:betaglcnac beta 1,4- galactosyltransferase,

polypeptide 5 (B4GALT5, Accession NP_004767.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with B4GALT5.

[40772] Btb and cnc homology 1, basic leucine zipper transcription factor 1 (BACH1, Accession NP_001177.1) is another GAM2071 target gene, herein designated TARGET GENE. BACH1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by BACH1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BACH1 BINDING SITE, designated SEQ ID:2969, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40773] Another function of GAM2071 is therefore inhibition of Btb and cnc homology 1, basic leucine zipper transcription factor 1 (BACH1, Accession NP_001177.1), a gene which acts as repressor or activator, binds to nf- e2 binding sites. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with BACH1.

[40774] The function of BACH1 and its association with various

diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM100.1.Bcl2-associated athanogene 5 (BAG5, Accession NP_004864.1) is another GAM2071 target gene, herein designated TARGET GENE. BAG5 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by BAG5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BAG5 BINDING SITE, designated SEQ ID:19878, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40775] Another function of GAM2071 is therefore inhibition of Bcl2-associated athanogene 5 (BAG5, Accession NP_004864.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with BAG5.

[40776] Bai1-associated protein 3 (BAIAP3, Accession NP_003924.2) is another GAM2071 target gene, herein designated TARGET GENE. BAIAP3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by BAIAP3, corresponding to a target binding site

such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BAIAP3 BINDING SITE, designated SEQ ID:14634, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40777] Another function of GAM2071 is therefore inhibition of Bai1-associated protein 3 (BAIAP3, Accession NP_003924.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with BAIAP3.

[40778] B-cell cll/lymphoma 10 (BCL10, Accession NP_003912.1) is another GAM2071 target gene, herein designated TARGET GENE. BCL10 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by BCL10, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BCL10 BINDING SITE, designated SEQ ID:17565, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40779] Another function of GAM2071 is therefore inhibition of B-

cell cll/lymphoma 10 (BCL10, Accession NP_003912.1), a gene which is a positive regulator of lymphocyte proliferation, NF- kappaB activator. and therefore may be associated with Malt lymphoma, follicular lymphoma. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Malt lymphoma, follicular lymphoma, and of other diseases and clinical conditions associated with BCL10.

[40780] The function of BCL10 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.Bradykinin receptor b1 (BDKRB1, Accession NP_000701.2) is another GAM2071 target gene, herein designated TARGET GENE. BDKRB1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by BDKRB1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BDKRB1 BINDING SITE, designated SEQ ID:13940, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40781] Another function of GAM2071 is therefore inhibition of Bradykinin receptor b1 (BDKRB1, Accession NP_000701.2), a gene which mediates intracellular calcium flux. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with BDKRB1.

[40782] The function of BDKRB1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.B double prime 1, subunit of rna polymerase iii transcription initiation factor iiib (BDP1, Accession NP_060899.1) is another GAM2071 target gene, herein designated TARGET GENE. BDP1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by BDP1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BDP1 BINDING SITE, designated SEQ ID:4304, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40783] Another function of GAM2071 is therefore inhibition of B double prime 1, subunit of rna polymerase iii transcription

initiation factor iiib (BDP1, Accession NP_060899.1), a gene which activates RNA polymerase III transcription. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with BDP1.

[40784] The function of BDP1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM146.1.BENE (Accession NP_005425.1) is another GAM2071 target gene, herein designated TARGET GENE. BENE BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by BENE, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BENE BINDING SITE, designated SEQ ID:3688, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40785] Another function of GAM2071 is therefore inhibition of BENE (Accession NP_005425.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with BENE.

[40786] Bone morphogenetic protein 1 (BMP1, Accession

NP_006120.1) is another GAM2071 target gene, herein designated TARGET GENE. BMP1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by BMP1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BMP1 BINDING SITE, designated SEQ ID:769, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40787] Another function of GAM2071 is therefore inhibition of Bone morphogenetic protein 1 (BMP1, Accession NP_006120.1), a gene which cleaves procollagens leading to formation of extracellular matrix. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with BMP1.

[40788] The function of BMP1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM51.1.BNIP-S (Accession NP_612122.1) is another GAM2071 target gene, herein designated TARGET GENE. BNIP-S BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA

encoded by BNIP-S, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BNIP-S BINDING SITE, designated SEQ ID:17763, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40789] Another function of GAM2071 is therefore inhibition of BNIP-S (Accession NP_612122.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with BNIP-S.

[40790] Butyrophilin, subfamily 3, member a1 (BTN3A1, Accession NP_008979.2) is another GAM2071 target gene, herein designated TARGET GENE. BTN3A1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by BTN3A1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BTN3A1 BINDING SITE, designated SEQ ID:17858, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40791] Another function of GAM2071 is therefore inhibition of

Butyrophilin, subfamily 3, member a1 (BTN3A1, Accession NP_008979.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with BTN3A1.

[40792] BXDC1 (Accession XP_166303.1) is another GAM2071 target gene, herein designated TARGET GENE. BXDC1 BINDING SITE1 and BXDC1 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by BXDC1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BXDC1 BINDING SITE1 and BXDC1 BINDING SITE2, designated SEQ ID:711 and SEQ ID:7070 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40793] Another function of GAM2071 is therefore inhibition of BXDC1 (Accession XP_166303.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with BXDC1.

[40794] BY55 (Accession NP_008984.1) is another GAM2071 target gene, herein designated TARGET GENE. BY55 BINDING SITE is a target binding site found in the 5` untranslated

region of mRNA encoded by BY55, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BY55 BINDING SITE, designated SEQ ID:17712, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40795] Another function of GAM2071 is therefore inhibition of BY55 (Accession NP_008984.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with BY55.

[40796] Chromosome 11 open reading frame 17 (C11orf17, Accession NP_065693.2) is another GAM2071 target gene, herein designated TARGET GENE. C11orf17 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C11orf17, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C11orf17 BINDING SITE, designated SEQ ID:13793, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40797] Another function of GAM2071 is therefore inhibition of

Chromosome 11 open reading frame 17 (C11orf17, Accession NP_065693.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C11orf17.

[40798] Chromosome 11 open reading frame 9 (C11orf9, Accession NP_037411.1) is another GAM2071 target gene, herein designated TARGET GENE. C11orf9 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C11orf9, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C11orf9 BINDING SITE, designated SEQ ID:5710, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40799] Another function of GAM2071 is therefore inhibition of Chromosome 11 open reading frame 9 (C11orf9, Accession NP_037411.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C11orf9.

[40800] Chromosome 13 open reading frame 1 (C13orf1, Accession NP_065189.1) is another GAM2071 target gene, herein designated TARGET GENE. C13orf1 BINDING SITE is

a target binding site found in the 3` untranslated region of mRNA encoded by C13orf1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C13orf1 BINDING SITE, designated SEQ ID:2596, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40801] Another function of GAM2071 is therefore inhibition of Chromosome 13 open reading frame 1 (C13orf1, Accession NP_065189.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C13orf1.

[40802] Chromosome 14 open reading frame 1 (C14orf1, Accession NP_009107.1) is another GAM2071 target gene, herein designated TARGET GENE. C14orf1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C14orf1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C14orf1 BINDING SITE, designated SEQ ID:2950, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA,

also designated SEQ ID:371.

[40803] Another function of GAM2071 is therefore inhibition of Chromosome 14 open reading frame 1 (C14orf1, Accession NP_009107.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C14orf1.

[40804] C14orf143 (Accession NP_660274.1) is another GAM2071 target gene, herein designated TARGET GENE. C14orf143 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C14orf143, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C14orf143 BINDING SITE, designated SEQ ID:11599, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40805] Another function of GAM2071 is therefore inhibition of C14orf143 (Accession NP_660274.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C14orf143.

[40806] C14orf92 (Accession NP_055643.1) is another GAM2071 target gene, herein designated TARGET GENE. C14orf92

BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C14orf92, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C14orf92 BINDING SITE, designated SEQ ID:18182, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40807] Another function of GAM2071 is therefore inhibition of C14orf92 (Accession NP_055643.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C14orf92.

[40808] Chromosome 1 open reading frame 24 (C1orf24, Accession NP_443198.1) is another GAM2071 target gene, herein designated TARGET GENE. C1orf24 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by C1orf24, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C1orf24 BINDING SITE, designated SEQ ID:601, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[40809] Another function of GAM2071 is therefore inhibition of Chromosome 1 open reading frame 24 (C1orf24, Accession NP_443198.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C1orf24.

[40810] C1q and tumor necrosis factor related protein 6 (C1QTNF6, Accession NP_114116.2) is another GAM2071 target gene, herein designated TARGET GENE. C1QTNF6 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C1QTNF6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C1QTNF6 BINDING SITE, designated SEQ ID:18746, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40811] Another function of GAM2071 is therefore inhibition of C1q and tumor necrosis factor related protein 6 (C1QTNF6, Accession NP_114116.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C1QTNF6.

[40812] Chromosome 21 open reading frame 108 (C21orf108, Accession XP_114191.2) is another GAM2071 target gene, herein designated TARGET GENE. C21orf108 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C21orf108, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C21orf108 BINDING SITE, designated SEQ ID:2886, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40813] Another function of GAM2071 is therefore inhibition of Chromosome 21 open reading frame 108 (C21orf108, Accession XP_114191.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C21orf108.

[40814] Chromosome 22 open reading frame 19 (C22orf19, Accession NP_003669.2) is another GAM2071 target gene, herein designated TARGET GENE. C22orf19 BINDING SITE1 and C22orf19 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by C22orf19, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C22orf19 BINDING SITE1 and C22orf19 BINDING SITE2, designated SEQ ID:16921 and SEQ ID:14748 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40815] Another function of GAM2071 is therefore inhibition of Chromosome 22 open reading frame 19 (C22orf19, Accession NP_003669.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C22orf19.

[40816] C3F (Accession NP_005759.2) is another GAM2071 target gene, herein designated TARGET GENE. C3F BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C3F, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C3F BINDING SITE, designated SEQ ID:15743, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40817] Another function of GAM2071 is therefore inhibition of C3F (Accession NP_005759.2) . Accordingly, utilities of

GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C3F.

[40818] Chromosome 5 open reading frame 4 (C5orf4, Accession NP_115761.1) is another GAM2071 target gene, herein designated TARGET GENE. C5orf4 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by C5orf4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C5orf4 BINDING SITE, designated SEQ ID:10925, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40819] Another function of GAM2071 is therefore inhibition of Chromosome 5 open reading frame 4 (C5orf4, Accession NP_115761.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C5orf4.

[40820] Chromosome 5 open reading frame 4 (C5orf4, Accession NP_057432.1) is another GAM2071 target gene, herein designated TARGET GENE. C5orf4 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by C5orf4, correspond-

ing to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C5orf4 BINDING SITE, designated SEQ ID:10925, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40821] Another function of GAM2071 is therefore inhibition of Chromosome 5 open reading frame 4 (C5orf4, Accession NP_057432.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C5orf4.

[40822] Chromosome 5 open reading frame 7 (C5orf7, Accession NP_057688.1) is another GAM2071 target gene, herein designated TARGET GENE. C5orf7 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C5orf7, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C5orf7 BINDING SITE, designated SEQ ID:7567, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40823] Another function of GAM2071 is therefore inhibition of

Chromosome 5 open reading frame 7 (C5orf7, Accession NP_057688.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C5orf7.

[40824] C6orf141 (Accession NP_699175.1) is another GAM2071 target gene, herein designated TARGET GENE. C6orf141 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C6orf141, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C6orf141 BINDING SITE, designated SEQ ID:12169, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40825] Another function of GAM2071 is therefore inhibition of C6orf141 (Accession NP_699175.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C6orf141.

[40826] Chromosome 6 open reading frame 33 (C6orf33, Accession NP_588608.1) is another GAM2071 target gene, herein designated TARGET GENE. C6orf33 BINDING SITE is a target binding site found in the 3` untranslated region

of mRNA encoded by C6orf33, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C6orf33 BINDING SITE, designated SEQ ID:7278, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40827] Another function of GAM2071 is therefore inhibition of Chromosome 6 open reading frame 33 (C6orf33, Accession NP_588608.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C6orf33.

[40828] C6orf5 (Accession NP_056339.2) is another GAM2071 target gene, herein designated TARGET GENE. C6orf5 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C6orf5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C6orf5 BINDING SITE, designated SEQ ID:10778, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40829] Another function of GAM2071 is therefore inhibition of

C6orf5 (Accession NP_056339.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C6orf5.

[40830] C6orf57 (Accession NP_660310.1) is another GAM2071 target gene, herein designated TARGET GENE. C6orf57 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by C6orf57, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C6orf57 BINDING SITE, designated SEQ ID:6442, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40831] Another function of GAM2071 is therefore inhibition of C6orf57 (Accession NP_660310.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C6orf57.

[40832] Chromosome 9 open reading frame 9 (C9orf9, Accession NP_061829.2) is another GAM2071 target gene, herein designated TARGET GENE. C9orf9 BINDING SITE1 and C9orf9 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by C9orf9, corre-

sponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of C9orf9 BINDING SITE1 and C9orf9 BINDING SITE2, designated SEQ ID:13797 and SEQ ID:19273 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40833] Another function of GAM2071 is therefore inhibition of Chromosome 9 open reading frame 9 (C9orf9, Accession NP_061829.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with C9orf9.

[40834] Carbonic anhydrase va, mitochondrial (CA5A, Accession NP_001730.1) is another GAM2071 target gene, herein designated TARGET GENE. CA5A BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by CA5A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CA5A BINDING SITE, designated SEQ ID:6692, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40835] Another function of GAM2071 is therefore inhibition of Carbonic anhydrase va, mitochondrial (CA5A, Accession NP_001730.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CA5A.

[40836] Caspase 8, apoptosis-related cysteine protease (CASP8, Accession NP_203519.1) is another GAM2071 target gene, herein designated TARGET GENE. CASP8 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CASP8, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CASP8 BINDING SITE, designated SEQ ID:9100, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40837] Another function of GAM2071 is therefore inhibition of Caspase 8, apoptosis-related cysteine protease (CASP8, Accession NP_203519.1), a gene which is an apoptosis-related caspase and an upstream component of Fas receptor and tumor necrosis factor (TNF) receptor- induced apoptosis. and therefore may be associated with Huntington- related neurodegenerative diseases. Accordingly,

utilities of GAM2071 include diagnosis, prevention and treatment of Huntington- related neurodegenerative diseases, and of other diseases and clinical conditions associated with CASP8.

[40838] The function of CASP8 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM72.1.Caspase 8, apoptosis-related cysteine protease (CASP8, Accession NP_203520.1) is another GAM2071 target gene, herein designated TARGET GENE. CASP8 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CASP8, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CASP8 BINDING SITE, designated SEQ ID:9100, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40839] Another function of GAM2071 is therefore inhibition of Caspase 8, apoptosis-related cysteine protease (CASP8, Accession NP_203520.1), a gene which is an apoptosis-related caspase and an upstream component of Fas re-

ceptor and tumor necrosis factor (TNF) receptor- induced apoptosis. and therefore may be associated with Huntington- related neurodegenerative diseases. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Huntington- related neurodegenerative diseases, and of other diseases and clinical conditions associated with CASP8.

[40840] The function of CASP8 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM72.1.Caspase 8, apoptosis-related cysteine protease (CASP8, Accession NP_001219.2) is another GAM2071 target gene, herein designated TARGET GENE. CASP8 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CASP8, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CASP8 BINDING SITE, designated SEQ ID:9100, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40841] Another function of GAM2071 is therefore inhibition of

Caspase 8, apoptosis-related cysteine protease (CASP8, Accession NP_001219.2), a gene which is an apoptosis-related caspase and an upstream component of Fas receptor and tumor necrosis factor (TNF) receptor- induced apoptosis. and therefore may be associated with Huntington- related neurodegenerative diseases. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Huntington- related neurodegenerative diseases, and of other diseases and clinical conditions associated with CASP8.

[40842] The function of CASP8 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM72.1.Caspase 8, apoptosis-related cysteine protease (CASP8, Accession NP_203521.1) is another GAM2071 target gene, herein designated TARGET GENE. CASP8 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CASP8, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CASP8 BINDING SITE, designated SEQ ID:9100, to the nucleotide sequence of GAM2071

RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40843] Another function of GAM2071 is therefore inhibition of Caspase 8, apoptosis-related cysteine protease (CASP8, Accession NP_203521.1), a gene which is an apoptosis-related caspase and an upstream component of Fas receptor and tumor necrosis factor (TNF) receptor- induced apoptosis. and therefore may be associated with Huntington- related neurodegenerative diseases. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Huntington- related neurodegenerative diseases, and of other diseases and clinical conditions associated with CASP8.

[40844] The function of CASP8 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM72.1.Core-binding factor, runt domain, alpha subunit 2; translocated to, 2 (CBFA2T2, Accession NP_005084.1) is another GAM2071 target gene, herein designated TARGET GENE. CBFA2T2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CBFA2T2, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CBFA2T2 BINDING SITE, designated SEQ ID:3868, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40845] Another function of GAM2071 is therefore inhibition of Core-binding factor, runt domain, alpha subunit 2; translocated to, 2 (CBFA2T2, Accession NP_005084.1), a gene which is a putative transcription factor. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CBFA2T2.

[40846] The function of CBFA2T2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM55.1.Core-binding factor, runt domain, alpha subunit 2; translocated to, 2 (CBFA2T2, Accession NP_787060.1) is another GAM2071 target gene, herein designated TARGET GENE. CBFA2T2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CBFA2T2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of CBFA2T2 BINDING SITE, designated SEQ ID:3868, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40847] Another function of GAM2071 is therefore inhibition of Core-binding factor, runt domain, alpha subunit 2; translocated to, 2 (CBFA2T2, Accession NP_787060.1), a gene which is a putative transcription factor. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CBFA2T2.

[40848] The function of CBFA2T2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM55.1.Chemokine (c-c motif) ligand 16 (CCL16, Accession NP_004581.1) is another GAM2071 target gene, herein designated TARGET GENE. CCL16 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CCL16, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CCL16 BINDING SITE, designated SEQ ID:10633, to the nucleotide sequence of

GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40849] Another function of GAM2071 is therefore inhibition of Chemokine (c-c motif) ligand 16 (CCL16, Accession NP_004581.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CCL16.

[40850] Chemokine (c-c motif) ligand 22 (CCL22, Accession NP_002981.2) is another GAM2071 target gene, herein designated TARGET GENE. CCL22 BINDING SITE1 and CCL22 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by CCL22, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CCL22 BINDING SITE1 and CCL22 BINDING SITE2, designated SEQ ID:16005 and SEQ ID:11649 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40851] Another function of GAM2071 is therefore inhibition of Chemokine (c-c motif) ligand 22 (CCL22, Accession NP_002981.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clini-

cal conditions associated with CCL22.

[40852] Cyclin f (CCNF, Accession NP_001752.1) is another GAM2071 target gene, herein designated TARGET GENE. CCNF BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CCNF, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CCNF BINDING SITE, designated SEQ ID:14395, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40853] Another function of GAM2071 is therefore inhibition of Cyclin f (CCNF, Accession NP_001752.1), a gene which likely to be involved in the control of the cell cycle during s phase and g2. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CCNF.

[40854] The function of CCNF and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Chemokine (c-c motif) receptor 5 (CCR5, Accession NP_000570.1) is another GAM2071 target gene, herein designated TARGET GENE. CCR5 BINDING SITE is a

target binding site found in the 3` untranslated region of mRNA encoded by CCR5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CCR5 BINDING SITE, designated SEQ ID:17905, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40855] Another function of GAM2071 is therefore inhibition of Chemokine (c-c motif) receptor 5 (CCR5, Accession NP_000570.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CCR5.

[40856] Cd209 antigen (CD209, Accession NP_066978.1) is another GAM2071 target gene, herein designated TARGET GENE. CD209 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CD209, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CD209 BINDING SITE, designated SEQ ID:8229, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ

ID:371.

[40857] Another function of GAM2071 is therefore inhibition of Cd209 antigen (CD209, Accession NP_066978.1), a gene which may play an important role in the CD4- independent association of HIV with cells. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CD209.

[40858] The function of CD209 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM96.1.Cd24 antigen (small cell lung carcinoma cluster 4 antigen) (CD24, Accession NP_037362.1) is another GAM2071 target gene, herein designated TARGET GENE. CD24 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CD24, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CD24 BINDING SITE, designated SEQ ID:18593, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40859] Another function of GAM2071 is therefore inhibition of Cd24 antigen (small cell lung carcinoma cluster 4 antigen)

(CD24, Accession NP_037362.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CD24.

[40860] Cdc14 cell division cycle 14 homolog b (s. cerevisiae) (CDC14B, Accession NP_201589.1) is another GAM2071 target gene, herein designated TARGET GENE. CDC14B BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CDC14B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CDC14B BINDING SITE, designated SEQ ID:7919, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40861] Another function of GAM2071 is therefore inhibition of Cdc14 cell division cycle 14 homolog b (s. cerevisiae) (CDC14B, Accession NP_201589.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CDC14B.

[40862] Cell division cycle 2-like 2 (CDC2L2, Accession NP_296370.1) is another GAM2071 target gene, herein

designated TARGET GENE. CDC2L2 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by CDC2L2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CDC2L2 BINDING SITE, designated SEQ ID:8250, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40863] Another function of GAM2071 is therefore inhibition of Cell division cycle 2-like 2 (CDC2L2, Accession NP_296370.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CDC2L2.

[40864] CDCP1 (Accession NP_073753.3) is another GAM2071 target gene, herein designated TARGET GENE. CDCP1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CDCP1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CDCP1 BINDING SITE, designated SEQ ID:20095, to the nucleotide sequence of GAM2071

RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40865] Another function of GAM2071 is therefore inhibition of CDCP1 (Accession NP_073753.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CDCP1.

[40866] Cadherin 1, type 1, e-cadherin (epithelial) (CDH1, Accession NP_004351.1) is another GAM2071 target gene, herein designated TARGET GENE. CDH1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CDH1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CDH1 BINDING SITE, designated SEQ ID:3667, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40867] Another function of GAM2071 is therefore inhibition of Cadherin 1, type 1, e-cadherin (epithelial) (CDH1, Accession NP_004351.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CDH1.

[40868] CDK11 (Accession XP_166324.1) is another GAM2071 tar-

get gene, herein designated TARGET GENE. CDK11 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CDK11, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CDK11 BINDING SITE, designated SEQ ID:5408, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40869] Another function of GAM2071 is therefore inhibition of CDK11 (Accession XP_166324.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CDK11.

[40870] CDKAL1 (Accession NP_060244.1) is another GAM2071 target gene, herein designated TARGET GENE. CDKAL1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CDKAL1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CDKAL1 BINDING SITE, designated SEQ ID:12153, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[40871] Another function of GAM2071 is therefore inhibition of CDKAL1 (Accession NP_060244.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CDKAL1.

[40872] Carcinoembryonic antigen-related cell adhesion molecule 8 (CEACAM8, Accession NP_001807.2) is another GAM2071 target gene, herein designated TARGET GENE. CEACAM8 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CEACAM8, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CEACAM8 BINDING SITE, designated SEQ ID:436, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40873] Another function of GAM2071 is therefore inhibition of Carcinoembryonic antigen-related cell adhesion molecule 8 (CEACAM8, Accession NP_001807.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CEACAM8.

[40874] Centromere protein h (CENPH, Accession NP_075060.1) is another GAM2071 target gene, herein designated TARGET GENE. CENPH BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CENPH, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CENPH BINDING SITE, designated SEQ ID:7835, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40875] Another function of GAM2071 is therefore inhibition of Centromere protein h (CENPH, Accession NP_075060.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CENPH.

[40876] CGI-150 (Accession NP_057164.1) is another GAM2071 target gene, herein designated TARGET GENE. CGI-150 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by CGI-150, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

CGI-150 BINDING SITE, designated SEQ ID:19951, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40877] Another function of GAM2071 is therefore inhibition of CGI-150 (Accession NP_057164.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CGI-150.

[40878] Cold autoinflammatory syndrome 1 (CIAS1, Accession NP_004886.2) is another GAM2071 target gene, herein designated TARGET GENE. CIAS1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by CIAS1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CIAS1 BINDING SITE, designated SEQ ID:7985, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40879] Another function of GAM2071 is therefore inhibition of Cold autoinflammatory syndrome 1 (CIAS1, Accession NP_004886.2), a gene which may mediate protein- protein interactions; contains a leucine rich repeat and there-

fore may be associated with Familial cold autoinflammatory syndrome, muckle- wells syndrome. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Familial cold autoinflammatory syndrome, muckle- wells syndrome, and of other diseases and clinical conditions associated with CIAS1.

[40880] The function of CIAS1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM90.1.CIP29 (Accession NP_115740.3) is another GAM2071 target gene, herein designated TARGET GENE. CIP29 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CIP29, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CIP29 BINDING SITE, designated SEQ ID:11639, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40881] Another function of GAM2071 is therefore inhibition of CIP29 (Accession NP_115740.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CIP29.

[40882] C-type (calcium dependent, carbohydrate-recognition domain) lectin, superfamily member 12 (CLECSF12, Accession NP_072092.2) is another GAM2071 target gene, herein designated TARGET GENE. CLECSF12 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CLECSF12, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CLECSF12 BINDING SITE, designated SEQ ID:10233, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40883] Another function of GAM2071 is therefore inhibition of C-type (calcium dependent, carbohydrate-recognition domain) lectin, superfamily member 12 (CLECSF12, Accession NP_072092.2), a gene which is a pattern- recognition receptor . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CLECSF12.

[40884] The function of CLECSF12 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM47.1.Chloride channel, nucleotide-sensitive, 1a

(CLNS1A, Accession NP_001284.1) is another GAM2071 target gene, herein designated TARGET GENE. CLNS1A BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CLNS1A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CLNS1A BINDING SITE, designated SEQ ID:8322, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40885] Another function of GAM2071 is therefore inhibition of Chloride channel, nucleotide-sensitive, 1a (CLNS1A, Accession NP_001284.1), a gene which may participate in cellular volume control . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CLNS1A.

[40886] The function of CLNS1A and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM96.1.Cell matrix adhesion regulator (CMAR, Accession NP_005191.2) is another GAM2071 target gene, herein designated TARGET GENE. CMAR BINDING SITE is a target binding site found in the 5` untranslated region of

mRNA encoded by CMAR, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CMAR BINDING SITE, designated SEQ ID:19999, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40887] Another function of GAM2071 is therefore inhibition of Cell matrix adhesion regulator (CMAR, Accession NP_005191.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CMAR.

[40888] Calponin 2 (CNN2, Accession NP_004359.1) is another GAM2071 target gene, herein designated TARGET GENE. CNN2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CNN2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CNN2 BINDING SITE, designated SEQ ID:6909, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40889] Another function of GAM2071 is therefore inhibition of

Calponin 2 (CNN2, Accession NP_004359.1), a gene which may be involved in the structural organization and/or anchorage of actin filaments. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CNN2.

[40890] The function of CNN2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.Cyclin m3 (CNNM3, Accession NP_060093.2) is another GAM2071 target gene, herein designated TARGET GENE. CNNM3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CNNM3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CNNM3 BINDING SITE, designated SEQ ID:3981, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40891] Another function of GAM2071 is therefore inhibition of Cyclin m3 (CNNM3, Accession NP_060093.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associ-

ated with CNNM3.

[40892] 2',3'-cyclic nucleotide 3' phosphodiesterase (CNP, Accession NP_149124.1) is another GAM2071 target gene, herein designated TARGET GENE. CNP BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CNP, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CNP BINDING SITE, designated SEQ ID:5014, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40893] Another function of GAM2071 is therefore inhibition of 2',3'-cyclic nucleotide 3' phosphodiesterase (CNP, Accession NP_149124.1), a gene which can link tubulin to membranes and may regulate cytoplasmic microtubule distribution. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CNP.

[40894] The function of CNP and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Collectin sub-family member 12 (COLEC12,

Accession NP_110408.2) is another GAM2071 target gene, herein designated TARGET GENE. COLEC12 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by COLEC12, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of COLEC12 BINDING SITE, designated SEQ ID:13793, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40895] Another function of GAM2071 is therefore inhibition of Collectin sub-family member 12 (COLEC12, Accession NP_110408.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with COLEC12.

[40896] Cop9 constitutive photomorphogenic homolog subunit 7a (arabidopsis) (COPS7A, Accession NP_057403.1) is another GAM2071 target gene, herein designated TARGET GENE. COPS7A BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by COPS7A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of COPS7A BINDING SITE, designated SEQ ID:5715, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40897] Another function of GAM2071 is therefore inhibition of Cop9 constitutive photomorphogenic homolog subunit 7a (arabidopsis) (COPS7A, Accession NP_057403.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with COPS7A.

[40898] CPR8 (Accession NP_065790.1) is another GAM2071 target gene, herein designated TARGET GENE. CPR8 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CPR8, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CPR8 BINDING SITE, designated SEQ ID:9163, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40899] Another function of GAM2071 is therefore inhibition of CPR8 (Accession NP_065790.1) . Accordingly, utilities of

GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CPR8.

[40900] Carbamoyl-phosphate synthetase 1, mitochondrial (CPS1, Accession NP_001866.2) is another GAM2071 target gene, herein designated TARGET GENE. CPS1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CPS1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CPS1 BINDING SITE, designated SEQ ID:4147, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40901] Another function of GAM2071 is therefore inhibition of Carbamoyl-phosphate synthetase 1, mitochondrial (CPS1, Accession NP_001866.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CPS1.

[40902] Cleavage and polyadenylation specific factor 2, 100kda (CPSF2, Accession XP_029311.2) is another GAM2071 target gene, herein designated TARGET GENE. CPSF2 BINDING SITE1 and CPSF2 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by

CPSF2, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CPSF2 BINDING SITE1 and CPSF2 BINDING SITE2, designated SEQ ID:6739 and SEQ ID:6347 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40903] Another function of GAM2071 is therefore inhibition of Cleavage and polyadenylation specific factor 2, 100kda (CPSF2, Accession XP_029311.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CPSF2.

[40904] Complement component (3b/4b) receptor 1, including knops blood group system (CR1, Accession NP_000642.2) is another GAM2071 target gene, herein designated TARGET GENE. CR1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CR1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CR1 BINDING SITE, designated SEQ ID:13868, to the nucleotide sequence of

GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40905] Another function of GAM2071 is therefore inhibition of Complement component (3b/4b) receptor 1, including knops blood group system (CR1, Accession NP_000642.2). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CR1.

[40906] Complement component (3b/4b) receptor 1, including knops blood group system (CR1, Accession NP_000564.1) is another GAM2071 target gene, herein designated TARGET GENE. CR1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CR1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CR1 BINDING SITE, designated SEQ ID:13868, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40907] Another function of GAM2071 is therefore inhibition of Complement component (3b/4b) receptor 1, including knops blood group system (CR1, Accession NP_000564.1)

. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CR1.

[40908] Cytokine receptor-like factor 3 (CRLF3, Accession NP_057070.2) is another GAM2071 target gene, herein designated TARGET GENE. CRLF3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CRLF3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CRLF3 BINDING SITE, designated SEQ ID:9675, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40909] Another function of GAM2071 is therefore inhibition of Cytokine receptor-like factor 3 (CRLF3, Accession NP_057070.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CRLF3.

[40910] Cofactor required for sp1 transcriptional activation, subunit 6, 77kda (CRSP6, Accession NP_004259.3) is another GAM2071 target gene, herein designated TARGET GENE. CRSP6 BINDING SITE is a target binding site found in the

3` untranslated region of mRNA encoded by CRSP6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CRSP6 BINDING SITE, designated SEQ ID:12005, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40911] Another function of GAM2071 is therefore inhibition of Cofactor required for sp1 transcriptional activation, subunit 6, 77kda (CRSP6, Accession NP_004259.3), a gene which is required for Sp1 mediated transcriptional activation with TAF(II)s. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CRSP6.

[40912] The function of CRSP6 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.CSE-C (Accession NP_061851.1) is another GAM2071 target gene, herein designated TARGET GENE. CSE-C BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by CSE-C, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III

of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CSE-C BINDING SITE, designated SEQ ID:2336, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40913] Another function of GAM2071 is therefore inhibition of CSE-C (Accession NP_061851.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CSE-C.

[40914] Cse1 chromosome segregation 1-like (yeast) (CSE1L, Accession NP_803185.1) is another GAM2071 target gene, herein designated TARGET GENE. CSE1L BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by CSE1L, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CSE1L BINDING SITE, designated SEQ ID:3997, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40915] Another function of GAM2071 is therefore inhibition of Cse1 chromosome segregation 1-like (yeast) (CSE1L, Accession NP_803185.1) . Accordingly, utilities of GAM2071

include diagnosis, prevention and treatment of diseases and clinical conditions associated with CSE1L.

[40916] Calsenilin, presenilin binding protein, ef hand transcription factor (CSEN, Accession NP_038462.1) is another GAM2071 target gene, herein designated TARGET GENE. CSEN BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CSEN, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CSEN BINDING SITE, designated SEQ ID:14933, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40917] Another function of GAM2071 is therefore inhibition of Calsenilin, presenilin binding protein, ef hand transcription factor (CSEN, Accession NP_038462.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CSEN.

[40918] Casein kinase 2, alpha prime polypeptide (CSNK2A2, Accession NP_001887.1) is another GAM2071 target gene, herein designated TARGET GENE. CSNK2A2 BINDING SITE is a target binding site found in the 5` untranslated re-

gion of mRNA encoded by CSNK2A2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CSNK2A2 BINDING SITE, designated SEQ ID:15382, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40919] Another function of GAM2071 is therefore inhibition of Casein kinase 2, alpha prime polypeptide (CSNK2A2, Accession NP_001887.1), a gene which catalyzes the phosphorylation of serine or threonine residues in proteins. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CSNK2A2.

[40920] The function of CSNK2A2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.CST (Accession NP_004852.1) is another GAM2071 target gene, herein designated TARGET GENE. CST BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by CST, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of CST BINDING SITE, designated SEQ ID:3944, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40921] Another function of GAM2071 is therefore inhibition of CST (Accession NP_004852.1), a gene which nucleotide-sugar transporter. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CST.

[40922] The function of CST and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM221.1.CTEN (Accession NP_116254.3) is another GAM2071 target gene, herein designated TARGET GENE. CTEN BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CTEN, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CTEN BINDING SITE, designated SEQ ID:14087, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40923] Another function of GAM2071 is therefore inhibition of

CTEN (Accession NP_116254.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CTEN.

[40924] Cathepsin s (CTSS, Accession NP_004070.3) is another GAM2071 target gene, herein designated TARGET GENE. CTSS BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CTSS, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CTSS BINDING SITE, designated SEQ ID:7946, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40925] Another function of GAM2071 is therefore inhibition of Cathepsin s (CTSS, Accession NP_004070.3), a gene which is a lysosomal cysteine (thiol) protease that cleaves elastin. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CTSS.

[40926] The function of CTSS and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM72.1.Chemokine (c-x-c motif) ligand 16 (CXCL16,

Accession NP_071342.1) is another GAM2071 target gene, herein designated TARGET GENE. CXCL16 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CXCL16, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CXCL16 BINDING SITE, designated SEQ ID:11701, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40927] Another function of GAM2071 is therefore inhibition of Chemokine (c-x-c motif) ligand 16 (CXCL16, Accession NP_071342.1), a gene which induces calcium mobilization. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CXCL16.

[40928] The function of CXCL16 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.CXYorf1 (Accession XP_088704.2) is another GAM2071 target gene, herein designated TARGET GENE. CXYorf1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by CXYorf1,

corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CXYorf1 BINDING SITE, designated SEQ ID:6801, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40929] Another function of GAM2071 is therefore inhibition of CXYorf1 (Accession XP_088704.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CXYorf1.

[40930] CYCS (Accession NP_061820.1) is another GAM2071 target gene, herein designated TARGET GENE. CYCS BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CYCS, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CYCS BINDING SITE, designated SEQ ID:14950, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40931] Another function of GAM2071 is therefore inhibition of CYCS (Accession NP_061820.1) . Accordingly, utilities of

GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CYCS.

[40932] Cytochrome p450, subfamily i (aromatic compound-inducible), polypeptide 2 (CYP1A2, Accession NP_000752.1) is another GAM2071 target gene, herein designated TARGET GENE. CYP1A2 BINDING SITE1 through CYP1A2 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by CYP1A2, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CYP1A2 BINDING SITE1 through CYP1A2 BINDING SITE3, designated SEQ ID:8688, SEQ ID:6816 and SEQ ID:13973 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40933] Another function of GAM2071 is therefore inhibition of Cytochrome p450, subfamily i (aromatic compound-inducible), polypeptide 2 (CYP1A2, Accession NP_000752.1), a gene which intervenes in an NADPH- dependent electron transport pathway. and therefore may be associated with Porphyria cutanea tarda. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Porphyria cutanea tarda, and of other diseases

and clinical conditions associated with CYP1A2.

[40934] The function of CYP1A2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Cytochrome p450, subfamily iib (phenobarbital-inducible), polypeptide 6 (CYP2B6, Accession NP_000758.1) is another GAM2071 target gene, herein designated TARGET GENE. CYP2B6 BINDING SITE1 and CYP2B6 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by CYP2B6, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CYP2B6 BINDING SITE1 and CYP2B6 BINDING SITE2, designated SEQ ID:9252 and SEQ ID:3011 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40935] Another function of GAM2071 is therefore inhibition of Cytochrome p450, subfamily iib (phenobarbital-inducible), polypeptide 6 (CYP2B6, Accession NP_000758.1), a gene which oxidizes a variety of structurally unrelated compounds, including steroids, fatty acids, and xenobiotics. Accordingly, utilities of

GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CYP2B6.

[40936] The function of CYP2B6 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Cytochrome p450, subfamily ivf, polypeptide 3 (leukotriene b4 omega hydroxylase) (CYP4F3, Accession NP_000887.1) is another GAM2071 target gene, herein designated TARGET GENE. CYP4F3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CYP4F3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CYP4F3 BINDING SITE, designated SEQ ID:1417, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40937] Another function of GAM2071 is therefore inhibition of Cytochrome p450, subfamily ivf, polypeptide 3 (leukotriene b4 omega hydroxylase) (CYP4F3, Accession NP_000887.1), a gene which converts leukotriene B4 into the less active 20- hydroxy- leukotriene B4. Accordingly, utilities of GAM2071 include diagnosis, prevention and

treatment of diseases and clinical conditions associated with CYP4F3.

[40938] The function of CYP4F3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM67.1.CYP51A1 (Accession NP_000777.1) is another GAM2071 target gene, herein designated TARGET GENE. CYP51A1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CYP51A1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CYP51A1 BINDING SITE, designated SEQ ID:10631, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40939] Another function of GAM2071 is therefore inhibition of CYP51A1 (Accession NP_000777.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CYP51A1.

[40940] Cytochrome p450, subfamily viiib (sterol 12-alpha-hydroxylase), polypeptide 1 (CYP8B1, Accession

NP_004382.1) is another GAM2071 target gene, herein designated TARGET GENE. CYP8B1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by CYP8B1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CYP8B1 BINDING SITE, designated SEQ ID:5584, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40941] Another function of GAM2071 is therefore inhibition of Cytochrome p450, subfamily viiib (sterol 12-alpha-hydroxylase), polypeptide 1 (CYP8B1, Accession NP_004382.1), a gene which functions in bile acid biosynthesis. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CYP8B1.

[40942] The function of CYP8B1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM47.1.Debranching enzyme homolog 1 (s. cerevisiae) (DBR1, Accession NP_057300.1) is another GAM2071 target gene, herein designated TARGET GENE.

DBR1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DBR1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DBR1 BINDING SITE, designated SEQ ID:1031, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40943] Another function of GAM2071 is therefore inhibition of Debranching enzyme homolog 1 (s. cerevisiae) (DBR1, Accession NP_057300.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DBR1.

[40944] Doublecortin and cam kinase-like 1 (DCAMKL1, Accession NP_004725.1) is another GAM2071 target gene, herein designated TARGET GENE. DCAMKL1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DCAMKL1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DCAMKL1 BINDING SITE, designated SEQ ID:4605, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA,

also designated SEQ ID:371.

[40945] Another function of GAM2071 is therefore inhibition of Doublecortin and cam kinase-like 1 (DCAMKL1, Accession NP_004725.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DCAMKL1.

[40946] Doublecortex; lissencephaly, x-linked (doublecortin) (DCX, Accession NP_835364.1) is another GAM2071 target gene, herein designated TARGET GENE. DCX BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by DCX, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DCX BINDING SITE, designated SEQ ID:6035, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40947] Another function of GAM2071 is therefore inhibition of Doublecortex; lissencephaly, x-linked (doublecortin) (DCX, Accession NP_835364.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DCX.

[40948] Doublecortex; lissencephaly, x-linked (doublecortin)

(DCX, Accession NP_835366.1) is another GAM2071 target gene, herein designated TARGET GENE. DCX BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by DCX, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DCX BINDING SITE, designated SEQ ID:6035, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40949] Another function of GAM2071 is therefore inhibition of Doublecortex; lissencephaly, x-linked (doublecortin) (DCX, Accession NP_835366.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DCX.

[40950] Doublecortex; lissencephaly, x-linked (doublecortin) (DCX, Accession NP_835365.1) is another GAM2071 target gene, herein designated TARGET GENE. DCX BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by DCX, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide se-

quences of DCX BINDING SITE, designated SEQ ID:6035, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40951] Another function of GAM2071 is therefore inhibition of Doublecortex; lissencephaly, x-linked (doublecortin) (DCX, Accession NP_835365.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DCX.

[40952] Doublecortex; lissencephaly, x-linked (doublecortin) (DCX, Accession NP_000546.2) is another GAM2071 target gene, herein designated TARGET GENE. DCX BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by DCX, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DCX BINDING SITE, designated SEQ ID:6035, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40953] Another function of GAM2071 is therefore inhibition of Doublecortex; lissencephaly, x-linked (doublecortin) (DCX, Accession NP_000546.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of

diseases and clinical conditions associated with DCX.

[40954] Dead/h (asp-glu-ala-asp/his) box polypeptide 31 (DDX31, Accession NP_619526.1) is another GAM2071 target gene, herein designated TARGET GENE. DDX31 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by DDX31, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DDX31 BINDING SITE, designated SEQ ID:17894, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40955] Another function of GAM2071 is therefore inhibition of Dead/h (asp-glu-ala-asp/his) box polypeptide 31 (DDX31, Accession NP_619526.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DDX31.

[40956] Dna fragmentation factor, 40kda, beta polypeptide (caspase-activated dnase) (DFFB, Accession NP_004393.1) is another GAM2071 target gene, herein designated TARGET GENE. DFFB BINDING SITE1 and DFFB BINDING SITE2 are target binding sites found in untranslated regions of

mRNA encoded by DFFB, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DFFB BINDING SITE1 and DFFB BINDING SITE2, designated SEQ ID:7574 and SEQ ID:7848 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40957] Another function of GAM2071 is therefore inhibition of Dna fragmentation factor, 40kda, beta polypeptide (caspase-activated dnase) (DFFB, Accession NP_004393.1), a gene which induces DNA fragmentation and chromatin condensation during apoptosis. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DFFB.

[40958] The function of DFFB and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Diaphanous homolog 2 (drosophila) (DIAPH2, Accession NP_006720.1) is another GAM2071 target gene, herein designated TARGET GENE. DIAPH2 BINDING SITE is a target binding site found in the 3` un-

translated region of multiple transcripts of mRNA encoded by DIAPH2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DIAPH2 BINDING SITE, designated SEQ ID:12586, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40959] Another function of GAM2071 is therefore inhibition of Diaphanous homolog 2 (drosophila) (DIAPH2, Accession NP_006720.1), a gene which may affect in oogenesis and therefore may be associated with Premature ovarian failure . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Premature ovarian failure ., and of other diseases and clinical conditions associated with DIAPH2.

[40960] The function of DIAPH2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM66.1.Disrupted in schizophrenia 1 (DISC1, Accession NP_061132.1) is another GAM2071 target gene, herein designated TARGET GENE. DISC1 BINDING SITE1 through DISC1 BINDING SITE4 are target binding sites

found in untranslated regions of mRNA encoded by DISC1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DISC1 BINDING SITE1 through DISC1 BINDING SITE4, designated SEQ ID:5967, SEQ ID:6590, SEQ ID:13620 and SEQ ID:10777 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40961] Another function of GAM2071 is therefore inhibition of Disrupted in schizophrenia 1 (DISC1, Accession NP_061132.1), a gene which has globular N- terminal domain(s) and a helical C- terminal domain. and therefore may be associated with Schizophrenia . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Schizophrenia ., and of other diseases and clinical conditions associated with DISC1.

[40962] The function of DISC1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM116.1.Disrupted in schizophrenia 1 (DISC1, Accession NP_061132.1) is another GAM2071 target gene, herein designated TARGET GENE. DISC1 BINDING SITE1

through DISC1 BINDING SITE4 are target binding sites found in untranslated regions of mRNA encoded by DISC1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DISC1 BINDING SITE1 through DISC1 BINDING SITE4, designated SEQ ID:6590, SEQ ID:11474, SEQ ID:7947 and SEQ ID:18031 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40963] Another function of GAM2071 is therefore inhibition of Disrupted in schizophrenia 1 (DISC1, Accession NP_061132.1), a gene which has globular N- terminal domain(s) and a helical C- terminal domain. and therefore may be associated with Schizophrenia . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Schizophrenia ., and of other diseases and clinical conditions associated with DISC1.

[40964] The function of DISC1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM116.1.DKFZp434O0320 (Accession XP_097012.2) is another GAM2071 target gene, herein designated TAR-

GET GENE. DKFZp434O0320 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZp434O0320, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp434O0320 BINDING SITE, designated SEQ ID:3669, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40965] Another function of GAM2071 is therefore inhibition of DKFZp434O0320 (Accession XP_097012.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp434O0320.

[40966] DKFZp547P234 (Accession NP_694590.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZp547P234 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZp547P234, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp547P234 BINDING SITE, designated SEQ ID:3007, to the nucleotide sequence of

GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40967] Another function of GAM2071 is therefore inhibition of DKFZp547P234 (Accession NP_694590.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp547P234.

[40968] DKFZP564D166 (Accession NP_108648.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZP564D166 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by DKFZP564D166, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZP564D166 BINDING SITE, designated SEQ ID:13202, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40969] Another function of GAM2071 is therefore inhibition of DKFZP564D166 (Accession NP_108648.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZP564D166.

[40970] DKFZP564G092 (Accession NP_056416.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZP564G092 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by DKFZP564G092, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZP564G092 BINDING SITE, designated SEQ ID:519, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40971] Another function of GAM2071 is therefore inhibition of DKFZP564G092 (Accession NP_056416.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZP564G092.

[40972] DKFZP564I122 (Accession XP_032397.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZP564I122 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZP564I122, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of DKFZP564I122 BINDING SITE, designated SEQ ID:19815, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40973] Another function of GAM2071 is therefore inhibition of DKFZP564I122 (Accession XP_032397.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZP564I122.

[40974] DKFZP564J0863 (Accession NP_056274.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZP564J0863 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZP564J0863, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZP564J0863 BINDING SITE, designated SEQ ID:18946, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40975] Another function of GAM2071 is therefore inhibition of DKFZP564J0863 (Accession NP_056274.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and

treatment of diseases and clinical conditions associated with DKFZP564J0863.

[40976] DKFZP564K0322 (Accession NP_114429.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZP564K0322 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZP564K0322, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZP564K0322 BINDING SITE, designated SEQ ID:1414, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40977] Another function of GAM2071 is therefore inhibition of DKFZP564K0322 (Accession NP_114429.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZP564K0322.

[40978] DKFZp564K142 (Accession NP_115497.2) is another GAM2071 target gene, herein designated TARGET GENE. DKFZp564K142 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZp564K142, corresponding to a target binding site

such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp564K142 BINDING SITE, designated SEQ ID:811, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40979] Another function of GAM2071 is therefore inhibition of DKFZp564K142 (Accession NP_115497.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp564K142.

[40980] DKFZP566K1924 (Accession NP_056278.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZP566K1924 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZP566K1924, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZP566K1924 BINDING SITE, designated SEQ ID:9020, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40981] Another function of GAM2071 is therefore inhibition of

DKFZP566K1924 (Accession NP_056278.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZP566K1924.

[40982] DKFZP566M114 (Accession NP_115504.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZP566M114 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZP566M114, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZP566M114 BINDING SITE, designated SEQ ID:1708, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40983] Another function of GAM2071 is therefore inhibition of DKFZP566M114 (Accession NP_115504.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZP566M114.

[40984] DKFZP586B1621 (Accession NP_056348.2) is another GAM2071 target gene, herein designated TARGET GENE. DKFZP586B1621 BINDING SITE1 and DKFZP586B1621

BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by DKFZP586B1621, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZP586B1621 BINDING SITE1 and DKFZP586B1621 BINDING SITE2, designated SEQ ID:20110 and SEQ ID:4762 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40985] Another function of GAM2071 is therefore inhibition of DKFZP586B1621 (Accession NP_056348.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZP586B1621.

[40986] DKFZp586C0721 (Accession XP_098416.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZp586C0721 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZp586C0721, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp586C0721 BINDING SITE,

designated SEQ ID:14672, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40987] Another function of GAM2071 is therefore inhibition of DKFZp586C0721 (Accession XP_098416.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp586C0721.

[40988] DKFZP586D0919 (Accession NP_056248.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZP586D0919 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZP586D0919, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZP586D0919 BINDING SITE, designated SEQ ID:5664, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40989] Another function of GAM2071 is therefore inhibition of DKFZP586D0919 (Accession NP_056248.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated

with DKFZP586D0919.

[40990] DKFZp667B1218 (Accession NP_808881.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZp667B1218 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZp667B1218, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp667B1218 BINDING SITE, designated SEQ ID:4387, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40991] Another function of GAM2071 is therefore inhibition of DKFZp667B1218 (Accession NP_808881.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp667B1218.

[40992] DKFZp667E0512 (Accession XP_117353.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZp667E0512 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZp667E0512, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III

of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp667E0512 BINDING SITE, designated SEQ ID:9198, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40993] Another function of GAM2071 is therefore inhibition of DKFZp667E0512 (Accession XP_117353.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp667E0512.

[40994] DKFZp761B107 (Accession NP_775734.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZp761B107 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZp761B107, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp761B107 BINDING SITE, designated SEQ ID:5298, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40995] Another function of GAM2071 is therefore inhibition of DKFZp761B107 (Accession NP_775734.1) . Accordingly,

utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp761B107.

[40996] DKFZp761B128 (Accession NP_689650.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZp761B128 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by DKFZp761B128, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp761B128 BINDING SITE, designated SEQ ID:436, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40997] Another function of GAM2071 is therefore inhibition of DKFZp761B128 (Accession NP_689650.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp761B128.

[40998] DKFZp761H039 (Accession NP_061181.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZp761H039 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

DKFZp761H039, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp761H039 BINDING SITE, designated SEQ ID:12709, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[40999] Another function of GAM2071 is therefore inhibition of DKFZp761H039 (Accession NP_061181.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp761H039.

[41000] DKFZp761J139 (Accession NP_115656.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZp761J139 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by DKFZp761J139, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp761J139 BINDING SITE, designated SEQ ID:969, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41001] Another function of GAM2071 is therefore inhibition of DKFZp761J139 (Accession NP_115656.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp761J139.

[41002] DKFZp761O0113 (Accession NP_060879.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZp761O0113 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by DKFZp761O0113, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp761O0113 BINDING SITE, designated SEQ ID:11194, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41003] Another function of GAM2071 is therefore inhibition of DKFZp761O0113 (Accession NP_060879.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp761O0113.

[41004] DKFZp761P1121 (Accession NP_690870.1) is another GAM2071 target gene, herein designated TARGET GENE.

DKFZp761P1121 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZp761P1121, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp761P1121 BINDING SITE, designated SEQ ID:1413, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41005] Another function of GAM2071 is therefore inhibition of DKFZp761P1121 (Accession NP_690870.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp761P1121.

[41006] DKFZp762C2414 (Accession NP_848637.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZp762C2414 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZp762C2414, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp762C2414 BINDING SITE, designated SEQ ID:11830, to the nucleotide sequence of

GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41007] Another function of GAM2071 is therefore inhibition of DKFZp762C2414 (Accession NP_848637.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp762C2414.

[41008] DKFZp762H185 (Accession XP_172976.2) is another GAM2071 target gene, herein designated TARGET GENE. DKFZp762H185 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZp762H185, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp762H185 BINDING SITE, designated SEQ ID:2137, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41009] Another function of GAM2071 is therefore inhibition of DKFZp762H185 (Accession XP_172976.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp762H185.

[41010] DKFZp762I137 (Accession NP_689624.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZp762I137 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZp762I137, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp762I137 BINDING SITE, designated SEQ ID:11659, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41011] Another function of GAM2071 is therefore inhibition of DKFZp762I137 (Accession NP_689624.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp762I137.

[41012] DKFZp762I194 (Accession NP_689597.1) is another GAM2071 target gene, herein designated TARGET GENE. DKFZp762I194 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZp762I194, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of DKFZp762I194 BINDING SITE, designated SEQ ID:19272, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41013] Another function of GAM2071 is therefore inhibition of DKFZp762I194 (Accession NP_689597.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZp762I194.

[41014] DKFZp762L0311 (Accession NP_061189.2) is another GAM2071 target gene, herein designated TARGET GENE. DKFZp762L0311 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZp762L0311, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZp762L0311 BINDING SITE, designated SEQ ID:13546, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41015] Another function of GAM2071 is therefore inhibition of DKFZp762L0311 (Accession NP_061189.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and

treatment of diseases and clinical conditions associated with DKFZp762L0311.

[41016] Dystrophia myotonica-containing wd repeat motif (DMWD, Accession XP_027569.1) is another GAM2071 target gene, herein designated TARGET GENE. DMWD BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DMWD, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DMWD BINDING SITE, designated SEQ ID:10543, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41017] Another function of GAM2071 is therefore inhibition of Dystrophia myotonica-containing wd repeat motif (DMWD, Accession XP_027569.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DMWD.

[41018] DRIM (Accession NP_055318.1) is another GAM2071 target gene, herein designated TARGET GENE. DRIM BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DRIM, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II

or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DRIM BINDING SITE, designated SEQ ID:2324, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41019] Another function of GAM2071 is therefore inhibition of DRIM (Accession NP_055318.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DRIM.

[41020] Desmocollin 3 (DSC3, Accession NP_001932.1) is another GAM2071 target gene, herein designated TARGET GENE. DSC3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by DSC3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DSC3 BINDING SITE, designated SEQ ID:2085, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41021] Another function of GAM2071 is therefore inhibition of Desmocollin 3 (DSC3, Accession NP_001932.1), a gene which is a component of intercellular desmosome junc-

tions. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DSC3.

[41022] The function of DSC3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Desmocollin 3 (DSC3, Accession NP_077741.1) is another GAM2071 target gene, herein designated TARGET GENE. DSC3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by DSC3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DSC3 BINDING SITE, designated SEQ ID:2085, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41023] Another function of GAM2071 is therefore inhibition of Desmocollin 3 (DSC3, Accession NP_077741.1), a gene which is a component of intercellular desmosome junctions. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DSC3.

[41024] The function of DSC3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Down syndrome critical region gene 3 (DSCR3, Accession NP_006043.1) is another GAM2071 target gene, herein designated TARGET GENE. DSCR3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DSCR3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DSCR3 BINDING SITE, designated SEQ ID:13453, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41025] Another function of GAM2071 is therefore inhibition of Down syndrome critical region gene 3 (DSCR3, Accession NP_006043.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DSCR3.

[41026] Down syndrome critical region gene 6 (DSCR6, Accession NP_061835.1) is another GAM2071 target gene, herein designated TARGET GENE. DSCR6 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA

encoded by DSCR6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DSCR6 BINDING SITE, designated SEQ ID:17339, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41027] Another function of GAM2071 is therefore inhibition of Down syndrome critical region gene 6 (DSCR6, Accession NP_061835.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DSCR6.

[41028] DUPLIN (Accession XP_208760.3) is another GAM2071 target gene, herein designated TARGET GENE. DUPLIN BINDING SITE1 and DUPLIN BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by DUPLIN, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DUPLIN BINDING SITE1 and DUPLIN BINDING SITE2, designated SEQ ID:2517 and SEQ ID:13723 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ

ID:371.

[41029] Another function of GAM2071 is therefore inhibition of DUPLIN (Accession XP_208760.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DUPLIN.

[41030] DUSP18 (Accession NP_689724.2) is another GAM2071 target gene, herein designated TARGET GENE. DUSP18 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DUSP18, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DUSP18 BINDING SITE, designated SEQ ID:19123, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41031] Another function of GAM2071 is therefore inhibition of DUSP18 (Accession NP_689724.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DUSP18.

[41032] Dual specificity phosphatase 19 (DUSP19, Accession NP_543152.1) is another GAM2071 target gene, herein designated TARGET GENE. DUSP19 BINDING SITE1 and

DUSP19 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by DUSP19, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DUSP19 BINDING SITE1 and DUSP19 BINDING SITE2, designated SEQ ID:710 and SEQ ID:969 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41033] Another function of GAM2071 is therefore inhibition of Dual specificity phosphatase 19 (DUSP19, Accession NP_543152.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DUSP19.

[41034] Dual-specificity tyrosine-(y)-phosphorylation regulated kinase 1a (DYRK1A, Accession NP_567824.1) is another GAM2071 target gene, herein designated TARGET GENE. DYRK1A BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by DYRK1A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DYRK1A BINDING SITE, desig-

nated SEQ ID:14469, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41035] Another function of GAM2071 is therefore inhibition of Dual-specificity tyrosine-(y)-phosphorylation regulated kinase 1a (DYRK1A, Accession NP_567824.1), a gene which regulates cell proliferation and may be involved in brain development . and therefore may be associated with Down syndrome. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Down syndrome, and of other diseases and clinical conditions associated with DYRK1A.

[41036] The function of DYRK1A and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM63.1.Endothelial differentiation, sphingolipid g-protein-coupled receptor, 8 (EDG8, Accession NP_110387.1) is another GAM2071 target gene, herein designated TARGET GENE. EDG8 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by EDG8, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the

nucleotide sequences of EDG8 BINDING SITE, designated SEQ ID:11935, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41037] Another function of GAM2071 is therefore inhibition of Endothelial differentiation, sphingolipid g-protein-coupled receptor, 8 (EDG8, Accession NP_110387.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EDG8.

[41038] EEF2K (Accession NP_037434.1) is another GAM2071 target gene, herein designated TARGET GENE. EEF2K BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by EEF2K, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EEF2K BINDING SITE, designated SEQ ID:11618, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41039] Another function of GAM2071 is therefore inhibition of EEF2K (Accession NP_037434.1), a gene which phosphorylates serine or threonine on the eukaryotic elongation

factor- 2 and therefore may be associated with Systemic lupus erythematosus and cancer. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Systemic lupus erythematosus and cancer, and of other diseases and clinical conditions associated with EEF2K.

[41040] The function of EEF2K and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Eh-domain containing 2 (EHD2, Accession NP_055416.2) is another GAM2071 target gene, herein designated TARGET GENE. EHD2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by EHD2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EHD2 BINDING SITE, designated SEQ ID:6934, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41041] Another function of GAM2071 is therefore inhibition of Eh-domain containing 2 (EHD2, Accession NP_055416.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions

associated with EHD2.

[41042] Eukaryotic translation initiation factor 2, subunit 3 gamma, 52kda (EIF2S3, Accession NP_001406.1) is another GAM2071 target gene, herein designated TARGET GENE. EIF2S3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by EIF2S3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EIF2S3 BINDING SITE, designated SEQ ID:11659, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41043] Another function of GAM2071 is therefore inhibition of Eukaryotic translation initiation factor 2, subunit 3 gamma, 52kda (EIF2S3, Accession NP_001406.1), a gene which functions in the early steps of protein synthesis. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EIF2S3.

[41044] The function of EIF2S3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Eukaryotic translation initiation factor 5a2

(EIF5A2, Accession NP_065123.1) is another GAM2071 target gene, herein designated TARGET GENE. EIF5A2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by EIF5A2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EIF5A2 BINDING SITE, designated SEQ ID:1333, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41045] Another function of GAM2071 is therefore inhibition of Eukaryotic translation initiation factor 5a2 (EIF5A2, Accession NP_065123.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EIF5A2.

[41046] ELP3 (Accession NP_060561.3) is another GAM2071 target gene, herein designated TARGET GENE. ELP3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ELP3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ELP3 BINDING SITE, designated SEQ ID:6182, to the nucleotide sequence

of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41047] Another function of GAM2071 is therefore inhibition of ELP3 (Accession NP_060561.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ELP3.

[41048] Egf-like module containing, mucin-like, hormone receptor-like sequence 2 (EMR2, Accession NP_690883.1) is another GAM2071 target gene, herein designated TARGET GENE. EMR2 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by EMR2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EMR2 BINDING SITE, designated SEQ ID:433, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41049] Another function of GAM2071 is therefore inhibition of Egf-like module containing, mucin-like, hormone receptor-like sequence 2 (EMR2, Accession NP_690883.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions as-

sociated with EMR2.

[41050] Egf-like module containing, mucin-like, hormone receptor-like sequence 2 (EMR2, Accession NP_038475.2) is another GAM2071 target gene, herein designated TARGET GENE. EMR2 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by EMR2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EMR2 BINDING SITE, designated SEQ ID:433, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41051] Another function of GAM2071 is therefore inhibition of Egf-like module containing, mucin-like, hormone receptor-like sequence 2 (EMR2, Accession NP_038475.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EMR2.

[41052] Egf-like module containing, mucin-like, hormone receptor-like sequence 2 (EMR2, Accession NP_690882.1) is another GAM2071 target gene, herein designated TARGET GENE. EMR2 BINDING SITE is a target binding site found in

the 5` untranslated region of multiple transcripts of mRNA encoded by EMR2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EMR2 BINDING SITE, designated SEQ ID:433, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41053] Another function of GAM2071 is therefore inhibition of Egf-like module containing, mucin-like, hormone receptor-like sequence 2 (EMR2, Accession NP_690882.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EMR2.

[41054] Egf-like module containing, mucin-like, hormone receptor-like sequence 2 (EMR2, Accession NP_690884.1) is another GAM2071 target gene, herein designated TARGET GENE. EMR2 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by EMR2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EMR2 BINDING SITE,

designated SEQ ID:433, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41055] Another function of GAM2071 is therefore inhibition of Egf-like module containing, mucin-like, hormone receptor-like sequence 2 (EMR2, Accession NP_690884.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EMR2.

[41056] Egf-like module containing, mucin-like, hormone receptor-like sequence 2 (EMR2, Accession NP_690881.1) is another GAM2071 target gene, herein designated TARGET GENE. EMR2 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by EMR2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EMR2 BINDING SITE, designated SEQ ID:433, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41057] Another function of GAM2071 is therefore inhibition of Egf-like module containing, mucin-like, hormone recep-

tor-like sequence 2 (EMR2, Accession NP_690881.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EMR2.

[41058] Egf-like module containing, mucin-like, hormone receptor-like sequence 2 (EMR2, Accession NP_690885.1) is another GAM2071 target gene, herein designated TARGET GENE. EMR2 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by EMR2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EMR2 BINDING SITE, designated SEQ ID:433, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41059] Another function of GAM2071 is therefore inhibition of Egf-like module containing, mucin-like, hormone receptor-like sequence 2 (EMR2, Accession NP_690885.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EMR2.

[41060] Egf-like module containing, mucin-like, hormone recep-

tor-like sequence 2 (EMR2, Accession NP_690880.1) is another GAM2071 target gene, herein designated TARGET GENE. EMR2 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by EMR2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EMR2 BINDING SITE, designated SEQ ID:433, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41061] Another function of GAM2071 is therefore inhibition of Egf-like module containing, mucin-like, hormone receptor-like sequence 2 (EMR2, Accession NP_690880.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EMR2.

[41062] Endonuclease g-like 1 (ENDOGL1, Accession NP_005098.1) is another GAM2071 target gene, herein designated TARGET GENE. ENDOGL1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ENDOGL1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or

BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ENDOGL1 BINDING SITE, designated SEQ ID:4223, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41063] Another function of GAM2071 is therefore inhibition of Endonuclease g-like 1 (ENDOGL1, Accession NP_005098.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ENDOGL1.

[41064] Ephb6 (EPHB6, Accession NP_004436.1) is another GAM2071 target gene, herein designated TARGET GENE. EPHB6 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by EPHB6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EPHB6 BINDING SITE, designated SEQ ID:19635, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41065] Another function of GAM2071 is therefore inhibition of Ephb6 (EPHB6, Accession NP_004436.1), a gene which Putative Eph- related receptor tyrosine kinase B6. Accord-

ingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EPHB6.

[41066] The function of EPHB6 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM55.1.Epsin 2 (EPN2, Accession NP_683723.1) is another GAM2071 target gene, herein designated TARGET GENE. EPN2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by EPN2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EPN2 BINDING SITE, designated SEQ ID:4430, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41067] Another function of GAM2071 is therefore inhibition of Epsin 2 (EPN2, Accession NP_683723.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EPN2.

[41068] Epsin 2 (EPN2, Accession NP_055779.1) is another

GAM2071 target gene, herein designated TARGET GENE. EPN2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by EPN2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EPN2 BINDING SITE, designated SEQ ID:4430, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41069] Another function of GAM2071 is therefore inhibition of Epsin 2 (EPN2, Accession NP_055779.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EPN2.

[41070] Epiregulin (EREG, Accession NP_001423.1) is another GAM2071 target gene, herein designated TARGET GENE. EREG BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by EREG, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EREG BINDING SITE, designated SEQ ID:430, to the nu-

cleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41071] Another function of GAM2071 is therefore inhibition of Epiregulin (EREG, Accession NP_001423.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EREG.

[41072] Ellis van creveld syndrome (EVC, Accession NP_055371.1) is another GAM2071 target gene, herein designated TARGET GENE. EVC BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by EVC, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EVC BINDING SITE, designated SEQ ID:4148, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41073] Another function of GAM2071 is therefore inhibition of Ellis van creveld syndrome (EVC, Accession NP_055371.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EVC.

[41074] Ellis van creveld syndrome (EVC, Accession NP_714928.1) is another GAM2071 target gene, herein designated TARGET GENE. EVC BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by EVC, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of EVC BINDING SITE, designated SEQ ID:4148, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41075] Another function of GAM2071 is therefore inhibition of Ellis van creveld syndrome (EVC, Accession NP_714928.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EVC.

[41076] Ecotropic viral integration site 5 (EVI5, Accession NP_005656.2) is another GAM2071 target gene, herein designated TARGET GENE. EVI5 BINDING SITE1 and EVI5 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by EVI5, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the com-

plementarity of the nucleotide sequences of EVI5 BINDING SITE1 and EVI5 BINDING SITE2, designated SEQ ID:16074 and SEQ ID:18007 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41077] Another function of GAM2071 is therefore inhibition of Ecotropic viral integration site 5 (EVI5, Accession NP_005656.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with EVI5.

[41078] F11R (Accession NP_058642.1) is another GAM2071 target gene, herein designated TARGET GENE. F11R BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by F11R, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of F11R BINDING SITE, designated SEQ ID:16292, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41079] Another function of GAM2071 is therefore inhibition of F11R (Accession NP_058642.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of

diseases and clinical conditions associated with F11R.

[41080] F11R (Accession NP_653085.1) is another GAM2071 target gene, herein designated TARGET GENE. F11R BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by F11R, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of F11R BINDING SITE, designated SEQ ID:16292, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41081] Another function of GAM2071 is therefore inhibition of F11R (Accession NP_653085.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with F11R.

[41082] F11R (Accession NP_653087.1) is another GAM2071 target gene, herein designated TARGET GENE. F11R BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by F11R, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of F11R BINDING SITE, designated SEQ ID:16292,

to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41083] Another function of GAM2071 is therefore inhibition of F11R (Accession NP_653087.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with F11R.

[41084] F11R (Accession NP_653086.1) is another GAM2071 target gene, herein designated TARGET GENE. F11R BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by F11R, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of F11R BINDING SITE, designated SEQ ID:16292, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41085] Another function of GAM2071 is therefore inhibition of F11R (Accession NP_653086.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with F11R.

[41086] Coagulation factor ii (thrombin) receptor-like 2 (F2RL2, Accession NP_004092.1) is another GAM2071 target gene, herein designated TARGET GENE. F2RL2 BINDING SITE is a

target binding site found in the 3` untranslated region of mRNA encoded by F2RL2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of F2RL2 BINDING SITE, designated SEQ ID:5026, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41087] Another function of GAM2071 is therefore inhibition of Coagulation factor ii (thrombin) receptor-like 2 (F2RL2, Accession NP_004092.1), a gene which receptor for activated thrombin coupled to g proteins that stimulate phosphoinositide hydrolysis. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with F2RL2.

[41088] The function of F2RL2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.Coagulation factor ii (thrombin) receptor-like 3 (F2RL3, Accession NP_003941.1) is another GAM2071 target gene, herein designated TARGET GENE. F2RL3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by F2RL3, cor-

responding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of F2RL3 BINDING SITE, designated SEQ ID:13324, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41089] Another function of GAM2071 is therefore inhibition of Coagulation factor ii (thrombin) receptor-like 3 (F2RL3, Accession NP_003941.1), a gene which Protease- activated receptor 4; G protein- coupled receptor that increases phosphoinositide hydrolysis. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with F2RL3.

[41090] The function of F2RL3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM72.1.Coagulation factor iii (thromboplastin, tissue factor) (F3, Accession NP_001984.1) is another GAM2071 target gene, herein designated TARGET GENE. F3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by F3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the comple-

mentarity of the nucleotide sequences of F3 BINDING SITE, designated SEQ ID:15547, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41091] Another function of GAM2071 is therefore inhibition of Coagulation factor iii (thromboplastin, tissue factor) (F3, Accession NP_001984.1), a gene which functions in normal hemostasis. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with F3.

[41092] The function of F3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.Family with sequence similarity 13, member a1 (FAM13A1, Accession NP_055698.1) is another GAM2071 target gene, herein designated TARGET GENE. FAM13A1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FAM13A1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FAM13A1 BINDING SITE, designated SEQ ID:17686, to the nucleotide sequence of GAM2071

RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41093] Another function of GAM2071 is therefore inhibition of Family with sequence similarity 13, member a1 (FAM13A1, Accession NP_055698.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FAM13A1.

[41094] Fanconi anemia, complementation group e (FANCE, Accession NP_068741.1) is another GAM2071 target gene, herein designated TARGET GENE. FANCE BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FANCE, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FANCE BINDING SITE, designated SEQ ID:16751, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41095] Another function of GAM2071 is therefore inhibition of Fanconi anemia, complementation group e (FANCE, Accession NP_068741.1), a gene which is a possible regulator of lymphocyte and platelet function. and therefore is associated with Fanconi anemia, complementation group

e. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Fanconi anemia, complementation group e., and of other diseases and clinical conditions associated with FANCE.

[41096] The function of FANCE and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Fanconi anemia, complementation group f (FANCF, Accession NP_073562.1) is another GAM2071 target gene, herein designated TARGET GENE. FANCF BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FANCF, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FANCF BINDING SITE, designated SEQ ID:14445, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41097] Another function of GAM2071 is therefore inhibition of Fanconi anemia, complementation group f (FANCF, Accession NP_073562.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FANCF.

[41098] FAT3 (Accession XP_061871.5) is another GAM2071 target gene, herein designated TARGET GENE. FAT3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FAT3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FAT3 BINDING SITE, designated SEQ ID:7945, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41099] Another function of GAM2071 is therefore inhibition of FAT3 (Accession XP_061871.5) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FAT3.

[41100] Fibulin 1 (FBLN1, Accession NP_006476.1) is another GAM2071 target gene, herein designated TARGET GENE. FBLN1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by FBLN1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FBLN1 BINDING SITE, designated SEQ ID:2764, to the nucleotide sequence of GAM2071

RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41101] Another function of GAM2071 is therefore inhibition of Fibulin 1 (FBLN1, Accession NP_006476.1), a gene which secreted glycoprotein; has EGF- like repeats, similar to anaphylatoxins C3a, C4a, and C5a. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FBLN1.

[41102] The function of FBLN1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM179.1.FBXW8 (Accession NP_036306.1) is another GAM2071 target gene, herein designated TARGET GENE. FBXW8 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by FBXW8, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FBXW8 BINDING SITE, designated SEQ ID:20011, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41103] Another function of GAM2071 is therefore inhibition of

FBXW8 (Accession NP_036306.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FBXW8.

[41104] FBXW8 (Accession NP_699179.2) is another GAM2071 target gene, herein designated TARGET GENE. FBXW8 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by FBXW8, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FBXW8 BINDING SITE, designated SEQ ID:20011, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41105] Another function of GAM2071 is therefore inhibition of FBXW8 (Accession NP_699179.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FBXW8.

[41106] Fc fragment of iga, receptor for (FCAR, Accession NP_579812.1) is another GAM2071 target gene, herein designated TARGET GENE. FCAR BINDING SITE1 through FCAR BINDING SITE3 are target binding sites found in untranslated regions of multiple transcripts of mRNA en-

coded by FCAR, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FCAR BINDING SITE1 through FCAR BINDING SITE3, designated SEQ ID:18209, SEQ ID:18209 and SEQ ID:10505 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41107] Another function of GAM2071 is therefore inhibition of Fc fragment of iga, receptor for (FCAR, Accession NP_579812.1), a gene which binds to the fc region of immunoglobulins alpha and mediates several functions including cytokine production. and therefore may be associated with Iga nephropathy. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Iga nephropathy., and of other diseases and clinical conditions associated with FCAR.

[41108] The function of FCAR and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.Fc fragment of iga, receptor for (FCAR, Accession NP_579808.1) is another GAM2071 target gene, herein designated TARGET GENE. FCAR BINDING SITE1

through FCAR BINDING SITE3 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by FCAR, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FCAR BINDING SITE1 through FCAR BINDING SITE3, designated SEQ ID:18209, SEQ ID:18209 and SEQ ID:441 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41109] Another function of GAM2071 is therefore inhibition of Fc fragment of iga, receptor for (FCAR, Accession NP_579808.1), a gene which binds to the fc region of immunoglobulins alpha and mediates several functions including cytokine production. and therefore may be associated with Iga nephropathy. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Iga nephropathy., and of other diseases and clinical conditions associated with FCAR.

[41110] The function of FCAR and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.Fc fragment of iga, receptor for (FCAR, Ac-

cession NP_579806.1) is another GAM2071 target gene, herein designated TARGET GENE. FCAR BINDING SITE1 through FCAR BINDING SITE3 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by FCAR, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FCAR BINDING SITE1 through FCAR BINDING SITE3, designated SEQ ID:18209, SEQ ID:441 and SEQ ID:18209 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41111] Another function of GAM2071 is therefore inhibition of Fc fragment of iga, receptor for (FCAR, Accession NP_579806.1), a gene which binds to the fc region of immunoglobulins alpha and mediates several functions including cytokine production. and therefore may be associated with Iga nephropathy. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Iga nephropathy., and of other diseases and clinical conditions associated with FCAR.

[41112] The function of FCAR and its association with various diseases and clinical conditions, has been established by

previous studies, as described hereinabove with reference to GAM136.1.Fc fragment of iga, receptor for (FCAR, Accession NP_579807.1) is another GAM2071 target gene, herein designated TARGET GENE. FCAR BINDING SITE1 through FCAR BINDING SITE3 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by FCAR, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FCAR BINDING SITE1 through FCAR BINDING SITE3, designated SEQ ID:18209, SEQ ID:10188 and SEQ ID:1759 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41113] Another function of GAM2071 is therefore inhibition of Fc fragment of iga, receptor for (FCAR, Accession NP_579807.1), a gene which binds to the fc region of immunoglobulins alpha and mediates several functions including cytokine production. and therefore may be associated with Iga nephropathy. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Iga nephropathy., and of other diseases and clinical conditions associated with FCAR.

[41114] The function of FCAR and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.Fer-1-like 4 (c. elegans) (FER1L4, Accession XP_300246.1) is another GAM2071 target gene, herein designated TARGET GENE. FER1L4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FER1L4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FER1L4 BINDING SITE, designated SEQ ID:1759, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41115] Another function of GAM2071 is therefore inhibition of Fer-1-like 4 (c. elegans) (FER1L4, Accession XP_300246.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FER1L4.

[41116] Fasciculation and elongation protein zeta 1 (zygin i) (FEZ1, Accession NP_072043.1) is another GAM2071 target gene, herein designated TARGET GENE. FEZ1 BINDING SITE is a target binding site found in the 3` untranslated region of

multiple transcripts of mRNA encoded by FEZ1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FEZ1 BINDING SITE, designated SEQ ID:659, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41117] Another function of GAM2071 is therefore inhibition of Fasciculation and elongation protein zeta 1 (zygin i) (FEZ1, Accession NP_072043.1), a gene which Zygin 1; may have a role in axonal outgrowth; has similarity to C. elegans UNC- 76. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FEZ1.

[41118] The function of FEZ1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Fibroblast growth factor 5 (FGF5, Accession NP_149134.1) is another GAM2071 target gene, herein designated TARGET GENE. FGF5 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by FGF5, corresponding to a target binding site such as BINDING SITE I, BINDING

SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FGF5 BINDING SITE, designated SEQ ID:3375, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41119] Another function of GAM2071 is therefore inhibition of Fibroblast growth factor 5 (FGF5, Accession NP_149134.1), a gene which induces transformation and may regulate neuronal differentiation. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FGF5.

[41120] The function of FGF5 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM106.1.Fibroblast growth factor 5 (FGF5, Accession NP_004455.1) is another GAM2071 target gene, herein designated TARGET GENE. FGF5 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by FGF5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FGF5 BINDING SITE, designated SEQ ID:3375, to the nucleotide

sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41121] Another function of GAM2071 is therefore inhibition of Fibroblast growth factor 5 (FGF5, Accession NP_004455.1), a gene which induces transformation and may regulate neuronal differentiation. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FGF5.

[41122] The function of FGF5 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM106.1.Four and a half lim domains 2 (FHL2, Accession NP_001441.2) is another GAM2071 target gene, herein designated TARGET GENE. FHL2 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FHL2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FHL2 BINDING SITE, designated SEQ ID:19820, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41123] Another function of GAM2071 is therefore inhibition of

Four and a half lim domains 2 (FHL2, Accession NP_001441.2), a gene which Contains four LIM domains and an additional zinc finger. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FHL2.

[41124] The function of FHL2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Fk506 binding protein 9, 63 kda (FKBP9, Accession NP_009201.1) is another GAM2071 target gene, herein designated TARGET GENE. FKBP9 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FKBP9, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FKBP9 BINDING SITE, designated SEQ ID:2718, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41125] Another function of GAM2071 is therefore inhibition of Fk506 binding protein 9, 63 kda (FKBP9, Accession NP_009201.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clini-

cal conditions associated with FKBP9.

[41126] FLJ00060 (Accession XP_028154.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ00060 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ00060, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ00060 BINDING SITE, designated SEQ ID:13800, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41127] Another function of GAM2071 is therefore inhibition of FLJ00060 (Accession XP_028154.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ00060.

[41128] FLJ10101 (Accession NP_078994.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ10101 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ10101, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

FLJ10101 BINDING SITE, designated SEQ ID:10153, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41129] Another function of GAM2071 is therefore inhibition of FLJ10101 (Accession NP_078994.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ10101.

[41130] FLJ10232 (Accession NP_060503.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ10232 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ10232, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ10232 BINDING SITE, designated SEQ ID:14903, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41131] Another function of GAM2071 is therefore inhibition of FLJ10232 (Accession NP_060503.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ10232.

[41132] FLJ10298 (Accession NP_060520.2) is another GAM2071 target gene, herein designated TARGET GENE. FLJ10298 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ10298, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ10298 BINDING SITE, designated SEQ ID:468, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41133] Another function of GAM2071 is therefore inhibition of FLJ10298 (Accession NP_060520.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ10298.

[41134] FLJ10346 (Accession NP_060535.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ10346 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ10346, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ10346 BINDING SITE, designated SEQ ID:7836, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41135] Another function of GAM2071 is therefore inhibition of FLJ10346 (Accession NP_060535.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ10346.

[41136] FLJ10535 (Accession NP_060599.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ10535 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ10535, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ10535 BINDING SITE, designated SEQ ID:10633, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41137] Another function of GAM2071 is therefore inhibition of FLJ10535 (Accession NP_060599.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ10535.

[41138] FLJ10640 (Accession NP_061896.1) is another GAM2071

target gene, herein designated TARGET GENE. FLJ10640 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ10640, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ10640 BINDING SITE, designated SEQ ID:16789, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41139] Another function of GAM2071 is therefore inhibition of FLJ10640 (Accession NP_061896.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ10640.

[41140] FLJ10713 (Accession NP_060659.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ10713 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ10713, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ10713 BINDING SITE, designated SEQ ID:12092, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[41141] Another function of GAM2071 is therefore inhibition of FLJ10713 (Accession NP_060659.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ10713.

[41142] FLJ10737 (Accession NP_060668.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ10737 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ10737, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ10737 BINDING SITE, designated SEQ ID:2224, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41143] Another function of GAM2071 is therefore inhibition of FLJ10737 (Accession NP_060668.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ10737.

[41144] FLJ10846 (Accession NP_060711.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ10846

BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ10846, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ10846 BINDING SITE, designated SEQ ID:13800, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41145] Another function of GAM2071 is therefore inhibition of FLJ10846 (Accession NP_060711.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ10846.

[41146] FLJ10847 (Accession NP_060712.2) is another GAM2071 target gene, herein designated TARGET GENE. FLJ10847 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ10847, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ10847 BINDING SITE, designated SEQ ID:18108, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41147] Another function of GAM2071 is therefore inhibition of FLJ10847 (Accession NP_060712.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ10847.

[41148] FLJ10998 (Accession NP_060764.2) is another GAM2071 target gene, herein designated TARGET GENE. FLJ10998 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ10998, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ10998 BINDING SITE, designated SEQ ID:20020, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41149] Another function of GAM2071 is therefore inhibition of FLJ10998 (Accession NP_060764.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ10998.

[41150] FLJ11274 (Accession NP_060845.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ11274 BINDING SITE is a target binding site found in the 5` un-

translated region of mRNA encoded by FLJ11274, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ11274 BINDING SITE, designated SEQ ID:7307, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41151] Another function of GAM2071 is therefore inhibition of FLJ11274 (Accession NP_060845.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ11274.

[41152] FLJ11323 (Accession NP_060860.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ11323 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by FLJ11323, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ11323 BINDING SITE, designated SEQ ID:13280, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41153] Another function of GAM2071 is therefore inhibition of FLJ11323 (Accession NP_060860.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ11323.

[41154] FLJ11467 (Accession NP_079239.2) is another GAM2071 target gene, herein designated TARGET GENE. FLJ11467 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ11467, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ11467 BINDING SITE, designated SEQ ID:9552, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41155] Another function of GAM2071 is therefore inhibition of FLJ11467 (Accession NP_079239.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ11467.

[41156] FLJ11710 (Accession NP_079122.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ11710 BINDING SITE is a target binding site found in the 3` un-

translated region of mRNA encoded by FLJ11710, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ11710 BINDING SITE, designated SEQ ID:6034, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41157] Another function of GAM2071 is therefore inhibition of FLJ11710 (Accession NP_079122.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ11710.

[41158] FLJ11800 (Accession NP_079250.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ11800 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ11800, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ11800 BINDING SITE, designated SEQ ID:17222, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41159] Another function of GAM2071 is therefore inhibition of

FLJ11800 (Accession NP_079250.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ11800.

[41160] FLJ12363 (Accession NP_115543.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ12363 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ12363, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ12363 BINDING SITE, designated SEQ ID:14486, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41161] Another function of GAM2071 is therefore inhibition of FLJ12363 (Accession NP_115543.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ12363.

[41162] FLJ12572 (Accession NP_075056.2) is another GAM2071 target gene, herein designated TARGET GENE. FLJ12572 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ12572, corre-

sponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ12572 BINDING SITE, designated SEQ ID:14282, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41163] Another function of GAM2071 is therefore inhibition of FLJ12572 (Accession NP_075056.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ12572.

[41164] FLJ12586 (Accession NP_078896.2) is another GAM2071 target gene, herein designated TARGET GENE. FLJ12586 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ12586, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ12586 BINDING SITE, designated SEQ ID:13509, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41165] Another function of GAM2071 is therefore inhibition of FLJ12586 (Accession NP_078896.2) . Accordingly, utilities

of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ12586.

[41166] FLJ12747 (Accession XP_290972.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ12747 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ12747, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ12747 BINDING SITE, designated SEQ ID:8373, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41167] Another function of GAM2071 is therefore inhibition of FLJ12747 (Accession XP_290972.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ12747.

[41168] FLJ12888 (Accession NP_079221.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ12888 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ12888, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ12888 BINDING SITE, designated SEQ ID:1302, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41169] Another function of GAM2071 is therefore inhibition of FLJ12888 (Accession NP_079221.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ12888.

[41170] FLJ12891 (Accession NP_079226.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ12891 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ12891, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ12891 BINDING SITE, designated SEQ ID:13646, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41171] Another function of GAM2071 is therefore inhibition of FLJ12891 (Accession NP_079226.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with FLJ12891.

[41172] FLJ12903 (Accession NP_073590.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ12903 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ12903, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ12903 BINDING SITE, designated SEQ ID:4783, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41173] Another function of GAM2071 is therefore inhibition of FLJ12903 (Accession NP_073590.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ12903.

[41174] FLJ12960 (Accession NP_078914.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ12960 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ12960, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of FLJ12960 BINDING SITE, designated SEQ ID:3109, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41175] Another function of GAM2071 is therefore inhibition of FLJ12960 (Accession NP_078914.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ12960.

[41176] FLJ12975 (Accession NP_079085.2) is another GAM2071 target gene, herein designated TARGET GENE. FLJ12975 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ12975, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ12975 BINDING SITE, designated SEQ ID:836, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41177] Another function of GAM2071 is therefore inhibition of FLJ12975 (Accession NP_079085.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

FLJ12975.

[41178] FLJ13072 (Accession XP_117117.2) is another GAM2071 target gene, herein designated TARGET GENE. FLJ13072 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ13072, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ13072 BINDING SITE, designated SEQ ID:6870, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41179] Another function of GAM2071 is therefore inhibition of FLJ13072 (Accession XP_117117.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ13072.

[41180] FLJ13081 (Accession NP_079110.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ13081 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ13081, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

FLJ13081 BINDING SITE, designated SEQ ID:3389, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41181] Another function of GAM2071 is therefore inhibition of FLJ13081 (Accession NP_079110.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ13081.

[41182] FLJ13188 (Accession NP_071346.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ13188 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ13188, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ13188 BINDING SITE, designated SEQ ID:12816, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41183] Another function of GAM2071 is therefore inhibition of FLJ13188 (Accession NP_071346.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ13188.

[41184] FLJ13197 (Accession NP_078890.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ13197 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ13197, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ13197 BINDING SITE, designated SEQ ID:7946, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41185] Another function of GAM2071 is therefore inhibition of FLJ13197 (Accession NP_078890.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ13197.

[41186] FLJ13456 (Accession XP_038291.5) is another GAM2071 target gene, herein designated TARGET GENE. FLJ13456 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ13456, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ13456 BINDING SITE, designated SEQ ID:5409, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41187] Another function of GAM2071 is therefore inhibition of FLJ13456 (Accession XP_038291.5) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ13456.

[41188] FLJ13590 (Accession NP_079116.2) is another GAM2071 target gene, herein designated TARGET GENE. FLJ13590 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ13590, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ13590 BINDING SITE, designated SEQ ID:6935, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41189] Another function of GAM2071 is therefore inhibition of FLJ13590 (Accession NP_079116.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ13590.

[41190] FLJ13639 (Accession NP_078981.1) is another GAM2071

target gene, herein designated TARGET GENE. FLJ13639 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ13639, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ13639 BINDING SITE, designated SEQ ID:1788, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41191] Another function of GAM2071 is therefore inhibition of FLJ13639 (Accession NP_078981.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ13639.

[41192] FLJ13984 (Accession NP_079046.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ13984 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ13984, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ13984 BINDING SITE, designated SEQ ID:16972, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[41193] Another function of GAM2071 is therefore inhibition of FLJ13984 (Accession NP_079046.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ13984.

[41194] FLJ14351 (Accession NP_079008.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ14351 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ14351, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ14351 BINDING SITE, designated SEQ ID:8244, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41195] Another function of GAM2071 is therefore inhibition of FLJ14351 (Accession NP_079008.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ14351.

[41196] FLJ14641 (Accession NP_116206.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ14641

BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ14641, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ14641 BINDING SITE, designated SEQ ID:18641, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41197] Another function of GAM2071 is therefore inhibition of FLJ14641 (Accession NP_116206.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ14641.

[41198] FLJ14803 (Accession NP_116231.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ14803 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ14803, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ14803 BINDING SITE, designated SEQ ID:3409, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41199] Another function of GAM2071 is therefore inhibition of FLJ14803 (Accession NP_116231.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ14803.

[41200] FLJ20045 (Accession NP_060108.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ20045 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ20045, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ20045 BINDING SITE, designated SEQ ID:19070, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41201] Another function of GAM2071 is therefore inhibition of FLJ20045 (Accession NP_060108.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ20045.

[41202] FLJ20095 (Accession NP_060136.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ20095 BINDING SITE is a target binding site found in the 3` un-

translated region of mRNA encoded by FLJ20095, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ20095 BINDING SITE, designated SEQ ID:13800, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41203] Another function of GAM2071 is therefore inhibition of FLJ20095 (Accession NP_060136.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ20095.

[41204] FLJ20344 (Accession NP_060246.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ20344 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ20344, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ20344 BINDING SITE, designated SEQ ID:8639, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41205] Another function of GAM2071 is therefore inhibition of

FLJ20344 (Accession NP_060246.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ20344.

[41206] FLJ20507 (Accession NP_060319.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ20507 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ20507, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ20507 BINDING SITE, designated SEQ ID:12154, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41207] Another function of GAM2071 is therefore inhibition of FLJ20507 (Accession NP_060319.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ20507.

[41208] FLJ20511 (Accession NP_060323.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ20511 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ20511, corre-

sponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ20511 BINDING SITE, designated SEQ ID:969, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41209] Another function of GAM2071 is therefore inhibition of FLJ20511 (Accession NP_060323.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ20511.

[41210] FLJ20671 (Accession NP_060394.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ20671 BINDING SITE1 and FLJ20671 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by FLJ20671, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ20671 BINDING SITE1 and FLJ20671 BINDING SITE2, designated SEQ ID:13745 and SEQ ID:10861 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41211] Another function of GAM2071 is therefore inhibition of FLJ20671 (Accession NP_060394.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ20671.

[41212] FLJ20700 (Accession NP_060402.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ20700 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ20700, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ20700 BINDING SITE, designated SEQ ID:20156, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41213] Another function of GAM2071 is therefore inhibition of FLJ20700 (Accession NP_060402.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ20700.

[41214] FLJ20813 (Accession NP_060431.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ20813 BINDING SITE is a target binding site found in the 3` un-

translated region of mRNA encoded by FLJ20813, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ20813 BINDING SITE, designated SEQ ID:18464, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41215] Another function of GAM2071 is therefore inhibition of FLJ20813 (Accession NP_060431.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ20813.

[41216] FLJ21603 (Accession NP_079038.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ21603 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ21603, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ21603 BINDING SITE, designated SEQ ID:11662, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41217] Another function of GAM2071 is therefore inhibition of

FLJ21603 (Accession NP_079038.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ21603.

[41218] FLJ21673 (Accession NP_112160.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ21673 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ21673, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ21673 BINDING SITE, designated SEQ ID:1926, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41219] Another function of GAM2071 is therefore inhibition of FLJ21673 (Accession NP_112160.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ21673.

[41220] FLJ21777 (Accession NP_115585.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ21777 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ21777, corre-

sponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ21777 BINDING SITE, designated SEQ ID:13303, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41221] Another function of GAM2071 is therefore inhibition of FLJ21777 (Accession NP_115585.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ21777.

[41222] FLJ22167 (Accession NP_078809.2) is another GAM2071 target gene, herein designated TARGET GENE. FLJ22167 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ22167, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ22167 BINDING SITE, designated SEQ ID:2733, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41223] Another function of GAM2071 is therefore inhibition of FLJ22167 (Accession NP_078809.2) . Accordingly, utilities

of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ22167.

[41224] FLJ22329 (Accession NP_078932.2) is another GAM2071 target gene, herein designated TARGET GENE. FLJ22329 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ22329, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ22329 BINDING SITE, designated SEQ ID:10803, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41225] Another function of GAM2071 is therefore inhibition of FLJ22329 (Accession NP_078932.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ22329.

[41226] FLJ22531 (Accession NP_078926.2) is another GAM2071 target gene, herein designated TARGET GENE. FLJ22531 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ22531, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ22531 BINDING SITE, designated SEQ ID:3548, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41227] Another function of GAM2071 is therefore inhibition of FLJ22531 (Accession NP_078926.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ22531.

[41228] FLJ22965 (Accession NP_071384.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ22965 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ22965, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ22965 BINDING SITE, designated SEQ ID:9754, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41229] Another function of GAM2071 is therefore inhibition of FLJ22965 (Accession NP_071384.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with FLJ22965.

[41230] FLJ23022 (Accession NP_079327.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ23022 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ23022, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ23022 BINDING SITE, designated SEQ ID:541, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41231] Another function of GAM2071 is therefore inhibition of FLJ23022 (Accession NP_079327.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ23022.

[41232] FLJ23040 (Accession NP_079450.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ23040 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ23040, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of FLJ23040 BINDING SITE, designated SEQ ID:12648, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41233] Another function of GAM2071 is therefore inhibition of FLJ23040 (Accession NP_079450.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ23040.

[41234] FLJ23053 (Accession NP_075058.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ23053 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ23053, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ23053 BINDING SITE, designated SEQ ID:16973, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41235] Another function of GAM2071 is therefore inhibition of FLJ23053 (Accession NP_075058.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

FLJ23053.

[41236] FLJ23186 (Accession NP_078892.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ23186 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ23186, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ23186 BINDING SITE, designated SEQ ID:10010, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41237] Another function of GAM2071 is therefore inhibition of FLJ23186 (Accession NP_078892.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ23186.

[41238] FLJ23263 (Accession NP_079391.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ23263 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ23263, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

FLJ23263 BINDING SITE, designated SEQ ID:13801, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41239] Another function of GAM2071 is therefore inhibition of FLJ23263 (Accession NP_079391.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ23263.

[41240] FLJ23356 (Accession NP_115613.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ23356 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ23356, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ23356 BINDING SITE, designated SEQ ID:14440, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41241] Another function of GAM2071 is therefore inhibition of FLJ23356 (Accession NP_115613.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ23356.

[41242] FLJ23392 (Accession NP_079060.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ23392 BINDING SITE1 through FLJ23392 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by FLJ23392, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ23392 BINDING SITE1 through FLJ23392 BINDING SITE3, designated SEQ ID:11425, SEQ ID:4022 and SEQ ID:431 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41243] Another function of GAM2071 is therefore inhibition of FLJ23392 (Accession NP_079060.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ23392.

[41244] FLJ23416 (Accession NP_115614.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ23416 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ23416, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of FLJ23416 BINDING SITE, designated SEQ ID:4771, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41245] Another function of GAM2071 is therefore inhibition of FLJ23416 (Accession NP_115614.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ23416.

[41246] FLJ23556 (Accession NP_079156.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ23556 BINDING SITE1 and FLJ23556 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by FLJ23556, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ23556 BINDING SITE1 and FLJ23556 BINDING SITE2, designated SEQ ID:6906 and SEQ ID:436 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41247] Another function of GAM2071 is therefore inhibition of FLJ23556 (Accession NP_079156.1) . Accordingly, utilities

of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ23556.

[41248] FLJ23834 (Accession NP_689963.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ23834 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ23834, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ23834 BINDING SITE, designated SEQ ID:14133, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41249] Another function of GAM2071 is therefore inhibition of FLJ23834 (Accession NP_689963.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ23834.

[41250] FLJ25416 (Accession NP_659455.2) is another GAM2071 target gene, herein designated TARGET GENE. FLJ25416 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ25416, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ25416 BINDING SITE, designated SEQ ID:8998, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41251] Another function of GAM2071 is therefore inhibition of FLJ25416 (Accession NP_659455.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ25416.

[41252] FLJ25795 (Accession NP_689633.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ25795 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ25795, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ25795 BINDING SITE, designated SEQ ID:18075, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41253] Another function of GAM2071 is therefore inhibition of FLJ25795 (Accession NP_689633.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with FLJ25795.

[41254] FLJ31139 (Accession NP_775928.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ31139 BINDING SITE1 and FLJ31139 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by FLJ31139, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ31139 BINDING SITE1 and FLJ31139 BINDING SITE2, designated SEQ ID:7279 and SEQ ID:1817 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41255] Another function of GAM2071 is therefore inhibition of FLJ31139 (Accession NP_775928.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ31139.

[41256] FLJ31153 (Accession NP_653201.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ31153 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ31153, corre-

sponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ31153 BINDING SITE, designated SEQ ID:13799, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41257] Another function of GAM2071 is therefore inhibition of FLJ31153 (Accession NP_653201.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ31153.

[41258] FLJ31401 (Accession NP_689877.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ31401 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ31401, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ31401 BINDING SITE, designated SEQ ID:11498, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41259] Another function of GAM2071 is therefore inhibition of FLJ31401 (Accession NP_689877.1) . Accordingly, utilities

of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ31401.

[41260] FLJ31958 (Accession NP_694575.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ31958 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ31958, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ31958 BINDING SITE, designated SEQ ID:12975, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41261] Another function of GAM2071 is therefore inhibition of FLJ31958 (Accession NP_694575.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ31958.

[41262] FLJ31978 (Accession NP_653270.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ31978 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ31978, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ31978 BINDING SITE, designated SEQ ID:10814, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41263] Another function of GAM2071 is therefore inhibition of FLJ31978 (Accession NP_653270.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ31978.

[41264] FLJ32130 (Accession NP_689671.2) is another GAM2071 target gene, herein designated TARGET GENE. FLJ32130 BINDING SITE1 and FLJ32130 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by FLJ32130, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ32130 BINDING SITE1 and FLJ32130 BINDING SITE2, designated SEQ ID:17307 and SEQ ID:9100 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41265] Another function of GAM2071 is therefore inhibition of

FLJ32130 (Accession NP_689671.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ32130.

[41266] FLJ32499 (Accession NP_653208.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ32499 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ32499, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ32499 BINDING SITE, designated SEQ ID:2883, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41267] Another function of GAM2071 is therefore inhibition of FLJ32499 (Accession NP_653208.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ32499.

[41268] FLJ32803 (Accession NP_694584.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ32803 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ32803, corre-

sponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ32803 BINDING SITE, designated SEQ ID:7824, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41269] Another function of GAM2071 is therefore inhibition of FLJ32803 (Accession NP_694584.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ32803.

[41270] FLJ32865 (Accession NP_653214.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ32865 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ32865, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ32865 BINDING SITE, designated SEQ ID:19864, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41271] Another function of GAM2071 is therefore inhibition of FLJ32865 (Accession NP_653214.1) . Accordingly, utilities

of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ32865.

[41272] FLJ32894 (Accession NP_653268.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ32894 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ32894, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ32894 BINDING SITE, designated SEQ ID:3716, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41273] Another function of GAM2071 is therefore inhibition of FLJ32894 (Accession NP_653268.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ32894.

[41274] FLJ32932 (Accession NP_690873.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ32932 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ32932, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ32932 BINDING SITE, designated SEQ ID:4748, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41275] Another function of GAM2071 is therefore inhibition of FLJ32932 (Accession NP_690873.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ32932.

[41276] FLJ33505 (Accession NP_689530.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ33505 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ33505, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ33505 BINDING SITE, designated SEQ ID:2450, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41277] Another function of GAM2071 is therefore inhibition of FLJ33505 (Accession NP_689530.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with FLJ33505.

[41278] FLJ34917 (Accession NP_694995.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ34917 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ34917, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ34917 BINDING SITE, designated SEQ ID:13154, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41279] Another function of GAM2071 is therefore inhibition of FLJ34917 (Accession NP_694995.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ34917.

[41280] FLJ34922 (Accession NP_689483.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ34922 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ34922, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of FLJ34922 BINDING SITE, designated SEQ ID:14214, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41281] Another function of GAM2071 is therefore inhibition of FLJ34922 (Accession NP_689483.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ34922.

[41282] FLJ35105 (Accession NP_689890.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ35105 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ35105, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ35105 BINDING SITE, designated SEQ ID:6840, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41283] Another function of GAM2071 is therefore inhibition of FLJ35105 (Accession NP_689890.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

FLJ35105.

[41284] FLJ35283 (Accession NP_689915.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ35283 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ35283, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ35283 BINDING SITE, designated SEQ ID:7525, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41285] Another function of GAM2071 is therefore inhibition of FLJ35283 (Accession NP_689915.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ35283.

[41286] FLJ35487 (Accession NP_776181.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ35487 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ35487, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

FLJ35487 BINDING SITE, designated SEQ ID:7675, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41287] Another function of GAM2071 is therefore inhibition of FLJ35487 (Accession NP_776181.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ35487.

[41288] FLJ35681 (Accession NP_787096.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ35681 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ35681, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ35681 BINDING SITE, designated SEQ ID:3105, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41289] Another function of GAM2071 is therefore inhibition of FLJ35681 (Accession NP_787096.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ35681.

[41290] FLJ35848 (Accession XP_290755.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ35848 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ35848, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ35848 BINDING SITE, designated SEQ ID:12720, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41291] Another function of GAM2071 is therefore inhibition of FLJ35848 (Accession XP_290755.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ35848.

[41292] FLJ36032 (Accession XP_290874.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ36032 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ36032, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ36032 BINDING SITE, designated SEQ ID:17613, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41293] Another function of GAM2071 is therefore inhibition of FLJ36032 (Accession XP_290874.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ36032.

[41294] FLJ36445 (Accession NP_694965.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ36445 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ36445, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ36445 BINDING SITE, designated SEQ ID:10632, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41295] Another function of GAM2071 is therefore inhibition of FLJ36445 (Accession NP_694965.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ36445.

[41296] FLJ37078 (Accession NP_694588.1) is another GAM2071

target gene, herein designated TARGET GENE. FLJ37078 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ37078, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ37078 BINDING SITE, designated SEQ ID:3106, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41297] Another function of GAM2071 is therefore inhibition of FLJ37078 (Accession NP_694588.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ37078.

[41298] FLJ37433 (Accession NP_848612.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ37433 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ37433, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ37433 BINDING SITE, designated SEQ ID:18178, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[41299] Another function of GAM2071 is therefore inhibition of FLJ37433 (Accession NP_848612.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ37433.

[41300] FLJ37543 (Accession NP_775938.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ37543 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ37543, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ37543 BINDING SITE, designated SEQ ID:435, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41301] Another function of GAM2071 is therefore inhibition of FLJ37543 (Accession NP_775938.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ37543.

[41302] FLJ37940 (Accession NP_848629.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ37940

BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ37940, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ37940 BINDING SITE, designated SEQ ID:7849, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41303] Another function of GAM2071 is therefore inhibition of FLJ37940 (Accession NP_848629.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ37940.

[41304] FLJ38149 (Accession XP_091919.5) is another GAM2071 target gene, herein designated TARGET GENE. FLJ38149 BINDING SITE1 through FLJ38149 BINDING SITE4 are target binding sites found in untranslated regions of mRNA encoded by FLJ38149, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ38149 BINDING SITE1 through FLJ38149 BINDING SITE4, designated SEQ ID:6194, SEQ ID:11661, SEQ ID:12581 and SEQ ID:2644 respectively, to

the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41305] Another function of GAM2071 is therefore inhibition of FLJ38149 (Accession XP_091919.5) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ38149.

[41306] FLJ38281 (Accession NP_689814.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ38281 BINDING SITE1 and FLJ38281 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by FLJ38281, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ38281 BINDING SITE1 and FLJ38281 BINDING SITE2, designated SEQ ID:17962 and SEQ ID:19457 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41307] Another function of GAM2071 is therefore inhibition of FLJ38281 (Accession NP_689814.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

FLJ38281.

[41308] FLJ38607 (Accession NP_689867.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ38607 BINDING SITE1 and FLJ38607 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by FLJ38607, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ38607 BINDING SITE1 and FLJ38607 BINDING SITE2, designated SEQ ID:18917 and SEQ ID:3109 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41309] Another function of GAM2071 is therefore inhibition of FLJ38607 (Accession NP_689867.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ38607.

[41310] FLJ38705 (Accession NP_776193.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ38705 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ38705, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ38705 BINDING SITE, designated SEQ ID:6867, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41311] Another function of GAM2071 is therefore inhibition of FLJ38705 (Accession NP_776193.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ38705.

[41312] FLJ38792 (Accession NP_848615.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ38792 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ38792, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ38792 BINDING SITE, designated SEQ ID:18182, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41313] Another function of GAM2071 is therefore inhibition of FLJ38792 (Accession NP_848615.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with FLJ38792.

[41314] FLJ38819 (Accession NP_665872.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ38819 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ38819, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ38819 BINDING SITE, designated SEQ ID:3726, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41315] Another function of GAM2071 is therefore inhibition of FLJ38819 (Accession NP_665872.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ38819.

[41316] FLJ38991 (Accession NP_776188.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ38991 BINDING SITE1 and FLJ38991 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by FLJ38991, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III

of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ38991 BINDING SITE1 and FLJ38991 BINDING SITE2, designated SEQ ID:5383 and SEQ ID:7191 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41317] Another function of GAM2071 is therefore inhibition of FLJ38991 (Accession NP_776188.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ38991.

[41318] FLJ39415 (Accession NP_775952.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ39415 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ39415, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ39415 BINDING SITE, designated SEQ ID:17781, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41319] Another function of GAM2071 is therefore inhibition of FLJ39415 (Accession NP_775952.1) . Accordingly, utilities

of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ39415.

[41320] FLJ39426 (Accession NP_775880.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ39426 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ39426, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ39426 BINDING SITE, designated SEQ ID:5369, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41321] Another function of GAM2071 is therefore inhibition of FLJ39426 (Accession NP_775880.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ39426.

[41322] FLJ39599 (Accession NP_776164.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ39599 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ39599, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ39599 BINDING SITE, designated SEQ ID:7948, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41323] Another function of GAM2071 is therefore inhibition of FLJ39599 (Accession NP_776164.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ39599.

[41324] FLJ39639 (Accession XP_290687.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ39639 BINDING SITE1 and FLJ39639 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by FLJ39639, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ39639 BINDING SITE1 and FLJ39639 BINDING SITE2, designated SEQ ID:13371 and SEQ ID:7663 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41325] Another function of GAM2071 is therefore inhibition of

FLJ39639 (Accession XP_290687.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ39639.

[41326] FLJ39821 (Accession NP_775971.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ39821 BINDING SITE1 and FLJ39821 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by FLJ39821, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ39821 BINDING SITE1 and FLJ39821 BINDING SITE2, designated SEQ ID:14284 and SEQ ID:8171 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41327] Another function of GAM2071 is therefore inhibition of FLJ39821 (Accession NP_775971.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ39821.

[41328] FLJ90231 (Accession NP_775852.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ90231

BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ90231, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ90231 BINDING SITE, designated SEQ ID:18854, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41329] Another function of GAM2071 is therefore inhibition of FLJ90231 (Accession NP_775852.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ90231.

[41330] FLJ90723 (Accession NP_787115.1) is another GAM2071 target gene, herein designated TARGET GENE. FLJ90723 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ90723, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ90723 BINDING SITE, designated SEQ ID:16986, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41331] Another function of GAM2071 is therefore inhibition of FLJ90723 (Accession NP_787115.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ90723.

[41332] Formin binding protein 1 (FNBP1, Accession XP_052666.3) is another GAM2071 target gene, herein designated TARGET GENE. FNBP1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FNBP1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FNBP1 BINDING SITE, designated SEQ ID:8560, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41333] Another function of GAM2071 is therefore inhibition of Formin binding protein 1 (FNBP1, Accession XP_052666.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FNBP1.

[41334] Fsh primary response (lrpr1 homolog, rat) 1 (FSHPRH1, Accession NP_006724.1) is another GAM2071 target gene,

herein designated TARGET GENE. FSHPRH1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FSHPRH1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FSHPRH1 BINDING SITE, designated SEQ ID:13800, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41335] Another function of GAM2071 is therefore inhibition of Fsh primary response (lrpr1 homolog, rat) 1 (FSHPRH1, Accession NP_006724.1), a gene which is involved in the response of gonadal tissues to follicle- stimulating hormone. and therefore may be associated with Hyperg- onadotropic ovarian dysgenesis (odg), x- linked disorders of gonadal development. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Hypergonadotropic ovarian dysgenesis (odg), x- linked disorders of gonadal development, and of other diseases and clinical conditions associated with FSHPRH1.

[41336] The function of FSHPRH1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference

to GAM189.1.Fucosyltransferase 1 (galactoside 2-alpha-l-fucosyltransferase, bombay phenotype included) (FUT1, Accession NP_000139.1) is another GAM2071 target gene, herein designated TARGET GENE. FUT1 BINDING SITE1 and FUT1 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by FUT1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FUT1 BINDING SITE1 and FUT1 BINDING SITE2, designated SEQ ID:3102 and SEQ ID:7472 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41337] Another function of GAM2071 is therefore inhibition of Fucosyltransferase 1 (galactoside 2-alpha-l-fucosyltransferase, bombay phenotype included) (FUT1, Accession NP_000139.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FUT1.

[41338] Interferon, alpha-inducible protein (clone ifi-6-16) (G1P3, Accession NP_075010.1) is another GAM2071 target gene,

herein designated TARGET GENE. G1P3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by G1P3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of G1P3 BINDING SITE, designated SEQ ID:14496, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41339] Another function of GAM2071 is therefore inhibition of Interferon, alpha-inducible protein (clone ifi-6-16) (G1P3, Accession NP_075010.1), a gene which is an interferon-stimulated gene (ISG). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with G1P3.

[41340] The function of G1P3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM234.1.Interferon, alpha-inducible protein (clone ifi-6-16) (G1P3, Accession NP_075011.1) is another GAM2071 target gene, herein designated TARGET GENE. G1P3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA en-

coded by G1P3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of G1P3 BINDING SITE, designated SEQ ID:14496, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41341] Another function of GAM2071 is therefore inhibition of Interferon, alpha-inducible protein (clone ifi-6-16) (G1P3, Accession NP_075011.1), a gene which is an interferon-stimulated gene (ISG). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with G1P3.

[41342] The function of G1P3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM234.1.Interferon, alpha-inducible protein (clone ifi-6-16) (G1P3, Accession NP_002029.3) is another GAM2071 target gene, herein designated TARGET GENE. G1P3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by G1P3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III

of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of G1P3 BINDING SITE, designated SEQ ID:14496, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41343] Another function of GAM2071 is therefore inhibition of Interferon, alpha-inducible protein (clone ifi-6-16) (G1P3, Accession NP_002029.3), a gene which is an interferon-stimulated gene (ISG). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with G1P3.

[41344] The function of G1P3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM234.1.Glucose-6-phosphatase, catalytic (glycogen storage disease type i, von gierke disease) (G6PC, Accession NP_000142.1) is another GAM2071 target gene, herein designated TARGET GENE. G6PC BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by G6PC, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of G6PC BINDING SITE,

designated SEQ ID:8902, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41345] Another function of GAM2071 is therefore inhibition of Glucose-6-phosphatase, catalytic (glycogen storage disease type i, von gierke disease) (G6PC, Accession NP_000142.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with G6PC.

[41346] GAL3ST-4 (Accession NP_078913.3) is another GAM2071 target gene, herein designated TARGET GENE. GAL3ST-4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GAL3ST-4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GAL3ST-4 BINDING SITE, designated SEQ ID:13405, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41347] Another function of GAM2071 is therefore inhibition of GAL3ST-4 (Accession NP_078913.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

GAL3ST-4.

[41348] GBP4 (Accession NP_443173.2) is another GAM2071 target gene, herein designated TARGET GENE. GBP4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GBP4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GBP4 BINDING SITE, designated SEQ ID:12569, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41349] Another function of GAM2071 is therefore inhibition of GBP4 (Accession NP_443173.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GBP4.

[41350] GDEP (Accession NP_477516.1) is another GAM2071 target gene, herein designated TARGET GENE. GDEP BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GDEP, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GDEP BINDING SITE, designated SEQ ID:14396, to the nucleotide se-

quence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41351] Another function of GAM2071 is therefore inhibition of GDEP (Accession NP_477516.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GDEP.

[41352] Golgi associated, gamma adaptin ear containing, arf binding protein 2 (GGA2, Accession NP_055859.1) is another GAM2071 target gene, herein designated TARGET GENE. GGA2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by GGA2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GGA2 BINDING SITE, designated SEQ ID:520, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41353] Another function of GAM2071 is therefore inhibition of Golgi associated, gamma adaptin ear containing, arf binding protein 2 (GGA2, Accession NP_055859.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GGA2.

[41354] Golgi associated, gamma adaptin ear containing, arf binding protein 2 (GGA2, Accession NP_619581.1) is another GAM2071 target gene, herein designated TARGET GENE. GGA2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by GGA2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GGA2 BINDING SITE, designated SEQ ID:520, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41355] Another function of GAM2071 is therefore inhibition of Golgi associated, gamma adaptin ear containing, arf binding protein 2 (GGA2, Accession NP_619581.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GGA2.

[41356] Gm2 ganglioside activator protein (GM2A, Accession NP_000396.1) is another GAM2071 target gene, herein designated TARGET GENE. GM2A BINDING SITE1 and GM2A BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by GM2A, corresponding to target binding sites such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GM2A BINDING SITE1 and GM2A BINDING SITE2, designated SEQ ID:17118 and SEQ ID:2518 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41357] Another function of GAM2071 is therefore inhibition of Gm2 ganglioside activator protein (GM2A, Accession NP_000396.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GM2A.

[41358] GNE (Accession NP_005467.1) is another GAM2071 target gene, herein designated TARGET GENE. GNE BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GNE, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GNE BINDING SITE, designated SEQ ID:7151, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41359] Another function of GAM2071 is therefore inhibition of GNE (Accession NP_005467.1), a gene which has roles in

sialic acid biosynthesis and regulates cell surface sialylation. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GNE.

[41360] The function of GNE and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Guanine nucleotide binding protein (g protein), gamma 4 (GNG4, Accession NP_004476.1) is another GAM2071 target gene, herein designated TARGET GENE. GNG4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GNG4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GNG4 BINDING SITE, designated SEQ ID:11336, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41361] Another function of GAM2071 is therefore inhibition of Guanine nucleotide binding protein (g protein), gamma 4 (GNG4, Accession NP_004476.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GNG4.

[41362] GNPNAT1 (Accession XP_085119.1) is another GAM2071 target gene, herein designated TARGET GENE. GNPNAT1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GNPNAT1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GNPNAT1 BINDING SITE, designated SEQ ID:19027, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41363] Another function of GAM2071 is therefore inhibition of GNPNAT1 (Accession XP_085119.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GNPNAT1.

[41364] GNRPX (Accession NP_060519.1) is another GAM2071 target gene, herein designated TARGET GENE. GNRPX BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GNRPX, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GNRPX BINDING SITE, designated SEQ ID:17848, to the nucleotide

sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41365] Another function of GAM2071 is therefore inhibition of GNRPX (Accession NP_060519.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GNRPX.

[41366] Golgi autoantigen, golgin subfamily a, 3 (GOLGA3, Accession NP_005886.2) is another GAM2071 target gene, herein designated TARGET GENE. GOLGA3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by GOLGA3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GOLGA3 BINDING SITE, designated SEQ ID:9100, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41367] Another function of GAM2071 is therefore inhibition of Golgi autoantigen, golgin subfamily a, 3 (GOLGA3, Accession NP_005886.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GOLGA3.

[41368] GPR128 (Accession NP_116176.1) is another GAM2071

target gene, herein designated TARGET GENE. GPR128 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by GPR128, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GPR128 BINDING SITE, designated SEQ ID:6503, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41369] Another function of GAM2071 is therefore inhibition of GPR128 (Accession NP_116176.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GPR128.

[41370] G protein-coupled receptor 4 (GPR4, Accession NP_005273.1) is another GAM2071 target gene, herein designated TARGET GENE. GPR4 BINDING SITE1 and GPR4 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by GPR4, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GPR4 BINDING SITE1 and GPR4 BINDING SITE2, designated SEQ

ID:15917 and SEQ ID:16936 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41371] Another function of GAM2071 is therefore inhibition of G protein-coupled receptor 4 (GPR4, Accession NP_005273.1), a gene which stimulates to produce increased calcium by both SPC and LPC . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GPR4.

[41372] The function of GPR4 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.G protein-coupled receptor 56 (GPR56, Accession NP_005673.2) is another GAM2071 target gene, herein designated TARGET GENE. GPR56 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by GPR56, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GPR56 BINDING SITE, designated SEQ ID:6235, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[41373] Another function of GAM2071 is therefore inhibition of G protein-coupled receptor 56 (GPR56, Accession NP_005673.2), a gene which transduces extracellular signals through heterotrimeric G proteins. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GPR56.

[41374] The function of GPR56 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM63.1.G protein-coupled receptor 66 (GPR66, Accession NP_006047.2) is another GAM2071 target gene, herein designated TARGET GENE. GPR66 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GPR66, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GPR66 BINDING SITE, designated SEQ ID:4149, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41375] Another function of GAM2071 is therefore inhibition of G

protein-coupled receptor 66 (GPR66, Accession NP_006047.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GPR66.

[41376] G protein-coupled receptor 81 (GPR81, Accession NP_115943.1) is another GAM2071 target gene, herein designated TARGET GENE. GPR81 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GPR81, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GPR81 BINDING SITE, designated SEQ ID:9012, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41377] Another function of GAM2071 is therefore inhibition of G protein-coupled receptor 81 (GPR81, Accession NP_115943.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GPR81.

[41378] GR6 (Accession NP_031380.1) is another GAM2071 target gene, herein designated TARGET GENE. GR6 BINDING SITE is a target binding site found in the 5` untranslated re-

gion of mRNA encoded by GR6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GR6 BINDING SITE, designated SEQ ID:11621, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41379] Another function of GAM2071 is therefore inhibition of GR6 (Accession NP_031380.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GR6.

[41380] GRAF (Accession NP_055886.1) is another GAM2071 target gene, herein designated TARGET GENE. GRAF BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GRAF, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GRAF BINDING SITE, designated SEQ ID:18118, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41381] Another function of GAM2071 is therefore inhibition of GRAF (Accession NP_055886.1), a gene which ia a GTPase

activating protein for p21- rac and therefore may be associated with Juvenile myelomonocytic leukemia. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Juvenile myelomonocytic leukemia, and of other diseases and clinical conditions associated with GRAF.

[41382] The function of GRAF and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.GREB1 (Accession NP_055483.2) is another GAM2071 target gene, herein designated TARGET GENE. GREB1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by GREB1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GREB1 BINDING SITE, designated SEQ ID:18182, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41383] Another function of GAM2071 is therefore inhibition of GREB1 (Accession NP_055483.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of

diseases and clinical conditions associated with GREB1.

[41384] Glutamate receptor, ionotropic, n-methyl d-aspartate-like 1a (GRINL1A, Accession NP_056347.1) is another GAM2071 target gene, herein designated TARGET GENE. GRINL1A BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GRINL1A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GRINL1A BINDING SITE, designated SEQ ID:17379, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41385] Another function of GAM2071 is therefore inhibition of Glutamate receptor, ionotropic, n-methyl d-aspartate-like 1a (GRINL1A, Accession NP_056347.1), a gene which plays a role in the development and function of the mammalian brain. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GRINL1A.

[41386] The function of GRINL1A and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Glutamate receptor, metabotropic 6 (GRM6,

Accession NP_000834.1) is another GAM2071 target gene, herein designated TARGET GENE. GRM6 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GRM6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GRM6 BINDING SITE, designated SEQ ID:5942, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41387] Another function of GAM2071 is therefore inhibition of Glutamate receptor, metabotropic 6 (GRM6, Accession NP_000834.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GRM6.

[41388] GRWD (Accession NP_113673.2) is another GAM2071 target gene, herein designated TARGET GENE. GRWD BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GRWD, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GRWD BINDING SITE, designated SEQ ID:6811, to the nucleotide

sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41389] Another function of GAM2071 is therefore inhibition of GRWD (Accession NP_113673.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GRWD.

[41390] GSDM (Accession XP_209009.1) is another GAM2071 target gene, herein designated TARGET GENE. GSDM BINDING SITE1 and GSDM BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by GSDM, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GSDM BINDING SITE1 and GSDM BINDING SITE2, designated SEQ ID:13197 and SEQ ID:3037 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41391] Another function of GAM2071 is therefore inhibition of GSDM (Accession XP_209009.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GSDM.

[41392] GTF2IRD2 (Accession NP_775808.1) is another GAM2071

target gene, herein designated TARGET GENE. GTF2IRD2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by GTF2IRD2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GTF2IRD2 BINDING SITE, designated SEQ ID:3107, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41393] Another function of GAM2071 is therefore inhibition of GTF2IRD2 (Accession NP_775808.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GTF2IRD2.

[41394] GTF2IRD2 (Accession NP_115579.3) is another GAM2071 target gene, herein designated TARGET GENE. GTF2IRD2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by GTF2IRD2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GTF2IRD2 BINDING SITE, designated

SEQ ID:3107, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41395] Another function of GAM2071 is therefore inhibition of GTF2IRD2 (Accession NP_115579.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GTF2IRD2.

[41396] GTPBG3 (Accession NP_116009.1) is another GAM2071 target gene, herein designated TARGET GENE. GTPBG3 BINDING SITE1 and GTPBG3 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by GTPBG3, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GTPBG3 BINDING SITE1 and GTPBG3 BINDING SITE2, designated SEQ ID:15596 and SEQ ID:7742 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41397] Another function of GAM2071 is therefore inhibition of GTPBG3 (Accession NP_116009.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with GTPBG3.

[41398] H-plk (Accession NP_056936.1) is another GAM2071 target gene, herein designated TARGET GENE. H-plk BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by H-plk, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of H-plk BINDING SITE, designated SEQ ID:8288, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41399] Another function of GAM2071 is therefore inhibition of H-plk (Accession NP_056936.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with H-plk.

[41400] H2AV (Accession NP_619541.1) is another GAM2071 target gene, herein designated TARGET GENE. H2AV BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by H2AV, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide se-

quences of H2AV BINDING SITE, designated SEQ ID:11005, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41401] Another function of GAM2071 is therefore inhibition of H2AV (Accession NP_619541.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with H2AV.

[41402] HECA (Accession NP_057301.1) is another GAM2071 target gene, herein designated TARGET GENE. HECA BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by HECA, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HECA BINDING SITE, designated SEQ ID:6145, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41403] Another function of GAM2071 is therefore inhibition of HECA (Accession NP_057301.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HECA.

[41404] HEMK (Accession NP_057257.1) is another GAM2071 target gene, herein designated TARGET GENE. HEMK BINDING

SITE is a target binding site found in the 3` untranslated region of mRNA encoded by HEMK, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HEMK BINDING SITE, designated SEQ ID:12517, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41405] Another function of GAM2071 is therefore inhibition of HEMK (Accession NP_057257.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HEMK.

[41406] HIP1R (Accession XP_290592.1) is another GAM2071 target gene, herein designated TARGET GENE. HIP1R BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by HIP1R, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HIP1R BINDING SITE, designated SEQ ID:4431, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41407] Another function of GAM2071 is therefore inhibition of

HIP1R (Accession XP_290592.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HIP1R.

[41408] Holocarboxylase synthetase (biotin-[proprionyl-coenzyme a-carboxylase (atp-hydrolysing)] ligase) (HLCS, Accession NP_000402.2) is another GAM2071 target gene, herein designated TARGET GENE. HLCS BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by HLCS, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HLCS BINDING SITE, designated SEQ ID:10628, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41409] Another function of GAM2071 is therefore inhibition of Holocarboxylase synthetase (biotin-[proprionyl-coenzyme a-carboxylase (atp-hydrolysing)] ligase) (HLCS, Accession NP_000402.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HLCS.

[41410] High-mobility group 20a (HMG20A, Accession NP_060670.1) is another GAM2071 target gene, herein

designated TARGET GENE. HMG20A BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by HMG20A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HMG20A BINDING SITE, designated SEQ ID:19141, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41411] Another function of GAM2071 is therefore inhibition of High-mobility group 20a (HMG20A, Accession NP_060670.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HMG20A.

[41412] Histamine receptor h4 (HRH4, Accession NP_067637.2) is another GAM2071 target gene, herein designated TARGET GENE. HRH4 BINDING SITE1 and HRH4 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by HRH4, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HRH4 BINDING SITE1 and HRH4 BINDING SITE2, designated SEQ ID:12079 and SEQ

ID:5920 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41413] Another function of GAM2071 is therefore inhibition of Histamine receptor h4 (HRH4, Accession NP_067637.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HRH4.

[41414] Heparan sulfate (glucosamine) 3-o-sulfotransferase 4 (HS3ST4, Accession XP_056254.4) is another GAM2071 target gene, herein designated TARGET GENE. HS3ST4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by HS3ST4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HS3ST4 BINDING SITE, designated SEQ ID:2420, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41415] Another function of GAM2071 is therefore inhibition of Heparan sulfate (glucosamine) 3-o-sulfotransferase 4 (HS3ST4, Accession XP_056254.4) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with HS3ST4.

[41416] HSA250839 (Accession NP_060871.1) is another GAM2071 target gene, herein designated TARGET GENE. HSA250839 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by HSA250839, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HSA250839 BINDING SITE, designated SEQ ID:588, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41417] Another function of GAM2071 is therefore inhibition of HSA250839 (Accession NP_060871.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HSA250839.

[41418] HSD3B7 (Accession NP_079469.2) is another GAM2071 target gene, herein designated TARGET GENE. HSD3B7 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by HSD3B7, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HSD3B7 BINDING SITE, designated SEQ ID:16293, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41419] Another function of GAM2071 is therefore inhibition of HSD3B7 (Accession NP_079469.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HSD3B7.

[41420] HSNOV1 (Accession NP_059985.2) is another GAM2071 target gene, herein designated TARGET GENE. HSNOV1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by HSNOV1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HSNOV1 BINDING SITE, designated SEQ ID:1150, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41421] Another function of GAM2071 is therefore inhibition of HSNOV1 (Accession NP_059985.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with HSNOV1.

[41422] HSPC065 (Accession NP_054876.2) is another GAM2071 target gene, herein designated TARGET GENE. HSPC065 BINDING SITE1 and HSPC065 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by HSPC065, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HSPC065 BINDING SITE1 and HSPC065 BINDING SITE2, designated SEQ ID:10877 and SEQ ID:7511 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41423] Another function of GAM2071 is therefore inhibition of HSPC065 (Accession NP_054876.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HSPC065.

[41424] 5-hydroxytryptamine (serotonin) receptor 1d (HTR1D, Accession NP_000855.1) is another GAM2071 target gene, herein designated TARGET GENE. HTR1D BINDING SITE is a target binding site found in the 3` untranslated region of

mRNA encoded by HTR1D, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HTR1D BINDING SITE, designated SEQ ID:14604, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41425] Another function of GAM2071 is therefore inhibition of 5-hydroxytryptamine (serotonin) receptor 1d (HTR1D, Accession NP_000855.1), a gene which belongs to g- protein coupled receptor. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HTR1D.

[41426] The function of HTR1D and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.5-hydroxytryptamine (serotonin) receptor 1e (HTR1E, Accession NP_000856.1) is another GAM2071 target gene, herein designated TARGET GENE. HTR1E BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by HTR1E, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of HTR1E BINDING SITE, designated SEQ ID:9063, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41427] Another function of GAM2071 is therefore inhibition of 5-hydroxytryptamine (serotonin) receptor 1e (HTR1E, Accession NP_000856.1), a gene which belongs to g- protein coupled receptors. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HTR1E.

[41428] The function of HTR1E and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM161.1.Hormonally upregulated neu-associated kinase (HUNK, Accession NP_055401.1) is another GAM2071 target gene, herein designated TARGET GENE. HUNK BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by HUNK, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HUNK BINDING SITE, designated SEQ ID:1413, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[41429] Another function of GAM2071 is therefore inhibition of Hormonally upregulated neu-associated kinase (HUNK, Accession NP_055401.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HUNK.

[41430] Hus1 checkpoint homolog (s. pombe) (HUS1, Accession NP_004498.1) is another GAM2071 target gene, herein designated TARGET GENE. HUS1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by HUS1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HUS1 BINDING SITE, designated SEQ ID:11161, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41431] Another function of GAM2071 is therefore inhibition of Hus1 checkpoint homolog (s. pombe) (HUS1, Accession NP_004498.1), a gene which May form DNA damage- responsive protein complex . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HUS1.

[41432] The function of HUS1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Hyaluronoglucosaminidase 4 (HYAL4, Accession NP_036401.1) is another GAM2071 target gene, herein designated TARGET GENE. HYAL4 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by HYAL4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HYAL4 BINDING SITE, designated SEQ ID:19431, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41433] Another function of GAM2071 is therefore inhibition of Hyaluronoglucosaminidase 4 (HYAL4, Accession NP_036401.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HYAL4.

[41434] HYPC (Accession NP_036404.1) is another GAM2071 target gene, herein designated TARGET GENE. HYPC BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by HYPC, corresponding to a

target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HYPC BINDING SITE, designated SEQ ID:10529, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41435] Another function of GAM2071 is therefore inhibition of HYPC (Accession NP_036404.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with HYPC.

[41436] Intercellular adhesion molecule 1 (cd54), human rhinovirus receptor (ICAM1, Accession NP_000192.1) is another GAM2071 target gene, herein designated TARGET GENE. ICAM1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ICAM1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ICAM1 BINDING SITE, designated SEQ ID:18182, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41437] Another function of GAM2071 is therefore inhibition of Intercellular adhesion molecule 1 (cd54), human rhi-

novirus receptor (ICAM1, Accession NP_000192.1), a gene which binds the integrin LFA- 1 (ITGB2) and promotes adhesion; member of the immunoglobulin superfamily and therefore may be associated with Malaria, cerebral, susceptibility to. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Malaria, cerebral, susceptibility to, and of other diseases and clinical conditions associated with ICAM1.

[41438] The function of ICAM1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.ICK (Accession NP_057597.2) is another GAM2071 target gene, herein designated TARGET GENE. ICK BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ICK, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ICK BINDING SITE, designated SEQ ID:3106, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41439] Another function of GAM2071 is therefore inhibition of ICK (Accession NP_057597.2) . Accordingly, utilities of

GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ICK.

[41440] ICK (Accession NP_055735.1) is another GAM2071 target gene, herein designated TARGET GENE. ICK BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ICK, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ICK BINDING SITE, designated SEQ ID:3106, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41441] Another function of GAM2071 is therefore inhibition of ICK (Accession NP_055735.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ICK.

[41442] Insulin-like growth factor 1 (somatomedin c) (IGF1, Accession NP_000609.1) is another GAM2071 target gene, herein designated TARGET GENE. IGF1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by IGF1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of

the nucleotide sequences of IGF1 BINDING SITE, designated SEQ ID:8230, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41443] Another function of GAM2071 is therefore inhibition of Insulin-like growth factor 1 (somatomedin c) (IGF1, Accession NP_000609.1), a gene which are structurally and functionally related to insulin but have a much higher growth- promoting activity and therefore may be associated with Growth retardation with sensorineural deafness and mental retardation. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Growth retardation with sensorineural deafness and mental retardation, and of other diseases and clinical conditions associated with IGF1.

[41444] The function of IGF1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM66.2.Interleukin 11 (IL11, Accession NP_000632.1) is another GAM2071 target gene, herein designated TARGET GENE. IL11 BINDING SITE1 and IL11 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by IL11, corresponding to target binding

sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of IL11 BINDING SITE1 and IL11 BINDING SITE2, designated SEQ ID:6919 and SEQ ID:17785 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41445] Another function of GAM2071 is therefore inhibition of Interleukin 11 (IL11, Accession NP_000632.1), a gene which stimulates the proliferation of hematopoietic stem cells and megakaryocyte progenitor cells and induces megakaryocyte maturation. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with IL11.

[41446] The function of IL11 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM41.1.Interleukin 20 receptor, alpha (IL20RA, Accession NP_055247.2) is another GAM2071 target gene, herein designated TARGET GENE. IL20RA BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by IL20RA, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or

BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of IL20RA BINDING SITE, designated SEQ ID:9137, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41447] Another function of GAM2071 is therefore inhibition of Interleukin 20 receptor, alpha (IL20RA, Accession NP_055247.2), a gene which is the receptor for interleukin- 20 . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with IL20RA.

[41448] The function of IL20RA and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM316.1.Interleukin 28 receptor, alpha (IL28RA, Accession NP_775087.1) is another GAM2071 target gene, herein designated TARGET GENE. IL28RA BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by IL28RA, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of IL28RA BINDING SITE, designated SEQ ID:17486, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41449] Another function of GAM2071 is therefore inhibition of Interleukin 28 receptor, alpha (IL28RA, Accession NP_775087.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with IL28RA.

[41450] Interleukin 28 receptor, alpha (IL28RA, Accession NP_734464.1) is another GAM2071 target gene, herein designated TARGET GENE. IL28RA BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by IL28RA, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of IL28RA BINDING SITE, designated SEQ ID:17486, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41451] Another function of GAM2071 is therefore inhibition of Interleukin 28 receptor, alpha (IL28RA, Accession NP_734464.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with IL28RA.

[41452] Interleukin 28 receptor, alpha (IL28RA, Accession NP_775088.1) is another GAM2071 target gene, herein designated TARGET GENE. IL28RA BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by IL28RA, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of IL28RA BINDING SITE, designated SEQ ID:17486, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41453] Another function of GAM2071 is therefore inhibition of Interleukin 28 receptor, alpha (IL28RA, Accession NP_775088.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with IL28RA.

[41454] IMPACT (Accession NP_060909.1) is another GAM2071 target gene, herein designated TARGET GENE. IMPACT BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by IMPACT, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

IMPACT BINDING SITE, designated SEQ ID:19846, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41455] Another function of GAM2071 is therefore inhibition of IMPACT (Accession NP_060909.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with IMPACT.

[41456] INHBE (Accession NP_113667.1) is another GAM2071 target gene, herein designated TARGET GENE. INHBE BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by INHBE, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of INHBE BINDING SITE, designated SEQ ID:9633, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41457] Another function of GAM2071 is therefore inhibition of INHBE (Accession NP_113667.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with INHBE.

[41458] Indolethylamine n-methyltransferase (INMT, Accession NP_006765.3) is another GAM2071 target gene, herein

designated TARGET GENE. INMT BINDING SITE1 and INMT BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by INMT, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of INMT BINDING SITE1 and INMT BINDING SITE2, designated SEQ ID:3109 and SEQ ID:1421 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41459] Another function of GAM2071 is therefore inhibition of Indolethylamine n-methyltransferase (INMT, Accession NP_006765.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with INMT.

[41460] IPO13 (Accession NP_055467.1) is another GAM2071 target gene, herein designated TARGET GENE. IPO13 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by IPO13, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of IPO13 BINDING SITE, designated SEQ ID:6877, to the nucleotide se-

quence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41461] Another function of GAM2071 is therefore inhibition of IPO13 (Accession NP_055467.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with IPO13.

[41462] Interferon regulatory factor 4 (IRF4, Accession NP_002451.1) is another GAM2071 target gene, herein designated TARGET GENE. IRF4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by IRF4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of IRF4 BINDING SITE, designated SEQ ID:16311, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41463] Another function of GAM2071 is therefore inhibition of Interferon regulatory factor 4 (IRF4, Accession NP_002451.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with IRF4.

[41464] Integrin, alpha l (antigen cd11a (p180), lymphocyte func-

tion-associated antigen 1; alpha polypeptide) (ITGAL, Accession NP_002200.1) is another GAM2071 target gene, herein designated TARGET GENE. ITGAL BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ITGAL, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ITGAL BINDING SITE, designated SEQ ID:17682, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41465] Another function of GAM2071 is therefore inhibition of Integrin, alpha l (antigen cd11a (p180), lymphocyte function-associated antigen 1; alpha polypeptide) (ITGAL, Accession NP_002200.1), a gene which s a receptor for icam1, icam2, icam3 and icam4. it is involved in a variety of immune phenomena including leukocyte- endothelial cell interaction, cytotoxic t- cell mediated killing, and antibody dependent killing by granulocytes and monocytes. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ITGAL.

[41466] The function of ITGAL and its association with various dis-

eases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM148.1.Integrin, alpha x (antigen cd11c (p150), alpha polypeptide) (ITGAX, Accession NP_000878.1) is another GAM2071 target gene, herein designated TARGET GENE. ITGAX BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ITGAX, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ITGAX BINDING SITE, designated SEQ ID:11336, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41467] Another function of GAM2071 is therefore inhibition of Integrin, alpha x (antigen cd11c (p150), alpha polypeptide) (ITGAX, Accession NP_000878.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ITGAX.

[41468] Janus kinase 3 (a protein tyrosine kinase, leukocyte) (JAK3, Accession NP_000206.1) is another GAM2071 target gene, herein designated TARGET GENE. JAK3 BINDING SITE is a target binding site found in the 3` untranslated region of

mRNA encoded by JAK3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of JAK3 BINDING SITE, designated SEQ ID:6262, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41469] Another function of GAM2071 is therefore inhibition of Janus kinase 3 (a protein tyrosine kinase, leukocyte) (JAK3, Accession NP_000206.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with JAK3.

[41470] JM11 (Accession NP_296375.1) is another GAM2071 target gene, herein designated TARGET GENE. JM11 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by JM11, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of JM11 BINDING SITE, designated SEQ ID:15361, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41471] Another function of GAM2071 is therefore inhibition of

JM11 (Accession NP_296375.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with JM11.

[41472] Jerky homolog (mouse) (JRK, Accession NP_003715.1) is another GAM2071 target gene, herein designated TARGET GENE. JRK BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by JRK, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of JRK BINDING SITE, designated SEQ ID:1529, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41473] Another function of GAM2071 is therefore inhibition of Jerky homolog (mouse) (JRK, Accession NP_003715.1), a gene which might function as a DNA- binding protein. and therefore may be associated with Absence epilepsy. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Absence epilepsy, and of other diseases and clinical conditions associated with JRK.

[41474] The function of JRK and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference

to GAM65.2.Potassium voltage-gated channel, shaker-related subfamily, member 5 (KCNA5, Accession NP_002225.2) is another GAM2071 target gene, herein designated TARGET GENE. KCNA5 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KCNA5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KCNA5 BINDING SITE, designated SEQ ID:18957, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41475] Another function of GAM2071 is therefore inhibition of Potassium voltage-gated channel, shaker-related subfamily, member 5 (KCNA5, Accession NP_002225.2), a gene which mediates the voltage- dependent potassium ion permeability of excitable membranes. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KCNA5.

[41476] The function of KCNA5 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference

to GAM391.1.Potassium voltage-gated channel, isk-related family, member 3 (KCNE3, Accession NP_005463.1) is another GAM2071 target gene, herein designated TARGET GENE. KCNE3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KCNE3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KCNE3 BINDING SITE, designated SEQ ID:6918, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41477] Another function of GAM2071 is therefore inhibition of Potassium voltage-gated channel, isk-related family, member 3 (KCNE3, Accession NP_005463.1), a gene which ancillary protein that co- assemble with a potassium channel alpha- subunit to modulate the gating kinetics and enhance stability of the multimeric complex (by similarity). and therefore may be associated with Hypokalemic periodic paralysis. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Hypokalemic periodic paralysis, and of other diseases and clinical conditions associated with KCNE3.

[41478] The function of KCNE3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM234.1.Potassium inwardly-rectifying channel, subfamily j, member 11 (KCNJ11, Accession NP_000516.2) is another GAM2071 target gene, herein designated TARGET GENE. KCNJ11 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by KCNJ11, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KCNJ11 BINDING SITE, designated SEQ ID:9100, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41479] Another function of GAM2071 is therefore inhibition of Potassium inwardly-rectifying channel, subfamily j, member 11 (KCNJ11, Accession NP_000516.2), a gene which is controlled by g proteins. inward rectifier k+ channels are characterized by a greater tendancy to allow potassium to flow into the cell rather than out of it. and therefore is associated with Persistent hyperinsulinemic hypoglycemia of infancy. Accordingly, utilities of GAM2071 include diagno-

sis, prevention and treatment of Persistent hyperinsulinemic hypoglycemia of infancy, and of other diseases and clinical conditions associated with KCNJ11.

[41480] The function of KCNJ11 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.KENAE (Accession NP_789786.1) is another GAM2071 target gene, herein designated TARGET GENE. KENAE BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KENAE, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KENAE BINDING SITE, designated SEQ ID:18180, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41481] Another function of GAM2071 is therefore inhibition of KENAE (Accession NP_789786.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KENAE.

[41482] KIAA0053 (Accession NP_055697.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0053 BINDING SITE is a target binding site found in the 3` un-

translated region of mRNA encoded by KIAA0053, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0053 BINDING SITE, designated SEQ ID:16223, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41483] Another function of GAM2071 is therefore inhibition of KIAA0053 (Accession NP_055697.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0053.

[41484] KIAA0087 (Accession NP_055584.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0087 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0087, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0087 BINDING SITE, designated SEQ ID:14875, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41485] Another function of GAM2071 is therefore inhibition of

KIAA0087 (Accession NP_055584.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0087.

[41486] KIAA0117 (Accession XP_290939.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0117 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0117, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0117 BINDING SITE, designated SEQ ID:1353, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41487] Another function of GAM2071 is therefore inhibition of KIAA0117 (Accession XP_290939.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0117.

[41488] KIAA0186 (Accession NP_066545.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0186 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0186, corre-

sponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0186 BINDING SITE, designated SEQ ID:6841, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41489] Another function of GAM2071 is therefore inhibition of KIAA0186 (Accession NP_066545.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0186.

[41490] KIAA0205 (Accession NP_055688.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0205 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0205, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0205 BINDING SITE, designated SEQ ID:17371, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41491] Another function of GAM2071 is therefore inhibition of KIAA0205 (Accession NP_055688.1) . Accordingly, utilities

of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0205.

[41492] KIAA0350 (Accession XP_290667.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0350 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0350, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0350 BINDING SITE, designated SEQ ID:12671, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41493] Another function of GAM2071 is therefore inhibition of KIAA0350 (Accession XP_290667.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0350.

[41494] KIAA0435 (Accession NP_055616.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0435 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by KIAA0435, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0435 BINDING SITE, designated SEQ ID:14441, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41495] Another function of GAM2071 is therefore inhibition of KIAA0435 (Accession NP_055616.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0435.

[41496] KIAA0446 (Accession XP_044155.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0446 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by KIAA0446, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0446 BINDING SITE, designated SEQ ID:20115, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41497] Another function of GAM2071 is therefore inhibition of KIAA0446 (Accession XP_044155.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with KIAA0446.

[41498] KIAA0459 (Accession XP_027862.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0459 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0459, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0459 BINDING SITE, designated SEQ ID:3442, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41499] Another function of GAM2071 is therefore inhibition of KIAA0459 (Accession XP_027862.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0459.

[41500] KIAA0469 (Accession NP_055666.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0469 BINDING SITE1 and KIAA0469 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by KIAA0469, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III

of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0469 BINDING SITE1 and KIAA0469 BINDING SITE2, designated SEQ ID:14283 and SEQ ID:1413 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41501] Another function of GAM2071 is therefore inhibition of KIAA0469 (Accession NP_055666.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0469.

[41502] KIAA0471 (Accession NP_055672.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0471 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by KIAA0471, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0471 BINDING SITE, designated SEQ ID:16265, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41503] Another function of GAM2071 is therefore inhibition of KIAA0471 (Accession NP_055672.1) . Accordingly, utilities

of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0471.

[41504] KIAA0475 (Accession NP_055679.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0475 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0475, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0475 BINDING SITE, designated SEQ ID:7946, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41505] Another function of GAM2071 is therefore inhibition of KIAA0475 (Accession NP_055679.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0475.

[41506] KIAA0478 (Accession NP_055685.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0478 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0478, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0478 BINDING SITE, designated SEQ ID:11512, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41507] Another function of GAM2071 is therefore inhibition of KIAA0478 (Accession NP_055685.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0478.

[41508] KIAA0493 (Accession XP_034717.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0493 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by KIAA0493, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0493 BINDING SITE, designated SEQ ID:6597, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41509] Another function of GAM2071 is therefore inhibition of KIAA0493 (Accession XP_034717.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with KIAA0493.

[41510] KIAA0495 (Accession XP_031397.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0495 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0495, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0495 BINDING SITE, designated SEQ ID:5452, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41511] Another function of GAM2071 is therefore inhibition of KIAA0495 (Accession XP_031397.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0495.

[41512] KIAA0513 (Accession NP_055547.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0513 BINDING SITE1 through KIAA0513 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by KIAA0513, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING

SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0513 BINDING SITE1 through KIAA0513 BINDING SITE3, designated SEQ ID:11210, SEQ ID:7613 and SEQ ID:12742 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41513] Another function of GAM2071 is therefore inhibition of KIAA0513 (Accession NP_055547.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0513.

[41514] KIAA0527 (Accession XP_171054.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0527 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0527, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0527 BINDING SITE, designated SEQ ID:19044, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41515] Another function of GAM2071 is therefore inhibition of KIAA0527 (Accession XP_171054.1) . Accordingly, utilities

of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0527.

[41516] KIAA0532 (Accession XP_047659.6) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0532 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0532, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0532 BINDING SITE, designated SEQ ID:483, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41517] Another function of GAM2071 is therefore inhibition of KIAA0532 (Accession XP_047659.6) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0532.

[41518] KIAA0557 (Accession XP_085507.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0557 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0557, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0557 BINDING SITE, designated SEQ ID:16200, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41519] Another function of GAM2071 is therefore inhibition of KIAA0557 (Accession XP_085507.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0557.

[41520] KIAA0561 (Accession XP_038150.2) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0561 BINDING SITE1 and KIAA0561 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by KIAA0561, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0561 BINDING SITE1 and KIAA0561 BINDING SITE2, designated SEQ ID:11513 and SEQ ID:12972 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41521] Another function of GAM2071 is therefore inhibition of

KIAA0561 (Accession XP_038150.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0561.

[41522] KIAA0562 (Accession NP_055519.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0562 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0562, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0562 BINDING SITE, designated SEQ ID:10458, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41523] Another function of GAM2071 is therefore inhibition of KIAA0562 (Accession NP_055519.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0562.

[41524] KIAA0563 (Accession NP_055649.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0563 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by KIAA0563, corre-

sponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0563 BINDING SITE, designated SEQ ID:19679, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41525] Another function of GAM2071 is therefore inhibition of KIAA0563 (Accession NP_055649.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0563.

[41526] KIAA0605 (Accession NP_055509.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0605 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by KIAA0605, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0605 BINDING SITE, designated SEQ ID:11045, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41527] Another function of GAM2071 is therefore inhibition of KIAA0605 (Accession NP_055509.1) . Accordingly, utilities

of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0605.

[41528] KIAA0682 (Accession NP_055667.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0682 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by KIAA0682, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0682 BINDING SITE, designated SEQ ID:2671, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41529] Another function of GAM2071 is therefore inhibition of KIAA0682 (Accession NP_055667.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0682.

[41530] KIAA0831 (Accession NP_055739.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0831 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0831, corre-

sponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0831 BINDING SITE, designated SEQ ID:16264, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41531] Another function of GAM2071 is therefore inhibition of KIAA0831 (Accession NP_055739.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0831.

[41532] KIAA0841 (Accession XP_049237.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0841 BINDING SITE1 and KIAA0841 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by KIAA0841, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0841 BINDING SITE1 and KIAA0841 BINDING SITE2, designated SEQ ID:901 and SEQ ID:1519 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41533] Another function of GAM2071 is therefore inhibition of KIAA0841 (Accession XP_049237.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0841.

[41534] KIAA0861 (Accession NP_055893.2) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0861 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0861, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0861 BINDING SITE, designated SEQ ID:10629, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41535] Another function of GAM2071 is therefore inhibition of KIAA0861 (Accession NP_055893.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0861.

[41536] KIAA0924 (Accession NP_055712.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0924 BINDING SITE1 and KIAA0924 BINDING SITE2 are target

binding sites found in untranslated regions of mRNA encoded by KIAA0924, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0924 BINDING SITE1 and KIAA0924 BINDING SITE2, designated SEQ ID:19935 and SEQ ID:864 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41537] Another function of GAM2071 is therefore inhibition of KIAA0924 (Accession NP_055712.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0924.

[41538] KIAA0931 (Accession XP_041191.2) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0931 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0931, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0931 BINDING SITE, designated SEQ ID:8504, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[41539] Another function of GAM2071 is therefore inhibition of KIAA0931 (Accession XP_041191.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0931.

[41540] KIAA0935 (Accession XP_052620.6) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0935 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0935, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0935 BINDING SITE, designated SEQ ID:10957, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41541] Another function of GAM2071 is therefore inhibition of KIAA0935 (Accession XP_052620.6) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0935.

[41542] KIAA0937 (Accession XP_166213.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA0937

BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA0937, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA0937 BINDING SITE, designated SEQ ID:7974, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41543] Another function of GAM2071 is therefore inhibition of KIAA0937 (Accession XP_166213.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA0937.

[41544] KIAA1002 (Accession XP_290584.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1002 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1002, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1002 BINDING SITE, designated SEQ ID:8660, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41545] Another function of GAM2071 is therefore inhibition of KIAA1002 (Accession XP_290584.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1002.

[41546] KIAA1040 (Accession XP_051091.3) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1040 BINDING SITE1 and KIAA1040 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by KIAA1040, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1040 BINDING SITE1 and KIAA1040 BINDING SITE2, designated SEQ ID:5138 and SEQ ID:5080 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41547] Another function of GAM2071 is therefore inhibition of KIAA1040 (Accession XP_051091.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1040.

[41548] KIAA1041 (Accession NP_055762.1) is another GAM2071

target gene, herein designated TARGET GENE. KIAA1041 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1041, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1041 BINDING SITE, designated SEQ ID:11112, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41549] Another function of GAM2071 is therefore inhibition of KIAA1041 (Accession NP_055762.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1041.

[41550] KIAA1043 (Accession NP_056096.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1043 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1043, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1043 BINDING SITE, designated SEQ ID:18400, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[41551] Another function of GAM2071 is therefore inhibition of KIAA1043 (Accession NP_056096.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1043.

[41552] KIAA1045 (Accession XP_048592.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1045 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1045, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1045 BINDING SITE, designated SEQ ID:9634, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41553] Another function of GAM2071 is therefore inhibition of KIAA1045 (Accession XP_048592.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1045.

[41554] KIAA1052 (Accession NP_055771.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1052

BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by KIAA1052, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1052 BINDING SITE, designated SEQ ID:1530, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41555] Another function of GAM2071 is therefore inhibition of KIAA1052 (Accession NP_055771.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1052.

[41556] KIAA1054 (Accession XP_043493.5) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1054 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1054, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1054 BINDING SITE, designated SEQ ID:7973, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41557] Another function of GAM2071 is therefore inhibition of KIAA1054 (Accession XP_043493.5) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1054.

[41558] KIAA1126 (Accession XP_050325.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1126 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1126, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1126 BINDING SITE, designated SEQ ID:6077, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41559] Another function of GAM2071 is therefore inhibition of KIAA1126 (Accession XP_050325.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1126.

[41560] KIAA1143 (Accession XP_044014.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1143 BINDING SITE is a target binding site found in the 3` un-

translated region of mRNA encoded by KIAA1143, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1143 BINDING SITE, designated SEQ ID:13800, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41561] Another function of GAM2071 is therefore inhibition of KIAA1143 (Accession XP_044014.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1143.

[41562] KIAA1155 (Accession XP_030864.2) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1155 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1155, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1155 BINDING SITE, designated SEQ ID:5405, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41563] Another function of GAM2071 is therefore inhibition of

KIAA1155 (Accession XP_030864.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1155.

[41564] KIAA1185 (Accession NP_065761.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1185 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1185, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1185 BINDING SITE, designated SEQ ID:9213, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41565] Another function of GAM2071 is therefore inhibition of KIAA1185 (Accession NP_065761.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1185.

[41566] KIAA1193 (Accession XP_041843.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1193 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1193, corre-

sponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1193 BINDING SITE, designated SEQ ID:1683, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41567] Another function of GAM2071 is therefore inhibition of KIAA1193 (Accession XP_041843.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1193.

[41568] KIAA1198 (Accession NP_065765.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1198 BINDING SITE1 through KIAA1198 BINDING SITE6 are target binding sites found in untranslated regions of mRNA encoded by KIAA1198, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1198 BINDING SITE1 through KIAA1198 BINDING SITE6, designated SEQ ID:19094, SEQ ID:17786, SEQ ID:8170, SEQ ID:5522, SEQ ID:17617 and SEQ ID:17224 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[41569] Another function of GAM2071 is therefore inhibition of KIAA1198 (Accession NP_065765.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1198.

[41570] KIAA1210 (Accession XP_172801.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1210 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1210, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1210 BINDING SITE, designated SEQ ID:1409, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41571] Another function of GAM2071 is therefore inhibition of KIAA1210 (Accession XP_172801.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1210.

[41572] KIAA1257 (Accession XP_031577.2) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1257

BINDING SITE1 and KIAA1257 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by KIAA1257, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1257 BINDING SITE1 and KIAA1257 BINDING SITE2, designated SEQ ID:14928 and SEQ ID:3109 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41573] Another function of GAM2071 is therefore inhibition of KIAA1257 (Accession XP_031577.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1257.

[41574] KIAA1272 (Accession XP_046600.7) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1272 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by KIAA1272, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1272 BINDING SITE, designated SEQ ID:15059, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41575] Another function of GAM2071 is therefore inhibition of KIAA1272 (Accession XP_046600.7) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1272.

[41576] KIAA1287 (Accession NP_065799.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1287 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1287, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1287 BINDING SITE, designated SEQ ID:13685, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41577] Another function of GAM2071 is therefore inhibition of KIAA1287 (Accession NP_065799.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1287.

[41578] KIAA1393 (Accession XP_050793.2) is another GAM2071

target gene, herein designated TARGET GENE. KIAA1393 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1393, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1393 BINDING SITE, designated SEQ ID:6495, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41579] Another function of GAM2071 is therefore inhibition of KIAA1393 (Accession XP_050793.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1393.

[41580] KIAA1407 (Accession NP_065868.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1407 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1407, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1407 BINDING SITE, designated SEQ ID:15873, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[41581] Another function of GAM2071 is therefore inhibition of KIAA1407 (Accession NP_065868.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1407.

[41582] KIAA1456 (Accession XP_040100.3) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1456 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1456, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1456 BINDING SITE, designated SEQ ID:13974, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41583] Another function of GAM2071 is therefore inhibition of KIAA1456 (Accession XP_040100.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1456.

[41584] KIAA1465 (Accession XP_027396.4) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1465

BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1465, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1465 BINDING SITE, designated SEQ ID:13306, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41585] Another function of GAM2071 is therefore inhibition of KIAA1465 (Accession XP_027396.4) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1465.

[41586] KIAA1508 (Accession XP_290952.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1508 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1508, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1508 BINDING SITE, designated SEQ ID:16911, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41587] Another function of GAM2071 is therefore inhibition of KIAA1508 (Accession XP_290952.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1508.

[41588] KIAA1518 (Accession XP_170889.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1518 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by KIAA1518, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1518 BINDING SITE, designated SEQ ID:17375, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41589] Another function of GAM2071 is therefore inhibition of KIAA1518 (Accession XP_170889.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1518.

[41590] KIAA1530 (Accession XP_042661.5) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1530

BINDING SITE1 and KIAA1530 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by KIAA1530, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1530 BINDING SITE1 and KIAA1530 BINDING SITE2, designated SEQ ID:12872 and SEQ ID:6360 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41591] Another function of GAM2071 is therefore inhibition of KIAA1530 (Accession XP_042661.5) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1530.

[41592] KIAA1553 (Accession XP_166320.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1553 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1553, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1553 BINDING SITE, designated SEQ ID:3650, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41593] Another function of GAM2071 is therefore inhibition of KIAA1553 (Accession XP_166320.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1553.

[41594] KIAA1554 (Accession XP_290768.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1554 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1554, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1554 BINDING SITE, designated SEQ ID:15297, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41595] Another function of GAM2071 is therefore inhibition of KIAA1554 (Accession XP_290768.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1554.

[41596] KIAA1559 (Accession XP_054472.2) is another GAM2071

target gene, herein designated TARGET GENE. KIAA1559 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1559, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1559 BINDING SITE, designated SEQ ID:14408, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41597] Another function of GAM2071 is therefore inhibition of KIAA1559 (Accession XP_054472.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1559.

[41598] KIAA1571 (Accession XP_027744.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1571 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1571, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1571 BINDING SITE, designated SEQ ID:13037, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[41599] Another function of GAM2071 is therefore inhibition of KIAA1571 (Accession XP_027744.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1571.

[41600] KIAA1615 (Accession NP_066002.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1615 BINDING SITE1 and KIAA1615 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by KIAA1615, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1615 BINDING SITE1 and KIAA1615 BINDING SITE2, designated SEQ ID:8578 and SEQ ID:12534 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41601] Another function of GAM2071 is therefore inhibition of KIAA1615 (Accession NP_066002.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1615.

[41602] KIAA1671 (Accession XP_037809.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1671 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1671, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1671 BINDING SITE, designated SEQ ID:17814, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41603] Another function of GAM2071 is therefore inhibition of KIAA1671 (Accession XP_037809.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1671.

[41604] KIAA1727 (Accession XP_034262.4) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1727 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1727, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1727 BINDING SITE, designated SEQ ID:14415, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41605] Another function of GAM2071 is therefore inhibition of KIAA1727 (Accession XP_034262.4) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1727.

[41606] KIAA1784 (Accession NP_115820.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1784 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1784, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1784 BINDING SITE, designated SEQ ID:18884, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41607] Another function of GAM2071 is therefore inhibition of KIAA1784 (Accession NP_115820.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1784.

[41608] KIAA1827 (Accession XP_290834.1) is another GAM2071

target gene, herein designated TARGET GENE. KIAA1827 BINDING SITE1 and KIAA1827 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by KIAA1827, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1827 BINDING SITE1 and KIAA1827 BINDING SITE2, designated SEQ ID:2385 and SEQ ID:19431 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41609] Another function of GAM2071 is therefore inhibition of KIAA1827 (Accession XP_290834.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1827.

[41610] KIAA1829 (Accession XP_030378.2) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1829 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1829, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

KIAA1829 BINDING SITE, designated SEQ ID:12386, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41611] Another function of GAM2071 is therefore inhibition of KIAA1829 (Accession XP_030378.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1829.

[41612] KIAA1836 (Accession XP_114087.2) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1836 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1836, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1836 BINDING SITE, designated SEQ ID:17519, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41613] Another function of GAM2071 is therefore inhibition of KIAA1836 (Accession XP_114087.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1836.

[41614] KIAA1853 (Accession XP_045184.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1853 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1853, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1853 BINDING SITE, designated SEQ ID:19842, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41615] Another function of GAM2071 is therefore inhibition of KIAA1853 (Accession XP_045184.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1853.

[41616] KIAA1924 (Accession NP_694971.2) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1924 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1924, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1924 BINDING SITE, designated SEQ ID:7825, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41617] Another function of GAM2071 is therefore inhibition of KIAA1924 (Accession NP_694971.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1924.

[41618] KIAA1951 (Accession XP_057401.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1951 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1951, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1951 BINDING SITE, designated SEQ ID:12956, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41619] Another function of GAM2071 is therefore inhibition of KIAA1951 (Accession XP_057401.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1951.

[41620] KIAA1971 (Accession XP_058720.4) is another GAM2071

target gene, herein designated TARGET GENE. KIAA1971 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA1971, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1971 BINDING SITE, designated SEQ ID:19552, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41621] Another function of GAM2071 is therefore inhibition of KIAA1971 (Accession XP_058720.4) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1971.

[41622] KIAA1987 (Accession XP_113870.1) is another GAM2071 target gene, herein designated TARGET GENE. KIAA1987 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by KIAA1987, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA1987 BINDING SITE, designated SEQ ID:18263, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[41623] Another function of GAM2071 is therefore inhibition of KIAA1987 (Accession XP_113870.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA1987.

[41624] KIAA2028 (Accession XP_059415.2) is another GAM2071 target gene, herein designated TARGET GENE. KIAA2028 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KIAA2028, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KIAA2028 BINDING SITE, designated SEQ ID:11722, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41625] Another function of GAM2071 is therefore inhibition of KIAA2028 (Accession XP_059415.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KIAA2028.

[41626] Kruppel-like factor 5 (intestinal) (KLF5, Accession NP_001721.2) is another GAM2071 target gene, herein

designated TARGET GENE. KLF5 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KLF5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KLF5 BINDING SITE, designated SEQ ID:17531, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41627] Another function of GAM2071 is therefore inhibition of Kruppel-like factor 5 (intestinal) (KLF5, Accession NP_001721.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KLF5.

[41628] Kallikrein 10 (KLK10, Accession NP_665895.1) is another GAM2071 target gene, herein designated TARGET GENE. KLK10 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by KLK10, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KLK10 BINDING SITE, designated SEQ ID:6691, to the nucleotide sequence of GAM2071

RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41629] Another function of GAM2071 is therefore inhibition of Kallikrein 10 (KLK10, Accession NP_665895.1), a gene which has a tumor- suppressor role in breast and prostate cancer. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KLK10.

[41630] The function of KLK10 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM234.1.Kallikrein 10 (KLK10, Accession NP_002767.2) is another GAM2071 target gene, herein designated TARGET GENE. KLK10 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by KLK10, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KLK10 BINDING SITE, designated SEQ ID:6691, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41631] Another function of GAM2071 is therefore inhibition of

Kallikrein 10 (KLK10, Accession NP_002767.2), a gene which has a tumor- suppressor role in breast and prostate cancer. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KLK10.

[41632] The function of KLK10 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM234.1.Kynurenine 3-monooxygenase (kynurenine 3-hydroxylase) (KMO, Accession NP_003670.1) is another GAM2071 target gene, herein designated TARGET GENE. KMO BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by KMO, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KMO BINDING SITE, designated SEQ ID:5730, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41633] Another function of GAM2071 is therefore inhibition of Kynurenine 3-monooxygenase (kynurenine 3-hydroxylase) (KMO, Accession NP_003670.1), a gene which may play a role in encephalic photoreception. Ac-

cordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KMO.

[41634] The function of KMO and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Kinase suppressor of ras (KSR, Accession XP_290793.1) is another GAM2071 target gene, herein designated TARGET GENE. KSR BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by KSR, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of KSR BINDING SITE, designated SEQ ID:15951, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41635] Another function of GAM2071 is therefore inhibition of Kinase suppressor of ras (KSR, Accession XP_290793.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with KSR.

[41636] Lysosomal-associated membrane protein 3 (LAMP3, Ac-

cession NP_055213.1) is another GAM2071 target gene, herein designated TARGET GENE. LAMP3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LAMP3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LAMP3 BINDING SITE, designated SEQ ID:970, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41637] Another function of GAM2071 is therefore inhibition of Lysosomal-associated membrane protein 3 (LAMP3, Accession NP_055213.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LAMP3.

[41638] LANO (Accession NP_060684.1) is another GAM2071 target gene, herein designated TARGET GENE. LANO BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by LANO, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LANO BINDING SITE, designated SEQ ID:4507,

to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41639] Another function of GAM2071 is therefore inhibition of LANO (Accession NP_060684.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LANO.

[41640] Lipocalin 7 (LCN7, Accession NP_071447.1) is another GAM2071 target gene, herein designated TARGET GENE. LCN7 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LCN7, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LCN7 BINDING SITE, designated SEQ ID:3972, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41641] Another function of GAM2071 is therefore inhibition of Lipocalin 7 (LCN7, Accession NP_071447.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LCN7.

[41642] Lymphoid enhancer-binding factor 1 (LEF1, Accession NP_057353.1) is another GAM2071 target gene, herein

designated TARGET GENE. LEF1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LEF1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LEF1 BINDING SITE, designated SEQ ID:11499, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41643] Another function of GAM2071 is therefore inhibition of Lymphoid enhancer-binding factor 1 (LEF1, Accession NP_057353.1), a gene which plays an essential role in the formation of several organs and structures that require inductive tissue interactions. and therefore may be associated with Colon cancer. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Colon cancer, and of other diseases and clinical conditions associated with LEF1.

[41644] The function of LEF1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM272.1.Lipoma hmgic fusion partner (LHFP, Accession NP_005771.1) is another GAM2071 target gene,

herein designated TARGET GENE. LHFP BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LHFP, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LHFP BINDING SITE, designated SEQ ID:8128, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41645] Another function of GAM2071 is therefore inhibition of Lipoma hmgic fusion partner (LHFP, Accession NP_005771.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LHFP.

[41646] LIN-28 (Accession NP_078950.1) is another GAM2071 target gene, herein designated TARGET GENE. LIN-28 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LIN-28, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LIN-28 BINDING SITE, designated SEQ ID:6030, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[41647] Another function of GAM2071 is therefore inhibition of LIN-28 (Accession NP_078950.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LIN-28.

[41648] LNK (Accession NP_005466.1) is another GAM2071 target gene, herein designated TARGET GENE. LNK BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LNK, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LNK BINDING SITE, designated SEQ ID:9510, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41649] Another function of GAM2071 is therefore inhibition of LNK (Accession NP_005466.1), a gene which links T- cell receptor activation signal to phospholipase c- gamma- 1, grb- 2 and phosphatidylinositol 3- kinase (by similarity). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LNK.

[41650] The function of LNK and its association with various dis-

eases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.LOC112687 (Accession XP_053145.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC112687 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC112687, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC112687 BINDING SITE, designated SEQ ID:4875, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41651] Another function of GAM2071 is therefore inhibition of LOC112687 (Accession XP_053145.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC112687.

[41652] LOC112817 (Accession NP_612422.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC112817 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC112817, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC112817 BINDING SITE, designated SEQ ID:16516, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41653] Another function of GAM2071 is therefore inhibition of LOC112817 (Accession NP_612422.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC112817.

[41654] LOC113444 (Accession NP_612437.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC113444 BINDING SITE1 through LOC113444 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC113444, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC113444 BINDING SITE1 through LOC113444 BINDING SITE3, designated SEQ ID:15369, SEQ ID:15847 and SEQ ID:14262 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ

ID:371.

[41655] Another function of GAM2071 is therefore inhibition of LOC113444 (Accession NP_612437.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC113444.

[41656] LOC115648 (Accession NP_663299.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC115648 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC115648, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC115648 BINDING SITE, designated SEQ ID:6386, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41657] Another function of GAM2071 is therefore inhibition of LOC115648 (Accession NP_663299.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC115648.

[41658] LOC116411 (Accession XP_058095.1) is another

GAM2071 target gene, herein designated TARGET GENE. LOC116411 BINDING SITE1 and LOC116411 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC116411, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC116411 BINDING SITE1 and LOC116411 BINDING SITE2, designated SEQ ID:1487 and SEQ ID:13193 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41659] Another function of GAM2071 is therefore inhibition of LOC116411 (Accession XP_058095.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC116411.

[41660] LOC118490 (Accession XP_060981.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC118490 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC118490, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC118490 BINDING SITE, designated SEQ ID:11022, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41661] Another function of GAM2071 is therefore inhibition of LOC118490 (Accession XP_060981.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC118490.

[41662] LOC118812 (Accession XP_058346.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC118812 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by LOC118812, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC118812 BINDING SITE, designated SEQ ID:7879, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41663] Another function of GAM2071 is therefore inhibition of LOC118812 (Accession XP_058346.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC118812.

[41664] LOC118812 (Accession NP_849154.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC118812 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by LOC118812, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC118812 BINDING SITE, designated SEQ ID:7879, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41665] Another function of GAM2071 is therefore inhibition of LOC118812 (Accession NP_849154.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC118812.

[41666] LOC120526 (Accession XP_058475.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC120526 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC120526, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC120526 BINDING SITE, designated SEQ ID:14215, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41667] Another function of GAM2071 is therefore inhibition of LOC120526 (Accession XP_058475.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC120526.

[41668] LOC121498 (Accession XP_062669.7) is another GAM2071 target gene, herein designated TARGET GENE. LOC121498 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC121498, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC121498 BINDING SITE, designated SEQ ID:1850, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41669] Another function of GAM2071 is therefore inhibition of

LOC121498 (Accession XP_062669.7) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC121498.

[41670] LOC121952 (Accession XP_062872.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC121952 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC121952, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC121952 BINDING SITE, designated SEQ ID:17591, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41671] Another function of GAM2071 is therefore inhibition of LOC121952 (Accession XP_062872.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC121952.

[41672] LOC125061 (Accession XP_058889.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC125061 BINDING SITE is a target binding site found in

the 3` untranslated region of mRNA encoded by LOC125061, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC125061 BINDING SITE, designated SEQ ID:9098, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41673] Another function of GAM2071 is therefore inhibition of LOC125061 (Accession XP_058889.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC125061.

[41674] LOC127602 (Accession XP_059166.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC127602 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC127602, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC127602 BINDING SITE, designated SEQ ID:14354, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[41675] Another function of GAM2071 is therefore inhibition of LOC127602 (Accession XP_059166.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC127602.

[41676] LOC130813 (Accession XP_065904.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC130813 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC130813, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC130813 BINDING SITE, designated SEQ ID:16452, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41677] Another function of GAM2071 is therefore inhibition of LOC130813 (Accession XP_065904.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC130813.

[41678] LOC131963 (Accession XP_067689.1) is another

GAM2071 target gene, herein designated TARGET GENE. LOC131963 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC131963, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC131963 BINDING SITE, designated SEQ ID:5289, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41679] Another function of GAM2071 is therefore inhibition of LOC131963 (Accession XP_067689.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC131963.

[41680] LOC132241 (Accession XP_059583.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC132241 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC132241, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC132241 BINDING SITE, desig-

nated SEQ ID:13281, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41681] Another function of GAM2071 is therefore inhibition of LOC132241 (Accession XP_059583.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC132241.

[41682] LOC134466 (Accession XP_068858.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC134466 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC134466, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC134466 BINDING SITE, designated SEQ ID:11536, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41683] Another function of GAM2071 is therefore inhibition of LOC134466 (Accession XP_068858.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC134466.

[41684] LOC135293 (Accession XP_072402.4) is another GAM2071 target gene, herein designated TARGET GENE. LOC135293 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC135293, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC135293 BINDING SITE, designated SEQ ID:11660, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41685] Another function of GAM2071 is therefore inhibition of LOC135293 (Accession XP_072402.4) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC135293.

[41686] LOC135763 (Accession NP_612639.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC135763 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC135763, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC135763 BINDING SITE, designated SEQ ID:14442, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41687] Another function of GAM2071 is therefore inhibition of LOC135763 (Accession NP_612639.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC135763.

[41688] LOC139422 (Accession XP_066687.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC139422 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC139422, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC139422 BINDING SITE, designated SEQ ID:17958, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41689] Another function of GAM2071 is therefore inhibition of LOC139422 (Accession XP_066687.2) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC139422.

[41690] LOC144248 (Accession XP_084786.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC144248 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC144248, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC144248 BINDING SITE, designated SEQ ID:11361, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41691] Another function of GAM2071 is therefore inhibition of LOC144248 (Accession XP_084786.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC144248.

[41692] LOC144404 (Accession XP_084852.6) is another GAM2071 target gene, herein designated TARGET GENE. LOC144404 BINDING SITE1 and LOC144404 BINDING SITE2 are target binding sites found in untranslated re-

gions of mRNA encoded by LOC144404, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC144404 BINDING SITE1 and LOC144404 BINDING SITE2, designated SEQ ID:8561 and SEQ ID:11669 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41693] Another function of GAM2071 is therefore inhibition of LOC144404 (Accession XP_084852.6) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC144404.

[41694] LOC144481 (Accession XP_096611.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC144481 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC144481, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC144481 BINDING SITE, designated SEQ ID:17022, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[41695] Another function of GAM2071 is therefore inhibition of LOC144481 (Accession XP_096611.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC144481.

[41696] LOC144766 (Accession XP_084963.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC144766 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC144766, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC144766 BINDING SITE, designated SEQ ID:19847, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41697] Another function of GAM2071 is therefore inhibition of LOC144766 (Accession XP_084963.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC144766.

[41698] LOC144817 (Accession XP_084972.1) is another

GAM2071 target gene, herein designated TARGET GENE. LOC144817 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC144817, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC144817 BINDING SITE, designated SEQ ID:12382, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41699] Another function of GAM2071 is therefore inhibition of LOC144817 (Accession XP_084972.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC144817.

[41700] LOC144871 (Accession XP_096698.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC144871 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC144871, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC144871 BINDING SITE, desig-

nated SEQ ID:10644, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41701] Another function of GAM2071 is therefore inhibition of LOC144871 (Accession XP_096698.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC144871.

[41702] LOC145453 (Accession XP_085120.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC145453 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC145453, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC145453 BINDING SITE, designated SEQ ID:8486, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41703] Another function of GAM2071 is therefore inhibition of LOC145453 (Accession XP_085120.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC145453.

[41704] LOC145676 (Accession XP_085202.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC145676 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC145676, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC145676 BINDING SITE, designated SEQ ID:2964, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41705] Another function of GAM2071 is therefore inhibition of LOC145676 (Accession XP_085202.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC145676.

[41706] LOC145757 (Accession XP_085227.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC145757 BINDING SITE1 and LOC145757 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC145757, corresponding to target binding sites such as BINDING SITE I, BINDING SITE

II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC145757 BINDING SITE1 and LOC145757 BINDING SITE2, designated SEQ ID:13797 and SEQ ID:3109 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41707] Another function of GAM2071 is therefore inhibition of LOC145757 (Accession XP_085227.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC145757.

[41708] LOC145783 (Accession XP_085231.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC145783 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC145783, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC145783 BINDING SITE, designated SEQ ID:6743, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41709] Another function of GAM2071 is therefore inhibition of

LOC145783 (Accession XP_085231.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC145783.

[41710] LOC145813 (Accession XP_096873.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC145813 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC145813, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC145813 BINDING SITE, designated SEQ ID:987, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41711] Another function of GAM2071 is therefore inhibition of LOC145813 (Accession XP_096873.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC145813.

[41712] LOC145988 (Accession XP_085290.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC145988 BINDING SITE is a target binding site found in

the 5` untranslated region of mRNA encoded by LOC145988, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC145988 BINDING SITE, designated SEQ ID:1945, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41713] Another function of GAM2071 is therefore inhibition of LOC145988 (Accession XP_085290.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC145988.

[41714] LOC146177 (Accession NP_778229.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC146177 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC146177, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146177 BINDING SITE, designated SEQ ID:15157, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[41715] Another function of GAM2071 is therefore inhibition of LOC146177 (Accession NP_778229.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146177.

[41716] LOC146229 (Accession XP_085387.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC146229 BINDING SITE1 and LOC146229 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC146229, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146229 BINDING SITE1 and LOC146229 BINDING SITE2, designated SEQ ID:3109 and SEQ ID:8345 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41717] Another function of GAM2071 is therefore inhibition of LOC146229 (Accession XP_085387.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146229.

[41718] LOC146336 (Accession XP_085421.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC146336 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC146336, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146336 BINDING SITE, designated SEQ ID:4132, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41719] Another function of GAM2071 is therefore inhibition of LOC146336 (Accession XP_085421.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146336.

[41720] LOC146346 (Accession XP_085430.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC146346 BINDING SITE1 and LOC146346 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC146346, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the com-

plementarity of the nucleotide sequences of LOC146346 BINDING SITE1 and LOC146346 BINDING SITE2, designated SEQ ID:16312 and SEQ ID:6781 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41721] Another function of GAM2071 is therefore inhibition of LOC146346 (Accession XP_085430.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146346.

[41722] LOC146429 (Accession XP_096998.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC146429 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC146429, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146429 BINDING SITE, designated SEQ ID:8579, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41723] Another function of GAM2071 is therefore inhibition of LOC146429 (Accession XP_096998.2) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146429.

[41724] LOC146443 (Accession XP_085461.6) is another GAM2071 target gene, herein designated TARGET GENE. LOC146443 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC146443, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146443 BINDING SITE, designated SEQ ID:5238, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41725] Another function of GAM2071 is therefore inhibition of LOC146443 (Accession XP_085461.6) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146443.

[41726] LOC146603 (Accession XP_085514.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC146603 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by

LOC146603, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146603 BINDING SITE, designated SEQ ID:3109, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41727] Another function of GAM2071 is therefore inhibition of LOC146603 (Accession XP_085514.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146603.

[41728] LOC146784 (Accession XP_085588.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC146784 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC146784, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146784 BINDING SITE, designated SEQ ID:13452, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41729] Another function of GAM2071 is therefore inhibition of LOC146784 (Accession XP_085588.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146784.

[41730] LOC146839 (Accession XP_097107.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC146839 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC146839, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146839 BINDING SITE, designated SEQ ID:11661, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41731] Another function of GAM2071 is therefore inhibition of LOC146839 (Accession XP_097107.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146839.

[41732] LOC146894 (Accession NP_660316.1) is another GAM2071 target gene, herein designated TARGET GENE.

LOC146894 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC146894, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146894 BINDING SITE, designated SEQ ID:2386, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41733] Another function of GAM2071 is therefore inhibition of LOC146894 (Accession NP_660316.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146894.

[41734] LOC146895 (Accession XP_097120.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC146895 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC146895, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146895 BINDING SITE, designated SEQ ID:8862, to the nucleotide sequence of

GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41735] Another function of GAM2071 is therefore inhibition of LOC146895 (Accession XP_097120.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146895.

[41736] LOC146901 (Accession XP_097121.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC146901 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC146901, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146901 BINDING SITE, designated SEQ ID:12152, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41737] Another function of GAM2071 is therefore inhibition of LOC146901 (Accession XP_097121.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146901.

[41738] LOC146909 (Accession XP_085634.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC146909 BINDING SITE1 and LOC146909 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC146909, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC146909 BINDING SITE1 and LOC146909 BINDING SITE2, designated SEQ ID:14280 and SEQ ID:20010 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41739] Another function of GAM2071 is therefore inhibition of LOC146909 (Accession XP_085634.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC146909.

[41740] LOC147080 (Accession XP_097182.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC147080 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC147080, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC147080 BINDING SITE, designated SEQ ID:18093, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41741] Another function of GAM2071 is therefore inhibition of LOC147080 (Accession XP_097182.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC147080.

[41742] LOC147166 (Accession XP_085722.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC147166 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC147166, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC147166 BINDING SITE, designated SEQ ID:546, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41743] Another function of GAM2071 is therefore inhibition of LOC147166 (Accession XP_085722.2) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC147166.

[41744] LOC147343 (Accession XP_097225.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC147343 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC147343, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC147343 BINDING SITE, designated SEQ ID:14957, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41745] Another function of GAM2071 is therefore inhibition of LOC147343 (Accession XP_097225.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC147343.

[41746] LOC147407 (Accession XP_084000.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC147407 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC147407, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC147407 BINDING SITE, designated SEQ ID:12382, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41747] Another function of GAM2071 is therefore inhibition of LOC147407 (Accession XP_084000.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC147407.

[41748] LOC147622 (Accession XP_097255.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC147622 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC147622, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC147622 BINDING SITE, designated SEQ ID:10349, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41749] Another function of GAM2071 is therefore inhibition of LOC147622 (Accession XP_097255.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC147622.

[41750] LOC147817 (Accession XP_085903.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC147817 BINDING SITE1 and LOC147817 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC147817, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC147817 BINDING SITE1 and LOC147817 BINDING SITE2, designated SEQ ID:14003 and SEQ ID:11085 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41751] Another function of GAM2071 is therefore inhibition of LOC147817 (Accession XP_085903.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC147817.

[41752] LOC147841 (Accession XP_085924.2) is another

GAM2071 target gene, herein designated TARGET GENE. LOC147841 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC147841, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC147841 BINDING SITE, designated SEQ ID:18175, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41753] Another function of GAM2071 is therefore inhibition of LOC147841 (Accession XP_085924.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC147841.

[41754] LOC147947 (Accession XP_085974.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC147947 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC147947, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC147947 BINDING SITE, desig-

nated SEQ ID:438, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41755] Another function of GAM2071 is therefore inhibition of LOC147947 (Accession XP_085974.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC147947.

[41756] LOC148137 (Accession NP_653293.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC148137 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC148137, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC148137 BINDING SITE, designated SEQ ID:13130, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41757] Another function of GAM2071 is therefore inhibition of LOC148137 (Accession NP_653293.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC148137.

[41758] LOC148708 (Accession XP_086286.4) is another GAM2071 target gene, herein designated TARGET GENE. LOC148708 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC148708, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC148708 BINDING SITE, designated SEQ ID:18164, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41759] Another function of GAM2071 is therefore inhibition of LOC148708 (Accession XP_086286.4) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC148708.

[41760] LOC148709 (Accession XP_086281.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC148709 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC148709, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC148709 BINDING SITE, designated SEQ ID:8427, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41761] Another function of GAM2071 is therefore inhibition of LOC148709 (Accession XP_086281.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC148709.

[41762] LOC149134 (Accession XP_097594.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC149134 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC149134, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC149134 BINDING SITE, designated SEQ ID:16592, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41763] Another function of GAM2071 is therefore inhibition of LOC149134 (Accession XP_097594.1) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC149134.

[41764] LOC149149 (Accession XP_097598.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC149149 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC149149, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC149149 BINDING SITE, designated SEQ ID:9725, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41765] Another function of GAM2071 is therefore inhibition of LOC149149 (Accession XP_097598.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC149149.

[41766] LOC149371 (Accession NP_787072.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC149371 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC149371, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC149371 BINDING SITE, designated SEQ ID:14762, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41767] Another function of GAM2071 is therefore inhibition of LOC149371 (Accession NP_787072.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC149371.

[41768] LOC149478 (Accession XP_086536.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC149478 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC149478, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC149478 BINDING SITE, designated SEQ ID:2514, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41769] Another function of GAM2071 is therefore inhibition of LOC149478 (Accession XP_086536.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC149478.

[41770] LOC149506 (Accession XP_097661.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC149506 BINDING SITE1 and LOC149506 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC149506, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC149506 BINDING SITE1 and LOC149506 BINDING SITE2, designated SEQ ID:17503 and SEQ ID:5777 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41771] Another function of GAM2071 is therefore inhibition of LOC149506 (Accession XP_097661.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC149506.

[41772] LOC149692 (Accession XP_097706.1) is another

GAM2071 target gene, herein designated TARGET GENE. LOC149692 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC149692, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC149692 BINDING SITE, designated SEQ ID:13800, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41773] Another function of GAM2071 is therefore inhibition of LOC149692 (Accession XP_097706.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC149692.

[41774] LOC149703 (Accession XP_097719.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC149703 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC149703, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC149703 BINDING SITE, desig-

nated SEQ ID:19805, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41775] Another function of GAM2071 is therefore inhibition of LOC149703 (Accession XP_097719.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC149703.

[41776] LOC150054 (Accession XP_097797.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC150054 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC150054, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC150054 BINDING SITE, designated SEQ ID:18175, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41777] Another function of GAM2071 is therefore inhibition of LOC150054 (Accession XP_097797.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC150054.

[41778] LOC150225 (Accession XP_097870.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC150225 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC150225, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC150225 BINDING SITE, designated SEQ ID:1664, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41779] Another function of GAM2071 is therefore inhibition of LOC150225 (Accession XP_097870.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC150225.

[41780] LOC150407 (Accession XP_086906.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC150407 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC150407, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC150407 BINDING SITE, designated SEQ ID:2430, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41781] Another function of GAM2071 is therefore inhibition of LOC150407 (Accession XP_086906.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC150407.

[41782] LOC150587 (Accession XP_097917.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC150587 BINDING SITE1 and LOC150587 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC150587, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC150587 BINDING SITE1 and LOC150587 BINDING SITE2, designated SEQ ID:15619 and SEQ ID:8861 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41783] Another function of GAM2071 is therefore inhibition of

LOC150587 (Accession XP_097917.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC150587.

[41784] LOC151057 (Accession XP_097998.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC151057 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC151057, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC151057 BINDING SITE, designated SEQ ID:5519, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41785] Another function of GAM2071 is therefore inhibition of LOC151057 (Accession XP_097998.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC151057.

[41786] LOC151201 (Accession XP_098021.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC151201 BINDING SITE1 and LOC151201 BINDING

SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC151201, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC151201 BINDING SITE1 and LOC151201 BINDING SITE2, designated SEQ ID:3299 and SEQ ID:11934 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41787] Another function of GAM2071 is therefore inhibition of LOC151201 (Accession XP_098021.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC151201.

[41788] LOC151475 (Accession XP_098063.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC151475 BINDING SITE1 and LOC151475 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC151475, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC151475 BINDING SITE1 and LOC151475 BINDING SITE2, desig-

nated SEQ ID:7086 and SEQ ID:15680 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41789] Another function of GAM2071 is therefore inhibition of LOC151475 (Accession XP_098063.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC151475.

[41790] LOC151636 (Accession NP_612144.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC151636 BINDING SITE1 through LOC151636 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC151636, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC151636 BINDING SITE1 through LOC151636 BINDING SITE3, designated SEQ ID:2479, SEQ ID:896 and SEQ ID:19982 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41791] Another function of GAM2071 is therefore inhibition of LOC151636 (Accession NP_612144.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC151636.

[41792] LOC152245 (Accession XP_098182.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC152245 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC152245, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC152245 BINDING SITE, designated SEQ ID:19257, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41793] Another function of GAM2071 is therefore inhibition of LOC152245 (Accession XP_098182.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC152245.

[41794] LOC152445 (Accession XP_098231.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC152445 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC152445, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC152445 BINDING SITE, designated SEQ ID:13905, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41795] Another function of GAM2071 is therefore inhibition of LOC152445 (Accession XP_098231.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC152445.

[41796] LOC152620 (Accession XP_011108.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC152620 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC152620, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC152620 BINDING SITE, designated SEQ ID:13870, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41797] Another function of GAM2071 is therefore inhibition of

LOC152620 (Accession XP_011108.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC152620.

[41798] LOC152719 (Accession XP_098257.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC152719 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC152719, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC152719 BINDING SITE, designated SEQ ID:1141, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41799] Another function of GAM2071 is therefore inhibition of LOC152719 (Accession XP_098257.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC152719.

[41800] LOC152794 (Accession XP_087525.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC152794 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC152794, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC152794 BINDING SITE, designated SEQ ID:3556, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41801] Another function of GAM2071 is therefore inhibition of LOC152794 (Accession XP_087525.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC152794.

[41802] LOC152804 (Accession XP_098266.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC152804 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC152804, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC152804 BINDING SITE, designated SEQ ID:8155, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41803] Another function of GAM2071 is therefore inhibition of LOC152804 (Accession XP_098266.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC152804.

[41804] LOC153077 (Accession XP_098307.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC153077 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC153077, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC153077 BINDING SITE, designated SEQ ID:19370, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41805] Another function of GAM2071 is therefore inhibition of LOC153077 (Accession XP_098307.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC153077.

[41806] LOC153811 (Accession XP_087779.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC153811 BINDING SITE1 through LOC153811 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC153811, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC153811 BINDING SITE1 through LOC153811 BINDING SITE3, designated SEQ ID:6031, SEQ ID:14281 and SEQ ID:15030 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41807] Another function of GAM2071 is therefore inhibition of LOC153811 (Accession XP_087779.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC153811.

[41808] LOC153883 (Accession XP_087798.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC153883 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by

LOC153883, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC153883 BINDING SITE, designated SEQ ID:3293, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41809] Another function of GAM2071 is therefore inhibition of LOC153883 (Accession XP_087798.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC153883.

[41810] LOC153910 (Accession XP_087801.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC153910 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC153910, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC153910 BINDING SITE, designated SEQ ID:7292, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41811] Another function of GAM2071 is therefore inhibition of LOC153910 (Accession XP_087801.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC153910.

[41812] LOC154282 (Accession XP_098505.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC154282 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC154282, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC154282 BINDING SITE, designated SEQ ID:14848, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41813] Another function of GAM2071 is therefore inhibition of LOC154282 (Accession XP_098505.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC154282.

[41814] LOC154822 (Accession XP_098618.3) is another GAM2071 target gene, herein designated TARGET GENE.

LOC154822 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC154822, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC154822 BINDING SITE, designated SEQ ID:3008, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41815] Another function of GAM2071 is therefore inhibition of LOC154822 (Accession XP_098618.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC154822.

[41816] LOC154877 (Accession XP_098626.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC154877 BINDING SITE1 through LOC154877 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC154877, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC154877 BINDING SITE1 through LOC154877 BINDING SITE3, des-

ignated SEQ ID:15947, SEQ ID:3038 and SEQ ID:14342 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41817] Another function of GAM2071 is therefore inhibition of LOC154877 (Accession XP_098626.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC154877.

[41818] LOC158014 (Accession XP_088442.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC158014 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC158014, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC158014 BINDING SITE, designated SEQ ID:12285, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41819] Another function of GAM2071 is therefore inhibition of LOC158014 (Accession XP_088442.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC158014.

[41820] LOC158310 (Accession XP_098919.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC158310 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC158310, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC158310 BINDING SITE, designated SEQ ID:18175, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41821] Another function of GAM2071 is therefore inhibition of LOC158310 (Accession XP_098919.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC158310.

[41822] LOC158402 (Accession XP_098936.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC158402 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC158402, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC158402 BINDING SITE, designated SEQ ID:1414, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41823] Another function of GAM2071 is therefore inhibition of LOC158402 (Accession XP_098936.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC158402.

[41824] LOC158436 (Accession XP_098942.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC158436 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC158436, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC158436 BINDING SITE, designated SEQ ID:7071, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41825] Another function of GAM2071 is therefore inhibition of LOC158436 (Accession XP_098942.1) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC158436.

[41826] LOC158476 (Accession XP_098955.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC158476 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC158476, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC158476 BINDING SITE, designated SEQ ID:436, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41827] Another function of GAM2071 is therefore inhibition of LOC158476 (Accession XP_098955.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC158476.

[41828] LOC158563 (Accession XP_088606.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC158563 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by

LOC158563, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC158563 BINDING SITE, designated SEQ ID:9685, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41829] Another function of GAM2071 is therefore inhibition of LOC158563 (Accession XP_088606.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC158563.

[41830] LOC160897 (Accession XP_090573.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC160897 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC160897, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC160897 BINDING SITE, designated SEQ ID:14437, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41831] Another function of GAM2071 is therefore inhibition of LOC160897 (Accession XP_090573.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC160897.

[41832] LOC162083 (Accession XP_091339.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC162083 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC162083, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC162083 BINDING SITE, designated SEQ ID:17143, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41833] Another function of GAM2071 is therefore inhibition of LOC162083 (Accession XP_091339.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC162083.

[41834] LOC162427 (Accession XP_091549.3) is another GAM2071 target gene, herein designated TARGET GENE.

LOC162427 BINDING SITE1 and LOC162427 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by LOC162427, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC162427 BINDING SITE1 and LOC162427 BINDING SITE2, designated SEQ ID:1761 and SEQ ID:12386 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41835] Another function of GAM2071 is therefore inhibition of LOC162427 (Accession XP_091549.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC162427.

[41836] LOC162427 (Accession NP_835227.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC162427 BINDING SITE1 and LOC162427 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by LOC162427, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC162427 BINDING SITE1 and LOC162427 BINDING SITE2, designated SEQ ID:1761 and SEQ ID:12386 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41837] Another function of GAM2071 is therefore inhibition of LOC162427 (Accession NP_835227.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC162427.

[41838] LOC162967 (Accession XP_091890.6) is another GAM2071 target gene, herein designated TARGET GENE. LOC162967 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC162967, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC162967 BINDING SITE, designated SEQ ID:3050, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41839] Another function of GAM2071 is therefore inhibition of

LOC162967 (Accession XP_091890.6) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC162967.

[41840] LOC163227 (Accession NP_775802.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC163227 BINDING SITE1 and LOC163227 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC163227, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC163227 BINDING SITE1 and LOC163227 BINDING SITE2, designated SEQ ID:1413 and SEQ ID:9582 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41841] Another function of GAM2071 is therefore inhibition of LOC163227 (Accession NP_775802.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC163227.

[41842] LOC168451 (Accession XP_095114.2) is another GAM2071 target gene, herein designated TARGET GENE.

LOC168451 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC168451, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC168451 BINDING SITE, designated SEQ ID:7426, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41843] Another function of GAM2071 is therefore inhibition of LOC168451 (Accession XP_095114.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC168451.

[41844] LOC170409 (Accession XP_096330.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC170409 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC170409, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC170409 BINDING SITE, designated SEQ ID:7616, to the nucleotide sequence of

GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41845] Another function of GAM2071 is therefore inhibition of LOC170409 (Accession XP_096330.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC170409.

[41846] LOC196264 (Accession XP_113683.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC196264 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC196264, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC196264 BINDING SITE, designated SEQ ID:8574, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41847] Another function of GAM2071 is therefore inhibition of LOC196264 (Accession XP_113683.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC196264.

[41848] LOC196993 (Accession XP_116971.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC196993 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC196993, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC196993 BINDING SITE, designated SEQ ID:7905, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41849] Another function of GAM2071 is therefore inhibition of LOC196993 (Accession XP_116971.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC196993.

[41850] LOC197336 (Accession NP_660337.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC197336 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC197336, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC197336 BINDING SITE, designated SEQ ID:18551, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41851] Another function of GAM2071 is therefore inhibition of LOC197336 (Accession NP_660337.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC197336.

[41852] LOC197358 (Accession XP_113872.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC197358 BINDING SITE1 and LOC197358 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC197358, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC197358 BINDING SITE1 and LOC197358 BINDING SITE2, designated SEQ ID:3887 and SEQ ID:5402 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41853] Another function of GAM2071 is therefore inhibition of LOC197358 (Accession XP_113872.2) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC197358.

[41854] LOC199906 (Accession XP_114052.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC199906 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC199906, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC199906 BINDING SITE, designated SEQ ID:11637, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41855] Another function of GAM2071 is therefore inhibition of LOC199906 (Accession XP_114052.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC199906.

[41856] LOC200169 (Accession XP_117200.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC200169 BINDING SITE1 and LOC200169 BINDING SITE2 are target binding sites found in untranslated re-

gions of multiple transcripts of mRNA encoded by LOC200169, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC200169 BINDING SITE1 and LOC200169 BINDING SITE2, designated SEQ ID:6517 and SEQ ID:5066 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41857] Another function of GAM2071 is therefore inhibition of LOC200169 (Accession XP_117200.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC200169.

[41858] LOC200860 (Accession XP_117289.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC200860 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC200860, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC200860 BINDING SITE, designated SEQ ID:18182, to the nucleotide sequence of

GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41859] Another function of GAM2071 is therefore inhibition of LOC200860 (Accession XP_117289.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC200860.

[41860] LOC200895 (Accession NP_789785.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC200895 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC200895, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC200895 BINDING SITE, designated SEQ ID:3376, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41861] Another function of GAM2071 is therefore inhibition of LOC200895 (Accession NP_789785.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC200895.

[41862] LOC200916 (Accession XP_114317.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC200916 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC200916, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC200916 BINDING SITE, designated SEQ ID:873, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41863] Another function of GAM2071 is therefore inhibition of LOC200916 (Accession XP_114317.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC200916.

[41864] LOC201164 (Accession NP_849158.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC201164 BINDING SITE1 and LOC201164 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by LOC201164, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC201164 BINDING SITE1 and LOC201164 BINDING SITE2, designated SEQ ID:18118 and SEQ ID:13530 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41865] Another function of GAM2071 is therefore inhibition of LOC201164 (Accession NP_849158.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC201164.

[41866] LOC201292 (Accession NP_775818.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC201292 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC201292, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC201292 BINDING SITE, designated SEQ ID:14592, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41867] Another function of GAM2071 is therefore inhibition of

LOC201292 (Accession NP_775818.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC201292.

[41868] LOC201510 (Accession XP_113972.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC201510 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC201510, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC201510 BINDING SITE, designated SEQ ID:4316, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41869] Another function of GAM2071 is therefore inhibition of LOC201510 (Accession XP_113972.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC201510.

[41870] LOC201562 (Accession XP_114343.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC201562 BINDING SITE is a target binding site found in

the 3` untranslated region of mRNA encoded by LOC201562, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC201562 BINDING SITE, designated SEQ ID:9102, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41871] Another function of GAM2071 is therefore inhibition of LOC201562 (Accession XP_114343.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC201562.

[41872] LOC201725 (Accession XP_114370.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC201725 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC201725, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC201725 BINDING SITE, designated SEQ ID:18941, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[41873] Another function of GAM2071 is therefore inhibition of LOC201725 (Accession XP_114370.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC201725.

[41874] LOC202400 (Accession XP_117397.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC202400 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC202400, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC202400 BINDING SITE, designated SEQ ID:436, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41875] Another function of GAM2071 is therefore inhibition of LOC202400 (Accession XP_117397.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC202400.

[41876] LOC202404 (Accession XP_114481.4) is another

GAM2071 target gene, herein designated TARGET GENE. LOC202404 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC202404, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC202404 BINDING SITE, designated SEQ ID:15206, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41877] Another function of GAM2071 is therefore inhibition of LOC202404 (Accession XP_114481.4) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC202404.

[41878] LOC202460 (Accession XP_114493.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC202460 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC202460, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC202460 BINDING SITE, desig-

nated SEQ ID:1278, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41879] Another function of GAM2071 is therefore inhibition of LOC202460 (Accession XP_114493.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC202460.

[41880] LOC202934 (Accession XP_117486.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC202934 BINDING SITE1 and LOC202934 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC202934, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC202934 BINDING SITE1 and LOC202934 BINDING SITE2, designated SEQ ID:9097 and SEQ ID:6782 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41881] Another function of GAM2071 is therefore inhibition of LOC202934 (Accession XP_117486.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC202934.

[41882] LOC203427 (Accession NP_660348.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC203427 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC203427, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC203427 BINDING SITE, designated SEQ ID:11590, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41883] Another function of GAM2071 is therefore inhibition of LOC203427 (Accession NP_660348.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC203427.

[41884] LOC203547 (Accession XP_114719.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC203547 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC203547, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC203547 BINDING SITE, designated SEQ ID:10631, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41885] Another function of GAM2071 is therefore inhibition of LOC203547 (Accession XP_114719.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC203547.

[41886] LOC219293 (Accession XP_166599.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC219293 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC219293, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC219293 BINDING SITE, designated SEQ ID:12080, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41887] Another function of GAM2071 is therefore inhibition of

LOC219293 (Accession XP_166599.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC219293.

[41888] LOC219731 (Accession XP_167596.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC219731 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC219731, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC219731 BINDING SITE, designated SEQ ID:3320, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41889] Another function of GAM2071 is therefore inhibition of LOC219731 (Accession XP_167596.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC219731.

[41890] LOC219735 (Accession XP_167601.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC219735 BINDING SITE is a target binding site found in

the 3` untranslated region of mRNA encoded by LOC219735, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC219735 BINDING SITE, designated SEQ ID:3675, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41891] Another function of GAM2071 is therefore inhibition of LOC219735 (Accession XP_167601.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC219735.

[41892] LOC219894 (Accession XP_167782.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC219894 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC219894, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC219894 BINDING SITE, designated SEQ ID:7138, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[41893] Another function of GAM2071 is therefore inhibition of LOC219894 (Accession XP_167782.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC219894.

[41894] LOC220074 (Accession NP_660352.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC220074 BINDING SITE1 through LOC220074 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC220074, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC220074 BINDING SITE1 through LOC220074 BINDING SITE3, designated SEQ ID:1413, SEQ ID:2086 and SEQ ID:4396 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41895] Another function of GAM2071 is therefore inhibition of LOC220074 (Accession NP_660352.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC220074.

[41896] LOC220594 (Accession NP_665808.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC220594 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC220594, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC220594 BINDING SITE, designated SEQ ID:6273, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41897] Another function of GAM2071 is therefore inhibition of LOC220594 (Accession NP_665808.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC220594.

[41898] LOC221663 (Accession XP_168131.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC221663 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC221663, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC221663 BINDING SITE, designated SEQ ID:10616, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41899] Another function of GAM2071 is therefore inhibition of LOC221663 (Accession XP_168131.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC221663.

[41900] LOC221683 (Accession XP_168089.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC221683 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC221683, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC221683 BINDING SITE, designated SEQ ID:1313, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41901] Another function of GAM2071 is therefore inhibition of LOC221683 (Accession XP_168089.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC221683.

[41902] LOC221814 (Accession XP_168226.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC221814 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC221814, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC221814 BINDING SITE, designated SEQ ID:6429, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41903] Another function of GAM2071 is therefore inhibition of LOC221814 (Accession XP_168226.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC221814.

[41904] LOC221946 (Accession XP_168340.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC221946 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC221946, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC221946 BINDING SITE, designated SEQ ID:3294, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41905] Another function of GAM2071 is therefore inhibition of LOC221946 (Accession XP_168340.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC221946.

[41906] LOC222057 (Accession XP_166594.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC222057 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC222057, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC222057 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41907] Another function of GAM2071 is therefore inhibition of

LOC222057 (Accession XP_166594.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC222057.

[41908] LOC222068 (Accession XP_166556.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC222068 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC222068, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC222068 BINDING SITE, designated SEQ ID:6331, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41909] Another function of GAM2071 is therefore inhibition of LOC222068 (Accession XP_166556.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC222068.

[41910] LOC252983 (Accession XP_170858.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC252983 BINDING SITE is a target binding site found in

the 3` untranslated region of mRNA encoded by LOC252983, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC252983 BINDING SITE, designated SEQ ID:8882, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41911] Another function of GAM2071 is therefore inhibition of LOC252983 (Accession XP_170858.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC252983.

[41912] LOC253216 (Accession XP_170765.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC253216 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC253216, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC253216 BINDING SITE, designated SEQ ID:14534, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[41913] Another function of GAM2071 is therefore inhibition of LOC253216 (Accession XP_170765.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC253216.

[41914] LOC253612 (Accession XP_172985.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC253612 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC253612, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC253612 BINDING SITE, designated SEQ ID:19268, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41915] Another function of GAM2071 is therefore inhibition of LOC253612 (Accession XP_172985.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC253612.

[41916] LOC253805 (Accession XP_172854.1) is another

GAM2071 target gene, herein designated TARGET GENE. LOC253805 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC253805, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC253805 BINDING SITE, designated SEQ ID:7275, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41917] Another function of GAM2071 is therefore inhibition of LOC253805 (Accession XP_172854.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC253805.

[41918] LOC255031 (Accession XP_173187.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC255031 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC255031, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC255031 BINDING SITE, desig-

nated SEQ ID:11416, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41919] Another function of GAM2071 is therefore inhibition of LOC255031 (Accession XP_173187.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC255031.

[41920] LOC255488 (Accession XP_172581.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC255488 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC255488, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC255488 BINDING SITE, designated SEQ ID:18594, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41921] Another function of GAM2071 is therefore inhibition of LOC255488 (Accession XP_172581.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC255488.

[41922] LOC255975 (Accession XP_171083.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC255975 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC255975, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC255975 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41923] Another function of GAM2071 is therefore inhibition of LOC255975 (Accession XP_171083.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC255975.

[41924] LOC256614 (Accession XP_172864.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC256614 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC256614, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC256614 BINDING SITE, designated SEQ ID:3106, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41925] Another function of GAM2071 is therefore inhibition of LOC256614 (Accession XP_172864.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC256614.

[41926] LOC282905 (Accession XP_212606.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC282905 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC282905, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC282905 BINDING SITE, designated SEQ ID:8939, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41927] Another function of GAM2071 is therefore inhibition of LOC282905 (Accession XP_212606.1) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC282905.

[41928] LOC282943 (Accession XP_212647.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC282943 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC282943, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC282943 BINDING SITE, designated SEQ ID:8939, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41929] Another function of GAM2071 is therefore inhibition of LOC282943 (Accession XP_212647.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC282943.

[41930] LOC282987 (Accession XP_210845.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC282987 BINDING SITE1 and LOC282987 BINDING SITE2 are target binding sites found in untranslated re-

gions of mRNA encoded by LOC282987, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC282987 BINDING SITE1 and LOC282987 BINDING SITE2, designated SEQ ID:12386 and SEQ ID:10460 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41931] Another function of GAM2071 is therefore inhibition of LOC282987 (Accession XP_210845.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC282987.

[41932] LOC283031 (Accession XP_210859.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283031 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283031, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283031 BINDING SITE, designated SEQ ID:654, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[41933] Another function of GAM2071 is therefore inhibition of LOC283031 (Accession XP_210859.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283031.

[41934] LOC283061 (Accession XP_210875.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283061 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283061, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283061 BINDING SITE, designated SEQ ID:18916, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41935] Another function of GAM2071 is therefore inhibition of LOC283061 (Accession XP_210875.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283061.

[41936] LOC283067 (Accession XP_208501.1) is another

GAM2071 target gene, herein designated TARGET GENE. LOC283067 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283067, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283067 BINDING SITE, designated SEQ ID:18641, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41937] Another function of GAM2071 is therefore inhibition of LOC283067 (Accession XP_208501.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283067.

[41938] LOC283087 (Accession XP_208509.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283087 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283087, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283087 BINDING SITE, desig-

nated SEQ ID:6936, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41939] Another function of GAM2071 is therefore inhibition of LOC283087 (Accession XP_208509.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283087.

[41940] LOC283089 (Accession XP_210885.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283089 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283089, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283089 BINDING SITE, designated SEQ ID:6866, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41941] Another function of GAM2071 is therefore inhibition of LOC283089 (Accession XP_210885.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC283089.

[41942] LOC283119 (Accession XP_210895.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283119 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283119, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283119 BINDING SITE, designated SEQ ID:1505, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41943] Another function of GAM2071 is therefore inhibition of LOC283119 (Accession XP_210895.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283119.

[41944] LOC283130 (Accession XP_208525.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC283130 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283130, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283130 BINDING SITE, designated SEQ ID:469, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41945] Another function of GAM2071 is therefore inhibition of LOC283130 (Accession XP_208525.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283130.

[41946] LOC283143 (Accession XP_210920.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283143 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283143, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283143 BINDING SITE, designated SEQ ID:14843, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41947] Another function of GAM2071 is therefore inhibition of LOC283143 (Accession XP_210920.1) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283143.

[41948] LOC283152 (Accession XP_210917.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC283152 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283152, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283152 BINDING SITE, designated SEQ ID:17431, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41949] Another function of GAM2071 is therefore inhibition of LOC283152 (Accession XP_210917.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283152.

[41950] LOC283170 (Accession XP_208535.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283170 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC283170, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283170 BINDING SITE, designated SEQ ID:19643, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41951] Another function of GAM2071 is therefore inhibition of LOC283170 (Accession XP_208535.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283170.

[41952] LOC283199 (Accession XP_210929.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283199 BINDING SITE1 and LOC283199 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC283199, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283199 BINDING SITE1 and LOC283199 BINDING SITE2, designated SEQ ID:20110 and SEQ ID:4762 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[41953] Another function of GAM2071 is therefore inhibition of LOC283199 (Accession XP_210929.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283199.

[41954] LOC283215 (Accession XP_208555.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC283215 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283215, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283215 BINDING SITE, designated SEQ ID:14997, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41955] Another function of GAM2071 is therefore inhibition of LOC283215 (Accession XP_208555.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283215.

[41956] LOC283241 (Accession NP_787089.1) is another

GAM2071 target gene, herein designated TARGET GENE. LOC283241 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283241, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283241 BINDING SITE, designated SEQ ID:10625, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41957] Another function of GAM2071 is therefore inhibition of LOC283241 (Accession NP_787089.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283241.

[41958] LOC283293 (Accession XP_210962.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283293 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283293, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283293 BINDING SITE, desig-

nated SEQ ID:438, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41959] Another function of GAM2071 is therefore inhibition of LOC283293 (Accession XP_210962.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283293.

[41960] LOC283329 (Accession XP_210978.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283329 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283329, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283329 BINDING SITE, designated SEQ ID:6052, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41961] Another function of GAM2071 is therefore inhibition of LOC283329 (Accession XP_210978.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC283329.

[41962] LOC283335 (Accession XP_210981.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283335 BINDING SITE1 and LOC283335 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC283335, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283335 BINDING SITE1 and LOC283335 BINDING SITE2, designated SEQ ID:10626 and SEQ ID:9238 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41963] Another function of GAM2071 is therefore inhibition of LOC283335 (Accession XP_210981.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283335.

[41964] LOC283377 (Accession XP_208647.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283377 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283377, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283377 BINDING SITE, designated SEQ ID:8862, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41965] Another function of GAM2071 is therefore inhibition of LOC283377 (Accession XP_208647.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283377.

[41966] LOC283395 (Accession XP_211020.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283395 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283395, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283395 BINDING SITE, designated SEQ ID:13838, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41967] Another function of GAM2071 is therefore inhibition of

LOC283395 (Accession XP_211020.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283395.

[41968] LOC283432 (Accession XP_211032.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283432 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283432, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283432 BINDING SITE, designated SEQ ID:6836, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41969] Another function of GAM2071 is therefore inhibition of LOC283432 (Accession XP_211032.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283432.

[41970] LOC283434 (Accession XP_211034.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283434 BINDING SITE is a target binding site found in

the 5` untranslated region of mRNA encoded by LOC283434, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283434 BINDING SITE, designated SEQ ID:16416, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41971] Another function of GAM2071 is therefore inhibition of LOC283434 (Accession XP_211034.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283434.

[41972] LOC283445 (Accession XP_211044.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283445 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283445, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283445 BINDING SITE, designated SEQ ID:9159, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[41973] Another function of GAM2071 is therefore inhibition of LOC283445 (Accession XP_211044.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283445.

[41974] LOC283452 (Accession XP_208679.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283452 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283452, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283452 BINDING SITE, designated SEQ ID:17791, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41975] Another function of GAM2071 is therefore inhibition of LOC283452 (Accession XP_208679.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283452.

[41976] LOC283454 (Accession XP_211049.1) is another

GAM2071 target gene, herein designated TARGET GENE. LOC283454 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283454, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283454 BINDING SITE, designated SEQ ID:12385, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41977] Another function of GAM2071 is therefore inhibition of LOC283454 (Accession XP_211049.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283454.

[41978] LOC283475 (Accession XP_211056.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283475 BINDING SITE1 and LOC283475 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC283475, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283475

BINDING SITE1 and LOC283475 BINDING SITE2, designated SEQ ID:8583 and SEQ ID:12806 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41979] Another function of GAM2071 is therefore inhibition of LOC283475 (Accession XP_211056.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283475.

[41980] LOC283507 (Accession XP_211075.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283507 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283507, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283507 BINDING SITE, designated SEQ ID:18182, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41981] Another function of GAM2071 is therefore inhibition of LOC283507 (Accession XP_211075.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC283507.

[41982] LOC283534 (Accession XP_211083.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283534 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283534, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283534 BINDING SITE, designated SEQ ID:13197, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41983] Another function of GAM2071 is therefore inhibition of LOC283534 (Accession XP_211083.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283534.

[41984] LOC283565 (Accession XP_211100.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283565 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283565, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283565 BINDING SITE, designated SEQ ID:6104, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41985] Another function of GAM2071 is therefore inhibition of LOC283565 (Accession XP_211100.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283565.

[41986] LOC283585 (Accession XP_294741.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283585 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283585, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283585 BINDING SITE, designated SEQ ID:3904, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41987] Another function of GAM2071 is therefore inhibition of

LOC283585 (Accession XP_294741.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283585.

[41988] LOC283588 (Accession NP_787093.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283588 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283588, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283588 BINDING SITE, designated SEQ ID:14938, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41989] Another function of GAM2071 is therefore inhibition of LOC283588 (Accession NP_787093.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283588.

[41990] LOC283624 (Accession XP_211126.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283624 BINDING SITE is a target binding site found in

the 5` untranslated region of mRNA encoded by LOC283624, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283624 BINDING SITE, designated SEQ ID:13972, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41991] Another function of GAM2071 is therefore inhibition of LOC283624 (Accession XP_211126.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283624.

[41992] LOC283637 (Accession XP_211134.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283637 BINDING SITE1 and LOC283637 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC283637, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283637 BINDING SITE1 and LOC283637 BINDING SITE2, designated SEQ ID:12382 and SEQ ID:3786 respectively, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41993] Another function of GAM2071 is therefore inhibition of LOC283637 (Accession XP_211134.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283637.

[41994] LOC283641 (Accession XP_208764.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283641 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283641, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283641 BINDING SITE, designated SEQ ID:435, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41995] Another function of GAM2071 is therefore inhibition of LOC283641 (Accession XP_208764.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283641.

[41996] LOC283664 (Accession XP_208773.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283664 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283664, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283664 BINDING SITE, designated SEQ ID:11292, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41997] Another function of GAM2071 is therefore inhibition of LOC283664 (Accession XP_208773.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283664.

[41998] LOC283679 (Accession XP_211157.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283679 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283679, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC283679 BINDING SITE, designated SEQ ID:18582, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[41999] Another function of GAM2071 is therefore inhibition of LOC283679 (Accession XP_211157.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283679.

[42000] LOC283687 (Accession NP_787094.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283687 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283687, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283687 BINDING SITE, designated SEQ ID:5544, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42001] Another function of GAM2071 is therefore inhibition of LOC283687 (Accession NP_787094.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC283687.

[42002] LOC283701 (Accession XP_211170.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC283701 BINDING SITE1 and LOC283701 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC283701, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283701 BINDING SITE1 and LOC283701 BINDING SITE2, designated SEQ ID:7650 and SEQ ID:777 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42003] Another function of GAM2071 is therefore inhibition of LOC283701 (Accession XP_211170.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283701.

[42004] LOC283706 (Accession XP_208804.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC283706 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC283706, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283706 BINDING SITE, designated SEQ ID:16154, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42005] Another function of GAM2071 is therefore inhibition of LOC283706 (Accession XP_208804.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283706.

[42006] LOC283741 (Accession XP_208115.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283741 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283741, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283741 BINDING SITE, designated SEQ ID:3109, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42007] Another function of GAM2071 is therefore inhibition of LOC283741 (Accession XP_208115.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283741.

[42008] LOC283778 (Accession XP_211199.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283778 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283778, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283778 BINDING SITE, designated SEQ ID:15679, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42009] Another function of GAM2071 is therefore inhibition of LOC283778 (Accession XP_211199.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283778.

[42010] LOC283801 (Accession XP_208122.1) is another GAM2071 target gene, herein designated TARGET GENE.

LOC283801 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283801, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283801 BINDING SITE, designated SEQ ID:11237, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42011] Another function of GAM2071 is therefore inhibition of LOC283801 (Accession XP_208122.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283801.

[42012] LOC283802 (Accession XP_208850.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283802 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283802, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283802 BINDING SITE, designated SEQ ID:16635, to the nucleotide sequence of

GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42013] Another function of GAM2071 is therefore inhibition of LOC283802 (Accession XP_208850.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283802.

[42014] LOC283818 (Accession XP_211218.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283818 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283818, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283818 BINDING SITE, designated SEQ ID:3834, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42015] Another function of GAM2071 is therefore inhibition of LOC283818 (Accession XP_211218.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283818.

[42016] LOC283851 (Accession XP_211229.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283851 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283851, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283851 BINDING SITE, designated SEQ ID:12708, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42017] Another function of GAM2071 is therefore inhibition of LOC283851 (Accession XP_211229.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283851.

[42018] LOC283861 (Accession NP_787095.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283861 BINDING SITE1 and LOC283861 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC283861, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the com-

plementarity of the nucleotide sequences of LOC283861 BINDING SITE1 and LOC283861 BINDING SITE2, designated SEQ ID:10879 and SEQ ID:8996 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42019] Another function of GAM2071 is therefore inhibition of LOC283861 (Accession NP_787095.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283861.

[42020] LOC283887 (Accession XP_211248.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC283887 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283887, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283887 BINDING SITE, designated SEQ ID:9775, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42021] Another function of GAM2071 is therefore inhibition of LOC283887 (Accession XP_211248.2) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283887.

[42022] LOC283889 (Accession XP_208899.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283889 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283889, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283889 BINDING SITE, designated SEQ ID:13686, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42023] Another function of GAM2071 is therefore inhibition of LOC283889 (Accession XP_208899.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283889.

[42024] LOC283928 (Accession XP_208909.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283928 BINDING SITE1 through LOC283928 BINDING SITE3 are target binding sites found in untranslated re-

gions of mRNA encoded by LOC283928, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283928 BINDING SITE1 through LOC283928 BINDING SITE3, designated SEQ ID:3604, SEQ ID:9603 and SEQ ID:13293 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42025] Another function of GAM2071 is therefore inhibition of LOC283928 (Accession XP_208909.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283928.

[42026] LOC283929 (Accession XP_208905.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC283929 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC283929, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283929 BINDING SITE, designated SEQ ID:10232, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[42027] Another function of GAM2071 is therefore inhibition of LOC283929 (Accession XP_208905.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283929.

[42028] LOC283932 (Accession NP_787097.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC283932 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283932, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283932 BINDING SITE, designated SEQ ID:15305, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42029] Another function of GAM2071 is therefore inhibition of LOC283932 (Accession NP_787097.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283932.

[42030] LOC283964 (Accession XP_208145.2) is another

GAM2071 target gene, herein designated TARGET GENE. LOC283964 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC283964, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC283964 BINDING SITE, designated SEQ ID:1384, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42031] Another function of GAM2071 is therefore inhibition of LOC283964 (Accession XP_208145.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC283964.

[42032] LOC284001 (Accession XP_208958.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC284001 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284001, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284001 BINDING SITE, desig-

nated SEQ ID:6195, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42033] Another function of GAM2071 is therefore inhibition of LOC284001 (Accession XP_208958.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284001.

[42034] LOC284017 (Accession XP_208961.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284017 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284017, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284017 BINDING SITE, designated SEQ ID:3858, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42035] Another function of GAM2071 is therefore inhibition of LOC284017 (Accession XP_208961.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC284017.

[42036] LOC284023 (Accession XP_208983.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC284023 BINDING SITE1 and LOC284023 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284023, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284023 BINDING SITE1 and LOC284023 BINDING SITE2, designated SEQ ID:429 and SEQ ID:5520 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42037] Another function of GAM2071 is therefore inhibition of LOC284023 (Accession XP_208983.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284023.

[42038] LOC284048 (Accession XP_208152.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284048 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284048, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284048 BINDING SITE, designated SEQ ID:17222, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42039] Another function of GAM2071 is therefore inhibition of LOC284048 (Accession XP_208152.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284048.

[42040] LOC284063 (Accession XP_208992.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284063 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284063, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284063 BINDING SITE, designated SEQ ID:17713, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42041] Another function of GAM2071 is therefore inhibition of

LOC284063 (Accession XP_208992.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284063.

[42042] LOC284074 (Accession XP_211321.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284074 BINDING SITE1 and LOC284074 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284074, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284074 BINDING SITE1 and LOC284074 BINDING SITE2, designated SEQ ID:18547 and SEQ ID:5751 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42043] Another function of GAM2071 is therefore inhibition of LOC284074 (Accession XP_211321.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284074.

[42044] LOC284082 (Accession XP_211323.1) is another GAM2071 target gene, herein designated TARGET GENE.

LOC284082 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284082, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284082 BINDING SITE, designated SEQ ID:18527, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42045] Another function of GAM2071 is therefore inhibition of LOC284082 (Accession XP_211323.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284082.

[42046] LOC284095 (Accession XP_211324.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284095 BINDING SITE1 and LOC284095 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284095, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284095 BINDING SITE1 and LOC284095 BINDING SITE2, desig-

nated SEQ ID:19595 and SEQ ID:16884 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42047] Another function of GAM2071 is therefore inhibition of LOC284095 (Accession XP_211324.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284095.

[42048] LOC284098 (Accession XP_209008.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC284098 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284098, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284098 BINDING SITE, designated SEQ ID:18178, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42049] Another function of GAM2071 is therefore inhibition of LOC284098 (Accession XP_209008.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC284098.

[42050] LOC284102 (Accession XP_211327.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC284102 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284102, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284102 BINDING SITE, designated SEQ ID:17111, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42051] Another function of GAM2071 is therefore inhibition of LOC284102 (Accession XP_211327.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284102.

[42052] LOC284106 (Accession XP_209004.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284106 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284106, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284106 BINDING SITE, designated SEQ ID:11925, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42053] Another function of GAM2071 is therefore inhibition of LOC284106 (Accession XP_209004.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284106.

[42054] LOC284116 (Accession XP_211338.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC284116 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284116, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284116 BINDING SITE, designated SEQ ID:1709, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42055] Another function of GAM2071 is therefore inhibition of LOC284116 (Accession XP_211338.2) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284116.

[42056] LOC284117 (Accession XP_209024.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284117 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284117, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284117 BINDING SITE, designated SEQ ID:11347, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42057] Another function of GAM2071 is therefore inhibition of LOC284117 (Accession XP_209024.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284117.

[42058] LOC284128 (Accession XP_211342.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284128 BINDING SITE1 and LOC284128 BINDING SITE2 are target binding sites found in untranslated re-

gions of mRNA encoded by LOC284128, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284128 BINDING SITE1 and LOC284128 BINDING SITE2, designated SEQ ID:17271 and SEQ ID:17792 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42059] Another function of GAM2071 is therefore inhibition of LOC284128 (Accession XP_211342.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284128.

[42060] LOC284145 (Accession XP_211353.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284145 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284145, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284145 BINDING SITE, designated SEQ ID:8678, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[42061] Another function of GAM2071 is therefore inhibition of LOC284145 (Accession XP_211353.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284145.

[42062] LOC284171 (Accession XP_209051.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284171 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284171, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284171 BINDING SITE, designated SEQ ID:12420, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42063] Another function of GAM2071 is therefore inhibition of LOC284171 (Accession XP_209051.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284171.

[42064] LOC284186 (Accession XP_209060.2) is another

GAM2071 target gene, herein designated TARGET GENE. LOC284186 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284186, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284186 BINDING SITE, designated SEQ ID:18182, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42065] Another function of GAM2071 is therefore inhibition of LOC284186 (Accession XP_209060.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284186.

[42066] LOC284191 (Accession XP_211377.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284191 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284191, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284191 BINDING SITE, desig-

nated SEQ ID:7923, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42067] Another function of GAM2071 is therefore inhibition of LOC284191 (Accession XP_211377.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284191.

[42068] LOC284267 (Accession XP_211411.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284267 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284267, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284267 BINDING SITE, designated SEQ ID:5421, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42069] Another function of GAM2071 is therefore inhibition of LOC284267 (Accession XP_211411.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC284267.

[42070] LOC284276 (Accession XP_211412.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284276 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284276, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284276 BINDING SITE, designated SEQ ID:12113, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42071] Another function of GAM2071 is therefore inhibition of LOC284276 (Accession XP_211412.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284276.

[42072] LOC284286 (Accession XP_211419.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284286 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284286, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284286 BINDING SITE, designated SEQ ID:5521, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42073] Another function of GAM2071 is therefore inhibition of LOC284286 (Accession XP_211419.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284286.

[42074] LOC284289 (Accession XP_209105.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284289 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284289, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284289 BINDING SITE, designated SEQ ID:7635, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42075] Another function of GAM2071 is therefore inhibition of LOC284289 (Accession XP_209105.1) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284289.

[42076] LOC284304 (Accession XP_211426.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284304 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284304, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284304 BINDING SITE, designated SEQ ID:16163, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42077] Another function of GAM2071 is therefore inhibition of LOC284304 (Accession XP_211426.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284304.

[42078] LOC284305 (Accession XP_211425.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284305 BINDING SITE1 and LOC284305 BINDING SITE2 are target binding sites found in untranslated re-

gions of mRNA encoded by LOC284305, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284305 BINDING SITE1 and LOC284305 BINDING SITE2, designated SEQ ID:15706 and SEQ ID:12588 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42079] Another function of GAM2071 is therefore inhibition of LOC284305 (Accession XP_211425.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284305.

[42080] LOC284317 (Accession XP_209162.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284317 BINDING SITE1 and LOC284317 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284317, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284317 BINDING SITE1 and LOC284317 BINDING SITE2, designated SEQ ID:5320 and SEQ ID:11486 respectively, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42081] Another function of GAM2071 is therefore inhibition of LOC284317 (Accession XP_209162.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284317.

[42082] LOC284321 (Accession XP_211432.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284321 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284321, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284321 BINDING SITE, designated SEQ ID:11129, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42083] Another function of GAM2071 is therefore inhibition of LOC284321 (Accession XP_211432.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284321.

[42084] LOC284325 (Accession XP_209143.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284325 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284325, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284325 BINDING SITE, designated SEQ ID:11657, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42085] Another function of GAM2071 is therefore inhibition of LOC284325 (Accession XP_209143.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284325.

[42086] LOC284362 (Accession XP_211435.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284362 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284362, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC284362 BINDING SITE, designated SEQ ID:10666, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42087] Another function of GAM2071 is therefore inhibition of LOC284362 (Accession XP_211435.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284362.

[42088] LOC284375 (Accession XP_209154.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284375 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284375, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284375 BINDING SITE, designated SEQ ID:13618, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42089] Another function of GAM2071 is therefore inhibition of LOC284375 (Accession XP_209154.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC284375.

[42090] LOC284376 (Accession XP_209157.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284376 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284376, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284376 BINDING SITE, designated SEQ ID:9328, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42091] Another function of GAM2071 is therefore inhibition of LOC284376 (Accession XP_209157.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284376.

[42092] LOC284379 (Accession XP_209163.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284379 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284379, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284379 BINDING SITE, designated SEQ ID:2198, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42093] Another function of GAM2071 is therefore inhibition of LOC284379 (Accession XP_209163.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284379.

[42094] LOC284405 (Accession XP_209183.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC284405 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284405, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284405 BINDING SITE, designated SEQ ID:3894, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42095] Another function of GAM2071 is therefore inhibition of

LOC284405 (Accession XP_209183.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284405.

[42096] LOC284421 (Accession XP_209200.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284421 BINDING SITE1 and LOC284421 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284421, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284421 BINDING SITE1 and LOC284421 BINDING SITE2, designated SEQ ID:2985 and SEQ ID:15524 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42097] Another function of GAM2071 is therefore inhibition of LOC284421 (Accession XP_209200.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284421.

[42098] LOC284426 (Accession XP_209198.1) is another GAM2071 target gene, herein designated TARGET GENE.

LOC284426 BINDING SITE1 and LOC284426 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284426, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284426 BINDING SITE1 and LOC284426 BINDING SITE2, designated SEQ ID:19419 and SEQ ID:932 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42099] Another function of GAM2071 is therefore inhibition of LOC284426 (Accession XP_209198.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284426.

[42100] LOC284436 (Accession XP_290862.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284436 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284436, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284436 BINDING SITE, desig-

nated SEQ ID:6140, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42101] Another function of GAM2071 is therefore inhibition of LOC284436 (Accession XP_290862.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284436.

[42102] LOC284440 (Accession XP_209210.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284440 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284440, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284440 BINDING SITE, designated SEQ ID:12050, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42103] Another function of GAM2071 is therefore inhibition of LOC284440 (Accession XP_209210.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC284440.

[42104] LOC284454 (Accession XP_209216.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284454 BINDING SITE1 and LOC284454 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284454, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284454 BINDING SITE1 and LOC284454 BINDING SITE2, designated SEQ ID:3963 and SEQ ID:18896 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42105] Another function of GAM2071 is therefore inhibition of LOC284454 (Accession XP_209216.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284454.

[42106] LOC284456 (Accession XP_211470.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284456 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284456, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284456 BINDING SITE, designated SEQ ID:10594, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42107] Another function of GAM2071 is therefore inhibition of LOC284456 (Accession XP_211470.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284456.

[42108] LOC284459 (Accession XP_290826.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284459 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284459, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284459 BINDING SITE, designated SEQ ID:1740, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42109] Another function of GAM2071 is therefore inhibition of

LOC284459 (Accession XP_290826.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284459.

[42110] LOC284471 (Accession XP_209225.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284471 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284471, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284471 BINDING SITE, designated SEQ ID:4926, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42111] Another function of GAM2071 is therefore inhibition of LOC284471 (Accession XP_209225.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284471.

[42112] LOC284486 (Accession XP_209231.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284486 BINDING SITE is a target binding site found in

the 3` untranslated region of mRNA encoded by LOC284486, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284486 BINDING SITE, designated SEQ ID:10824, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42113] Another function of GAM2071 is therefore inhibition of LOC284486 (Accession XP_209231.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284486.

[42114] LOC284513 (Accession XP_211502.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284513 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284513, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284513 BINDING SITE, designated SEQ ID:19066, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[42115] Another function of GAM2071 is therefore inhibition of LOC284513 (Accession XP_211502.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284513.

[42116] LOC284531 (Accession XP_211513.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284531 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284531, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284531 BINDING SITE, designated SEQ ID:2846, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42117] Another function of GAM2071 is therefore inhibition of LOC284531 (Accession XP_211513.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284531.

[42118] LOC284551 (Accession XP_211515.1) is another

GAM2071 target gene, herein designated TARGET GENE. LOC284551 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284551, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284551 BINDING SITE, designated SEQ ID:17959, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42119] Another function of GAM2071 is therefore inhibition of LOC284551 (Accession XP_211515.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284551.

[42120] LOC284577 (Accession XP_211522.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284577 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284577, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284577 BINDING SITE, desig-

nated SEQ ID:11682, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42121] Another function of GAM2071 is therefore inhibition of LOC284577 (Accession XP_211522.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284577.

[42122] LOC284587 (Accession XP_209278.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC284587 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284587, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284587 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42123] Another function of GAM2071 is therefore inhibition of LOC284587 (Accession XP_209278.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC284587.

[42124] LOC284611 (Accession XP_211552.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284611 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284611, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284611 BINDING SITE, designated SEQ ID:11652, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42125] Another function of GAM2071 is therefore inhibition of LOC284611 (Accession XP_211552.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284611.

[42126] LOC284675 (Accession XP_209319.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284675 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284675, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284675 BINDING SITE, designated SEQ ID:8487, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42127] Another function of GAM2071 is therefore inhibition of LOC284675 (Accession XP_209319.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284675.

[42128] LOC284701 (Accession XP_294994.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284701 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284701, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284701 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42129] Another function of GAM2071 is therefore inhibition of LOC284701 (Accession XP_294994.1) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284701.

[42130] LOC284723 (Accession XP_211602.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284723 BINDING SITE1 and LOC284723 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284723, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284723 BINDING SITE1 and LOC284723 BINDING SITE2, designated SEQ ID:6492 and SEQ ID:17106 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42131] Another function of GAM2071 is therefore inhibition of LOC284723 (Accession XP_211602.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284723.

[42132] LOC284805 (Accession XP_209371.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284805 BINDING SITE1 and LOC284805 BINDING

SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284805, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284805 BINDING SITE1 and LOC284805 BINDING SITE2, designated SEQ ID:18781 and SEQ ID:11447 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42133] Another function of GAM2071 is therefore inhibition of LOC284805 (Accession XP_209371.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284805.

[42134] LOC284845 (Accession XP_211663.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284845 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284845, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284845 BINDING SITE, designated SEQ ID:15141, to the nucleotide sequence of

GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42135] Another function of GAM2071 is therefore inhibition of LOC284845 (Accession XP_211663.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284845.

[42136] LOC284856 (Accession XP_302835.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284856 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by LOC284856, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284856 BINDING SITE, designated SEQ ID:3436, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42137] Another function of GAM2071 is therefore inhibition of LOC284856 (Accession XP_302835.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284856.

[42138] LOC284856 (Accession XP_211668.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC284856 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by LOC284856, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284856 BINDING SITE, designated SEQ ID:3436, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42139] Another function of GAM2071 is therefore inhibition of LOC284856 (Accession XP_211668.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284856.

[42140] LOC284874 (Accession XP_209394.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284874 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284874, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC284874 BINDING SITE, designated SEQ ID:2751, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42141] Another function of GAM2071 is therefore inhibition of LOC284874 (Accession XP_209394.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284874.

[42142] LOC284934 (Accession XP_211696.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284934 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC284934, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284934 BINDING SITE, designated SEQ ID:17477, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42143] Another function of GAM2071 is therefore inhibition of LOC284934 (Accession XP_211696.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC284934.

[42144] LOC284950 (Accession XP_211703.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284950 BINDING SITE1 and LOC284950 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC284950, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284950 BINDING SITE1 and LOC284950 BINDING SITE2, designated SEQ ID:1362 and SEQ ID:6753 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42145] Another function of GAM2071 is therefore inhibition of LOC284950 (Accession XP_211703.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284950.

[42146] LOC284965 (Accession XP_209425.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284965 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by

LOC284965, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284965 BINDING SITE, designated SEQ ID:6801, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42147] Another function of GAM2071 is therefore inhibition of LOC284965 (Accession XP_209425.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284965.

[42148] LOC284976 (Accession XP_211714.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC284976 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC284976, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC284976 BINDING SITE, designated SEQ ID:5711, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42149] Another function of GAM2071 is therefore inhibition of LOC284976 (Accession XP_211714.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC284976.

[42150] LOC285026 (Accession XP_209440.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285026 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285026, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285026 BINDING SITE, designated SEQ ID:14276, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42151] Another function of GAM2071 is therefore inhibition of LOC285026 (Accession XP_209440.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285026.

[42152] LOC285052 (Accession XP_211751.1) is another GAM2071 target gene, herein designated TARGET GENE.

LOC285052 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285052, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285052 BINDING SITE, designated SEQ ID:5968, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42153] Another function of GAM2071 is therefore inhibition of LOC285052 (Accession XP_211751.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285052.

[42154] LOC285058 (Accession XP_211753.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285058 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285058, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285058 BINDING SITE, designated SEQ ID:10836, to the nucleotide sequence of

GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42155] Another function of GAM2071 is therefore inhibition of LOC285058 (Accession XP_211753.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285058.

[42156] LOC285083 (Accession XP_209464.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285083 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285083, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285083 BINDING SITE, designated SEQ ID:18085, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42157] Another function of GAM2071 is therefore inhibition of LOC285083 (Accession XP_209464.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285083.

[42158] LOC285094 (Accession XP_209471.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285094 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285094, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285094 BINDING SITE, designated SEQ ID:2931, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42159] Another function of GAM2071 is therefore inhibition of LOC285094 (Accession XP_209471.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285094.

[42160] LOC285127 (Accession XP_211771.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285127 BINDING SITE1 and LOC285127 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC285127, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the com-

plementarity of the nucleotide sequences of LOC285127 BINDING SITE1 and LOC285127 BINDING SITE2, designated SEQ ID:19204 and SEQ ID:3106 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42161] Another function of GAM2071 is therefore inhibition of LOC285127 (Accession XP_211771.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285127.

[42162] LOC285176 (Accession XP_209500.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285176 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285176, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285176 BINDING SITE, designated SEQ ID:12167, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42163] Another function of GAM2071 is therefore inhibition of LOC285176 (Accession XP_209500.1) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285176.

[42164] LOC285193 (Accession XP_209509.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285193 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285193, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285193 BINDING SITE, designated SEQ ID:13870, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42165] Another function of GAM2071 is therefore inhibition of LOC285193 (Accession XP_209509.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285193.

[42166] LOC285221 (Accession XP_209521.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285221 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by

LOC285221, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285221 BINDING SITE, designated SEQ ID:15365, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42167] Another function of GAM2071 is therefore inhibition of LOC285221 (Accession XP_209521.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285221.

[42168] LOC285231 (Accession XP_211813.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285231 BINDING SITE1 through LOC285231 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC285231, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285231 BINDING SITE1 through LOC285231 BINDING SITE3, designated SEQ ID:3632, SEQ ID:11238 and SEQ ID:13069 respectively, to the nucleotide sequence of GAM2071 RNA,

herein designated GAM RNA, also designated SEQ ID:371.

[42169] Another function of GAM2071 is therefore inhibition of LOC285231 (Accession XP_211813.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285231.

[42170] LOC285281 (Accession XP_211829.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285281 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285281, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285281 BINDING SITE, designated SEQ ID:7766, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42171] Another function of GAM2071 is therefore inhibition of LOC285281 (Accession XP_211829.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285281.

[42172] LOC285299 (Accession XP_209554.1) is another

GAM2071 target gene, herein designated TARGET GENE. LOC285299 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285299, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285299 BINDING SITE, designated SEQ ID:15961, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42173] Another function of GAM2071 is therefore inhibition of LOC285299 (Accession XP_209554.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285299.

[42174] LOC285345 (Accession XP_211854.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285345 BINDING SITE1 and LOC285345 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC285345, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285345

BINDING SITE1 and LOC285345 BINDING SITE2, designated SEQ ID:11821 and SEQ ID:13276 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42175] Another function of GAM2071 is therefore inhibition of LOC285345 (Accession XP_211854.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285345.

[42176] LOC285366 (Accession XP_209581.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285366 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285366, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285366 BINDING SITE, designated SEQ ID:4019, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42177] Another function of GAM2071 is therefore inhibition of LOC285366 (Accession XP_209581.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC285366.

[42178] LOC285369 (Accession XP_211861.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC285369 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285369, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285369 BINDING SITE, designated SEQ ID:19816, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42179] Another function of GAM2071 is therefore inhibition of LOC285369 (Accession XP_211861.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285369.

[42180] LOC285370 (Accession XP_211869.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285370 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285370, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285370 BINDING SITE, designated SEQ ID:5624, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42181] Another function of GAM2071 is therefore inhibition of LOC285370 (Accession XP_211869.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285370.

[42182] LOC285389 (Accession XP_211873.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285389 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285389, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285389 BINDING SITE, designated SEQ ID:7025, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42183] Another function of GAM2071 is therefore inhibition of

LOC285389 (Accession XP_211873.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285389.

[42184] LOC285392 (Accession XP_211879.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285392 BINDING SITE1 and LOC285392 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC285392, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285392 BINDING SITE1 and LOC285392 BINDING SITE2, designated SEQ ID:436 and SEQ ID:6034 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42185] Another function of GAM2071 is therefore inhibition of LOC285392 (Accession XP_211879.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285392.

[42186] LOC285398 (Accession XP_209593.1) is another GAM2071 target gene, herein designated TARGET GENE.

LOC285398 BINDING SITE1 and LOC285398 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC285398, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285398 BINDING SITE1 and LOC285398 BINDING SITE2, designated SEQ ID:3701 and SEQ ID:4020 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42187] Another function of GAM2071 is therefore inhibition of LOC285398 (Accession XP_209593.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285398.

[42188] LOC285400 (Accession XP_209596.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285400 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285400, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285400 BINDING SITE, desig-

nated SEQ ID:3267, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42189] Another function of GAM2071 is therefore inhibition of LOC285400 (Accession XP_209596.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285400.

[42190] LOC285409 (Accession XP_209600.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285409 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285409, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285409 BINDING SITE, designated SEQ ID:1914, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42191] Another function of GAM2071 is therefore inhibition of LOC285409 (Accession XP_209600.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC285409.

[42192] LOC285429 (Accession XP_209607.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC285429 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285429, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285429 BINDING SITE, designated SEQ ID:4870, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42193] Another function of GAM2071 is therefore inhibition of LOC285429 (Accession XP_209607.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285429.

[42194] LOC285488 (Accession XP_211914.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285488 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285488, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285488 BINDING SITE, designated SEQ ID:11093, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42195] Another function of GAM2071 is therefore inhibition of LOC285488 (Accession XP_211914.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285488.

[42196] LOC285491 (Accession XP_211917.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285491 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285491, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285491 BINDING SITE, designated SEQ ID:8951, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42197] Another function of GAM2071 is therefore inhibition of LOC285491 (Accession XP_211917.1) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285491.

[42198] LOC285509 (Accession XP_211923.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285509 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285509, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285509 BINDING SITE, designated SEQ ID:11997, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42199] Another function of GAM2071 is therefore inhibition of LOC285509 (Accession XP_211923.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285509.

[42200] LOC285540 (Accession XP_209654.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285540 BINDING SITE1 and LOC285540 BINDING SITE2 are target binding sites found in untranslated re-

gions of mRNA encoded by LOC285540, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285540 BINDING SITE1 and LOC285540 BINDING SITE2, designated SEQ ID:19426 and SEQ ID:5384 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42201] Another function of GAM2071 is therefore inhibition of LOC285540 (Accession XP_209654.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285540.

[42202] LOC285589 (Accession XP_209671.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285589 BINDING SITE1 and LOC285589 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC285589, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285589 BINDING SITE1 and LOC285589 BINDING SITE2, designated SEQ ID:14069 and SEQ ID:3782 respectively, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42203] Another function of GAM2071 is therefore inhibition of LOC285589 (Accession XP_209671.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285589.

[42204] LOC285594 (Accession XP_211946.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC285594 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285594, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285594 BINDING SITE, designated SEQ ID:9271, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42205] Another function of GAM2071 is therefore inhibition of LOC285594 (Accession XP_211946.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285594.

[42206] LOC285608 (Accession XP_211952.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285608 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285608, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285608 BINDING SITE, designated SEQ ID:15956, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42207] Another function of GAM2071 is therefore inhibition of LOC285608 (Accession XP_211952.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285608.

[42208] LOC285638 (Accession XP_209693.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285638 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285638, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC285638 BINDING SITE, designated SEQ ID:13619, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42209] Another function of GAM2071 is therefore inhibition of LOC285638 (Accession XP_209693.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285638.

[42210] LOC285641 (Accession XP_209697.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285641 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285641, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285641 BINDING SITE, designated SEQ ID:3501, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42211] Another function of GAM2071 is therefore inhibition of LOC285641 (Accession XP_209697.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC285641.

[42212] LOC285679 (Accession XP_209719.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC285679 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285679, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285679 BINDING SITE, designated SEQ ID:15031, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42213] Another function of GAM2071 is therefore inhibition of LOC285679 (Accession XP_209719.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285679.

[42214] LOC285683 (Accession XP_211980.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285683 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285683, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285683 BINDING SITE, designated SEQ ID:5151, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42215] Another function of GAM2071 is therefore inhibition of LOC285683 (Accession XP_211980.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285683.

[42216] LOC285687 (Accession XP_211985.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285687 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285687, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285687 BINDING SITE, designated SEQ ID:10580, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42217] Another function of GAM2071 is therefore inhibition of

LOC285687 (Accession XP_211985.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285687.

[42218] LOC285693 (Accession XP_211981.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285693 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285693, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285693 BINDING SITE, designated SEQ ID:7946, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42219] Another function of GAM2071 is therefore inhibition of LOC285693 (Accession XP_211981.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285693.

[42220] LOC285722 (Accession XP_211997.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285722 BINDING SITE is a target binding site found in

the 5` untranslated region of mRNA encoded by LOC285722, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285722 BINDING SITE, designated SEQ ID:19494, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42221] Another function of GAM2071 is therefore inhibition of LOC285722 (Accession XP_211997.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285722.

[42222] LOC285744 (Accession XP_209743.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285744 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285744, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285744 BINDING SITE, designated SEQ ID:11603, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[42223] Another function of GAM2071 is therefore inhibition of LOC285744 (Accession XP_209743.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285744.

[42224] LOC285747 (Accession XP_209742.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285747 BINDING SITE1 and LOC285747 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC285747, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285747 BINDING SITE1 and LOC285747 BINDING SITE2, designated SEQ ID:13800 and SEQ ID:9553 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42225] Another function of GAM2071 is therefore inhibition of LOC285747 (Accession XP_209742.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285747.

[42226] LOC285812 (Accession XP_212055.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285812 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285812, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285812 BINDING SITE, designated SEQ ID:13275, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42227] Another function of GAM2071 is therefore inhibition of LOC285812 (Accession XP_212055.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285812.

[42228] LOC285813 (Accession XP_212036.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285813 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285813, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC285813 BINDING SITE, designated SEQ ID:17617, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42229] Another function of GAM2071 is therefore inhibition of LOC285813 (Accession XP_212036.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285813.

[42230] LOC285821 (Accession XP_209789.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285821 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285821, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285821 BINDING SITE, designated SEQ ID:7849, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42231] Another function of GAM2071 is therefore inhibition of LOC285821 (Accession XP_209789.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC285821.

[42232] LOC285822 (Accession XP_209777.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285822 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285822, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285822 BINDING SITE, designated SEQ ID:6011, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42233] Another function of GAM2071 is therefore inhibition of LOC285822 (Accession XP_209777.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285822.

[42234] LOC285830 (Accession XP_212043.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285830 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285830, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285830 BINDING SITE, designated SEQ ID:8939, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42235] Another function of GAM2071 is therefore inhibition of LOC285830 (Accession XP_212043.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285830.

[42236] LOC285840 (Accession XP_208353.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285840 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285840, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285840 BINDING SITE, designated SEQ ID:15519, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42237] Another function of GAM2071 is therefore inhibition of

LOC285840 (Accession XP_208353.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285840.

[42238] LOC285843 (Accession XP_212034.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285843 BINDING SITE1 and LOC285843 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC285843, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285843 BINDING SITE1 and LOC285843 BINDING SITE2, designated SEQ ID:1414 and SEQ ID:11782 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42239] Another function of GAM2071 is therefore inhibition of LOC285843 (Accession XP_212034.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285843.

[42240] LOC285847 (Accession XP_212045.1) is another GAM2071 target gene, herein designated TARGET GENE.

LOC285847 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285847, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285847 BINDING SITE, designated SEQ ID:7212, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42241] Another function of GAM2071 is therefore inhibition of LOC285847 (Accession XP_212045.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285847.

[42242] LOC285872 (Accession XP_212061.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285872 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285872, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285872 BINDING SITE, designated SEQ ID:7986, to the nucleotide sequence of

GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42243] Another function of GAM2071 is therefore inhibition of LOC285872 (Accession XP_212061.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285872.

[42244] LOC285896 (Accession XP_209806.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285896 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285896, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285896 BINDING SITE, designated SEQ ID:4795, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42245] Another function of GAM2071 is therefore inhibition of LOC285896 (Accession XP_209806.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285896.

[42246] LOC285922 (Accession XP_209822.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285922 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285922, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285922 BINDING SITE, designated SEQ ID:4795, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42247] Another function of GAM2071 is therefore inhibition of LOC285922 (Accession XP_209822.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285922.

[42248] LOC285923 (Accession XP_212104.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285923 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285923, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC285923 BINDING SITE, designated SEQ ID:16934, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42249] Another function of GAM2071 is therefore inhibition of LOC285923 (Accession XP_212104.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285923.

[42250] LOC285930 (Accession XP_209818.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285930 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285930, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285930 BINDING SITE, designated SEQ ID:3828, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42251] Another function of GAM2071 is therefore inhibition of LOC285930 (Accession XP_209818.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC285930.

[42252] LOC285945 (Accession XP_212092.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285945 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285945, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285945 BINDING SITE, designated SEQ ID:12385, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42253] Another function of GAM2071 is therefore inhibition of LOC285945 (Accession XP_212092.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285945.

[42254] LOC285952 (Accession XP_209821.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285952 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285952, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285952 BINDING SITE, designated SEQ ID:2758, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42255] Another function of GAM2071 is therefore inhibition of LOC285952 (Accession XP_209821.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285952.

[42256] LOC285961 (Accession XP_209833.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285961 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC285961, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285961 BINDING SITE, designated SEQ ID:11621, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42257] Another function of GAM2071 is therefore inhibition of

LOC285961 (Accession XP_209833.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285961.

[42258] LOC285972 (Accession XP_212105.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285972 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC285972, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285972 BINDING SITE, designated SEQ ID:8156, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42259] Another function of GAM2071 is therefore inhibition of LOC285972 (Accession XP_212105.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285972.

[42260] LOC285979 (Accession XP_212117.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC285979 BINDING SITE is a target binding site found in

the 5` untranslated region of mRNA encoded by LOC285979, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC285979 BINDING SITE, designated SEQ ID:3889, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42261] Another function of GAM2071 is therefore inhibition of LOC285979 (Accession XP_212117.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC285979.

[42262] LOC286029 (Accession XP_209866.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286029 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286029, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286029 BINDING SITE, designated SEQ ID:14224, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[42263] Another function of GAM2071 is therefore inhibition of LOC286029 (Accession XP_209866.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286029.

[42264] LOC286032 (Accession XP_209867.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC286032 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286032, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286032 BINDING SITE, designated SEQ ID:1208, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42265] Another function of GAM2071 is therefore inhibition of LOC286032 (Accession XP_209867.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286032.

[42266] LOC286052 (Accession XP_212152.1) is another

GAM2071 target gene, herein designated TARGET GENE. LOC286052 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286052, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286052 BINDING SITE, designated SEQ ID:14748, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42267] Another function of GAM2071 is therefore inhibition of LOC286052 (Accession XP_212152.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286052.

[42268] LOC286077 (Accession XP_209892.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286077 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286077, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286077 BINDING SITE, desig-

nated SEQ ID:3388, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42269] Another function of GAM2071 is therefore inhibition of LOC286077 (Accession XP_209892.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286077.

[42270] LOC286078 (Accession XP_212163.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286078 BINDING SITE1 and LOC286078 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC286078, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286078 BINDING SITE1 and LOC286078 BINDING SITE2, designated SEQ ID:8139 and SEQ ID:12045 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42271] Another function of GAM2071 is therefore inhibition of LOC286078 (Accession XP_212163.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC286078.

[42272] LOC286103 (Accession NP_848630.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286103 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by LOC286103, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286103 BINDING SITE, designated SEQ ID:15670, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42273] Another function of GAM2071 is therefore inhibition of LOC286103 (Accession NP_848630.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286103.

[42274] LOC286103 (Accession XP_209897.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286103 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by LOC286103, corresponding to a target

binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286103 BINDING SITE, designated SEQ ID:15670, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42275] Another function of GAM2071 is therefore inhibition of LOC286103 (Accession XP_209897.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286103.

[42276] LOC286121 (Accession XP_212184.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC286121 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286121, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286121 BINDING SITE, designated SEQ ID:19438, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42277] Another function of GAM2071 is therefore inhibition of

LOC286121 (Accession XP_212184.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286121.

[42278] LOC286126 (Accession XP_212185.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286126 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286126, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286126 BINDING SITE, designated SEQ ID:8950, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42279] Another function of GAM2071 is therefore inhibition of LOC286126 (Accession XP_212185.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286126.

[42280] LOC286132 (Accession XP_212194.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286132 BINDING SITE is a target binding site found in

the 5` untranslated region of mRNA encoded by LOC286132, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286132 BINDING SITE, designated SEQ ID:2266, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42281] Another function of GAM2071 is therefore inhibition of LOC286132 (Accession XP_212194.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286132.

[42282] LOC286166 (Accession XP_209925.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286166 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC286166, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286166 BINDING SITE, designated SEQ ID:1529, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[42283] Another function of GAM2071 is therefore inhibition of LOC286166 (Accession XP_209925.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286166.

[42284] LOC286186 (Accession XP_212219.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286186 BINDING SITE1 and LOC286186 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC286186, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286186 BINDING SITE1 and LOC286186 BINDING SITE2, designated SEQ ID:15317 and SEQ ID:13117 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42285] Another function of GAM2071 is therefore inhibition of LOC286186 (Accession XP_212219.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286186.

[42286] LOC286207 (Accession XP_209941.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286207 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286207, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286207 BINDING SITE, designated SEQ ID:16987, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42287] Another function of GAM2071 is therefore inhibition of LOC286207 (Accession XP_209941.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286207.

[42288] LOC286208 (Accession XP_212230.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286208 BINDING SITE1 and LOC286208 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC286208, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the com-

plementarity of the nucleotide sequences of LOC286208 BINDING SITE1 and LOC286208 BINDING SITE2, designated SEQ ID:16222 and SEQ ID:14347 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42289] Another function of GAM2071 is therefore inhibition of LOC286208 (Accession XP_212230.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286208.

[42290] LOC286215 (Accession XP_212228.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286215 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC286215, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286215 BINDING SITE, designated SEQ ID:14899, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42291] Another function of GAM2071 is therefore inhibition of LOC286215 (Accession XP_212228.1) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286215.

[42292] LOC286245 (Accession XP_212244.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286245 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC286245, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286245 BINDING SITE, designated SEQ ID:4711, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42293] Another function of GAM2071 is therefore inhibition of LOC286245 (Accession XP_212244.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286245.

[42294] LOC286341 (Accession XP_212278.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286341 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC286341, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286341 BINDING SITE, designated SEQ ID:14403, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42295] Another function of GAM2071 is therefore inhibition of LOC286341 (Accession XP_212278.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286341.

[42296] LOC286356 (Accession XP_212290.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286356 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC286356, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286356 BINDING SITE, designated SEQ ID:13800, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42297] Another function of GAM2071 is therefore inhibition of LOC286356 (Accession XP_212290.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286356.

[42298] LOC286357 (Accession XP_212285.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286357 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC286357, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286357 BINDING SITE, designated SEQ ID:13894, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42299] Another function of GAM2071 is therefore inhibition of LOC286357 (Accession XP_212285.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286357.

[42300] LOC286441 (Accession XP_212319.1) is another GAM2071 target gene, herein designated TARGET GENE.

LOC286441 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286441, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286441 BINDING SITE, designated SEQ ID:643, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42301] Another function of GAM2071 is therefore inhibition of LOC286441 (Accession XP_212319.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286441.

[42302] LOC286553 (Accession XP_212340.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC286553 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC286553, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC286553 BINDING SITE, designated SEQ ID:17107, to the nucleotide sequence of

GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42303] Another function of GAM2071 is therefore inhibition of LOC286553 (Accession XP_212340.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC286553.

[42304] LOC338562 (Accession XP_294654.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC338562 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC338562, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC338562 BINDING SITE, designated SEQ ID:17586, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42305] Another function of GAM2071 is therefore inhibition of LOC338562 (Accession XP_294654.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC338562.

[42306] LOC338579 (Accession XP_290472.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC338579 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC338579, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC338579 BINDING SITE, designated SEQ ID:18756, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42307] Another function of GAM2071 is therefore inhibition of LOC338579 (Accession XP_290472.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC338579.

[42308] LOC338709 (Accession XP_211595.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC338709 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC338709, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC338709 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42309] Another function of GAM2071 is therefore inhibition of LOC338709 (Accession XP_211595.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC338709.

[42310] LOC338739 (Accession XP_294690.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC338739 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC338739, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC338739 BINDING SITE, designated SEQ ID:11661, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42311] Another function of GAM2071 is therefore inhibition of LOC338739 (Accession XP_294690.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC338739.

[42312] LOC338773 (Accession XP_290570.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC338773 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC338773, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC338773 BINDING SITE, designated SEQ ID:17388, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42313] Another function of GAM2071 is therefore inhibition of LOC338773 (Accession XP_290570.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC338773.

[42314] LOC338817 (Accession XP_290588.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC338817 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC338817, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC338817 BINDING SITE, designated SEQ ID:11448, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42315] Another function of GAM2071 is therefore inhibition of LOC338817 (Accession XP_290588.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC338817.

[42316] LOC338899 (Accession XP_294740.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC338899 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC338899, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC338899 BINDING SITE, designated SEQ ID:8888, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42317] Another function of GAM2071 is therefore inhibition of

LOC338899 (Accession XP_294740.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC338899.

[42318] LOC338923 (Accession XP_294742.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC338923 BINDING SITE1 and LOC338923 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC338923, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC338923 BINDING SITE1 and LOC338923 BINDING SITE2, designated SEQ ID:14847 and SEQ ID:3243 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42319] Another function of GAM2071 is therefore inhibition of LOC338923 (Accession XP_294742.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC338923.

[42320] LOC339078 (Accession XP_290692.1) is another GAM2071 target gene, herein designated TARGET GENE.

LOC339078 BINDING SITE1 and LOC339078 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC339078, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339078 BINDING SITE1 and LOC339078 BINDING SITE2, designated SEQ ID:7937 and SEQ ID:19426 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42321] Another function of GAM2071 is therefore inhibition of LOC339078 (Accession XP_290692.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339078.

[42322] LOC339146 (Accession XP_294825.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339146 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339146, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339146 BINDING SITE, desig-

nated SEQ ID:822, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42323] Another function of GAM2071 is therefore inhibition of LOC339146 (Accession XP_294825.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339146.

[42324] LOC339178 (Accession XP_290742.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339178 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339178, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339178 BINDING SITE, designated SEQ ID:16519, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42325] Another function of GAM2071 is therefore inhibition of LOC339178 (Accession XP_290742.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC339178.

[42326] LOC339201 (Accession XP_290756.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339201 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339201, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339201 BINDING SITE, designated SEQ ID:11830, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42327] Another function of GAM2071 is therefore inhibition of LOC339201 (Accession XP_290756.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339201.

[42328] LOC339298 (Accession XP_294903.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339298 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339298, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339298 BINDING SITE, designated SEQ ID:3121, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42329] Another function of GAM2071 is therefore inhibition of LOC339298 (Accession XP_294903.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339298.

[42330] LOC339318 (Accession XP_290835.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339318 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339318, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339318 BINDING SITE, designated SEQ ID:10660, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42331] Another function of GAM2071 is therefore inhibition of LOC339318 (Accession XP_290835.1) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339318.

[42332] LOC339325 (Accession XP_290830.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339325 BINDING SITE1 and LOC339325 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC339325, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339325 BINDING SITE1 and LOC339325 BINDING SITE2, designated SEQ ID:13290 and SEQ ID:7946 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42333] Another function of GAM2071 is therefore inhibition of LOC339325 (Accession XP_290830.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339325.

[42334] LOC339417 (Accession XP_294944.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339417 BINDING SITE is a target binding site found in

the 5` untranslated region of mRNA encoded by LOC339417, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339417 BINDING SITE, designated SEQ ID:4497, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42335] Another function of GAM2071 is therefore inhibition of LOC339417 (Accession XP_294944.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339417.

[42336] LOC339448 (Accession XP_290902.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339448 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339448, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339448 BINDING SITE, designated SEQ ID:19680, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[42337] Another function of GAM2071 is therefore inhibition of LOC339448 (Accession XP_290902.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339448.

[42338] LOC339458 (Accession XP_290911.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339458 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339458, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339458 BINDING SITE, designated SEQ ID:436, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42339] Another function of GAM2071 is therefore inhibition of LOC339458 (Accession XP_290911.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339458.

[42340] LOC339459 (Accession XP_290907.2) is another

GAM2071 target gene, herein designated TARGET GENE. LOC339459 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339459, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339459 BINDING SITE, designated SEQ ID:13345, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42341] Another function of GAM2071 is therefore inhibition of LOC339459 (Accession XP_290907.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339459.

[42342] LOC339492 (Accession XP_290919.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339492 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339492, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339492 BINDING SITE, desig-

nated SEQ ID:13601, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42343] Another function of GAM2071 is therefore inhibition of LOC339492 (Accession XP_290919.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339492.

[42344] LOC339568 (Accession XP_295008.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339568 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339568, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339568 BINDING SITE, designated SEQ ID:15942, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42345] Another function of GAM2071 is therefore inhibition of LOC339568 (Accession XP_295008.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC339568.

[42346] LOC339577 (Accession XP_295005.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339577 BINDING SITE1 and LOC339577 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC339577, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339577 BINDING SITE1 and LOC339577 BINDING SITE2, designated SEQ ID:9239 and SEQ ID:18182 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42347] Another function of GAM2071 is therefore inhibition of LOC339577 (Accession XP_295005.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339577.

[42348] LOC339600 (Accession XP_295014.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339600 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339600, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339600 BINDING SITE, designated SEQ ID:15466, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42349] Another function of GAM2071 is therefore inhibition of LOC339600 (Accession XP_295014.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339600.

[42350] LOC339622 (Accession XP_295016.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339622 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339622, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339622 BINDING SITE, designated SEQ ID:15723, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42351] Another function of GAM2071 is therefore inhibition of

LOC339622 (Accession XP_295016.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339622.

[42352] LOC339663 (Accession XP_295028.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339663 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339663, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339663 BINDING SITE, designated SEQ ID:1438, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42353] Another function of GAM2071 is therefore inhibition of LOC339663 (Accession XP_295028.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339663.

[42354] LOC339685 (Accession XP_295032.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339685 BINDING SITE is a target binding site found in

the 5` untranslated region of mRNA encoded by LOC339685, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339685 BINDING SITE, designated SEQ ID:7793, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42355] Another function of GAM2071 is therefore inhibition of LOC339685 (Accession XP_295032.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339685.

[42356] LOC339711 (Accession XP_295038.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339711 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339711, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339711 BINDING SITE, designated SEQ ID:3106, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[42357] Another function of GAM2071 is therefore inhibition of LOC339711 (Accession XP_295038.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339711.

[42358] LOC339720 (Accession XP_295041.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339720 BINDING SITE1 and LOC339720 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC339720, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339720 BINDING SITE1 and LOC339720 BINDING SITE2, designated SEQ ID:7943 and SEQ ID:17652 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42359] Another function of GAM2071 is therefore inhibition of LOC339720 (Accession XP_295041.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339720.

[42360] LOC339803 (Accession XP_295072.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339803 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339803, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339803 BINDING SITE, designated SEQ ID:2943, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42361] Another function of GAM2071 is therefore inhibition of LOC339803 (Accession XP_295072.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339803.

[42362] LOC339809 (Accession XP_291020.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339809 BINDING SITE1 and LOC339809 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC339809, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the com-

plementarity of the nucleotide sequences of LOC339809 BINDING SITE1 and LOC339809 BINDING SITE2, designated SEQ ID:8744 and SEQ ID:9098 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42363] Another function of GAM2071 is therefore inhibition of LOC339809 (Accession XP_291020.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339809.

[42364] LOC339813 (Accession XP_295074.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339813 BINDING SITE1 and LOC339813 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC339813, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339813 BINDING SITE1 and LOC339813 BINDING SITE2, designated SEQ ID:10731 and SEQ ID:13432 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42365] Another function of GAM2071 is therefore inhibition of

LOC339813 (Accession XP_295074.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339813.

[42366] LOC339833 (Accession XP_291031.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339833 BINDING SITE1 and LOC339833 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC339833, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339833 BINDING SITE1 and LOC339833 BINDING SITE2, designated SEQ ID:8180 and SEQ ID:10061 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42367] Another function of GAM2071 is therefore inhibition of LOC339833 (Accession XP_291031.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339833.

[42368] LOC339834 (Accession XP_291033.1) is another GAM2071 target gene, herein designated TARGET GENE.

LOC339834 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by LOC339834, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339834 BINDING SITE, designated SEQ ID:2474, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42369] Another function of GAM2071 is therefore inhibition of LOC339834 (Accession XP_291033.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339834.

[42370] LOC339834 (Accession NP_835467.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339834 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by LOC339834, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339834 BINDING SITE, designated SEQ ID:2474, to the nucleotide

sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42371] Another function of GAM2071 is therefore inhibition of LOC339834 (Accession NP_835467.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339834.

[42372] LOC339872 (Accession XP_291050.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339872 BINDING SITE1 through LOC339872 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC339872, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339872 BINDING SITE1 through LOC339872 BINDING SITE3, designated SEQ ID:15990, SEQ ID:10908 and SEQ ID:6179 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42373] Another function of GAM2071 is therefore inhibition of LOC339872 (Accession XP_291050.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC339872.

[42374] LOC339894 (Accession XP_295095.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339894 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339894, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339894 BINDING SITE, designated SEQ ID:11426, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42375] Another function of GAM2071 is therefore inhibition of LOC339894 (Accession XP_295095.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339894.

[42376] LOC339907 (Accession XP_291065.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339907 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339907, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339907 BINDING SITE, designated SEQ ID:1531, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42377] Another function of GAM2071 is therefore inhibition of LOC339907 (Accession XP_291065.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339907.

[42378] LOC339909 (Accession XP_291069.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339909 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC339909, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339909 BINDING SITE, designated SEQ ID:9102, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42379] Another function of GAM2071 is therefore inhibition of LOC339909 (Accession XP_291069.1) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339909.

[42380] LOC339970 (Accession XP_291095.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC339970 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC339970, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC339970 BINDING SITE, designated SEQ ID:8858, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42381] Another function of GAM2071 is therefore inhibition of LOC339970 (Accession XP_291095.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC339970.

[42382] LOC340125 (Accession XP_291150.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC340125 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by

LOC340125, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC340125 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42383] Another function of GAM2071 is therefore inhibition of LOC340125 (Accession XP_291150.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC340125.

[42384] LOC340138 (Accession XP_291153.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC340138 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC340138, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC340138 BINDING SITE, designated SEQ ID:2442, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42385] Another function of GAM2071 is therefore inhibition of LOC340138 (Accession XP_291153.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC340138.

[42386] LOC340156 (Accession XP_291158.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC340156 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC340156, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC340156 BINDING SITE, designated SEQ ID:8575, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42387] Another function of GAM2071 is therefore inhibition of LOC340156 (Accession XP_291158.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC340156.

[42388] LOC340227 (Accession XP_291203.1) is another GAM2071 target gene, herein designated TARGET GENE.

LOC340227 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC340227, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC340227 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42389] Another function of GAM2071 is therefore inhibition of LOC340227 (Accession XP_291203.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC340227.

[42390] LOC340249 (Accession XP_291211.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC340249 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC340249, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC340249 BINDING SITE, designated SEQ ID:8336, to the nucleotide sequence of

GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42391] Another function of GAM2071 is therefore inhibition of LOC340249 (Accession XP_291211.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC340249.

[42392] LOC340290 (Accession XP_291214.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC340290 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC340290, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC340290 BINDING SITE, designated SEQ ID:15164, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42393] Another function of GAM2071 is therefore inhibition of LOC340290 (Accession XP_291214.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC340290.

[42394] LOC340318 (Accession XP_290401.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC340318 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC340318, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC340318 BINDING SITE, designated SEQ ID:3251, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42395] Another function of GAM2071 is therefore inhibition of LOC340318 (Accession XP_290401.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC340318.

[42396] LOC340414 (Accession XP_295240.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC340414 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC340414, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC340414 BINDING SITE, designated SEQ ID:11659, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42397] Another function of GAM2071 is therefore inhibition of LOC340414 (Accession XP_295240.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC340414.

[42398] LOC340450 (Accession XP_295252.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC340450 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC340450, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC340450 BINDING SITE, designated SEQ ID:4971, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42399] Another function of GAM2071 is therefore inhibition of LOC340450 (Accession XP_295252.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC340450.

[42400] LOC342926 (Accession XP_292790.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC342926 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC342926, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC342926 BINDING SITE, designated SEQ ID:1413, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42401] Another function of GAM2071 is therefore inhibition of LOC342926 (Accession XP_292790.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC342926.

[42402] LOC344805 (Accession XP_293599.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC344805 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC344805, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC344805 BINDING SITE, designated SEQ ID:11441, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42403] Another function of GAM2071 is therefore inhibition of LOC344805 (Accession XP_293599.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC344805.

[42404] LOC345275 (Accession NP_835236.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC345275 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by LOC345275, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC345275 BINDING SITE, designated SEQ ID:14511, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42405] Another function of GAM2071 is therefore inhibition of

LOC345275 (Accession NP_835236.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC345275.

[42406] LOC347803 (Accession XP_302604.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC347803 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC347803, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC347803 BINDING SITE, designated SEQ ID:12975, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42407] Another function of GAM2071 is therefore inhibition of LOC347803 (Accession XP_302604.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC347803.

[42408] LOC347918 (Accession XP_300565.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC347918 BINDING SITE is a target binding site found in

the 5` untranslated region of mRNA encoded by LOC347918, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC347918 BINDING SITE, designated SEQ ID:983, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42409] Another function of GAM2071 is therefore inhibition of LOC347918 (Accession XP_300565.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC347918.

[42410] LOC348024 (Accession XP_300592.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348024 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC348024, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348024 BINDING SITE, designated SEQ ID:3526, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[42411] Another function of GAM2071 is therefore inhibition of LOC348024 (Accession XP_300592.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348024.

[42412] LOC348071 (Accession XP_300620.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348071 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348071, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348071 BINDING SITE, designated SEQ ID:16154, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42413] Another function of GAM2071 is therefore inhibition of LOC348071 (Accession XP_300620.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348071.

[42414] LOC348075 (Accession XP_302653.1) is another

GAM2071 target gene, herein designated TARGET GENE. LOC348075 BINDING SITE1 and LOC348075 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC348075, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348075 BINDING SITE1 and LOC348075 BINDING SITE2, designated SEQ ID:7650 and SEQ ID:777 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42415] Another function of GAM2071 is therefore inhibition of LOC348075 (Accession XP_302653.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348075.

[42416] LOC348115 (Accession XP_300626.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348115 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC348115, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of LOC348115 BINDING SITE, designated SEQ ID:12601, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42417] Another function of GAM2071 is therefore inhibition of LOC348115 (Accession XP_300626.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348115.

[42418] LOC348261 (Accession XP_302704.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348261 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348261, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348261 BINDING SITE, designated SEQ ID:19539, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42419] Another function of GAM2071 is therefore inhibition of LOC348261 (Accession XP_302704.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC348261.

[42420] LOC348262 (Accession XP_300683.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348262 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC348262, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348262 BINDING SITE, designated SEQ ID:7914, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42421] Another function of GAM2071 is therefore inhibition of LOC348262 (Accession XP_300683.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348262.

[42422] LOC348314 (Accession XP_302716.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348314 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC348314, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348314 BINDING SITE, designated SEQ ID:9161, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42423] Another function of GAM2071 is therefore inhibition of LOC348314 (Accession XP_302716.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348314.

[42424] LOC348326 (Accession XP_300696.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348326 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348326, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348326 BINDING SITE, designated SEQ ID:1995, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42425] Another function of GAM2071 is therefore inhibition of

LOC348326 (Accession XP_300696.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348326.

[42426] LOC348327 (Accession XP_030209.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC348327 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348327, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348327 BINDING SITE, designated SEQ ID:16911, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42427] Another function of GAM2071 is therefore inhibition of LOC348327 (Accession XP_030209.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348327.

[42428] LOC348393 (Accession XP_302741.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348393 BINDING SITE1 and LOC348393 BINDING

SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC348393, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348393 BINDING SITE1 and LOC348393 BINDING SITE2, designated SEQ ID:16960 and SEQ ID:20185 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42429] Another function of GAM2071 is therefore inhibition of LOC348393 (Accession XP_302741.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348393.

[42430] LOC348396 (Accession XP_300729.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348396 BINDING SITE1 through LOC348396 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by LOC348396, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348396 BINDING SITE1 through LOC348396 BINDING SITE3, des-

ignated SEQ ID:5596, SEQ ID:1615 and SEQ ID:10631 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42431] Another function of GAM2071 is therefore inhibition of LOC348396 (Accession XP_300729.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348396.

[42432] LOC348402 (Accession XP_300730.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348402 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348402, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348402 BINDING SITE, designated SEQ ID:13601, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42433] Another function of GAM2071 is therefore inhibition of LOC348402 (Accession XP_300730.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

LOC348402.

[42434] LOC348445 (Accession XP_300738.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348445 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348445, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348445 BINDING SITE, designated SEQ ID:1995, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42435] Another function of GAM2071 is therefore inhibition of LOC348445 (Accession XP_300738.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348445.

[42436] LOC348455 (Accession XP_302760.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348455 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348455, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348455 BINDING SITE, designated SEQ ID:9100, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42437] Another function of GAM2071 is therefore inhibition of LOC348455 (Accession XP_302760.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348455.

[42438] LOC348460 (Accession XP_300743.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348460 BINDING SITE1 and LOC348460 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC348460, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348460 BINDING SITE1 and LOC348460 BINDING SITE2, designated SEQ ID:442 and SEQ ID:8756 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42439] Another function of GAM2071 is therefore inhibition of

LOC348460 (Accession XP_300743.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348460.

[42440] LOC348474 (Accession XP_209299.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC348474 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348474, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348474 BINDING SITE, designated SEQ ID:6597, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42441] Another function of GAM2071 is therefore inhibition of LOC348474 (Accession XP_209299.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348474.

[42442] LOC348494 (Accession XP_302789.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348494 BINDING SITE is a target binding site found in

the 5` untranslated region of mRNA encoded by LOC348494, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348494 BINDING SITE, designated SEQ ID:6743, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42443] Another function of GAM2071 is therefore inhibition of LOC348494 (Accession XP_302789.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348494.

[42444] LOC348503 (Accession XP_300762.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348503 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348503, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348503 BINDING SITE, designated SEQ ID:12080, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:371.

[42445] Another function of GAM2071 is therefore inhibition of LOC348503 (Accession XP_300762.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348503.

[42446] LOC348508 (Accession XP_302806.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348508 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC348508, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348508 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42447] Another function of GAM2071 is therefore inhibition of LOC348508 (Accession XP_302806.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348508.

[42448] LOC348525 (Accession XP_300778.1) is another

GAM2071 target gene, herein designated TARGET GENE. LOC348525 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348525, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348525 BINDING SITE, designated SEQ ID:436, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42449] Another function of GAM2071 is therefore inhibition of LOC348525 (Accession XP_300778.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348525.

[42450] LOC348532 (Accession XP_302818.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348532 BINDING SITE1 and LOC348532 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC348532, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348532

BINDING SITE1 and LOC348532 BINDING SITE2, designated SEQ ID:16960 and SEQ ID:20185 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42451] Another function of GAM2071 is therefore inhibition of LOC348532 (Accession XP_302818.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348532.

[42452] LOC348702 (Accession XP_300808.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348702 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC348702, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348702 BINDING SITE, designated SEQ ID:3103, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42453] Another function of GAM2071 is therefore inhibition of LOC348702 (Accession XP_300808.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with LOC348702.

[42454] LOC348790 (Accession XP_300843.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348790 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348790, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348790 BINDING SITE, designated SEQ ID:11124, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42455] Another function of GAM2071 is therefore inhibition of LOC348790 (Accession XP_300843.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348790.

[42456] LOC348797 (Accession XP_302888.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348797 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348797, corresponding to a target binding site such

as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348797 BINDING SITE, designated SEQ ID:4796, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42457] Another function of GAM2071 is therefore inhibition of LOC348797 (Accession XP_302888.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348797.

[42458] LOC348798 (Accession XP_300845.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348798 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC348798, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348798 BINDING SITE, designated SEQ ID:8736, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42459] Another function of GAM2071 is therefore inhibition of

LOC348798 (Accession XP_300845.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348798.

[42460] LOC348825 (Accession XP_300853.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348825 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC348825, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348825 BINDING SITE, designated SEQ ID:2639, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42461] Another function of GAM2071 is therefore inhibition of LOC348825 (Accession XP_300853.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348825.

[42462] LOC348842 (Accession XP_300861.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC348842 BINDING SITE is a target binding site found in

the 5` untranslated region of mRNA encoded by LOC348842, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC348842 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42463] Another function of GAM2071 is therefore inhibition of LOC348842 (Accession XP_300861.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC348842.

[42464] LOC349024 (Accession XP_300250.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC349024 BINDING SITE1 and LOC349024 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC349024, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349024 BINDING SITE1 and LOC349024 BINDING SITE2, designated SEQ ID:4753 and SEQ ID:11653 respectively, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42465] Another function of GAM2071 is therefore inhibition of LOC349024 (Accession XP_300250.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349024.

[42466] LOC349075 (Accession XP_300932.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC349075 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC349075, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349075 BINDING SITE, designated SEQ ID:9465, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42467] Another function of GAM2071 is therefore inhibition of LOC349075 (Accession XP_300932.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349075.

[42468] LOC349114 (Accession XP_302960.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC349114 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC349114, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349114 BINDING SITE, designated SEQ ID:902, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42469] Another function of GAM2071 is therefore inhibition of LOC349114 (Accession XP_302960.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349114.

[42470] LOC349170 (Accession XP_300969.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC349170 BINDING SITE1 and LOC349170 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC349170, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the com-

plementarity of the nucleotide sequences of LOC349170 BINDING SITE1 and LOC349170 BINDING SITE2, designated SEQ ID:13839 and SEQ ID:19429 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42471] Another function of GAM2071 is therefore inhibition of LOC349170 (Accession XP_300969.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349170.

[42472] LOC349251 (Accession XP_300251.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC349251 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC349251, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349251 BINDING SITE, designated SEQ ID:17649, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42473] Another function of GAM2071 is therefore inhibition of LOC349251 (Accession XP_300251.1) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349251.

[42474] LOC349282 (Accession XP_301008.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC349282 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC349282, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349282 BINDING SITE, designated SEQ ID:15530, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42475] Another function of GAM2071 is therefore inhibition of LOC349282 (Accession XP_301008.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349282.

[42476] LOC349313 (Accession XP_301024.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC349313 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

LOC349313, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349313 BINDING SITE, designated SEQ ID:15530, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42477] Another function of GAM2071 is therefore inhibition of LOC349313 (Accession XP_301024.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349313.

[42478] LOC349324 (Accession XP_303030.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC349324 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC349324, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349324 BINDING SITE, designated SEQ ID:988, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42479] Another function of GAM2071 is therefore inhibition of LOC349324 (Accession XP_303030.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349324.

[42480] LOC349440 (Accession XP_300513.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC349440 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC349440, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC349440 BINDING SITE, designated SEQ ID:19505, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42481] Another function of GAM2071 is therefore inhibition of LOC349440 (Accession XP_300513.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC349440.

[42482] LOC351597 (Accession XP_302099.1) is another GAM2071 target gene, herein designated TARGET GENE.

LOC351597 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC351597, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC351597 BINDING SITE, designated SEQ ID:14926, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42483] Another function of GAM2071 is therefore inhibition of LOC351597 (Accession XP_302099.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC351597.

[42484] LOC51193 (Accession NP_057415.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC51193 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC51193, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC51193 BINDING SITE, designated SEQ ID:6858, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[42485] Another function of GAM2071 is therefore inhibition of LOC51193 (Accession NP_057415.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC51193.

[42486] LOC51248 (Accession NP_057568.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC51248 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC51248, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC51248 BINDING SITE, designated SEQ ID:10914, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42487] Another function of GAM2071 is therefore inhibition of LOC51248 (Accession NP_057568.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC51248.

[42488] LOC51257 (Accession NP_057580.2) is another GAM2071 target gene, herein designated TARGET GENE. LOC51257

BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC51257, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC51257 BINDING SITE, designated SEQ ID:18183, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42489] Another function of GAM2071 is therefore inhibition of LOC51257 (Accession NP_057580.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC51257.

[42490] LOC51336 (Accession NP_057730.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC51336 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC51336, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC51336 BINDING SITE, designated SEQ ID:18609, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42491] Another function of GAM2071 is therefore inhibition of LOC51336 (Accession NP_057730.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC51336.

[42492] LOC55954 (Accession NP_061976.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC55954 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC55954, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC55954 BINDING SITE, designated SEQ ID:17853, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42493] Another function of GAM2071 is therefore inhibition of LOC55954 (Accession NP_061976.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC55954.

[42494] LOC56902 (Accession NP_064528.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC56902 BINDING SITE is a target binding site found in the 3` un-

translated region of mRNA encoded by LOC56902, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC56902 BINDING SITE, designated SEQ ID:8077, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42495] Another function of GAM2071 is therefore inhibition of LOC56902 (Accession NP_064528.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC56902.

[42496] LOC90408 (Accession XP_031517.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC90408 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC90408, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC90408 BINDING SITE, designated SEQ ID:2729, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42497] Another function of GAM2071 is therefore inhibition of

LOC90408 (Accession XP_031517.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC90408.

[42498] LOC90485 (Accession XP_032059.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC90485 BINDING SITE1 and LOC90485 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC90485, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC90485 BINDING SITE1 and LOC90485 BINDING SITE2, designated SEQ ID:15525 and SEQ ID:10103 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42499] Another function of GAM2071 is therefore inhibition of LOC90485 (Accession XP_032059.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC90485.

[42500] LOC91056 (Accession NP_612377.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC91056

BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by LOC91056, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC91056 BINDING SITE, designated SEQ ID:6693, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42501] Another function of GAM2071 is therefore inhibition of LOC91056 (Accession NP_612377.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC91056.

[42502] LOC91115 (Accession XP_036218.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC91115 BINDING SITE1 and LOC91115 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by LOC91115, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC91115 BINDING SITE1 and LOC91115 BINDING SITE2, designated SEQ ID:18042

and SEQ ID:6053 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42503] Another function of GAM2071 is therefore inhibition of LOC91115 (Accession XP_036218.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC91115.

[42504] LOC91170 (Accession XP_036612.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC91170 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC91170, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC91170 BINDING SITE, designated SEQ ID:3969, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42505] Another function of GAM2071 is therefore inhibition of LOC91170 (Accession XP_036612.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC91170.

[42506] LOC91250 (Accession XP_037135.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC91250 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC91250, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC91250 BINDING SITE, designated SEQ ID:16739, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42507] Another function of GAM2071 is therefore inhibition of LOC91250 (Accession XP_037135.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC91250.

[42508] LOC91373 (Accession XP_038063.5) is another GAM2071 target gene, herein designated TARGET GENE. LOC91373 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC91373, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC91373 BINDING SITE, designated SEQ ID:5516, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42509] Another function of GAM2071 is therefore inhibition of LOC91373 (Accession XP_038063.5) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC91373.

[42510] LOC91663 (Accession NP_612382.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC91663 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC91663, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC91663 BINDING SITE, designated SEQ ID:13779, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42511] Another function of GAM2071 is therefore inhibition of LOC91663 (Accession NP_612382.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC91663.

[42512] LOC91801 (Accession NP_620130.1) is another GAM2071

target gene, herein designated TARGET GENE. LOC91801 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC91801, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC91801 BINDING SITE, designated SEQ ID:3586, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42513] Another function of GAM2071 is therefore inhibition of LOC91801 (Accession NP_620130.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC91801.

[42514] LOC91893 (Accession XP_041340.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC91893 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC91893, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC91893 BINDING SITE, designated SEQ ID:9129, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[42515] Another function of GAM2071 is therefore inhibition of LOC91893 (Accession XP_041340.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC91893.

[42516] LOC92148 (Accession XP_043160.1) is another GAM2071 target gene, herein designated TARGET GENE. LOC92148 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LOC92148, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC92148 BINDING SITE, designated SEQ ID:16536, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42517] Another function of GAM2071 is therefore inhibition of LOC92148 (Accession XP_043160.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC92148.

[42518] LOC92659 (Accession XP_046434.3) is another GAM2071 target gene, herein designated TARGET GENE. LOC92659

BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LOC92659, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LOC92659 BINDING SITE, designated SEQ ID:19539, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42519] Another function of GAM2071 is therefore inhibition of LOC92659 (Accession XP_046434.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LOC92659.

[42520] LPHN1 (Accession NP_055736.1) is another GAM2071 target gene, herein designated TARGET GENE. LPHN1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LPHN1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LPHN1 BINDING SITE, designated SEQ ID:12633, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42521] Another function of GAM2071 is therefore inhibition of LPHN1 (Accession NP_055736.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LPHN1.

[42522] Leukotriene b4 receptor (LTB4R, Accession NP_000743.1) is another GAM2071 target gene, herein designated TARGET GENE. LTB4R BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by LTB4R, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LTB4R BINDING SITE, designated SEQ ID:19595, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42523] Another function of GAM2071 is therefore inhibition of Leukotriene b4 receptor (LTB4R, Accession NP_000743.1), a gene which may be the cardiac p2y receptor involved in the regulation of cardiac muscle contraction through modulation of l- type calcium currents. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LTB4R.

[42524] The function of LTB4R and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Lysophospholipase ii (LYPLA2, Accession NP_009191.1) is another GAM2071 target gene, herein designated TARGET GENE. LYPLA2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LYPLA2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LYPLA2 BINDING SITE, designated SEQ ID:15519, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42525] Another function of GAM2071 is therefore inhibition of Lysophospholipase ii (LYPLA2, Accession NP_009191.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LYPLA2.

[42526] Lysozyme (renal amyloidosis) (LYZ, Accession NP_000230.1) is another GAM2071 target gene, herein designated TARGET GENE. LYZ BINDING SITE is a target binding site found in the 3` untranslated region of mRNA

encoded by LYZ, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LYZ BINDING SITE, designated SEQ ID:3109, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42527] Another function of GAM2071 is therefore inhibition of Lysozyme (renal amyloidosis) (LYZ, Accession NP_000230.1), a gene which a bacteriolytic enzyme. and therefore may be associated with Renal amyloidosis. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Renal amyloidosis, and of other diseases and clinical conditions associated with LYZ.

[42528] The function of LYZ and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Leucine zipper, putative tumor suppressor 1 (LZTS1, Accession NP_066300.1) is another GAM2071 target gene, herein designated TARGET GENE. LZTS1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by LZTS1, corresponding to a target binding site such as BINDING SITE I, BINDING

SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of LZTS1 BINDING SITE, designated SEQ ID:13405, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42529] Another function of GAM2071 is therefore inhibition of Leucine zipper, putative tumor suppressor 1 (LZTS1, Accession NP_066300.1), a gene which is an essential component of the nucleoskeleton. potential role in crosslinking filaments or anchoring other molecules. it is essential for growth. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with LZTS1.

[42530] The function of LZTS1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Male germ cell-associated kinase (MAK, Accession NP_005897.1) is another GAM2071 target gene, herein designated TARGET GENE. MAK BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MAK, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of

the nucleotide sequences of MAK BINDING SITE, designated SEQ ID:11208, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42531] Another function of GAM2071 is therefore inhibition of Male germ cell-associated kinase (MAK, Accession NP_005897.1), a gene which plays an important role in spermatogenesis. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MAK.

[42532] The function of MAK and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.MAPA (Accession NP_660299.1) is another GAM2071 target gene, herein designated TARGET GENE. MAPA BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MAPA, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MAPA BINDING SITE, designated SEQ ID:12475, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42533] Another function of GAM2071 is therefore inhibition of MAPA (Accession NP_660299.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MAPA.

[42534] MCLC (Accession NP_055942.1) is another GAM2071 target gene, herein designated TARGET GENE. MCLC BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MCLC, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MCLC BINDING SITE, designated SEQ ID:4526, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42535] Another function of GAM2071 is therefore inhibition of MCLC (Accession NP_055942.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MCLC.

[42536] Mcm10 minichromosome maintenance deficient 10 (s. cerevisiae) (MCM10, Accession NP_060988.2) is another GAM2071 target gene, herein designated TARGET GENE. MCM10 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MCM10, cor-

responding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MCM10 BINDING SITE, designated SEQ ID:4821, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42537] Another function of GAM2071 is therefore inhibition of Mcm10 minichromosome maintenance deficient 10 (s. cerevisiae) (MCM10, Accession NP_060988.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MCM10.

[42538] MDC1 (Accession NP_055456.1) is another GAM2071 target gene, herein designated TARGET GENE. MDC1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MDC1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MDC1 BINDING SITE, designated SEQ ID:3945, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42539] Another function of GAM2071 is therefore inhibition of

MDC1 (Accession NP_055456.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MDC1.

[42540] Mam domain containing glycosylphosphatidylinositol anchor 1 (MDGA1, Accession NP_705691.1) is another GAM2071 target gene, herein designated TARGET GENE. MDGA1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MDGA1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MDGA1 BINDING SITE, designated SEQ ID:1000, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42541] Another function of GAM2071 is therefore inhibition of Mam domain containing glycosylphosphatidylinositol anchor 1 (MDGA1, Accession NP_705691.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MDGA1.

[42542] Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006872.1) is another GAM2071 target gene, herein designated TARGET

GENE. MDM2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MDM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MDM2 BINDING SITE, designated SEQ ID:6085, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42543] Another function of GAM2071 is therefore inhibition of Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006872.1), a gene which binds to and downmodulates p53 (TP53) and retinoblastoma protein (RB1) function. and therefore may be associated with Tumors (including soft tissue sarcomas, osteosarcomas and gliomas). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Tumors (including soft tissue sarcomas, osteosarcomas and gliomas)., and of other diseases and clinical conditions associated with MDM2.

[42544] The function of MDM2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference

to GAM189.1.Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006870.1) is another GAM2071 target gene, herein designated TARGET GENE. MDM2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MDM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MDM2 BINDING SITE, designated SEQ ID:6085, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42545] Another function of GAM2071 is therefore inhibition of Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006870.1), a gene which binds to and downmodulates p53 (TP53) and retinoblastoma protein (RB1) function. and therefore may be associated with Tumors (including soft tissue sarcomas, osteosarcomas and gliomas). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Tumors (including soft tissue sarcomas, osteosarcomas and gliomas)., and of other diseases and clinical conditions associated with MDM2.

[42546] The function of MDM2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006871.1) is another GAM2071 target gene, herein designated TARGET GENE. MDM2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MDM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MDM2 BINDING SITE, designated SEQ ID:6085, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42547] Another function of GAM2071 is therefore inhibition of Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006871.1), a gene which binds to and downmodulates p53 (TP53) and retinoblastoma protein (RB1) function. and therefore may be associated with Tumors (including soft tissue sarcomas, osteosarcomas and gliomas). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of

Tumors (including soft tissue sarcomas, osteosarcomas and gliomas)., and of other diseases and clinical conditions associated with MDM2.

[42548] The function of MDM2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006869.1) is another GAM2071 target gene, herein designated TARGET GENE. MDM2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MDM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MDM2 BINDING SITE, designated SEQ ID:6085, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42549] Another function of GAM2071 is therefore inhibition of Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006869.1), a gene which binds to and downmodulates p53 (TP53) and retinoblastoma protein (RB1) function. and therefore may

be associated with Tumors (including soft tissue sarcomas, osteosarcomas and gliomas). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Tumors (including soft tissue sarcomas, osteosarcomas and gliomas)., and of other diseases and clinical conditions associated with MDM2.

[42550] The function of MDM2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_002383.1) is another GAM2071 target gene, herein designated TARGET GENE. MDM2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MDM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MDM2 BINDING SITE, designated SEQ ID:6085, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42551] Another function of GAM2071 is therefore inhibition of Mdm2, transformed 3t3 cell double minute 2, p53 binding

protein (mouse) (MDM2, Accession NP_002383.1), a gene which binds to and downmodulates p53 (TP53) and retinoblastoma protein (RB1) function. and therefore may be associated with Tumors (including soft tissue sarcomas, osteosarcomas and gliomas). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Tumors (including soft tissue sarcomas, osteosarcomas and gliomas)., and of other diseases and clinical conditions associated with MDM2.

[42552] The function of MDM2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006873.1) is another GAM2071 target gene, herein designated TARGET GENE. MDM2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MDM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MDM2 BINDING SITE, designated SEQ ID:6085, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[42553] Another function of GAM2071 is therefore inhibition of Mdm2, transformed 3t3 cell double minute 2, p53 binding protein (mouse) (MDM2, Accession NP_006873.1), a gene which binds to and downmodulates p53 (TP53) and retinoblastoma protein (RB1) function. and therefore may be associated with Tumors (including soft tissue sarcomas, osteosarcomas and gliomas). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Tumors (including soft tissue sarcomas, osteosarcomas and gliomas)., and of other diseases and clinical conditions associated with MDM2.

[42554] The function of MDM2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Mdm4, transformed 3t3 cell double minute 4, p53 binding protein (mouse) (MDM4, Accession NP_002384.1) is another GAM2071 target gene, herein designated TARGET GENE. MDM4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MDM4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the

nucleotide sequences of MDM4 BINDING SITE, designated SEQ ID:19527, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42555] Another function of GAM2071 is therefore inhibition of Mdm4, transformed 3t3 cell double minute 4, p53 binding protein (mouse) (MDM4, Accession NP_002384.1), a gene which Strongly similar to murine Mdm4; may interact with p53. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MDM4.

[42556] The function of MDM4 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Mediterranean fever (MEFV, Accession NP_000234.1) is another GAM2071 target gene, herein designated TARGET GENE. MEFV BINDING SITE1 and MEFV BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by MEFV, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MEFV BINDING SITE1 and MEFV BINDING SITE2, designated SEQ

ID:12284 and SEQ ID:17376 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42557] Another function of GAM2071 is therefore inhibition of Mediterranean fever (MEFV, Accession NP_000234.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MEFV.

[42558] MFTC (Accession NP_110407.2) is another GAM2071 target gene, herein designated TARGET GENE. MFTC BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MFTC, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MFTC BINDING SITE, designated SEQ ID:10459, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42559] Another function of GAM2071 is therefore inhibition of MFTC (Accession NP_110407.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MFTC.

[42560] Mannosyl (alpha-1,6-)-glycoprotein beta-

1,2-n-acetylglucosaminyltransferase (MGAT2, Accession NP_079374.1) is another GAM2071 target gene, herein designated TARGET GENE. MGAT2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MGAT2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGAT2 BINDING SITE, designated SEQ ID:18270, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42561] Another function of GAM2071 is therefore inhibition of Mannosyl (alpha-1,6-)-glycoprotein beta-1,2-n-acetylglucosaminyltransferase (MGAT2, Accession NP_079374.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGAT2.

[42562] MGC10200 (Accession NP_659497.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC10200 BINDING SITE1 and MGC10200 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by MGC10200, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING

SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC10200 BINDING SITE1 and MGC10200 BINDING SITE2, designated SEQ ID:1700 and SEQ ID:13048 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42563] Another function of GAM2071 is therefore inhibition of MGC10200 (Accession NP_659497.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC10200.

[42564] MGC11102 (Accession NP_115701.2) is another GAM2071 target gene, herein designated TARGET GENE. MGC11102 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC11102, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC11102 BINDING SITE, designated SEQ ID:14977, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42565] Another function of GAM2071 is therefore inhibition of MGC11102 (Accession NP_115701.2) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC11102.

[42566] MGC12262 (Accession NP_116085.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC12262 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MGC12262, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC12262 BINDING SITE, designated SEQ ID:6361, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42567] Another function of GAM2071 is therefore inhibition of MGC12262 (Accession NP_116085.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC12262.

[42568] MGC12518 (Accession NP_291026.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC12518 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC12518, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC12518 BINDING SITE, designated SEQ ID:18251, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42569] Another function of GAM2071 is therefore inhibition of MGC12518 (Accession NP_291026.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC12518.

[42570] MGC13010 (Accession NP_116076.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC13010 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC13010, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC13010 BINDING SITE, designated SEQ ID:16983, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42571] Another function of GAM2071 is therefore inhibition of MGC13010 (Accession NP_116076.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with MGC13010.

[42572] MGC13017 (Accession NP_542387.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC13017 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC13017, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC13017 BINDING SITE, designated SEQ ID:18970, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42573] Another function of GAM2071 is therefore inhibition of MGC13017 (Accession NP_542387.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC13017.

[42574] MGC13024 (Accession NP_689501.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC13024 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC13024, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of MGC13024 BINDING SITE, designated SEQ ID:15630, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42575] Another function of GAM2071 is therefore inhibition of MGC13024 (Accession NP_689501.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC13024.

[42576] MGC13138 (Accession NP_219363.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC13138 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC13138, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC13138 BINDING SITE, designated SEQ ID:19426, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42577] Another function of GAM2071 is therefore inhibition of MGC13138 (Accession NP_219363.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

MGC13138.

[42578] MGC13204 (Accession NP_113653.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC13204 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC13204, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC13204 BINDING SITE, designated SEQ ID:17963, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42579] Another function of GAM2071 is therefore inhibition of MGC13204 (Accession NP_113653.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC13204.

[42580] MGC14289 (Accession NP_542391.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC14289 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC14289, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

MGC14289 BINDING SITE, designated SEQ ID:1959, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42581] Another function of GAM2071 is therefore inhibition of MGC14289 (Accession NP_542391.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC14289.

[42582] MGC14436 (Accession NP_116286.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC14436 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MGC14436, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC14436 BINDING SITE, designated SEQ ID:5075, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42583] Another function of GAM2071 is therefore inhibition of MGC14436 (Accession NP_116286.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC14436.

[42584] MGC14836 (Accession NP_219480.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC14836 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC14836, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC14836 BINDING SITE, designated SEQ ID:9102, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42585] Another function of GAM2071 is therefore inhibition of MGC14836 (Accession NP_219480.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC14836.

[42586] MGC15705 (Accession NP_116146.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC15705 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC15705, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC15705 BINDING SITE, designated SEQ ID:6734, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42587] Another function of GAM2071 is therefore inhibition of MGC15705 (Accession NP_116146.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC15705.

[42588] MGC17839 (Accession NP_777586.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC17839 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MGC17839, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC17839 BINDING SITE, designated SEQ ID:18441, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42589] Another function of GAM2071 is therefore inhibition of MGC17839 (Accession NP_777586.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC17839.

[42590] MGC1842 (Accession XP_037797.2) is another GAM2071

target gene, herein designated TARGET GENE. MGC1842 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC1842, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC1842 BINDING SITE, designated SEQ ID:11658, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42591] Another function of GAM2071 is therefore inhibition of MGC1842 (Accession XP_037797.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC1842.

[42592] MGC2474 (Accession NP_076420.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC2474 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC2474, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC2474 BINDING SITE, designated SEQ ID:18119, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[42593] Another function of GAM2071 is therefore inhibition of MGC2474 (Accession NP_076420.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC2474.

[42594] MGC2477 (Accession NP_077004.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC2477 BINDING SITE1 and MGC2477 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by MGC2477, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC2477 BINDING SITE1 and MGC2477 BINDING SITE2, designated SEQ ID:12048 and SEQ ID:3973 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42595] Another function of GAM2071 is therefore inhibition of MGC2477 (Accession NP_077004.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC2477.

[42596] MGC2603 (Accession NP_076942.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC2603 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC2603, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC2603 BINDING SITE, designated SEQ ID:17763, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42597] Another function of GAM2071 is therefore inhibition of MGC2603 (Accession NP_076942.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC2603.

[42598] MGC26989 (Accession NP_689976.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC26989 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC26989, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC26989 BINDING SITE, designated SEQ ID:14418, to

the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42599] Another function of GAM2071 is therefore inhibition of MGC26989 (Accession NP_689976.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC26989.

[42600] MGC27345 (Accession XP_300964.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC27345 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by MGC27345, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC27345 BINDING SITE, designated SEQ ID:18352, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42601] Another function of GAM2071 is therefore inhibition of MGC27345 (Accession XP_300964.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC27345.

[42602] MGC29891 (Accession NP_653219.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC29891 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC29891, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC29891 BINDING SITE, designated SEQ ID:18179, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42603] Another function of GAM2071 is therefore inhibition of MGC29891 (Accession NP_653219.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC29891.

[42604] MGC29898 (Accession NP_659485.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC29898 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC29898, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC29898 BINDING SITE, designated SEQ ID:9164, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42605] Another function of GAM2071 is therefore inhibition of MGC29898 (Accession NP_659485.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC29898.

[42606] MGC3113 (Accession NP_076940.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC3113 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC3113, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC3113 BINDING SITE, designated SEQ ID:15946, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42607] Another function of GAM2071 is therefore inhibition of MGC3113 (Accession NP_076940.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC3113.

[42608] MGC3195 (Accession NP_114111.2) is another GAM2071

target gene, herein designated TARGET GENE. MGC3195 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MGC3195, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC3195 BINDING SITE, designated SEQ ID:15735, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42609] Another function of GAM2071 is therefore inhibition of MGC3195 (Accession NP_114111.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC3195.

[42610] MGC3207 (Accession NP_115661.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC3207 BINDING SITE1 and MGC3207 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by MGC3207, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC3207 BINDING SITE1 and MGC3207 BINDING SITE2, designated SEQ ID:14723 and

SEQ ID:12382 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42611] Another function of GAM2071 is therefore inhibition of MGC3207 (Accession NP_115661.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC3207.

[42612] MGC3248 (Accession NP_115875.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC3248 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC3248, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC3248 BINDING SITE, designated SEQ ID:11953, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42613] Another function of GAM2071 is therefore inhibition of MGC3248 (Accession NP_115875.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC3248.

[42614] MGC3329 (Accession NP_076991.2) is another GAM2071 target gene, herein designated TARGET GENE. MGC3329 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC3329, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC3329 BINDING SITE, designated SEQ ID:4873, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42615] Another function of GAM2071 is therefore inhibition of MGC3329 (Accession NP_076991.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC3329.

[42616] MGC33637 (Accession NP_689809.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC33637 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC33637, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC33637 BINDING SITE, designated SEQ ID:12383, to

the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42617] Another function of GAM2071 is therefore inhibition of MGC33637 (Accession NP_689809.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC33637.

[42618] MGC34079 (Accession NP_689688.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC34079 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC34079, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC34079 BINDING SITE, designated SEQ ID:19879, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42619] Another function of GAM2071 is therefore inhibition of MGC34079 (Accession NP_689688.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC34079.

[42620] MGC34132 (Accession XP_291029.1) is another GAM2071

target gene, herein designated TARGET GENE. MGC34132 BINDING SITE1 and MGC34132 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by MGC34132, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC34132 BINDING SITE1 and MGC34132 BINDING SITE2, designated SEQ ID:8862 and SEQ ID:9188 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42621] Another function of GAM2071 is therefore inhibition of MGC34132 (Accession XP_291029.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC34132.

[42622] MGC35136 (Accession NP_689640.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC35136 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MGC35136, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

MGC35136 BINDING SITE, designated SEQ ID:8783, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42623] Another function of GAM2071 is therefore inhibition of MGC35136 (Accession NP_689640.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC35136.

[42624] MGC35440 (Accession NP_694952.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC35440 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC35440, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC35440 BINDING SITE, designated SEQ ID:13796, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42625] Another function of GAM2071 is therefore inhibition of MGC35440 (Accession NP_694952.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC35440.

[42626] MGC35468 (Accession NP_694976.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC35468 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC35468, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC35468 BINDING SITE, designated SEQ ID:19258, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42627] Another function of GAM2071 is therefore inhibition of MGC35468 (Accession NP_694976.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC35468.

[42628] MGC39320 (Accession NP_689642.2) is another GAM2071 target gene, herein designated TARGET GENE. MGC39320 BINDING SITE1 and MGC39320 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by MGC39320, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC39320 BINDING SITE1

and MGC39320 BINDING SITE2, designated SEQ ID:2691 and SEQ ID:1498 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42629] Another function of GAM2071 is therefore inhibition of MGC39320 (Accession NP_689642.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC39320.

[42630] MGC39558 (Accession NP_689703.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC39558 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC39558, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC39558 BINDING SITE, designated SEQ ID:1145, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42631] Another function of GAM2071 is therefore inhibition of MGC39558 (Accession NP_689703.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

MGC39558.

[42632] MGC40157 (Accession NP_689563.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC40157 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC40157, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC40157 BINDING SITE, designated SEQ ID:13547, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42633] Another function of GAM2071 is therefore inhibition of MGC40157 (Accession NP_689563.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC40157.

[42634] MGC40579 (Accession NP_689989.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC40579 BINDING SITE1 and MGC40579 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by MGC40579, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of

the nucleotide sequences of MGC40579 BINDING SITE1 and MGC40579 BINDING SITE2, designated SEQ ID:3759 and SEQ ID:516 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42635] Another function of GAM2071 is therefore inhibition of MGC40579 (Accession NP_689989.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC40579.

[42636] MGC43122 (Accession NP_775784.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC43122 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC43122, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC43122 BINDING SITE, designated SEQ ID:16117, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42637] Another function of GAM2071 is therefore inhibition of MGC43122 (Accession NP_775784.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treat-

ment of diseases and clinical conditions associated with MGC43122.

[42638] MGC4415 (Accession NP_113672.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC4415 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC4415, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC4415 BINDING SITE, designated SEQ ID:8576, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42639] Another function of GAM2071 is therefore inhibition of MGC4415 (Accession NP_113672.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC4415.

[42640] MGC46732 (Accession NP_714925.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC46732 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC46732, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of MGC46732 BINDING SITE, designated SEQ ID:3645, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42641] Another function of GAM2071 is therefore inhibition of MGC46732 (Accession NP_714925.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC46732.

[42642] MGC50337 (Accession NP_848604.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC50337 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC50337, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC50337 BINDING SITE, designated SEQ ID:8882, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42643] Another function of GAM2071 is therefore inhibition of MGC50337 (Accession NP_848604.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

MGC50337.

[42644] MGC50559 (Accession NP_776163.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC50559 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC50559, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC50559 BINDING SITE, designated SEQ ID:7831, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42645] Another function of GAM2071 is therefore inhibition of MGC50559 (Accession NP_776163.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC50559.

[42646] MGC5149 (Accession XP_051200.2) is another GAM2071 target gene, herein designated TARGET GENE. MGC5149 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC5149, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

MGC5149 BINDING SITE, designated SEQ ID:17590, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42647] Another function of GAM2071 is therefore inhibition of MGC5149 (Accession XP_051200.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC5149.

[42648] MGC9912 (Accession NP_542395.1) is another GAM2071 target gene, herein designated TARGET GENE. MGC9912 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGC9912, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGC9912 BINDING SITE, designated SEQ ID:11391, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42649] Another function of GAM2071 is therefore inhibition of MGC9912 (Accession NP_542395.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGC9912.

[42650] MGRN1 (Accession XP_048119.4) is another GAM2071 target gene, herein designated TARGET GENE. MGRN1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MGRN1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MGRN1 BINDING SITE, designated SEQ ID:13807, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42651] Another function of GAM2071 is therefore inhibition of MGRN1 (Accession XP_048119.4) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MGRN1.

[42652] Mhc class ii transactivator (MHC2TA, Accession NP_000237.1) is another GAM2071 target gene, herein designated TARGET GENE. MHC2TA BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MHC2TA, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MHC2TA BINDING SITE, designated SEQ ID:9987, to the nucleotide se-

quence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42653] Another function of GAM2071 is therefore inhibition of Mhc class ii transactivator (MHC2TA, Accession NP_000237.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MHC2TA.

[42654] MIRAB13 (Accession XP_039236.6) is another GAM2071 target gene, herein designated TARGET GENE. MIRAB13 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MIRAB13, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MIRAB13 BINDING SITE, designated SEQ ID:3109, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42655] Another function of GAM2071 is therefore inhibition of MIRAB13 (Accession XP_039236.6) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MIRAB13.

[42656] MIRAB13 (Accession NP_203744.1) is another GAM2071 target gene, herein designated TARGET GENE. MIRAB13 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MIRAB13, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MIRAB13 BINDING SITE, designated SEQ ID:3109, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42657] Another function of GAM2071 is therefore inhibition of MIRAB13 (Accession NP_203744.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MIRAB13.

[42658] MIS12 (Accession NP_076944.1) is another GAM2071 target gene, herein designated TARGET GENE. MIS12 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MIS12, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MIS12

BINDING SITE, designated SEQ ID:3332, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42659] Another function of GAM2071 is therefore inhibition of MIS12 (Accession NP_076944.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MIS12.

[42660] Makorin, ring finger protein, 4 (MKRN4, Accession NP_110384.1) is another GAM2071 target gene, herein designated TARGET GENE. MKRN4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MKRN4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MKRN4 BINDING SITE, designated SEQ ID:12385, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42661] Another function of GAM2071 is therefore inhibition of Makorin, ring finger protein, 4 (MKRN4, Accession NP_110384.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MKRN4.

[42662] Melanoma-derived leucine zipper, extra-nuclear factor (MLZE, Accession NP_113603.1) is another GAM2071 target gene, herein designated TARGET GENE. MLZE BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by MLZE, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MLZE BINDING SITE, designated SEQ ID:11404, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42663] Another function of GAM2071 is therefore inhibition of Melanoma-derived leucine zipper, extra-nuclear factor (MLZE, Accession NP_113603.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MLZE.

[42664] Modulator of apoptosis 1 (MOAP1, Accession NP_071434.2) is another GAM2071 target gene, herein designated TARGET GENE. MOAP1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MOAP1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the

nucleotide sequences of MOAP1 BINDING SITE, designated SEQ ID:11659, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42665] Another function of GAM2071 is therefore inhibition of Modulator of apoptosis 1 (MOAP1, Accession NP_071434.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MOAP1.

[42666] moblak (Accession NP_570719.1) is another GAM2071 target gene, herein designated TARGET GENE. moblak BINDING SITE1 and moblak BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by moblak, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of moblak BINDING SITE1 and moblak BINDING SITE2, designated SEQ ID:2270 and SEQ ID:18353 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42667] Another function of GAM2071 is therefore inhibition of moblak (Accession NP_570719.1) . Accordingly, utilities of

GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with moblak.

[42668] Molybdenum cofactor synthesis 3 (MOCS3, Accession NP_055299.1) is another GAM2071 target gene, herein designated TARGET GENE. MOCS3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MOCS3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MOCS3 BINDING SITE, designated SEQ ID:6108, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42669] Another function of GAM2071 is therefore inhibition of Molybdenum cofactor synthesis 3 (MOCS3, Accession NP_055299.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MOCS3.

[42670] Myeloproliferative leukemia virus oncogene (MPL, Accession NP_005364.1) is another GAM2071 target gene, herein designated TARGET GENE. MPL BINDING SITE1 and MPL BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by MPL, correspond-

ing to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MPL BINDING SITE1 and MPL BINDING SITE2, designated SEQ ID:11909 and SEQ ID:633 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42671] Another function of GAM2071 is therefore inhibition of Myeloproliferative leukemia virus oncogene (MPL, Accession NP_005364.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MPL.

[42672] Mitochondrial ribosomal protein l30 (MRPL30, Accession NP_660213.1) is another GAM2071 target gene, herein designated TARGET GENE. MRPL30 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MRPL30, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MRPL30 BINDING SITE, designated SEQ ID:1858, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42673] Another function of GAM2071 is therefore inhibition of Mitochondrial ribosomal protein l30 (MRPL30, Accession NP_660213.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MRPL30.

[42674] Mitochondrial ribosomal protein l35 (MRPL35, Accession NP_057706.2) is another GAM2071 target gene, herein designated TARGET GENE. MRPL35 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by MRPL35, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MRPL35 BINDING SITE, designated SEQ ID:10631, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42675] Another function of GAM2071 is therefore inhibition of Mitochondrial ribosomal protein l35 (MRPL35, Accession NP_057706.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MRPL35.

[42676] Mitochondrial ribosomal protein l49 (MRPL49, Accession NP_004918.1) is another GAM2071 target gene, herein

designated TARGET GENE. MRPL49 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MRPL49, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MRPL49 BINDING SITE, designated SEQ ID:13534, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42677] Another function of GAM2071 is therefore inhibition of Mitochondrial ribosomal protein l49 (MRPL49, Accession NP_004918.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MRPL49.

[42678] Mitochondrial ribosomal protein s27 (MRPS27, Accession NP_055899.1) is another GAM2071 target gene, herein designated TARGET GENE. MRPS27 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MRPS27, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MRPS27 BINDING SITE, designated SEQ ID:13372, to the nucleotide se-

quence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42679] Another function of GAM2071 is therefore inhibition of Mitochondrial ribosomal protein s27 (MRPS27, Accession NP_055899.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MRPS27.

[42680] MSTP028 (Accession NP_114160.1) is another GAM2071 target gene, herein designated TARGET GENE. MSTP028 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MSTP028, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MSTP028 BINDING SITE, designated SEQ ID:11359, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42681] Another function of GAM2071 is therefore inhibition of MSTP028 (Accession NP_114160.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MSTP028.

[42682] MtFMT (Accession NP_640335.1) is another GAM2071 tar-

get gene, herein designated TARGET GENE. MtFMT BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MtFMT, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MtFMT BINDING SITE, designated SEQ ID:2529, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42683] Another function of GAM2071 is therefore inhibition of MtFMT (Accession NP_640335.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MtFMT.

[42684] MTH2 (Accession NP_060753.1) is another GAM2071 target gene, herein designated TARGET GENE. MTH2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MTH2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MTH2 BINDING SITE, designated SEQ ID:12462, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42685] Another function of GAM2071 is therefore inhibition of MTH2 (Accession NP_060753.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MTH2.

[42686] 5-methyltetrahydrofolate-homocysteine methyltransferase (MTR, Accession NP_000245.1) is another GAM2071 target gene, herein designated TARGET GENE. MTR BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MTR, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MTR BINDING SITE, designated SEQ ID:13325, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42687] Another function of GAM2071 is therefore inhibition of 5-methyltetrahydrofolate-homocysteine methyltransferase (MTR, Accession NP_000245.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MTR.

[42688] Myosin 5c (MYO5C, Accession NP_061198.1) is another GAM2071 target gene, herein designated TARGET GENE.

MYO5C BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by MYO5C, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of MYO5C BINDING SITE, designated SEQ ID:14846, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42689] Another function of GAM2071 is therefore inhibition of Myosin 5c (MYO5C, Accession NP_061198.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with MYO5C.

[42690] NAGPA (Accession NP_057340.1) is another GAM2071 target gene, herein designated TARGET GENE. NAGPA BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NAGPA, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NAGPA BINDING SITE, designated SEQ ID:8883, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42691] Another function of GAM2071 is therefore inhibition of NAGPA (Accession NP_057340.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NAGPA.

[42692] NALP12 (Accession NP_150639.1) is another GAM2071 target gene, herein designated TARGET GENE. NALP12 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by NALP12, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NALP12 BINDING SITE, designated SEQ ID:12925, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42693] Another function of GAM2071 is therefore inhibition of NALP12 (Accession NP_150639.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NALP12.

[42694] Nanog (Accession NP_079141.1) is another GAM2071 target gene, herein designated TARGET GENE. Nanog BINDING SITE is a target binding site found in the 3` untrans-

lated region of mRNA encoded by Nanog, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of Nanog BINDING SITE, designated SEQ ID:3109, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42695] Another function of GAM2071 is therefore inhibition of Nanog (Accession NP_079141.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with Nanog.

[42696] NCAG1 (Accession NP_115536.1) is another GAM2071 target gene, herein designated TARGET GENE. NCAG1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NCAG1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NCAG1 BINDING SITE, designated SEQ ID:11436, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42697] Another function of GAM2071 is therefore inhibition of NCAG1 (Accession NP_115536.1) . Accordingly, utilities of

GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NCAG1.

[42698] Nuclear receptor coactivator 6 (NCOA6, Accession NP_054790.1) is another GAM2071 target gene, herein designated TARGET GENE. NCOA6 BINDING SITE1 and NCOA6 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by NCOA6, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NCOA6 BINDING SITE1 and NCOA6 BINDING SITE2, designated SEQ ID:5484 and SEQ ID:6181 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42699] Another function of GAM2071 is therefore inhibition of Nuclear receptor coactivator 6 (NCOA6, Accession NP_054790.1), a gene which activates gene transcription through ligand- dependent association with coactivators. and therefore may be associated with Breast cancer. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Breast cancer., and of other diseases and clinical conditions associated with NCOA6.

[42700] The function of NCOA6 and its association with various

diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM161.1.Nuclear receptor coactivator 6 interacting protein (NCOA6IP, Accession NP_079107.5) is another GAM2071 target gene, herein designated TARGET GENE. NCOA6IP BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NCOA6IP, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NCOA6IP BINDING SITE, designated SEQ ID:3026, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42701] Another function of GAM2071 is therefore inhibition of Nuclear receptor coactivator 6 interacting protein (NCOA6IP, Accession NP_079107.5) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NCOA6IP.

[42702] NDP52 (Accession NP_005822.1) is another GAM2071 target gene, herein designated TARGET GENE. NDP52 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NDP52, corresponding

to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NDP52 BINDING SITE, designated SEQ ID:13886, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42703] Another function of GAM2071 is therefore inhibition of NDP52 (Accession NP_005822.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NDP52.

[42704] Ndrg family member 3 (NDRG3, Accession NP_114402.1) is another GAM2071 target gene, herein designated TARGET GENE. NDRG3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by NDRG3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NDRG3 BINDING SITE, designated SEQ ID:20109, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42705] Another function of GAM2071 is therefore inhibition of Ndrg family member 3 (NDRG3, Accession NP_114402.1) .

Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NDRG3.

[42706] Nadh dehydrogenase (ubiquinone) 1, subcomplex unknown, 2, 14.5kda (NDUFC2, Accession NP_004540.1) is another GAM2071 target gene, herein designated TARGET GENE. NDUFC2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NDUFC2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NDUFC2 BINDING SITE, designated SEQ ID:15362, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42707] Another function of GAM2071 is therefore inhibition of Nadh dehydrogenase (ubiquinone) 1, subcomplex unknown, 2, 14.5kda (NDUFC2, Accession NP_004540.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NDUFC2.

[42708] Sialidase 3 (membrane sialidase) (NEU3, Accession NP_006647.2) is another GAM2071 target gene, herein

designated TARGET GENE. NEU3 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by NEU3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NEU3 BINDING SITE, designated SEQ ID:18182, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42709] Another function of GAM2071 is therefore inhibition of Sialidase 3 (membrane sialidase) (NEU3, Accession NP_006647.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NEU3.

[42710] Neurofibromin 2 (bilateral acoustic neuroma) (NF2, Accession NP_057502.1) is another GAM2071 target gene, herein designated TARGET GENE. NF2 BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by NF2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NF2 BINDING SITE, designated SEQ ID:557, to the nu-

cleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42711] Another function of GAM2071 is therefore inhibition of Neurofibromin 2 (bilateral acoustic neuroma) (NF2, Accession NP_057502.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NF2.

[42712] Non-pou domain containing, octamer-binding (NONO, Accession NP_031389.2) is another GAM2071 target gene, herein designated TARGET GENE. NONO BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NONO, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NONO BINDING SITE, designated SEQ ID:1412, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42713] Another function of GAM2071 is therefore inhibition of Non-pou domain containing, octamer-binding (NONO, Accession NP_031389.2), a gene which is a nuclear protein which contains RNA recognition motifs. Accordingly, utilities of GAM2071 include diagnosis, prevention and

treatment of diseases and clinical conditions associated with NONO.

[42714] The function of NONO and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Nad(p)h dehydrogenase, quinone 1 (NQO1, Accession NP_000894.1) is another GAM2071 target gene, herein designated TARGET GENE. NQO1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NQO1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NQO1 BINDING SITE, designated SEQ ID:18183, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42715] Another function of GAM2071 is therefore inhibition of Nad(p)h dehydrogenase, quinone 1 (NQO1, Accession NP_000894.1), a gene which is cytochrome b5 reductase which reduces redox dyes and quinones. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NQO1.

[42716] The function of NQO1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Neurotensin receptor 2 (NTSR2, Accession NP_036476.1) is another GAM2071 target gene, herein designated TARGET GENE. NTSR2 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by NTSR2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NTSR2 BINDING SITE, designated SEQ ID:4568, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42717] Another function of GAM2071 is therefore inhibition of Neurotensin receptor 2 (NTSR2, Accession NP_036476.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NTSR2.

[42718] Nudix (nucleoside diphosphate linked moiety x)-type motif 4 (NUDT4, Accession NP_061967.2) is another GAM2071 target gene, herein designated TARGET GENE. NUDT4 BINDING SITE is a target binding site found in the

3` untranslated region of mRNA encoded by NUDT4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NUDT4 BINDING SITE, designated SEQ ID:20051, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42719] Another function of GAM2071 is therefore inhibition of Nudix (nucleoside diphosphate linked moiety x)-type motif 4 (NUDT4, Accession NP_061967.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NUDT4.

[42720] Nucleoredoxin (NXN, Accession NP_071908.1) is another GAM2071 target gene, herein designated TARGET GENE. NXN BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by NXN, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of NXN BINDING SITE, designated SEQ ID:436, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42721] Another function of GAM2071 is therefore inhibition of Nucleoredoxin (NXN, Accession NP_071908.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with NXN.

[42722] Olfactory receptor, family 51, subfamily e, member 2 (OR51E2, Accession NP_110401.1) is another GAM2071 target gene, herein designated TARGET GENE. OR51E2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by OR51E2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of OR51E2 BINDING SITE, designated SEQ ID:8690, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42723] Another function of GAM2071 is therefore inhibition of Olfactory receptor, family 51, subfamily e, member 2 (OR51E2, Accession NP_110401.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with OR51E2.

[42724] Origin recognition complex, subunit 1-like (yeast)

(ORC1L, Accession NP_004144.1) is another GAM2071 target gene, herein designated TARGET GENE. ORC1L BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ORC1L, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ORC1L BINDING SITE, designated SEQ ID:436, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42725] Another function of GAM2071 is therefore inhibition of Origin recognition complex, subunit 1-like (yeast) (ORC1L, Accession NP_004144.1), a gene which may be required for initiation of DNA replication. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ORC1L.

[42726] The function of ORC1L and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.P15RS (Accession NP_060640.2) is another GAM2071 target gene, herein designated TARGET GENE. P15RS BINDING SITE is a target binding site found in the

3` untranslated region of mRNA encoded by P15RS, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of P15RS BINDING SITE, designated SEQ ID:1032, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42727] Another function of GAM2071 is therefore inhibition of P15RS (Accession NP_060640.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with P15RS.

[42728] Phosphoribosylaminoimidazole carboxylase, phosphoribosylaminoimidazole succinocarboxamide synthetase (PAICS, Accession NP_006443.1) is another GAM2071 target gene, herein designated TARGET GENE. PAICS BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PAICS, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PAICS BINDING SITE, designated SEQ ID:11127, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42729] Another function of GAM2071 is therefore inhibition of Phosphoribosylaminoimidazole carboxylase, phosphoribosylaminoimidazole succinocarboxamide synthetase (PAICS, Accession NP_006443.1), a gene which is required for purine biosynthesis. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PAICS.

[42730] The function of PAICS and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM96.1.PART1 (Accession NP_057674.1) is another GAM2071 target gene, herein designated TARGET GENE. PART1 BINDING SITE1 and PART1 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by PART1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PART1 BINDING SITE1 and PART1 BINDING SITE2, designated SEQ ID:19024 and SEQ ID:7026 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42731] Another function of GAM2071 is therefore inhibition of

PART1 (Accession NP_057674.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PART1.

[42732] Pas domain containing serine/threonine kinase (PASK, Accession NP_055963.1) is another GAM2071 target gene, herein designated TARGET GENE. PASK BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by PASK, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PASK BINDING SITE, designated SEQ ID:3230, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42733] Another function of GAM2071 is therefore inhibition of Pas domain containing serine/threonine kinase (PASK, Accession NP_055963.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PASK.

[42734] Protocadherin alpha 9 (PCDHA9, Accession NP_054724.1) is another GAM2071 target gene, herein designated TARGET GENE. PCDHA9 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts

of mRNA encoded by PCDHA9, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PCDHA9 BINDING SITE, designated SEQ ID:10631, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42735] Another function of GAM2071 is therefore inhibition of Protocadherin alpha 9 (PCDHA9, Accession NP_054724.1), a gene which is a calcium- dependent cell- adhesion protein. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PCDHA9.

[42736] The function of PCDHA9 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Protocadherin beta 11 (PCDHB11, Accession NP_061754.1) is another GAM2071 target gene, herein designated TARGET GENE. PCDHB11 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PCDHB11, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the comple-

mentarity of the nucleotide sequences of PCDHB11 BINDING SITE, designated SEQ ID:7975, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42737] Another function of GAM2071 is therefore inhibition of Protocadherin beta 11 (PCDHB11, Accession NP_061754.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PCDHB11.

[42738] Protocadherin beta 16 (PCDHB16, Accession NP_066008.1) is another GAM2071 target gene, herein designated TARGET GENE. PCDHB16 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PCDHB16, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PCDHB16 BINDING SITE, designated SEQ ID:4753, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42739] Another function of GAM2071 is therefore inhibition of Protocadherin beta 16 (PCDHB16, Accession NP_066008.1), a gene which is a potential calcium- de-

pendent cell- adhesion protein. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PCDHB16.

[42740] The function of PCDHB16 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Protocadherin beta 9 (PCDHB9, Accession NP_061992.2) is another GAM2071 target gene, herein designated TARGET GENE. PCDHB9 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PCDHB9, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PCDHB9 BINDING SITE, designated SEQ ID:3109, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42741] Another function of GAM2071 is therefore inhibition of Protocadherin beta 9 (PCDHB9, Accession NP_061992.2), a gene which is a potential calcium- dependent cell- adhesion protein. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PCDHB9.

[42742] The function of PCDHB9 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM72.1.Phosducin-like (PDCL, Accession NP_005379.2) is another GAM2071 target gene, herein designated TARGET GENE. PDCL BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PDCL, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PDCL BINDING SITE, designated SEQ ID:14559, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42743] Another function of GAM2071 is therefore inhibition of Phosducin-like (PDCL, Accession NP_005379.2), a gene which may regulate G- protein signaling and similar to phosducins. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PDCL.

[42744] The function of PDCL and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference

to GAM30.1.Phosphodiesterase 6b, cgmp-specific, rod, beta (congenital stationary night blindness 3, autosomal dominant) (PDE6B, Accession NP_000274.1) is another GAM2071 target gene, herein designated TARGET GENE. PDE6B BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PDE6B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PDE6B BINDING SITE, designated SEQ ID:18070, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42745] Another function of GAM2071 is therefore inhibition of Phosphodiesterase 6b, cgmp-specific, rod, beta (congenital stationary night blindness 3, autosomal dominant) (PDE6B, Accession NP_000274.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PDE6B.

[42746] Platelet derived growth factor c (PDGFC, Accession NP_057289.1) is another GAM2071 target gene, herein designated TARGET GENE. PDGFC BINDING SITE is a target binding site found in the 3` untranslated region of mRNA

encoded by PDGFC, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PDGFC BINDING SITE, designated SEQ ID:19767, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42747] Another function of GAM2071 is therefore inhibition of Platelet derived growth factor c (PDGFC, Accession NP_057289.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PDGFC.

[42748] Pdz and lim domain 2 (mystique) (PDLIM2, Accession NP_789847.1) is another GAM2071 target gene, herein designated TARGET GENE. PDLIM2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PDLIM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PDLIM2 BINDING SITE, designated SEQ ID:4874, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42749] Another function of GAM2071 is therefore inhibition of Pdz and lim domain 2 (mystique) (PDLIM2, Accession NP_789847.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PDLIM2.

[42750] Pdz domain containing 1 (PDZK1, Accession NP_002605.2) is another GAM2071 target gene, herein designated TARGET GENE. PDZK1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by PDZK1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PDZK1 BINDING SITE, designated SEQ ID:11598, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42751] Another function of GAM2071 is therefore inhibition of Pdz domain containing 1 (PDZK1, Accession NP_002605.2), a gene which is a contains PDZ interaction domains, interacts with MAP17, a protein involved in control of cell proliferation. and therefore may be associated with Autosomal dominant hypophosphatemic rickets. Accordingly, utilities of GAM2071 include diagnosis, preven-

tion and treatment of Autosomal dominant hypophosphatemic rickets, and of other diseases and clinical conditions associated with PDZK1.

[42752] The function of PDZK1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.PDZRN1 (Accession NP_699202.1) is another GAM2071 target gene, herein designated TARGET GENE. PDZRN1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PDZRN1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PDZRN1 BINDING SITE, designated SEQ ID:17567, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42753] Another function of GAM2071 is therefore inhibition of PDZRN1 (Accession NP_699202.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PDZRN1.

[42754] PEGASUS (Accession NP_071911.2) is another GAM2071 target gene, herein designated TARGET GENE. PEGASUS

BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PEGASUS, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PEGASUS BINDING SITE, designated SEQ ID:13389, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42755] Another function of GAM2071 is therefore inhibition of PEGASUS (Accession NP_071911.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PEGASUS.

[42756] Pellino homolog 1 (drosophila) (PELI1, Accession NP_065702.2) is another GAM2071 target gene, herein designated TARGET GENE. PELI1 BINDING SITE1 through PELI1 BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by PELI1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PELI1 BINDING SITE1 through PELI1 BINDING SITE3, designated SEQ ID:18182, SEQ ID:430 and SEQ ID:13801 re-

spectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42757] Another function of GAM2071 is therefore inhibition of Pellino homolog 1 (drosophila) (PELI1, Accession NP_065702.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PELI1.

[42758] Period homolog 2 (drosophila) (PER2, Accession NP_073728.1) is another GAM2071 target gene, herein designated TARGET GENE. PER2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PER2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PER2 BINDING SITE, designated SEQ ID:6602, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42759] Another function of GAM2071 is therefore inhibition of Period homolog 2 (drosophila) (PER2, Accession NP_073728.1), a gene which Period homolog 2; putative circadian clock protein; has a PAS dimerization domain and therefore may be associated with Familial advanced

sleep- phase syndrome. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Familial advanced sleep- phase syndrome, and of other diseases and clinical conditions associated with PER2.

[42760] The function of PER2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Phosphoribosylformylglycinamidine synthase (fgar amidotransferase) (PFAS, Accession NP_036525.1) is another GAM2071 target gene, herein designated TARGET GENE. PFAS BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PFAS, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PFAS BINDING SITE, designated SEQ ID:16519, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42761] Another function of GAM2071 is therefore inhibition of Phosphoribosylformylglycinamidine synthase (fgar amidotransferase) (PFAS, Accession NP_036525.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and

treatment of diseases and clinical conditions associated with PFAS.

[42762] Polymeric immunoglobulin receptor (PIGR, Accession NP_002635.2) is another GAM2071 target gene, herein designated TARGET GENE. PIGR BINDING SITE1 and PIGR BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by PIGR, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PIGR BINDING SITE1 and PIGR BINDING SITE2, designated SEQ ID:5370 and SEQ ID:8350 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42763] Another function of GAM2071 is therefore inhibition of Polymeric immunoglobulin receptor (PIGR, Accession NP_002635.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PIGR.

[42764] Phosphoinositide-3-kinase, class 2, beta polypeptide (PIK3C2B, Accession NP_002637.2) is another GAM2071 target gene, herein designated TARGET GENE. PIK3C2B BINDING SITE is a target binding site found in the 3` un-

translated region of mRNA encoded by PIK3C2B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PIK3C2B BINDING SITE, designated SEQ ID:15277, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42765] Another function of GAM2071 is therefore inhibition of Phosphoinositide-3-kinase, class 2, beta polypeptide (PIK3C2B, Accession NP_002637.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PIK3C2B.

[42766] Phosphoinositide-3-kinase, catalytic, delta polypeptide (PIK3CD, Accession NP_005017.2) is another GAM2071 target gene, herein designated TARGET GENE. PIK3CD BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PIK3CD, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PIK3CD BINDING SITE, designated SEQ ID:4771, to the nucleotide sequence of GAM2071 RNA, herein designated

GAM RNA, also designated SEQ ID:371.

[42767] Another function of GAM2071 is therefore inhibition of Phosphoinositide-3-kinase, catalytic, delta polypeptide (PIK3CD, Accession NP_005017.2), a gene which regulating cell growth. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PIK3CD.

[42768] The function of PIK3CD and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.PILRB (Accession NP_778212.2) is another GAM2071 target gene, herein designated TARGET GENE. PILRB BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PILRB, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PILRB BINDING SITE, designated SEQ ID:15120, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42769] Another function of GAM2071 is therefore inhibition of PILRB (Accession NP_778212.2) . Accordingly, utilities of

GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PILRB.

[42770] PILRB (Accession NP_038468.3) is another GAM2071 target gene, herein designated TARGET GENE. PILRB BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PILRB, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PILRB BINDING SITE, designated SEQ ID:15120, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42771] Another function of GAM2071 is therefore inhibition of PILRB (Accession NP_038468.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PILRB.

[42772] PILRB (Accession NP_839956.1) is another GAM2071 target gene, herein designated TARGET GENE. PILRB BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PILRB, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide se-

quences of PILRB BINDING SITE, designated SEQ ID:15120, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42773] Another function of GAM2071 is therefore inhibition of PILRB (Accession NP_839956.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PILRB.

[42774] Phosphatidylinositol-4-phosphate 5-kinase, type i, gamma (PIP5K1C, Accession NP_036530.1) is another GAM2071 target gene, herein designated TARGET GENE. PIP5K1C BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PIP5K1C, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PIP5K1C BINDING SITE, designated SEQ ID:1328, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42775] Another function of GAM2071 is therefore inhibition of Phosphatidylinositol-4-phosphate 5-kinase, type i, gamma (PIP5K1C, Accession NP_036530.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and

treatment of diseases and clinical conditions associated with PIP5K1C.

[42776] Phosphatidylinositol-4-phosphate 5-kinase, type i, gamma (PIP5K1C, Accession XP_047620.2) is another GAM2071 target gene, herein designated TARGET GENE. PIP5K1C BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PIP5K1C, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PIP5K1C BINDING SITE, designated SEQ ID:1328, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42777] Another function of GAM2071 is therefore inhibition of Phosphatidylinositol-4-phosphate 5-kinase, type i, gamma (PIP5K1C, Accession XP_047620.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PIP5K1C.

[42778] Phosphotidylinositol transfer protein, beta (PITPNB, Accession NP_036531.1) is another GAM2071 target gene, herein designated TARGET GENE. PITPNB BINDING SITE is a

target binding site found in the 3` untranslated region of mRNA encoded by PITPNB, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PITPNB BINDING SITE, designated SEQ ID:19285, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42779] Another function of GAM2071 is therefore inhibition of Phosphotidylinositol transfer protein, beta (PITPNB, Accession NP_036531.1), a gene which catalyzes the transfer of ptdins and phosphatidylcholine between membranes. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PITPNB.

[42780] The function of PITPNB and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM354.1.Phosphomannomutase 2 (PMM2, Accession NP_000294.1) is another GAM2071 target gene, herein designated TARGET GENE. PMM2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PMM2, corresponding to a target binding site

such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PMM2 BINDING SITE, designated SEQ ID:1676, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42781] Another function of GAM2071 is therefore inhibition of Phosphomannomutase 2 (PMM2, Accession NP_000294.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PMM2.

[42782] Paraneoplastic antigen ma2 (PNMA2, Accession NP_009188.1) is another GAM2071 target gene, herein designated TARGET GENE. PNMA2 BINDING SITE1 and PNMA2 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by PNMA2, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PNMA2 BINDING SITE1 and PNMA2 BINDING SITE2, designated SEQ ID:11236 and SEQ ID:11189 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42783] Another function of GAM2071 is therefore inhibition of Paraneoplastic antigen ma2 (PNMA2, Accession NP_009188.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PNMA2.

[42784] Protein o-fucosyltransferase 1 (POFUT1, Accession NP_056167.1) is another GAM2071 target gene, herein designated TARGET GENE. POFUT1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by POFUT1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of POFUT1 BINDING SITE, designated SEQ ID:1760, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42785] Another function of GAM2071 is therefore inhibition of Protein o-fucosyltransferase 1 (POFUT1, Accession NP_056167.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with POFUT1.

[42786] Polymerase (dna directed), epsilon 3 (p17 subunit) (POLE3, Accession NP_059139.2) is another GAM2071 target gene,

herein designated TARGET GENE. POLE3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by POLE3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of POLE3 BINDING SITE, designated SEQ ID:5665, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42787] Another function of GAM2071 is therefore inhibition of Polymerase (dna directed), epsilon 3 (p17 subunit) (POLE3, Accession NP_059139.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with POLE3.

[42788] Polymerase (rna) ii (dna directed) polypeptide d (POLR2D, Accession NP_004796.1) is another GAM2071 target gene, herein designated TARGET GENE. POLR2D BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by POLR2D, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of POLR2D BINDING SITE, designated SEQ ID:11282, to the nucleotide se-

quence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42789] Another function of GAM2071 is therefore inhibition of Polymerase (rna) ii (dna directed) polypeptide d (POLR2D, Accession NP_004796.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with POLR2D.

[42790] Paraoxonase 1 (PON1, Accession NP_000437.3) is another GAM2071 target gene, herein designated TARGET GENE. PON1 BINDING SITE1 and PON1 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by PON1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PON1 BINDING SITE1 and PON1 BINDING SITE2, designated SEQ ID:19429 and SEQ ID:1117 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42791] Another function of GAM2071 is therefore inhibition of Paraoxonase 1 (PON1, Accession NP_000437.3), a gene which hydrolyzes the toxic metabolites of a variety of organophosphorus insecticides. Accordingly, utilities of

GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PON1.

[42792] The function of PON1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Pou domain, class 2, transcription factor 3 (POU2F3, Accession NP_055167.1) is another GAM2071 target gene, herein designated TARGET GENE. POU2F3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by POU2F3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of POU2F3 BINDING SITE, designated SEQ ID:7036, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42793] Another function of GAM2071 is therefore inhibition of Pou domain, class 2, transcription factor 3 (POU2F3, Accession NP_055167.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with POU2F3.

[42794] Ptprf interacting protein, binding protein 1 (liprin beta 1) (PPFIBP1, Accession NP_003613.2) is another GAM2071

target gene, herein designated TARGET GENE. PPFIBP1 BINDING SITE1 and PPFIBP1 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by PPFIBP1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPFIBP1 BINDING SITE1 and PPFIBP1 BINDING SITE2, designated SEQ ID:8861 and SEQ ID:5523 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42795] Another function of GAM2071 is therefore inhibition of Ptprf interacting protein, binding protein 1 (liprin beta 1) (PPFIBP1, Accession NP_003613.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPFIBP1.

[42796] Peptidylprolyl isomerase d (cyclophilin d) (PPID, Accession NP_005029.1) is another GAM2071 target gene, herein designated TARGET GENE. PPID BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PPID, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III

of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPID BINDING SITE, designated SEQ ID:3110, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42797] Another function of GAM2071 is therefore inhibition of Peptidylprolyl isomerase d (cyclophilin d) (PPID, Accession NP_005029.1), a gene which catalyzes the cis- trans isomerization of proline imidic peptide bonds in oligopeptides. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPID.

[42798] The function of PPID and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.Peptidylprolyl isomerase (cyclophilin)-like 2 (PPIL2, Accession NP_055152.1) is another GAM2071 target gene, herein designated TARGET GENE. PPIL2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PPIL2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide se-

quences of PPIL2 BINDING SITE, designated SEQ ID:18677, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42799] Another function of GAM2071 is therefore inhibition of Peptidylprolyl isomerase (cyclophilin)-like 2 (PPIL2, Accession NP_055152.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPIL2.

[42800] Protein phosphatase 1, regulatory (inhibitor) subunit 12b (PPP1R12B, Accession NP_115288.1) is another GAM2071 target gene, herein designated TARGET GENE. PPP1R12B BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PPP1R12B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPP1R12B BINDING SITE, designated SEQ ID:14820, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42801] Another function of GAM2071 is therefore inhibition of Protein phosphatase 1, regulatory (inhibitor) subunit 12b (PPP1R12B, Accession NP_115288.1) . Accordingly, utili-

ties of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPP1R12B.

[42802] Protein phosphatase 1, regulatory (inhibitor) subunit 12b (PPP1R12B, Accession NP_002472.1) is another GAM2071 target gene, herein designated TARGET GENE. PPP1R12B BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by PPP1R12B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPP1R12B BINDING SITE, designated SEQ ID:14820, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42803] Another function of GAM2071 is therefore inhibition of Protein phosphatase 1, regulatory (inhibitor) subunit 12b (PPP1R12B, Accession NP_002472.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPP1R12B.

[42804] Protein phosphatase 2 (formerly 2a), regulatory subunit a (pr 65), beta isoform (PPP2R1B, Accession NP_002707.2)

is another GAM2071 target gene, herein designated TARGET GENE. PPP2R1B BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PPP2R1B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PPP2R1B BINDING SITE, designated SEQ ID:8962, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42805] Another function of GAM2071 is therefore inhibition of Protein phosphatase 2 (formerly 2a), regulatory subunit a (pr 65), beta isoform (PPP2R1B, Accession NP_002707.2), a gene which is necessary for interaction of the catalytic PP2A- C and variable PP2A- B subunits. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PPP2R1B.

[42806] The function of PPP2R1B and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM94.1.PRDX6 (Accession NP_004896.1) is another GAM2071 target gene, herein designated TARGET GENE.

PRDX6 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PRDX6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PRDX6 BINDING SITE, designated SEQ ID:19006, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42807] Another function of GAM2071 is therefore inhibition of PRDX6 (Accession NP_004896.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PRDX6.

[42808] Primase, polypeptide 2a, 58kda (PRIM2A, Accession NP_000938.1) is another GAM2071 target gene, herein designated TARGET GENE. PRIM2A BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PRIM2A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PRIM2A BINDING SITE, designated SEQ ID:12707, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42809] Another function of GAM2071 is therefore inhibition of Primase, polypeptide 2a, 58kda (PRIM2A, Accession NP_000938.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PRIM2A.

[42810] Protein kinase, lysine deficient 3 (PRKWNK3, Accession NP_065973.1) is another GAM2071 target gene, herein designated TARGET GENE. PRKWNK3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PRKWNK3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PRKWNK3 BINDING SITE, designated SEQ ID:5524, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42811] Another function of GAM2071 is therefore inhibition of Protein kinase, lysine deficient 3 (PRKWNK3, Accession NP_065973.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PRKWNK3.

[42812] Protein kinase, y-linked (PRKY, Accession NP_002751.1) is another GAM2071 target gene, herein designated TARGET

GENE. PRKY BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PRKY, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PRKY BINDING SITE, designated SEQ ID:1958, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42813] Another function of GAM2071 is therefore inhibition of Protein kinase, y-linked (PRKY, Accession NP_002751.1), a gene which is a putative protein kinase. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PRKY.

[42814] The function of PRKY and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM72.1.Prion protein 2 (dublet) (PRND, Accession NP_036541.1) is another GAM2071 target gene, herein designated TARGET GENE. PRND BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PRND, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III

of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PRND BINDING SITE, designated SEQ ID:7084, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42815] Another function of GAM2071 is therefore inhibition of Prion protein 2 (dublet) (PRND, Accession NP_036541.1), a gene which is similar to prion protein PRNP. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PRND.

[42816] The function of PRND and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM116.1.PRO0159 (Accession NP_054837.1) is another GAM2071 target gene, herein designated TARGET GENE. PRO0159 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by PRO0159, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PRO0159 BINDING SITE, designated SEQ ID:4857, to the nucleotide sequence of GAM2071

RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42817] Another function of GAM2071 is therefore inhibition of PRO0159 (Accession NP_054837.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PRO0159.

[42818] PRO0297 (Accession NP_054800.1) is another GAM2071 target gene, herein designated TARGET GENE. PRO0297 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by PRO0297, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PRO0297 BINDING SITE, designated SEQ ID:1504, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42819] Another function of GAM2071 is therefore inhibition of PRO0297 (Accession NP_054800.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PRO0297.

[42820] PRO0365 (Accession NP_054845.1) is another GAM2071 target gene, herein designated TARGET GENE. PRO0365 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by PRO0365, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PRO0365 BINDING SITE, designated SEQ ID:7958, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42821] Another function of GAM2071 is therefore inhibition of PRO0365 (Accession NP_054845.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PRO0365.

[42822] PROM2 (Accession NP_653308.1) is another GAM2071 target gene, herein designated TARGET GENE. PROM2 BINDING SITE is a target binding site found in the 3` un-

translated region of mRNA encoded by PROM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PROM2 BINDING SITE, designated SEQ ID:19427, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42823] Another function of GAM2071 is therefore inhibition of PROM2 (Accession NP_653308.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PROM2.

[42824] Proteasome (prosome, macropain) 26s subunit, non-atpase, 9 (PSMD9, Accession NP_002804.2) is another GAM2071 target gene, herein designated TARGET GENE. PSMD9 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PSMD9, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PSMD9 BINDING SITE, designated SEQ ID:11654, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42825] Another function of GAM2071 is therefore inhibition of

Proteasome (prosome, macropain) 26s subunit, non-atpase, 9 (PSMD9, Accession NP_002804.2), a gene which acts as a regulatory subunit of the 26 proteasome. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PSMD9.

[42826] The function of PSMD9 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.PSME4 (Accession XP_040158.1) is another GAM2071 target gene, herein designated TARGET GENE. PSME4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PSME4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PSME4 BINDING SITE, designated SEQ ID:14216, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42827] Another function of GAM2071 is therefore inhibition of PSME4 (Accession XP_040158.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PSME4.

[42828] Phosphoserine phosphatase (PSPH, Accession NP_004568.1) is another GAM2071 target gene, herein designated TARGET GENE. PSPH BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PSPH, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PSPH BINDING SITE, designated SEQ ID:9102, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42829] Another function of GAM2071 is therefore inhibition of Phosphoserine phosphatase (PSPH, Accession NP_004568.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PSPH.

[42830] Phosphatidylserine synthase 2 (PTDSS2, Accession NP_110410.1) is another GAM2071 target gene, herein designated TARGET GENE. PTDSS2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PTDSS2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the comple-

mentarity of the nucleotide sequences of PTDSS2 BINDING SITE, designated SEQ ID:12204, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42831] Another function of GAM2071 is therefore inhibition of Phosphatidylserine synthase 2 (PTDSS2, Accession NP_110410.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PTDSS2.

[42832] Prostaglandin e synthase (PTGES, Accession NP_004869.1) is another GAM2071 target gene, herein designated TARGET GENE. PTGES BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PTGES, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PTGES BINDING SITE, designated SEQ ID:11575, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42833] Another function of GAM2071 is therefore inhibition of Prostaglandin e synthase (PTGES, Accession NP_004869.1) . Accordingly, utilities of GAM2071 include diagnosis,

prevention and treatment of diseases and clinical conditions associated with PTGES.

[42834] Prostaglandin i2 (prostacyclin) synthase (PTGIS, Accession NP_000952.1) is another GAM2071 target gene, herein designated TARGET GENE. PTGIS BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by PTGIS, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of PTGIS BINDING SITE, designated SEQ ID:11917, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42835] Another function of GAM2071 is therefore inhibition of Prostaglandin i2 (prostacyclin) synthase (PTGIS, Accession NP_000952.1), a gene which catalyzes the isomerization of prostaglandin h2 to prostacyclin (= prostaglandin i2). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with PTGIS.

[42836] The function of PTGIS and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference

to GAM30.1.RAB11-FIP4 (Accession NP_116321.2) is another GAM2071 target gene, herein designated TARGET GENE. RAB11-FIP4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RAB11-FIP4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAB11-FIP4 BINDING SITE, designated SEQ ID:5406, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42837] Another function of GAM2071 is therefore inhibition of RAB11-FIP4 (Accession NP_116321.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAB11-FIP4.

[42838] Rab21, member ras oncogene family (RAB21, Accession NP_055814.1) is another GAM2071 target gene, herein designated TARGET GENE. RAB21 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RAB21, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the

nucleotide sequences of RAB21 BINDING SITE, designated SEQ ID:17172, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42839] Another function of GAM2071 is therefore inhibition of Rab21, member ras oncogene family (RAB21, Accession NP_055814.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAB21.

[42840] Rab33b, member ras oncogene family (RAB33B, Accession NP_112586.1) is another GAM2071 target gene, herein designated TARGET GENE. RAB33B BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RAB33B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAB33B BINDING SITE, designated SEQ ID:15333, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42841] Another function of GAM2071 is therefore inhibition of Rab33b, member ras oncogene family (RAB33B, Accession NP_112586.1) . Accordingly, utilities of GAM2071 include

diagnosis, prevention and treatment of diseases and clinical conditions associated with RAB33B.

[42842] Rab36, member ras oncogene family (RAB36, Accession NP_004905.1) is another GAM2071 target gene, herein designated TARGET GENE. RAB36 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RAB36, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAB36 BINDING SITE, designated SEQ ID:12750, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42843] Another function of GAM2071 is therefore inhibition of Rab36, member ras oncogene family (RAB36, Accession NP_004905.1), a gene which is involved in protein transport. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAB36.

[42844] The function of RAB36 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Rab39, member ras oncogene family

(RAB39, Accession XP_084662.1) is another GAM2071 target gene, herein designated TARGET GENE. RAB39 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RAB39, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAB39 BINDING SITE, designated SEQ ID:2158, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42845] Another function of GAM2071 is therefore inhibition of Rab39, member ras oncogene family (RAB39, Accession XP_084662.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAB39.

[42846] Rab40c, member ras oncogene family (RAB40C, Accession NP_066991.1) is another GAM2071 target gene, herein designated TARGET GENE. RAB40C BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RAB40C, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAB40C BINDING

SITE, designated SEQ ID:8129, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42847] Another function of GAM2071 is therefore inhibition of Rab40c, member ras oncogene family (RAB40C, Accession NP_066991.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAB40C.

[42848] Rab, member of ras oncogene family-like 2a (RABL2A, Accession NP_038198.1) is another GAM2071 target gene, herein designated TARGET GENE. RABL2A BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by RABL2A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RABL2A BINDING SITE, designated SEQ ID:14847, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42849] Another function of GAM2071 is therefore inhibition of Rab, member of ras oncogene family-like 2a (RABL2A, Accession NP_038198.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases

and clinical conditions associated with RABL2A.

[42850] Rab, member of ras oncogene family-like 2b (RABL2B, Accession NP_009012.1) is another GAM2071 target gene, herein designated TARGET GENE. RABL2B BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RABL2B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RABL2B BINDING SITE, designated SEQ ID:14847, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42851] Another function of GAM2071 is therefore inhibition of Rab, member of ras oncogene family-like 2b (RABL2B, Accession NP_009012.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RABL2B.

[42852] Rad52 homolog (s. cerevisiae) (RAD52, Accession NP_602295.1) is another GAM2071 target gene, herein designated TARGET GENE. RAD52 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by RAD52, corresponding to a target binding site such as BINDING SITE I, BIND-

ING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAD52 BINDING SITE, designated SEQ ID:4266, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42853] Another function of GAM2071 is therefore inhibition of Rad52 homolog (s. cerevisiae) (RAD52, Accession NP_602295.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAD52.

[42854] Rad52 homolog (s. cerevisiae) (RAD52, Accession NP_002870.2) is another GAM2071 target gene, herein designated TARGET GENE. RAD52 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by RAD52, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAD52 BINDING SITE, designated SEQ ID:4266, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42855] Another function of GAM2071 is therefore inhibition of Rad52 homolog (s. cerevisiae) (RAD52, Accession

NP_002870.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAD52.

[42856] Rad52 homolog (s. cerevisiae) (RAD52, Accession NP_602296.1) is another GAM2071 target gene, herein designated TARGET GENE. RAD52 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by RAD52, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAD52 BINDING SITE, designated SEQ ID:4266, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42857] Another function of GAM2071 is therefore inhibition of Rad52 homolog (s. cerevisiae) (RAD52, Accession NP_602296.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAD52.

[42858] Rad52 homolog (s. cerevisiae) (RAD52, Accession NP_602294.1) is another GAM2071 target gene, herein designated TARGET GENE. RAD52 BINDING SITE is a target binding site found in the 3` untranslated region of multi-

ple transcripts of mRNA encoded by RAD52, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAD52 BINDING SITE, designated SEQ ID:4266, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42859] Another function of GAM2071 is therefore inhibition of Rad52 homolog (s. cerevisiae) (RAD52, Accession NP_602294.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAD52.

[42860] RAI (Accession NP_006654.1) is another GAM2071 target gene, herein designated TARGET GENE. RAI BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by RAI, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAI BINDING SITE, designated SEQ ID:17223, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42861] Another function of GAM2071 is therefore inhibition of

RAI (Accession NP_006654.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAI.

[42862] Retinoic acid induced 3 (RAI3, Accession NP_003970.1) is another GAM2071 target gene, herein designated TARGET GENE. RAI3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RAI3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RAI3 BINDING SITE, designated SEQ ID:16116, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42863] Another function of GAM2071 is therefore inhibition of Retinoic acid induced 3 (RAI3, Accession NP_003970.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RAI3.

[42864] Ras association (ralgds/af-6) domain family 2 (RASSF2, Accession NP_055552.1) is another GAM2071 target gene, herein designated TARGET GENE. RASSF2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by RASSF2, cor-

responding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RASSF2 BINDING SITE, designated SEQ ID:7664, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42865] Another function of GAM2071 is therefore inhibition of Ras association (ralgds/af-6) domain family 2 (RASSF2, Accession NP_055552.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RASSF2.

[42866] Ras association (ralgds/af-6) domain family 2 (RASSF2, Accession NP_739580.1) is another GAM2071 target gene, herein designated TARGET GENE. RASSF2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by RASSF2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RASSF2 BINDING SITE, designated SEQ ID:7664, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42867] Another function of GAM2071 is therefore inhibition of

Ras association (ralgds/af-6) domain family 2 (RASSF2, Accession NP_739580.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RASSF2.

[42868] Ras association (ralgds/af-6) domain family 2 (RASSF2, Accession NP_739579.1) is another GAM2071 target gene, herein designated TARGET GENE. RASSF2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by RASSF2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RASSF2 BINDING SITE, designated SEQ ID:7664, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42869] Another function of GAM2071 is therefore inhibition of Ras association (ralgds/af-6) domain family 2 (RASSF2, Accession NP_739579.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RASSF2.

[42870] RCBTB1 (Accession NP_060661.2) is another GAM2071 target gene, herein designated TARGET GENE. RCBTB1 BINDING SITE is a target binding site found in the 5` un-

translated region of mRNA encoded by RCBTB1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RCBTB1 BINDING SITE, designated SEQ ID:3049, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42871] Another function of GAM2071 is therefore inhibition of RCBTB1 (Accession NP_060661.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RCBTB1.

[42872] Regulator of g-protein signalling 11 (RGS11, Accession NP_003825.1) is another GAM2071 target gene, herein designated TARGET GENE. RGS11 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RGS11, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RGS11 BINDING SITE, designated SEQ ID:7393, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42873] Another function of GAM2071 is therefore inhibition of Regulator of g-protein signalling 11 (RGS11, Accession NP_003825.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RGS11.

[42874] Rhesus blood group, d antigen (RHD, Accession NP_057208.2) is another GAM2071 target gene, herein designated TARGET GENE. RHD BINDING SITE1 and RHD BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by RHD, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RHD BINDING SITE1 and RHD BINDING SITE2, designated SEQ ID:442 and SEQ ID:8756 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42875] Another function of GAM2071 is therefore inhibition of Rhesus blood group, d antigen (RHD, Accession NP_057208.2), a gene which Major antigen of the RH system. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RHD.

[42876] The function of RHD and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM161.1.Rhesus blood group, d antigen (RHD, Accession NP_057309.2) is another GAM2071 target gene, herein designated TARGET GENE. RHD BINDING SITE1 and RHD BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by RHD, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RHD BINDING SITE1 and RHD BINDING SITE2, designated SEQ ID:8756 and SEQ ID:442 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42877] Another function of GAM2071 is therefore inhibition of Rhesus blood group, d antigen (RHD, Accession NP_057309.2), a gene which Major antigen of the RH system. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RHD.

[42878] The function of RHD and its association with various diseases and clinical conditions, has been established by

previous studies, as described hereinabove with reference to GAM161.1.RHPN2 (Accession NP_149094.2) is another GAM2071 target gene, herein designated TARGET GENE. RHPN2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RHPN2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RHPN2 BINDING SITE, designated SEQ ID:5481, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42879] Another function of GAM2071 is therefore inhibition of RHPN2 (Accession NP_149094.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RHPN2.

[42880] RNF137 (Accession NP_060543.4) is another GAM2071 target gene, herein designated TARGET GENE. RNF137 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RNF137, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RNF137 BINDING SITE, designated SEQ ID:8861, to the nu-

cleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42881] Another function of GAM2071 is therefore inhibition of RNF137 (Accession NP_060543.4) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RNF137.

[42882] Ring finger protein 19 (RNF19, Accession NP_056250.2) is another GAM2071 target gene, herein designated TARGET GENE. RNF19 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by RNF19, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RNF19 BINDING SITE, designated SEQ ID:14309, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42883] Another function of GAM2071 is therefore inhibition of Ring finger protein 19 (RNF19, Accession NP_056250.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RNF19.

[42884] RPP30 (Accession NP_006404.1) is another GAM2071 tar-

get gene, herein designated TARGET GENE. RPP30 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by RPP30, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of RPP30 BINDING SITE, designated SEQ ID:3259, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42885] Another function of GAM2071 is therefore inhibition of RPP30 (Accession NP_006404.1), a gene which is a component of ribonuclease p that processes 5' ends of precursor tRNAs. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with RPP30.

[42886] The function of RPP30 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.S100A15 (Accession NP_789793.1) is another GAM2071 target gene, herein designated TARGET GENE. S100A15 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by S100A15, corresponding to a target binding site such as

BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of S100A15 BINDING SITE, designated SEQ ID:18561, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42887] Another function of GAM2071 is therefore inhibition of S100A15 (Accession NP_789793.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with S100A15.

[42888] SBLF (Accession NP_006864.2) is another GAM2071 target gene, herein designated TARGET GENE. SBLF BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SBLF, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SBLF BINDING SITE, designated SEQ ID:14250, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42889] Another function of GAM2071 is therefore inhibition of SBLF (Accession NP_006864.2) . Accordingly, utilities of

GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SBLF.

[42890] SCAMP-4 (Accession NP_524558.1) is another GAM2071 target gene, herein designated TARGET GENE. SCAMP-4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SCAMP-4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SCAMP-4 BINDING SITE, designated SEQ ID:19434, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42891] Another function of GAM2071 is therefore inhibition of SCAMP-4 (Accession NP_524558.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SCAMP-4.

[42892] Scan domain containing 2 (SCAND2, Accession NP_071333.2) is another GAM2071 target gene, herein designated TARGET GENE. SCAND2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SCAND2, corresponding to a target binding site such as BINDING SITE I,

BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SCAND2 BINDING SITE, designated SEQ ID:16790, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42893] Another function of GAM2071 is therefore inhibition of Scan domain containing 2 (SCAND2, Accession NP_071333.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SCAND2.

[42894] Scavenger receptor class f, member 1 (SCARF1, Accession NP_003684.1) is another GAM2071 target gene, herein designated TARGET GENE. SCARF1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SCARF1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SCARF1 BINDING SITE, designated SEQ ID:12384, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42895] Another function of GAM2071 is therefore inhibition of Scavenger receptor class f, member 1 (SCARF1, Accession

NP_003684.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SCARF1.

[42896] SCN3B (Accession NP_060870.1) is another GAM2071 target gene, herein designated TARGET GENE. SCN3B BINDING SITE1 and SCN3B BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by SCN3B, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SCN3B BINDING SITE1 and SCN3B BINDING SITE2, designated SEQ ID:1471 and SEQ ID:9932 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42897] Another function of GAM2071 is therefore inhibition of SCN3B (Accession NP_060870.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SCN3B.

[42898] Stromal cell-derived factor 2 (SDF2, Accession NP_008854.2) is another GAM2071 target gene, herein designated TARGET GENE. SDF2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA

encoded by SDF2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SDF2 BINDING SITE, designated SEQ ID:4852, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42899] Another function of GAM2071 is therefore inhibition of Stromal cell-derived factor 2 (SDF2, Accession NP_008854.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SDF2.

[42900] SDS-RS1 (Accession NP_612441.1) is another GAM2071 target gene, herein designated TARGET GENE. SDS-RS1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by SDS-RS1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SDS-RS1 BINDING SITE, designated SEQ ID:2100, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42901] Another function of GAM2071 is therefore inhibition of

SDS-RS1 (Accession NP_612441.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SDS-RS1.

[42902] Secreted and transmembrane 1 (SECTM1, Accession NP_002995.1) is another GAM2071 target gene, herein designated TARGET GENE. SECTM1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SECTM1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SECTM1 BINDING SITE, designated SEQ ID:14404, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42903] Another function of GAM2071 is therefore inhibition of Secreted and transmembrane 1 (SECTM1, Accession NP_002995.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SECTM1.

[42904] Spondyloepiphyseal dysplasia, late (SEDL, Accession NP_055378.1) is another GAM2071 target gene, herein designated TARGET GENE. SEDL BINDING SITE1 through

SEDL BINDING SITE3 are target binding sites found in untranslated regions of mRNA encoded by SEDL, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SEDL BINDING SITE1 through SEDL BINDING SITE3, designated SEQ ID:7261, SEQ ID:13400 and SEQ ID:16842 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42905] Another function of GAM2071 is therefore inhibition of Spondyloepiphyseal dysplasia, late (SEDL, Accession NP_055378.1), a gene which may play role in vesicular transport from endoplasmic reticulum to golgi. and therefore may be associated with Spondyloepiphyseal dysplasia. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Spondyloepiphyseal dysplasia, and of other diseases and clinical conditions associated with SEDL.

[42906] The function of SEDL and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Sel-1 suppressor of lin-12-like (c. elegans) (SEL1L, Accession NP_005056.3) is another GAM2071 tar-

get gene, herein designated TARGET GENE. SEL1L BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SEL1L, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SEL1L BINDING SITE, designated SEQ ID:16250, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42907] Another function of GAM2071 is therefore inhibition of Sel-1 suppressor of lin-12-like (c. elegans) (SEL1L, Accession NP_005056.3), a gene which may play a role in notch signaling (by similarity). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SEL1L.

[42908] The function of SEL1L and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM193.1.Selenoprotein n, 1 (SEPN1, Accession NP_065184.1) is another GAM2071 target gene, herein designated TARGET GENE. SEPN1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SEPN1, corresponding to a target binding site

such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SEPN1 BINDING SITE, designated SEQ ID:1799, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42909] Another function of GAM2071 is therefore inhibition of Selenoprotein n, 1 (SEPN1, Accession NP_065184.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SEPN1.

[42910] Small edrk-rich factor 1a (telomeric) (SERF1A, Accession NP_068802.1) is another GAM2071 target gene, herein designated TARGET GENE. SERF1A BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SERF1A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SERF1A BINDING SITE, designated SEQ ID:11123, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42911] Another function of GAM2071 is therefore inhibition of

Small edrk-rich factor 1a (telomeric) (SERF1A, Accession NP_068802.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SERF1A.

[42912] Small edrk-rich factor 1b (centromeric) (SERF1B, Accession NP_075267.1) is another GAM2071 target gene, herein designated TARGET GENE. SERF1B BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SERF1B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SERF1B BINDING SITE, designated SEQ ID:11123, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42913] Another function of GAM2071 is therefore inhibition of Small edrk-rich factor 1b (centromeric) (SERF1B, Accession NP_075267.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SERF1B.

[42914] Serine (or cysteine) proteinase inhibitor, clade b (ovalbumin), member 9 (SERPINB9, Accession NP_004146.1) is another GAM2071 target gene, herein

designated TARGET GENE. SERPINB9 BINDING SITE1 and SERPINB9 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by SERPINB9, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SERPINB9 BINDING SITE1 and SERPINB9 BINDING SITE2, designated SEQ ID:437 and SEQ ID:4057 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42915] Another function of GAM2071 is therefore inhibition of Serine (or cysteine) proteinase inhibitor, clade b (ovalbumin), member 9 (SERPINB9, Accession NP_004146.1), a gene which may be a serpin serine protease inhibitor that interacts with granzyme B (GZMB). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SERPINB9.

[42916] The function of SERPINB9 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM88.2.Sh3-domain binding protein 2 (SH3BP2, Accession NP_003014.2) is another GAM2071 target gene,

herein designated TARGET GENE. SH3BP2 BINDING SITE1 and SH3BP2 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by SH3BP2, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SH3BP2 BINDING SITE1 and SH3BP2 BINDING SITE2, designated SEQ ID:18716 and SEQ ID:12957 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42917] Another function of GAM2071 is therefore inhibition of Sh3-domain binding protein 2 (SH3BP2, Accession NP_003014.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SH3BP2.

[42918] Sialic acid binding ig-like lectin 8 (SIGLEC8, Accession NP_055257.1) is another GAM2071 target gene, herein designated TARGET GENE. SIGLEC8 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SIGLEC8, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SIGLEC8 BIND-

ING SITE, designated SEQ ID:3441, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42919] Another function of GAM2071 is therefore inhibition of Sialic acid binding ig-like lectin 8 (SIGLEC8, Accession NP_055257.1), a gene which is a cell adhesion molecule for postnatal neural development. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SIGLEC8.

[42920] The function of SIGLEC8 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM63.1.Solute carrier family 12 (potassium/chloride transporters), member 8 (SLC12A8, Accession NP_078904.1) is another GAM2071 target gene, herein designated TARGET GENE. SLC12A8 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SLC12A8, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC12A8 BINDING SITE, designated SEQ ID:18425, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA,

also designated SEQ ID:371.

[42921] Another function of GAM2071 is therefore inhibition of Solute carrier family 12 (potassium/chloride transporters), member 8 (SLC12A8, Accession NP_078904.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC12A8.

[42922] Solute carrier family 13 (sodium/sulfate symporters), member 1 (SLC13A1, Accession NP_071889.2) is another GAM2071 target gene, herein designated TARGET GENE. SLC13A1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SLC13A1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC13A1 BINDING SITE, designated SEQ ID:15679, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42923] Another function of GAM2071 is therefore inhibition of Solute carrier family 13 (sodium/sulfate symporters), member 1 (SLC13A1, Accession NP_071889.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associ-

ated with SLC13A1.

[42924] Solute carrier family 14 (urea transporter), member 2 (SLC14A2, Accession NP_009094.2) is another GAM2071 target gene, herein designated TARGET GENE. SLC14A2 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by SLC14A2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC14A2 BINDING SITE, designated SEQ ID:18700, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42925] Another function of GAM2071 is therefore inhibition of Solute carrier family 14 (urea transporter), member 2 (SLC14A2, Accession NP_009094.2), a gene which is a renal urea transporter 2. and therefore may be associated with Orthostatic hypotension. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Orthostatic hypotension, and of other diseases and clinical conditions associated with SLC14A2.

[42926] The function of SLC14A2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference

to GAM97.1.Solute carrier family 16 (monocarboxylic acid transporters), member 4 (SLC16A4, Accession NP_004687.1) is another GAM2071 target gene, herein designated TARGET GENE. SLC16A4 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SLC16A4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC16A4 BINDING SITE, designated SEQ ID:20157, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42927] Another function of GAM2071 is therefore inhibition of Solute carrier family 16 (monocarboxylic acid transporters), member 4 (SLC16A4, Accession NP_004687.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC16A4.

[42928] Solute carrier family 16 (monocarboxylic acid transporters), member 6 (SLC16A6, Accession NP_004685.1) is another GAM2071 target gene, herein designated TARGET GENE. SLC16A6 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by

SLC16A6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC16A6 BINDING SITE, designated SEQ ID:517, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42929] Another function of GAM2071 is therefore inhibition of Solute carrier family 16 (monocarboxylic acid transporters), member 6 (SLC16A6, Accession NP_004685.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC16A6.

[42930] Solute carrier family 25 (mitochondrial carrier; citrate transporter), member 1 (SLC25A1, Accession NP_005975.1) is another GAM2071 target gene, herein designated TARGET GENE. SLC25A1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SLC25A1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC25A1 BINDING SITE, designated SEQ ID:18982, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA,

also designated SEQ ID:371.

[42931] Another function of GAM2071 is therefore inhibition of Solute carrier family 25 (mitochondrial carrier; citrate transporter), member 1 (SLC25A1, Accession NP_005975.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC25A1.

[42932] SLC30A5 (Accession NP_076960.1) is another GAM2071 target gene, herein designated TARGET GENE. SLC30A5 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SLC30A5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC30A5 BINDING SITE, designated SEQ ID:1341, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42933] Another function of GAM2071 is therefore inhibition of SLC30A5 (Accession NP_076960.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC30A5.

[42934] SLC35B2 (Accession NP_835361.1) is another GAM2071 target gene, herein designated TARGET GENE. SLC35B2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SLC35B2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC35B2 BINDING SITE, designated SEQ ID:17255, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42935] Another function of GAM2071 is therefore inhibition of SLC35B2 (Accession NP_835361.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC35B2.

[42936] SLC35B2 (Accession XP_300918.1) is another GAM2071 target gene, herein designated TARGET GENE. SLC35B2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SLC35B2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nu-

cleotide sequences of SLC35B2 BINDING SITE, designated SEQ ID:17255, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42937] Another function of GAM2071 is therefore inhibition of SLC35B2 (Accession XP_300918.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC35B2.

[42938] SLC35E2 (Accession XP_049733.6) is another GAM2071 target gene, herein designated TARGET GENE. SLC35E2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SLC35E2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC35E2 BINDING SITE, designated SEQ ID:12300, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42939] Another function of GAM2071 is therefore inhibition of SLC35E2 (Accession XP_049733.6) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

SLC35E2.

[42940] Solute carrier family 39 (zinc transporter), member 1 (SLC39A1, Accession NP_055252.2) is another GAM2071 target gene, herein designated TARGET GENE. SLC39A1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by SLC39A1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC39A1 BINDING SITE, designated SEQ ID:19430, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42941] Another function of GAM2071 is therefore inhibition of Solute carrier family 39 (zinc transporter), member 1 (SLC39A1, Accession NP_055252.2), a gene which is a divalent (zinc/iron) metal ion transporter. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC39A1.

[42942] The function of SLC39A1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM175.1.Solute carrier family 4, sodium bicarbonate

cotransporter, member 4 (SLC4A4, Accession NP_003750.1) is another GAM2071 target gene, herein designated TARGET GENE. SLC4A4 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by SLC4A4, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC4A4 BINDING SITE, designated SEQ ID:13075, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42943] Another function of GAM2071 is therefore inhibition of Solute carrier family 4, sodium bicarbonate cotransporter, member 4 (SLC4A4, Accession NP_003750.1), a gene which is a sodium bicarbonate cotransporter and therefore may be associated with Proximal renal tubular acidosis, mental retardation, and bilateral glaucoma, cataracts, and band keratopathy. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Proximal renal tubular acidosis, mental retardation, and bilateral glaucoma, cataracts, and band keratopathy, and of other diseases and clinical conditions associated with SLC4A4.

[42944] The function of SLC4A4 and its association with various

diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM96.1.Solute carrier family 6 (neurotransmitter transporter), member 14 (SLC6A14, Accession NP_009162.1) is another GAM2071 target gene, herein designated TARGET GENE. SLC6A14 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SLC6A14, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SLC6A14 BINDING SITE, designated SEQ ID:16741, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42945] Another function of GAM2071 is therefore inhibition of Solute carrier family 6 (neurotransmitter transporter), member 14 (SLC6A14, Accession NP_009162.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SLC6A14.

[42946] SMAC (Accession NP_620308.1) is another GAM2071 target gene, herein designated TARGET GENE. SMAC BINDING SITE1 and SMAC BINDING SITE2 are target binding sites

found in untranslated regions of multiple transcripts of mRNA encoded by SMAC, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SMAC BINDING SITE1 and SMAC BINDING SITE2, designated SEQ ID:1245 and SEQ ID:15275 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42947] Another function of GAM2071 is therefore inhibition of SMAC (Accession NP_620308.1), a gene which promotes apoptosis via caspase activation. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SMAC.

[42948] The function of SMAC and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.Synaptosomal-associated protein, 25kda (SNAP25, Accession NP_570824.1) is another GAM2071 target gene, herein designated TARGET GENE. SNAP25 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SNAP25, corresponding to a target binding site such as

BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SNAP25 BINDING SITE, designated SEQ ID:8525, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42949] Another function of GAM2071 is therefore inhibition of Synaptosomal-associated protein, 25kda (SNAP25, Accession NP_570824.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SNAP25.

[42950] Synaptosomal-associated protein, 25kda (SNAP25, Accession NP_003072.2) is another GAM2071 target gene, herein designated TARGET GENE. SNAP25 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SNAP25, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SNAP25 BINDING SITE, designated SEQ ID:8525, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42951] Another function of GAM2071 is therefore inhibition of

Synaptosomal-associated protein, 25kda (SNAP25, Accession NP_003072.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SNAP25.

[42952] Syntaphilin (SNPH, Accession NP_055538.1) is another GAM2071 target gene, herein designated TARGET GENE. SNPH BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SNPH, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SNPH BINDING SITE, designated SEQ ID:1354, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42953] Another function of GAM2071 is therefore inhibition of Syntaphilin (SNPH, Accession NP_055538.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SNPH.

[42954] Sorting nexin 15 (SNX15, Accession NP_680086.1) is another GAM2071 target gene, herein designated TARGET GENE. SNX15 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of

mRNA encoded by SNX15, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SNX15 BINDING SITE, designated SEQ ID:2728, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42955] Another function of GAM2071 is therefore inhibition of Sorting nexin 15 (SNX15, Accession NP_680086.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SNX15.

[42956] Sorting nexin 15 (SNX15, Accession NP_037438.2) is another GAM2071 target gene, herein designated TARGET GENE. SNX15 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by SNX15, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SNX15 BINDING SITE, designated SEQ ID:2728, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42957] Another function of GAM2071 is therefore inhibition of Sorting nexin 15 (SNX15, Accession NP_037438.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SNX15.

[42958] SNX27 (Accession NP_112180.4) is another GAM2071 target gene, herein designated TARGET GENE. SNX27 BINDING SITE1 and SNX27 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by SNX27, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SNX27 BINDING SITE1 and SNX27 BINDING SITE2, designated SEQ ID:8857 and SEQ ID:1972 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42959] Another function of GAM2071 is therefore inhibition of SNX27 (Accession NP_112180.4) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SNX27.

[42960] Sry (sex determining region y)-box 8 (SOX8, Accession NP_055402.2) is another GAM2071 target gene, herein

designated TARGET GENE. SOX8 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SOX8, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SOX8 BINDING SITE, designated SEQ ID:12214, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42961] Another function of GAM2071 is therefore inhibition of Sry (sex determining region y)-box 8 (SOX8, Accession NP_055402.2), a gene which binds the consensus motif 5'- [at][at]caa[at]g- 3'. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SOX8.

[42962] The function of SOX8 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM842.1.Sialophorin (gpl115, leukosialin, cd43) (SPN, Accession NP_003114.1) is another GAM2071 target gene, herein designated TARGET GENE. SPN BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SPN, corresponding to a target binding

site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SPN BINDING SITE, designated SEQ ID:19300, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42963] Another function of GAM2071 is therefore inhibition of Sialophorin (gpl115, leukosialin, cd43) (SPN, Accession NP_003114.1), a gene which plays a role in the physico-chemical properties of the t- cell surface and in lectin binding. presents carbohydrate ligands to selectins. . and therefore may be associated with Wiskott- aldrich syndrome. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Wiskott- aldrich syndrome, and of other diseases and clinical conditions associated with SPN.

[42964] The function of SPN and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Speckle-type poz protein (SPOP, Accession NP_003554.1) is another GAM2071 target gene, herein designated TARGET GENE. SPOP BINDING SITE is a target binding site found in the 5` untranslated region of mRNA

encoded by SPOP, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SPOP BINDING SITE, designated SEQ ID:7212, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42965] Another function of GAM2071 is therefore inhibition of Speckle-type poz protein (SPOP, Accession NP_003554.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SPOP.

[42966] Scavenger receptor cysteine rich domain containing, group b (4 domains) (SRCRB4D, Accession NP_542782.1) is another GAM2071 target gene, herein designated TARGET GENE. SRCRB4D BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SRCRB4D, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SRCRB4D BINDING SITE, designated SEQ ID:19630, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ

ID:371.

[42967] Another function of GAM2071 is therefore inhibition of Scavenger receptor cysteine rich domain containing, group b (4 domains) (SRCRB4D, Accession NP_542782.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SRCRB4D.

[42968] Sarcalumenin (SRL, Accession XP_064152.3) is another GAM2071 target gene, herein designated TARGET GENE. SRL BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SRL, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SRL BINDING SITE, designated SEQ ID:9910, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42969] Another function of GAM2071 is therefore inhibition of Sarcalumenin (SRL, Accession XP_064152.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SRL.

[42970] Synovial sarcoma translocation, chromosome 18 (SS18,

Accession NP_005628.1) is another GAM2071 target gene, herein designated TARGET GENE. SS18 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SS18, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SS18 BINDING SITE, designated SEQ ID:10975, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42971] Another function of GAM2071 is therefore inhibition of Synovial sarcoma translocation, chromosome 18 (SS18, Accession NP_005628.1), a gene which is a putative transcriptional activator. and therefore is associated with Human synovial sarcomas. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Human synovial sarcomas., and of other diseases and clinical conditions associated with SS18.

[42972] The function of SS18 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.STAF65(gamma) (Accession NP_055675.1) is another GAM2071 target gene, herein designated TARGET

GENE. STAF65(gamma) BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by STAF65(gamma), corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of STAF65(gamma) BINDING SITE, designated SEQ ID:6743, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42973] Another function of GAM2071 is therefore inhibition of STAF65(gamma) (Accession NP_055675.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with STAF65(gamma).

[42974] Signal transducing adaptor molecule (sh3 domain and itam motif) 2 (STAM2, Accession NP_005834.3) is another GAM2071 target gene, herein designated TARGET GENE. STAM2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by STAM2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of STAM2 BINDING SITE, designated SEQ ID:5920, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42975] Another function of GAM2071 is therefore inhibition of Signal transducing adaptor molecule (sh3 domain and itam motif) 2 (STAM2, Accession NP_005834.3) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with STAM2.

[42976] Staufen, rna binding protein (drosophila) (STAU, Accession NP_004593.1) is another GAM2071 target gene, herein designated TARGET GENE. STAU BINDING SITE is a target binding site found in the 5` untranslated region of multiple transcripts of mRNA encoded by STAU, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of STAU BINDING SITE, designated SEQ ID:9365, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42977] Another function of GAM2071 is therefore inhibition of Staufen, rna binding protein (drosophila) (STAU, Accession NP_004593.1), a gene which may play a role in specific positioning of mrnas at given sites in the cell and in stim-

ulating their translation at the site. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with STAU.

[42978] The function of STAU and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM37.1.Six transmembrane epithelial antigen of prostate 2 (STEAP2, Accession NP_694544.1) is another GAM2071 target gene, herein designated TARGET GENE. STEAP2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by STEAP2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of STEAP2 BINDING SITE, designated SEQ ID:1413, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42979] Another function of GAM2071 is therefore inhibition of Six transmembrane epithelial antigen of prostate 2 (STEAP2, Accession NP_694544.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with STEAP2.

[42980] Syntaxin binding protein 6 (amisyn) (STXBP6, Accession NP_054897.4) is another GAM2071 target gene, herein designated TARGET GENE. STXBP6 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by STXBP6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of STXBP6 BINDING SITE, designated SEQ ID:11916, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42981] Another function of GAM2071 is therefore inhibition of Syntaxin binding protein 6 (amisyn) (STXBP6, Accession NP_054897.4) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with STXBP6.

[42982] Synaptotagmin xii (SYT12, Accession NP_808878.1) is another GAM2071 target gene, herein designated TARGET GENE. SYT12 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SYT12, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide se-

quences of SYT12 BINDING SITE, designated SEQ ID:3730, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42983] Another function of GAM2071 is therefore inhibition of Synaptotagmin xii (SYT12, Accession NP_808878.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SYT12.

[42984] Synaptotagmin xiii (SYT13, Accession NP_065877.1) is another GAM2071 target gene, herein designated TARGET GENE. SYT13 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by SYT13, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of SYT13 BINDING SITE, designated SEQ ID:19065, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42985] Another function of GAM2071 is therefore inhibition of Synaptotagmin xiii (SYT13, Accession NP_065877.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with SYT13.

[42986] TADA3L (Accession NP_597814.1) is another GAM2071 target gene, herein designated TARGET GENE. TADA3L BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TADA3L, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TADA3L BINDING SITE, designated SEQ ID:10415, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42987] Another function of GAM2071 is therefore inhibition of TADA3L (Accession NP_597814.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TADA3L.

[42988] Taf11 rna polymerase ii, tata box binding protein (tbp)-associated factor, 28kda (TAF11, Accession NP_005634.1) is another GAM2071 target gene, herein designated TARGET GENE. TAF11 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TAF11, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III

of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TAF11 BINDING SITE, designated SEQ ID:17432, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42989] Another function of GAM2071 is therefore inhibition of Taf11 rna polymerase ii, tata box binding protein (tbp)-associated factor, 28kda (TAF11, Accession NP_005634.1), a gene which plays a central role in mediating promoter responses to various activators and repressors. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TAF11.

[42990] The function of TAF11 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Tap binding protein (tapasin) (TAPBP, Accession NP_003181.3) is another GAM2071 target gene, herein designated TARGET GENE. TAPBP BINDING SITE1 through TAPBP BINDING SITE3 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by TAPBP, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING

SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TAPBP BINDING SITE1 through TAPBP BINDING SITE3, designated SEQ ID:8861, SEQ ID:6086 and SEQ ID:3109 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42991] Another function of GAM2071 is therefore inhibition of Tap binding protein (tapasin) (TAPBP, Accession NP_003181.3), a gene which is involved in MHC class I-restricted antigen processing. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TAPBP.

[42992] The function of TAPBP and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.Tyrosine aminotransferase (TAT, Accession NP_000344.1) is another GAM2071 target gene, herein designated TARGET GENE. TAT BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TAT, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TAT BINDING SITE, designated

SEQ ID:20161, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42993] Another function of GAM2071 is therefore inhibition of Tyrosine aminotransferase (TAT, Accession NP_000344.1), a gene which is tyrosine aminotransferase and strongly similar to rat Rn.9947, which plays a role in gluconeogenesis. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TAT.

[42994] The function of TAT and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Tbc1 domain family, member 5 (TBC1D5, Accession NP_055559.1) is another GAM2071 target gene, herein designated TARGET GENE. TBC1D5 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by TBC1D5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TBC1D5 BINDING SITE, designated SEQ ID:12382, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA,

also designated SEQ ID:371.

[42995] Another function of GAM2071 is therefore inhibition of Tbc1 domain family, member 5 (TBC1D5, Accession NP_055559.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TBC1D5.

[42996] Transcription factor 2, hepatic; lf-b3; variant hepatic nuclear factor (TCF2, Accession NP_006472.1) is another GAM2071 target gene, herein designated TARGET GENE. TCF2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TCF2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TCF2 BINDING SITE, designated SEQ ID:401, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42997] Another function of GAM2071 is therefore inhibition of Transcription factor 2, hepatic; lf-b3; variant hepatic nuclear factor (TCF2, Accession NP_006472.1), a gene which probably binds to the inverted palindrome 5'- gttaatnattaac- 3'. and therefore is associated with Maturity- onset diabetes of the young type 5 (mody5), familial hypoplastic

glomerulocystic kidney disease (gckd). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Maturity- onset diabetes of the young type 5 (mody5), familial hypoplastic glomerulocystic kidney disease (gckd), and of other diseases and clinical conditions associated with TCF2.

[42998] The function of TCF2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM144.1.Teratocarcinoma-derived growth factor 1 (TDGF1, Accession NP_003203.1) is another GAM2071 target gene, herein designated TARGET GENE. TDGF1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TDGF1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TDGF1 BINDING SITE, designated SEQ ID:10005, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[42999] Another function of GAM2071 is therefore inhibition of Teratocarcinoma-derived growth factor 1 (TDGF1, Accession NP_003203.1), a gene which can play a role in the

determination of the epiblastic cells that subsequently give rise to the mesoderm. and therefore may be associated with Forebrain defects. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Forebrain defects, and of other diseases and clinical conditions associated with TDGF1.

[43000] The function of TDGF1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.TERA (Accession NP_067061.1) is another GAM2071 target gene, herein designated TARGET GENE. TERA BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TERA, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TERA BINDING SITE, designated SEQ ID:971, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43001] Another function of GAM2071 is therefore inhibition of TERA (Accession NP_067061.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TERA.

[43002] Telomeric repeat binding factor (nima-interacting) 1 (TERF1, Accession NP_059523.1) is another GAM2071 target gene, herein designated TARGET GENE. TERF1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TERF1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TERF1 BINDING SITE, designated SEQ ID:13870, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43003] Another function of GAM2071 is therefore inhibition of Telomeric repeat binding factor (nima-interacting) 1 (TERF1, Accession NP_059523.1), a gene which negatively regulates telomere length, involves in regulation of the mitotic spindle. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TERF1.

[43004] The function of TERF1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Telomeric repeat binding factor

(nima-interacting) 1 (TERF1, Accession NP_003209.1) is another GAM2071 target gene, herein designated TARGET GENE. TERF1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TERF1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TERF1 BINDING SITE, designated SEQ ID:13870, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43005] Another function of GAM2071 is therefore inhibition of Telomeric repeat binding factor (nima-interacting) 1 (TERF1, Accession NP_003209.1), a gene which negatively regulates telomere length, involves in regulation of the mitotic spindle. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TERF1.

[43006] The function of TERF1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.Telomeric repeat binding factor 2 (TERF2, Accession NP_005643.1) is another GAM2071 target gene,

herein designated TARGET GENE. TERF2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TERF2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TERF2 BINDING SITE, designated SEQ ID:11659, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43007] Another function of GAM2071 is therefore inhibition of Telomeric repeat binding factor 2 (TERF2, Accession NP_005643.1), a gene which plays a key role in the protective activity of telomeres. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TERF2.

[43008] The function of TERF2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM133.2.Transforming growth factor, beta receptor iii (betaglycan, 300kda) (TGFBR3, Accession NP_003234.1) is another GAM2071 target gene, herein designated TARGET GENE. TGFBR3 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

TGFBR3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TGFBR3 BINDING SITE, designated SEQ ID:4831, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43009] Another function of GAM2071 is therefore inhibition of Transforming growth factor, beta receptor iii (betaglycan, 300kda) (TGFBR3, Accession NP_003234.1), a gene which involves in capturing and retaining TGF- beta for presentation to the signaling receptors. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TGFBR3.

[43010] The function of TGFBR3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM47.1.Tgfb-induced factor 2 (tale family homeobox) (TGIF2, Accession NP_068581.1) is another GAM2071 target gene, herein designated TARGET GENE. TGIF2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TGIF2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II

or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TGIF2 BINDING SITE, designated SEQ ID:7274, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43011] Another function of GAM2071 is therefore inhibition of Tgfb-induced factor 2 (tale family homeobox) (TGIF2, Accession NP_068581.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TGIF2.

[43012] Transmembrane, cochlear expressed, 1 (TMC1, Accession NP_619636.2) is another GAM2071 target gene, herein designated TARGET GENE. TMC1 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by TMC1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TMC1 BINDING SITE, designated SEQ ID:19429, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43013] Another function of GAM2071 is therefore inhibition of Transmembrane, cochlear expressed, 1 (TMC1, Accession

NP_619636.2), a gene which is required for normal function of cochlear hair cells and therefore may be associated with Autosomal recessive nonsyndromic neurosensory deafness and autosomal dominant nonsyndromic sensorineural hearing loss . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Autosomal recessive nonsyndromic neurosensory deafness and autosomal dominant nonsyndromic sensorineural hearing loss ., and of other diseases and clinical conditions associated with TMC1.

[43014] The function of TMC1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM136.1.TMEM14A (Accession NP_054770.1) is another GAM2071 target gene, herein designated TARGET GENE. TMEM14A BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by TMEM14A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TMEM14A BINDING SITE, designated SEQ ID:7622, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ

ID:371.

[43015] Another function of GAM2071 is therefore inhibition of TMEM14A (Accession NP_054770.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TMEM14A.

[43016] Transmembrane protease, serine 3 (TMPRSS3, Accession NP_076927.1) is another GAM2071 target gene, herein designated TARGET GENE. TMPRSS3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TMPRSS3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TMPRSS3 BINDING SITE, designated SEQ ID:15133, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43017] Another function of GAM2071 is therefore inhibition of Transmembrane protease, serine 3 (TMPRSS3, Accession NP_076927.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TMPRSS3.

[43018] Transmembrane protease, serine 3 (TMPRSS3, Accession

NP_115777.1) is another GAM2071 target gene, herein designated TARGET GENE. TMPRSS3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TMPRSS3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TMPRSS3 BINDING SITE, designated SEQ ID:15133, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43019] Another function of GAM2071 is therefore inhibition of Transmembrane protease, serine 3 (TMPRSS3, Accession NP_115777.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TMPRSS3.

[43020] Transmembrane protease, serine 3 (TMPRSS3, Accession NP_115780.1) is another GAM2071 target gene, herein designated TARGET GENE. TMPRSS3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TMPRSS3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

TMPRSS3 BINDING SITE, designated SEQ ID:15133, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43021] Another function of GAM2071 is therefore inhibition of Transmembrane protease, serine 3 (TMPRSS3, Accession NP_115780.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TMPRSS3.

[43022] Tumor necrosis factor, alpha-induced protein 2 (TNFAIP2, Accession NP_006282.2) is another GAM2071 target gene, herein designated TARGET GENE. TNFAIP2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TNFAIP2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TNFAIP2 BINDING SITE, designated SEQ ID:14228, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43023] Another function of GAM2071 is therefore inhibition of Tumor necrosis factor, alpha-induced protein 2 (TNFAIP2, Accession NP_006282.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of

diseases and clinical conditions associated with TNFAIP2.

[43024] Tumor necrosis factor receptor superfamily, member 10b (TNFRSF10B, Accession NP_671716.1) is another GAM2071 target gene, herein designated TARGET GENE. TNFRSF10B BINDING SITE1 and TNFRSF10B BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by TNFRSF10B, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TNFRSF10B BINDING SITE1 and TNFRSF10B BINDING SITE2, designated SEQ ID:9933 and SEQ ID:9933 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43025] Another function of GAM2071 is therefore inhibition of Tumor necrosis factor receptor superfamily, member 10b (TNFRSF10B, Accession NP_671716.1), a gene which forms complex that induces apoptosis. and therefore may be associated with Squamous cell carcinoma . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Squamous cell carcinoma ., and of other diseases and clinical conditions associated with TNFRSF10B.

[43026] The function of TNFRSF10B and its association with vari-

ous diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Tumor necrosis factor receptor superfamily, member 10b (TNFRSF10B, Accession NP_003833.3) is another GAM2071 target gene, herein designated TARGET GENE. TNFRSF10B BINDING SITE1 and TNFRSF10B BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by TNFRSF10B, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TNFRSF10B BINDING SITE1 and TNFRSF10B BINDING SITE2, designated SEQ ID:14554 and SEQ ID:14554 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43027] Another function of GAM2071 is therefore inhibition of Tumor necrosis factor receptor superfamily, member 10b (TNFRSF10B, Accession NP_003833.3), a gene which forms complex that induces apoptosis. and therefore may be associated with Squamous cell carcinoma . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Squamous cell carcinoma ., and of other diseases

and clinical conditions associated with TNFRSF10B.

[43028] The function of TNFRSF10B and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Tumor necrosis factor receptor superfamily, member 11a, activator of nfkb (TNFRSF11A, Accession NP_003830.1) is another GAM2071 target gene, herein designated TARGET GENE. TNFRSF11A BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TNFRSF11A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TNFRSF11A BINDING SITE, designated SEQ ID:11190, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43029] Another function of GAM2071 is therefore inhibition of Tumor necrosis factor receptor superfamily, member 11a, activator of nfkb (TNFRSF11A, Accession NP_003830.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TNFRSF11A.

[43030] Tumor necrosis factor receptor superfamily, member 9

(TNFRSF9, Accession NP_001552.2) is another GAM2071 target gene, herein designated TARGET GENE. TNFRSF9 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TNFRSF9, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TNFRSF9 BINDING SITE, designated SEQ ID:438, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43031] Another function of GAM2071 is therefore inhibition of Tumor necrosis factor receptor superfamily, member 9 (TNFRSF9, Accession NP_001552.2), a gene which inhibits proliferation of activated T lymphocytes. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TNFRSF9.

[43032] The function of TNFRSF9 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM189.1.TOMM20-PENDING (Accession NP_055580.1) is another GAM2071 target gene, herein designated TARGET GENE. TOMM20-PENDING BINDING

SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TOMM20-PENDING, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TOMM20-PENDING BINDING SITE, designated SEQ ID:11702, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43033] Another function of GAM2071 is therefore inhibition of TOMM20-PENDING (Accession NP_055580.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TOMM20-PENDING.

[43034] Torsin family 1, member b (torsin b) (TOR1B, Accession NP_055321.1) is another GAM2071 target gene, herein designated TARGET GENE. TOR1B BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TOR1B, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TOR1B BINDING SITE, designated SEQ ID:2429, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ

ID:371.

[43035] Another function of GAM2071 is therefore inhibition of Torsin family 1, member b (torsin b) (TOR1B, Accession NP_055321.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TOR1B.

[43036] Tumor protein p53 (li-fraumeni syndrome) (TP53, Accession NP_000537.2) is another GAM2071 target gene, herein designated TARGET GENE. TP53 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TP53, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TP53 BINDING SITE, designated SEQ ID:2118, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43037] Another function of GAM2071 is therefore inhibition of Tumor protein p53 (li-fraumeni syndrome) (TP53, Accession NP_000537.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TP53.

[43038] Thiopurine s-methyltransferase (TPMT, Accession

NP_000358.1) is another GAM2071 target gene, herein designated TARGET GENE. TPMT BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TPMT, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TPMT BINDING SITE, designated SEQ ID:10218, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43039] Another function of GAM2071 is therefore inhibition of Thiopurine s-methyltransferase (TPMT, Accession NP_000358.1), a gene which catalyzes the s- methylation of thiopurine drugs such as 6- mercaptopurine. and therefore may be associated with Thiopurine s- methyl-transferase polymorphism. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Thiopurine s- methyltransferase polymorphism, and of other diseases and clinical conditions associated with TPMT.

[43040] The function of TPMT and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference

to GAM130.1.Tnf receptor-associated factor 5 (TRAF5, Accession NP_665702.1) is another GAM2071 target gene, herein designated TARGET GENE. TRAF5 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TRAF5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRAF5 BINDING SITE, designated SEQ ID:10175, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43041] Another function of GAM2071 is therefore inhibition of Tnf receptor-associated factor 5 (TRAF5, Accession NP_665702.1), a gene which Member of a family of proteins that interact with TNF receptors; binds the lymphotoxin beta receptor (LTBR). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TRAF5.

[43042] The function of TRAF5 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM69.2.Tnf receptor-associated factor 5 (TRAF5, Accession NP_004610.1) is another GAM2071 target gene,

herein designated TARGET GENE. TRAF5 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by TRAF5, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRAF5 BINDING SITE, designated SEQ ID:10175, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43043] Another function of GAM2071 is therefore inhibition of Tnf receptor-associated factor 5 (TRAF5, Accession NP_004610.1), a gene which Member of a family of proteins that interact with TNF receptors; binds the lymphotoxin beta receptor (LTBR). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TRAF5.

[43044] The function of TRAF5 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM69.2.Tripartite motif-containing 6 (TRIM6, Accession NP_477514.1) is another GAM2071 target gene, herein designated TARGET GENE. TRIM6 BINDING SITE is a target binding site found in the 3` untranslated region of

mRNA encoded by TRIM6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRIM6 BINDING SITE, designated SEQ ID:13974, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43045] Another function of GAM2071 is therefore inhibition of Tripartite motif-containing 6 (TRIM6, Accession NP_477514.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TRIM6.

[43046] Transient receptor potential cation channel, subfamily m, member 6 (TRPM6, Accession NP_060132.3) is another GAM2071 target gene, herein designated TARGET GENE. TRPM6 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TRPM6, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRPM6 BINDING SITE, designated SEQ ID:1713, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43047] Another function of GAM2071 is therefore inhibition of Transient receptor potential cation channel, subfamily m, member 6 (TRPM6, Accession NP_060132.3), a gene which contains a predicted ion channel domain and a protein kinase domain. and therefore is associated with Hypomagnesemia with secondary hypocalcemia. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Hypomagnesemia with secondary hypocalcemia, and of other diseases and clinical conditions associated with TRPM6.

[43048] The function of TRPM6 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Transient receptor potential cation channel, subfamily v, member 1 (TRPV1, Accession NP_061197.3) is another GAM2071 target gene, herein designated TARGET GENE. TRPV1 BINDING SITE1 and TRPV1 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by TRPV1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRPV1 BINDING SITE1 and TRPV1 BINDING

SITE2, designated SEQ ID:15897 and SEQ ID:1587 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43049] Another function of GAM2071 is therefore inhibition of Transient receptor potential cation channel, subfamily v, member 1 (TRPV1, Accession NP_061197.3), a gene which functions as a receptor for capsaicin. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TRPV1.

[43050] The function of TRPV1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Transient receptor potential cation channel, subfamily v, member 1 (TRPV1, Accession NP_542437.1) is another GAM2071 target gene, herein designated TARGET GENE. TRPV1 BINDING SITE1 and TRPV1 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by TRPV1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRPV1 BINDING SITE1 and TRPV1 BINDING SITE2, designated SEQ ID:1587 and SEQ ID:15897 respec-

tively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43051] Another function of GAM2071 is therefore inhibition of Transient receptor potential cation channel, subfamily v, member 1 (TRPV1, Accession NP_542437.1), a gene which functions as a receptor for capsaicin. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TRPV1.

[43052] The function of TRPV1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Transient receptor potential cation channel, subfamily v, member 1 (TRPV1, Accession NP_542435.1) is another GAM2071 target gene, herein designated TARGET GENE. TRPV1 BINDING SITE1 and TRPV1 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by TRPV1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRPV1 BINDING SITE1 and TRPV1 BINDING SITE2, designated SEQ ID:1587 and SEQ ID:15897 respectively, to the nucleotide sequence of GAM2071 RNA,

herein designated GAM RNA, also designated SEQ ID:371.

[43053] Another function of GAM2071 is therefore inhibition of Transient receptor potential cation channel, subfamily v, member 1 (TRPV1, Accession NP_542435.1), a gene which functions as a receptor for capsaicin. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TRPV1.

[43054] The function of TRPV1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.Transient receptor potential cation channel, subfamily v, member 1 (TRPV1, Accession NP_542435.1) is another GAM2071 target gene, herein designated TARGET GENE. TRPV1 BINDING SITE1 and TRPV1 BINDING SITE2 are target binding sites found in untranslated regions of multiple transcripts of mRNA encoded by TRPV1, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TRPV1 BINDING SITE1 and TRPV1 BINDING SITE2, designated SEQ ID:15897 and SEQ ID:1587 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43055] Another function of GAM2071 is therefore inhibition of Transient receptor potential cation channel, subfamily v, member 1 (TRPV1, Accession NP_542435.1), a gene which functions as a receptor for capsaicin. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TRPV1.

[43056] The function of TRPV1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM130.1.TSARG1 (Accession NP_620712.2) is another GAM2071 target gene, herein designated TARGET GENE. TSARG1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TSARG1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TSARG1 BINDING SITE, designated SEQ ID:15069, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43057] Another function of GAM2071 is therefore inhibition of TSARG1 (Accession NP_620712.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

TSARG1.

[43058] Tspy-like (TSPYL, Accession XP_166325.1) is another GAM2071 target gene, herein designated TARGET GENE. TSPYL BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TSPYL, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TSPYL BINDING SITE, designated SEQ ID:9101, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43059] Another function of GAM2071 is therefore inhibition of Tspy-like (TSPYL, Accession XP_166325.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TSPYL.

[43060] TU12B1-TY (Accession NP_057659.1) is another GAM2071 target gene, herein designated TARGET GENE. TU12B1-TY BINDING SITE1 and TU12B1-TY BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by TU12B1-TY, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the comple-

mentarity of the nucleotide sequences of TU12B1-TY BINDING SITE1 and TU12B1-TY BINDING SITE2, designated SEQ ID:17849 and SEQ ID:12270 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43061] Another function of GAM2071 is therefore inhibition of TU12B1-TY (Accession NP_057659.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TU12B1-TY.

[43062] TUCAN (Accession NP_055774.1) is another GAM2071 target gene, herein designated TARGET GENE. TUCAN BINDING SITE1 and TUCAN BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by TUCAN, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TUCAN BINDING SITE1 and TUCAN BINDING SITE2, designated SEQ ID:2265 and SEQ ID:10630 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43063] Another function of GAM2071 is therefore inhibition of

TUCAN (Accession NP_055774.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TUCAN.

[43064] Tuftelin 1 (TUFT1, Accession NP_064512.1) is another GAM2071 target gene, herein designated TARGET GENE. TUFT1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TUFT1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TUFT1 BINDING SITE, designated SEQ ID:19342, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43065] Another function of GAM2071 is therefore inhibition of Tuftelin 1 (TUFT1, Accession NP_064512.1), a gene which appears to play a role in cytokinesis, cell shape, and specialized functions such as secretion and capping. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TUFT1.

[43066] The function of TUFT1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference

to GAM136.1.Thioredoxin-like 2 (TXNL2, Accession NP_006532.1) is another GAM2071 target gene, herein designated TARGET GENE. TXNL2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by TXNL2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of TXNL2 BINDING SITE, designated SEQ ID:1413, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43067] Another function of GAM2071 is therefore inhibition of Thioredoxin-like 2 (TXNL2, Accession NP_006532.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with TXNL2.

[43068] Ubiquitin associated protein 2 (UBAP2, Accession NP_680476.1) is another GAM2071 target gene, herein designated TARGET GENE. UBAP2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by UBAP2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates

the complementarity of the nucleotide sequences of UBAP2 BINDING SITE, designated SEQ ID:5122, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43069] Another function of GAM2071 is therefore inhibition of Ubiquitin associated protein 2 (UBAP2, Accession NP_680476.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with UBAP2.

[43070] Ubiquitin associated protein 2 (UBAP2, Accession NP_060919.2) is another GAM2071 target gene, herein designated TARGET GENE. UBAP2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by UBAP2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of UBAP2 BINDING SITE, designated SEQ ID:5122, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43071] Another function of GAM2071 is therefore inhibition of Ubiquitin associated protein 2 (UBAP2, Accession NP_060919.2) . Accordingly, utilities of GAM2071 include

diagnosis, prevention and treatment of diseases and clinical conditions associated with UBAP2.

[43072] Ubiquitin associated protein 2 (UBAP2, Accession NP_065918.1) is another GAM2071 target gene, herein designated TARGET GENE. UBAP2 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by UBAP2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of UBAP2 BINDING SITE, designated SEQ ID:5122, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43073] Another function of GAM2071 is therefore inhibition of Ubiquitin associated protein 2 (UBAP2, Accession NP_065918.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with UBAP2.

[43074] UBF-fl (Accession NP_116217.1) is another GAM2071 target gene, herein designated TARGET GENE. UBF-fl BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by UBF-fl, corresponding to a target binding site such as BINDING SITE I, BINDING

SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of UBF-fl BINDING SITE, designated SEQ ID:17229, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43075] Another function of GAM2071 is therefore inhibition of UBF-fl (Accession NP_116217.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with UBF-fl.

[43076] Udp-glucose dehydrogenase (UGDH, Accession NP_003350.1) is another GAM2071 target gene, herein designated TARGET GENE. UGDH BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by UGDH, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of UGDH BINDING SITE, designated SEQ ID:12092, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43077] Another function of GAM2071 is therefore inhibition of Udp-glucose dehydrogenase (UGDH, Accession NP_003350.1), a gene which is an UDP- glucose dehydro-

genase. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with UGDH.

[43078] The function of UGDH and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM69.2.Uridine monophosphate synthetase (orotate phosphoribosyl transferase and orotidine-5'-decarboxylase) (UMPS, Accession NP_000364.1) is another GAM2071 target gene, herein designated TARGET GENE. UMPS BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by UMPS, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of UMPS BINDING SITE, designated SEQ ID:19428, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43079] Another function of GAM2071 is therefore inhibition of Uridine monophosphate synthetase (orotate phosphoribosyl transferase and orotidine-5'-decarboxylase) (UMPS, Accession NP_000364.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of

diseases and clinical conditions associated with UMPS.

[43080] Uracil-dna glycosylase 2 (UNG2, Accession NP_066970.1) is another GAM2071 target gene, herein designated TARGET GENE. UNG2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by UNG2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of UNG2 BINDING SITE, designated SEQ ID:10716, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43081] Another function of GAM2071 is therefore inhibition of Uracil-dna glycosylase 2 (UNG2, Accession NP_066970.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with UNG2.

[43082] Ubiquitin specific protease 22 (USP22, Accession XP_042698.2) is another GAM2071 target gene, herein designated TARGET GENE. USP22 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by USP22, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the

nucleotide sequences of USP22 BINDING SITE, designated SEQ ID:20055, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43083] Another function of GAM2071 is therefore inhibition of Ubiquitin specific protease 22 (USP22, Accession XP_042698.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with USP22.

[43084] VDU1 (Accession NP_055832.2) is another GAM2071 target gene, herein designated TARGET GENE. VDU1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by VDU1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of VDU1 BINDING SITE, designated SEQ ID:794, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43085] Another function of GAM2071 is therefore inhibition of VDU1 (Accession NP_055832.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with VDU1.

[43086] Vent-like homeobox 2 (VENTX2, Accession NP_055283.1) is another GAM2071 target gene, herein designated TARGET GENE. VENTX2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by VENTX2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of VENTX2 BINDING SITE, designated SEQ ID:13003, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43087] Another function of GAM2071 is therefore inhibition of Vent-like homeobox 2 (VENTX2, Accession NP_055283.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with VENTX2.

[43088] Von hippel-lindau syndrome (VHL, Accession NP_000542.1) is another GAM2071 target gene, herein designated TARGET GENE. VHL BINDING SITE1 and VHL BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by VHL, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the com-

plementarity of the nucleotide sequences of VHL BINDING SITE1 and VHL BINDING SITE2, designated SEQ ID:19946 and SEQ ID:969 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43089] Another function of GAM2071 is therefore inhibition of Von hippel-lindau syndrome (VHL, Accession NP_000542.1), a gene which may control rna stability through the selective degradation of rna- bound proteins. and therefore is associated with Von hippel- lindau disease. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Von hippel- lindau disease, and of other diseases and clinical conditions associated with VHL.

[43090] The function of VHL and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM72.1.Vasoactive intestinal peptide receptor 2 (VIPR2, Accession NP_003373.2) is another GAM2071 target gene, herein designated TARGET GENE. VIPR2 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by VIPR2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II

or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of VIPR2 BINDING SITE, designated SEQ ID:861, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43091] Another function of GAM2071 is therefore inhibition of Vasoactive intestinal peptide receptor 2 (VIPR2, Accession NP_003373.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with VIPR2.

[43092] Vacuolar protein sorting 33a (yeast) (VPS33A, Accession NP_075067.2) is another GAM2071 target gene, herein designated TARGET GENE. VPS33A BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by VPS33A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of VPS33A BINDING SITE, designated SEQ ID:4137, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43093] Another function of GAM2071 is therefore inhibition of Vacuolar protein sorting 33a (yeast) (VPS33A, Accession

NP_075067.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with VPS33A.

[43094] Vesicle transport through interaction with t-snares homolog 1a (yeast) (VTI1A, Accession NP_660207.1) is another GAM2071 target gene, herein designated TARGET GENE. VTI1A BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by VTI1A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of VTI1A BINDING SITE, designated SEQ ID:1472, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43095] Another function of GAM2071 is therefore inhibition of Vesicle transport through interaction with t-snares homolog 1a (yeast) (VTI1A, Accession NP_660207.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with VTI1A.

[43096] Williams beuren syndrome chromosome region 18 (WBSCR18, Accession NP_115693.2) is another GAM2071 target gene, herein designated TARGET GENE. WBSCR18

BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by WBSCR18, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of WBSCR18 BINDING SITE, designated SEQ ID:10631, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43097] Another function of GAM2071 is therefore inhibition of Williams beuren syndrome chromosome region 18 (WBSCR18, Accession NP_115693.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with WBSCR18.

[43098] Wolf-hirschhorn syndrome candidate 1 (WHSC1, Accession NP_579889.1) is another GAM2071 target gene, herein designated TARGET GENE. WHSC1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by WHSC1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of WHSC1 BINDING SITE, designated SEQ ID:12602, to the

nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43099] Another function of GAM2071 is therefore inhibition of Wolf-hirschhorn syndrome candidate 1 (WHSC1, Accession NP_579889.1), a gene which binds covalently to and repairs g/t mismatches. and therefore may be associated with Wolf- hirschhorn syndrome. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of Wolf- hirschhorn syndrome, and of other diseases and clinical conditions associated with WHSC1.

[43100] The function of WHSC1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.Wnt1 inducible signaling pathway protein 1 (WISP1, Accession NP_003873.1) is another GAM2071 target gene, herein designated TARGET GENE. WISP1 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by WISP1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of WISP1 BINDING SITE, designated SEQ ID:6051, to the nucleotide sequence of GAM2071 RNA, herein des-

ignated GAM RNA, also designated SEQ ID:371.

[43101] Another function of GAM2071 is therefore inhibition of Wnt1 inducible signaling pathway protein 1 (WISP1, Accession NP_003873.1), a gene which is a member of connective tissue growth factor family. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with WISP1.

[43102] The function of WISP1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM629.1.X-ray repair complementing defective repair in chinese hamster cells 2 (XRCC2, Accession NP_005422.1) is another GAM2071 target gene, herein designated TARGET GENE. XRCC2 BINDING SITE1 and XRCC2 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by XRCC2, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of XRCC2 BINDING SITE1 and XRCC2 BINDING SITE2, designated SEQ ID:19967 and SEQ ID:6034 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43103] Another function of GAM2071 is therefore inhibition of X-ray repair complementing defective repair in chinese hamster cells 2 (XRCC2, Accession NP_005422.1), a gene which involves in the homologous recombination repair (hrr) pathway of double- stranded dna. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with XRCC2.

[43104] The function of XRCC2 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM72.1.V-yes-1 yamaguchi sarcoma viral oncogene homolog 1 (YES1, Accession NP_005424.1) is another GAM2071 target gene, herein designated TARGET GENE. YES1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by YES1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of YES1 BINDING SITE, designated SEQ ID:18699, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43105] Another function of GAM2071 is therefore inhibition of V-

yes-1 yamaguchi sarcoma viral oncogene homolog 1 (YES1, Accession NP_005424.1), a gene which is a putative protein- tyrosine kinase. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with YES1.

[43106] The function of YES1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM30.1.ZAP (Accession NP_064504.2) is another GAM2071 target gene, herein designated TARGET GENE. ZAP BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ZAP, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZAP BINDING SITE, designated SEQ ID:19083, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43107] Another function of GAM2071 is therefore inhibition of ZAP (Accession NP_064504.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZAP.

[43108] ZFP42 (Accession NP_777560.1) is another GAM2071 tar-

get gene, herein designated TARGET GENE. ZFP42 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZFP42, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZFP42 BINDING SITE, designated SEQ ID:6576, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43109] Another function of GAM2071 is therefore inhibition of ZFP42 (Accession NP_777560.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZFP42.

[43110] Zinc finger protein 64 homolog (mouse) (ZFP64, Accession NP_060667.1) is another GAM2071 target gene, herein designated TARGET GENE. ZFP64 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ZFP64, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZFP64 BINDING SITE, designated SEQ ID:13869, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA,

also designated SEQ ID:371.

[43111] Another function of GAM2071 is therefore inhibition of Zinc finger protein 64 homolog (mouse) (ZFP64, Accession NP_060667.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZFP64.

[43112] Zinc finger protein 64 homolog (mouse) (ZFP64, Accession NP_071371.2) is another GAM2071 target gene, herein designated TARGET GENE. ZFP64 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ZFP64, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZFP64 BINDING SITE, designated SEQ ID:13869, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43113] Another function of GAM2071 is therefore inhibition of Zinc finger protein 64 homolog (mouse) (ZFP64, Accession NP_071371.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZFP64.

[43114] ZMYND17 (Accession NP_848546.1) is another GAM2071

target gene, herein designated TARGET GENE. ZMYND17 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZMYND17, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZMYND17 BINDING SITE, designated SEQ ID:11022, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43115] Another function of GAM2071 is therefore inhibition of ZMYND17 (Accession NP_848546.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZMYND17.

[43116] Zinc finger protein 253 (ZNF253, Accession NP_066385.1) is another GAM2071 target gene, herein designated TARGET GENE. ZNF253 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZNF253, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF253 BINDING SITE, designated SEQ ID:12223, to the nucleotide sequence of GAM2071

RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43117] Another function of GAM2071 is therefore inhibition of Zinc finger protein 253 (ZNF253, Accession NP_066385.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF253.

[43118] Zinc finger protein 264 (ZNF264, Accession NP_003408.1) is another GAM2071 target gene, herein designated TARGET GENE. ZNF264 BINDING SITE1 and ZNF264 BINDING SITE2 are target binding sites found in untranslated regions of mRNA encoded by ZNF264, corresponding to target binding sites such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF264 BINDING SITE1 and ZNF264 BINDING SITE2, designated SEQ ID:438 and SEQ ID:15406 respectively, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43119] Another function of GAM2071 is therefore inhibition of Zinc finger protein 264 (ZNF264, Accession NP_003408.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical condi-

tions associated with ZNF264.

[43120] Zinc finger protein 302 (ZNF302, Accession NP_061145.1) is another GAM2071 target gene, herein designated TARGET GENE. ZNF302 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ZNF302, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF302 BINDING SITE, designated SEQ ID:19157, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43121] Another function of GAM2071 is therefore inhibition of Zinc finger protein 302 (ZNF302, Accession NP_061145.1). Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF302.

[43122] Zinc finger protein 302 (ZNF302, Accession NP_060913.1) is another GAM2071 target gene, herein designated TARGET GENE. ZNF302 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ZNF302, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or

BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF302 BINDING SITE, designated SEQ ID:19157, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43123] Another function of GAM2071 is therefore inhibition of Zinc finger protein 302 (ZNF302, Accession NP_060913.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF302.

[43124] Zinc finger protein 305 (ZNF305, Accession NP_055539.1) is another GAM2071 target gene, herein designated TARGET GENE. ZNF305 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZNF305, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF305 BINDING SITE, designated SEQ ID:10363, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43125] Another function of GAM2071 is therefore inhibition of Zinc finger protein 305 (ZNF305, Accession NP_055539.1)

. Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF305.

[43126] Zinc finger protein 334 (ZNF334, Accession NP_060572.2) is another GAM2071 target gene, herein designated TARGET GENE. ZNF334 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by ZNF334, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF334 BINDING SITE, designated SEQ ID:7143, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43127] Another function of GAM2071 is therefore inhibition of Zinc finger protein 334 (ZNF334, Accession NP_060572.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF334.

[43128] Zinc finger protein 339 (ZNF339, Accession NP_067043.1) is another GAM2071 target gene, herein designated TARGET GENE. ZNF339 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by

ZNF339, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF339 BINDING SITE, designated SEQ ID:9097, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43129] Another function of GAM2071 is therefore inhibition of Zinc finger protein 339 (ZNF339, Accession NP_067043.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF339.

[43130] Zinc finger protein 345 (ZNF345, Accession NP_003410.1) is another GAM2071 target gene, herein designated TARGET GENE. ZNF345 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZNF345, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF345 BINDING SITE, designated SEQ ID:11758, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43131] Another function of GAM2071 is therefore inhibition of Zinc finger protein 345 (ZNF345, Accession NP_003410.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF345.

[43132] ZNF431 (Accession XP_086098.2) is another GAM2071 target gene, herein designated TARGET GENE. ZNF431 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZNF431, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF431 BINDING SITE, designated SEQ ID:9382, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43133] Another function of GAM2071 is therefore inhibition of ZNF431 (Accession XP_086098.2) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF431.

[43134] ZNF440 (Accession NP_689570.1) is another GAM2071 target gene, herein designated TARGET GENE. ZNF440 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZNF440, corre-

sponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF440 BINDING SITE, designated SEQ ID:11659, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43135] Another function of GAM2071 is therefore inhibition of ZNF440 (Accession NP_689570.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF440.

[43136] ZNF450 (Accession NP_055612.1) is another GAM2071 target gene, herein designated TARGET GENE. ZNF450 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZNF450, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF450 BINDING SITE, designated SEQ ID:13289, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43137] Another function of GAM2071 is therefore inhibition of ZNF450 (Accession NP_055612.1) . Accordingly, utilities

of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF450.

[43138] Zinc finger protein 74 (cos52) (ZNF74, Accession NP_003417.1) is another GAM2071 target gene, herein designated TARGET GENE. ZNF74 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by ZNF74, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZNF74 BINDING SITE, designated SEQ ID:2276, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43139] Another function of GAM2071 is therefore inhibition of Zinc finger protein 74 (cos52) (ZNF74, Accession NP_003417.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZNF74.

[43140] ZSIG11 (Accession NP_057010.1) is another GAM2071 target gene, herein designated TARGET GENE. ZSIG11 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ZSIG11, corre-

sponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ZSIG11 BINDING SITE, designated SEQ ID:13057, to the nucleotide sequence of GAM2071 RNA, herein designated GAM RNA, also designated SEQ ID:371.

[43141] Another function of GAM2071 is therefore inhibition of ZSIG11 (Accession NP_057010.1) . Accordingly, utilities of GAM2071 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ZSIG11.

[43142]

[43143] Fig. 8 further provides a conceptual description of a novel bioinformatically detected of the present invention, referred to here as Genomic Address Messenger 2608 (GAM2608), which modulates expression of respective target genes thereof, the function and utility of which target genes is known in the art.

[43144] GAM2608 is a novel bioinformatically detected regulatory, non protein coding, micro RNA (miRNA) gene. The method by which GAM2608 was detected is described hereinabove with reference to Figs. 8-15.

[43145] GAM2608 gene, herein designated GAM GENE, and GAM2608 target gene, herein designated TARGET GENE,

are human genes contained in the human genome.

[43146] GAM2608 gene encodes a GAM2608 precursor RNA, herein designated GAM PRECURSOR RNA. Similar to other miRNA genes, and unlike most ordinary genes, GAM2608 precursor RNA does not encode a protein. A nucleotide sequence identical or highly similar to the nucleotide sequence of GAM2608 precursor RNA is designated SEQ ID:153, and is provided hereinbelow with reference to the sequence listing part. Nucleotide sequence SEQ ID:153 is located at position 131249166 relative to chromosome X.

[43147] GAM2608 precursor RNA folds onto itself, forming GAM2608 folded precursor RNA, herein designated GAM FOLDED PRECURSOR RNA, which has a two-dimensional `hairpin structure`. As is well known in the art, this `hairpin structure`, is typical of RNA encoded by miRNA genes, and is due to the fact that the nucleotide sequence of the first half of the RNA encoded by a miRNA gene is an accurate or partial inversed-reversed sequence of the nucleotide sequence of the second half thereof.

[43148] GAM2608 precursor RNA folds onto itself, forming GAM2608 folded precursor RNA, herein designated GAM FOLDED PRECURSOR RNA, which has a two-dimensional `hairpin structure`. As is well known in the art, this

`hairpin structure`, is typical of RNA encoded by miRNA genes, and is due to the fact that the nucleotide sequence of the first half of the RNA encoded by a miRNA gene is an accurate or partial reverse-complementary sequence of the nucleotide sequence of the second half thereof.

[43149] Nucleotide sequence of GAM2608 precursor RNA, designated SEQ-ID: 153, and a schematic representation of a predicted secondary folding of GAM2608 folded precursor RNA are further described with reference to Table 2, hereby incorporated by reference.

[43150] An enzyme complex designated DICER COMPLEX, `dices` the GAM2608 folded precursor RNA into GAM2608 RNA, herein designated GAM RNA, a single stranded ~22 nt long RNA segment. As is known in the art, `dicing` of a hairpin structured RNA precursor product into a short ~22nt RNA segment is catalyzed by an enzyme complex comprising an enzyme called Dicer together with other necessary proteins. A probable (GAM Prediction Accuracy Group: A) nucleotide sequence of GAM2608 RNA is designated SEQ ID:245, and is provided hereinbelow with references to the sequence listing part and Table 3, hereby incorporated by reference.

[43151] GAM2608 target gene, herein designated TARGET GENE,

encodes a corresponding messenger RNA, GAM2608 target RNA, herein designated GAM TARGET RNA. GAM2608 target RNA comprises three regions, as is typical of mRNA of a protein coding gene: a 5` untranslated region, a protein coding region and a 3` untranslated region, designated 5`UTR, PROTEIN CODING and 3`UTR respectively.

[43152] GAM2608 RNA, herein designated GAM RNA, binds complementarily to one or more target binding sites located in untranslated regions of GAM2608 target RNA, herein designated GAM TARGET RNA. This complementary binding is due to the fact that the nucleotide sequence of GAM2608 RNA is an accurate or a partial inversed-reversed sequence of the nucleotide sequence of each of the target binding sites. As an illustration, Fig. 8 shows three such target binding sites, designated BINDING SITE I, BINDING SITE II and BINDING SITE III respectively. It is appreciated that the number of target binding sites shown in Fig. 8 is meant as an illustration only, and is not meant to be limiting GAM2608 RNA may have a different number of target binding sites in untranslated regions of a GAM2608 target RNA. It is further appreciated that while Fig. 8 depicts target binding sites in the 3`UTR region, this is meant as an example only these target binding sites may be located in

the 3`UTR region, the 5`UTR region, or in both 3`UTR and 5`UTR regions.

[43153] The complementary binding of GAM2608 RNA, herein designated GAM RNA, to target binding sites on GAM2608 target RNA, herein designated GAM TARGET RNA, such as BINDING SITE I, BINDING SITE II and BINDING SITE III, inhibits translation of GAM2608 target RNA into GAM2608 target protein, herein designated GAM TARGET PROTEIN. GAM target protein is therefore outlined by a broken line.

[43154] It is appreciated that GAM2608 target gene, herein designated TARGET GENE, in fact represents a plurality of GAM2608 target genes. The mRNA of each one of this plurality of GAM2608 target genes comprises one or more target binding sites, each having a nucleotide sequence which is at least partly complementary to GAM2608 RNA, herein designated GAM RNA, and which when bound by GAM2608 RNA causes inhibition of translation of respective one or more GAM2608 target proteins.

[43155] It is further appreciated by one skilled in the art that the mode of translational inhibition illustrated by Fig. 8 with specific reference to translational inhibition exerted by GAM2608 gene, herein designated GAM GENE, on one or more GAM2608 target genes, herein collectively desig-

nated TARGET GENE, is common to other known miRNA genes. As mentioned hereinabove with reference to the background section, although a specific complementary binding site has been demonstrated only for some of the known miRNA genes (primarily Lin-4 and Let-7), all other recently discovered miRNA genes are also believed by those skilled in the art to modulate expression of other genes by complementary binding, although specific complementary binding sites of these other miRNA genes have not yet been found (Ruvkun G., Perspective: Glimpses of a tiny RNA world, Science 294,779 (2001)).

[43156] It is appreciated that specific functions and accordingly utilities of GAM2608 correlate with, and may be deduced from, the identity of the target genes which GAM2608 binds and inhibits, and the function of these target genes, as elaborated hereinbelow.

[43157]

[43158]

[43159] Atp-binding cassette, sub-family c (cftr/mrp), member 3 (ABCC3, Accession NP_064422.1) is a GAM2608 target gene, herein designated TARGET GENE. ABCC3 BINDING SITE is a target binding site found in the 3` untranslated

region of multiple transcripts of mRNA encoded by ABCC3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ABCC3 BINDING SITE, designated SEQ ID:19582, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43160] A function of GAM2608 is therefore inhibition of Atp-binding cassette, sub-family c (cftr/mrp), member 3 (ABCC3, Accession NP_064422.1), a gene which may act as an inducible transporter in the biliary and intestinal excretion of organic anions. Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ABCC3.

[43161] The function of ABCC3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM66.2.Atp-binding cassette, sub-family c (cftr/mrp), member 3 (ABCC3, Accession NP_064421.1) is another GAM2608 target gene, herein designated TARGET GENE. ABCC3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA

encoded by ABCC3, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ABCC3 BINDING SITE, designated SEQ ID:19582, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43162] Another function of GAM2608 is therefore inhibition of Atp-binding cassette, sub-family c (cftr/mrp), member 3 (ABCC3, Accession NP_064421.1), a gene which may act as an inducible transporter in the biliary and intestinal excretion of organic anions. Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ABCC3.

[43163] The function of ABCC3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM66.2.Atp-binding cassette, sub-family c (cftr/mrp), member 3 (ABCC3, Accession NP_003777.2) is another GAM2608 target gene, herein designated TARGET GENE. ABCC3 BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by ABCC3, corresponding to a target binding site

such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ABCC3 BINDING SITE, designated SEQ ID:19582, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43164] Another function of GAM2608 is therefore inhibition of Atp-binding cassette, sub-family c (cftr/mrp), member 3 (ABCC3, Accession NP_003777.2), a gene which may act as an inducible transporter in the biliary and intestinal excretion of organic anions. Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ABCC3.

[43165] The function of ABCC3 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM66.2.Atpase, cu++ transporting, alpha polypeptide (menkes syndrome) (ATP7A, Accession NP_000043.1) is another GAM2608 target gene, herein designated TARGET GENE. ATP7A BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ATP7A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4

illustrates the complementarity of the nucleotide sequences of ATP7A BINDING SITE, designated SEQ ID:10811, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43166] Another function of GAM2608 is therefore inhibition of Atpase, cu++ transporting, alpha polypeptide (menkes syndrome) (ATP7A, Accession NP_000043.1) . Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ATP7A.

[43167] Beta-site app-cleaving enzyme (BACE, Accession NP_036236.1) is another GAM2608 target gene, herein designated TARGET GENE. BACE BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by BACE, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BACE BINDING SITE, designated SEQ ID:13378, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43168] Another function of GAM2608 is therefore inhibition of Beta-site app-cleaving enzyme (BACE, Accession

NP_036236.1), a gene which is responsible for the proteolytic processing of the amyloid precursor protein and therefore may be associated with Alzheimer disease. Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of Alzheimer disease, and of other diseases and clinical conditions associated with BACE.

[43169] The function of BACE and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM71.1.Beta-site app-cleaving enzyme (BACE, Accession NP_620428.1) is another GAM2608 target gene, herein designated TARGET GENE. BACE BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by BACE, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BACE BINDING SITE, designated SEQ ID:13378, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43170] Another function of GAM2608 is therefore inhibition of Beta-site app-cleaving enzyme (BACE, Accession NP_620428.1), a gene which is responsible for the prote-

olytic processing of the amyloid precursor protein and therefore may be associated with Alzheimer disease. Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of Alzheimer disease, and of other diseases and clinical conditions associated with BACE.

[43171] The function of BACE and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM71.1.Beta-site app-cleaving enzyme (BACE, Accession NP_620427.1) is another GAM2608 target gene, herein designated TARGET GENE. BACE BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by BACE, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BACE BINDING SITE, designated SEQ ID:13378, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43172] Another function of GAM2608 is therefore inhibition of Beta-site app-cleaving enzyme (BACE, Accession NP_620427.1), a gene which is responsible for the proteolytic processing of the amyloid precursor protein and

therefore may be associated with Alzheimer disease. Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of Alzheimer disease, and of other diseases and clinical conditions associated with BACE.

[43173] The function of BACE and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM71.1.Beta-site app-cleaving enzyme (BACE, Accession NP_620429.1) is another GAM2608 target gene, herein designated TARGET GENE. BACE BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by BACE, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BACE BINDING SITE, designated SEQ ID:13378, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43174] Another function of GAM2608 is therefore inhibition of Beta-site app-cleaving enzyme (BACE, Accession NP_620429.1), a gene which is responsible for the proteolytic processing of the amyloid precursor protein and therefore may be associated with Alzheimer disease. Ac-

cordingly, utilities of GAM2608 include diagnosis, prevention and treatment of Alzheimer disease, and of other diseases and clinical conditions associated with BACE.

[43175] The function of BACE and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM71.1.BMF (Accession NP_277038.1) is another GAM2608 target gene, herein designated TARGET GENE. BMF BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by BMF, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of BMF BINDING SITE, designated SEQ ID:14471, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43176] Another function of GAM2608 is therefore inhibition of BMF (Accession NP_277038.1) . Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with BMF.

[43177] Camp responsive element binding protein-like 2 (CREBL2, Accession NP_001301.1) is another GAM2608 target gene, herein designated TARGET GENE. CREBL2 BINDING SITE is

a target binding site found in the 3` untranslated region of mRNA encoded by CREBL2, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of CREBL2 BINDING SITE, designated SEQ ID:10963, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43178] Another function of GAM2608 is therefore inhibition of Camp responsive element binding protein-like 2 (CREBL2, Accession NP_001301.1) . Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with CREBL2.

[43179] DJ465N24.2.1 (Accession NP_064713.2) is another GAM2608 target gene, herein designated TARGET GENE. DJ465N24.2.1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DJ465N24.2.1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DJ465N24.2.1 BINDING SITE, designated SEQ ID:7651, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also desig-

nated SEQ ID:245.

[43180] Another function of GAM2608 is therefore inhibition of DJ465N24.2.1 (Accession NP_064713.2) . Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DJ465N24.2.1.

[43181] DKFZP586C1619 (Accession NP_665803.1) is another GAM2608 target gene, herein designated TARGET GENE. DKFZP586C1619 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by DKFZP586C1619, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DKFZP586C1619 BINDING SITE, designated SEQ ID:1283, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43182] Another function of GAM2608 is therefore inhibition of DKFZP586C1619 (Accession NP_665803.1) . Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DKFZP586C1619.

[43183] DMN (Accession NP_056101.4) is another GAM2608 target

gene, herein designated TARGET GENE. DMN BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by DMN, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DMN BINDING SITE, designated SEQ ID:5539, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43184] Another function of GAM2608 is therefore inhibition of DMN (Accession NP_056101.4), a gene which may participate in maintaining muscle cell integrity. Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DMN.

[43185] The function of DMN and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM66.2.DMN (Accession NP_663780.1) is another GAM2608 target gene, herein designated TARGET GENE. DMN BINDING SITE is a target binding site found in the 3` untranslated region of multiple transcripts of mRNA encoded by DMN, corresponding to a target binding site

such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of DMN BINDING SITE, designated SEQ ID:5539, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43186] Another function of GAM2608 is therefore inhibition of DMN (Accession NP_663780.1), a gene which may participate in maintaining muscle cell integrity. Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with DMN.

[43187] The function of DMN and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM66.2.Elongation of very long chain fatty acids (fen1/elo2, sur4/elo3, yeast)-like 1 (ELOVL1, Accession NP_073732.1) is another GAM2608 target gene, herein designated TARGET GENE. ELOVL1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ELOVL1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the comple-

mentarity of the nucleotide sequences of ELOVL1 BINDING SITE, designated SEQ ID:11677, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43188] Another function of GAM2608 is therefore inhibition of Elongation of very long chain fatty acids (fen1/elo2, sur4/elo3, yeast)-like 1 (ELOVL1, Accession NP_073732.1). Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ELOVL1.

[43189] Endothelial cell-specific molecule 1 (ESM1, Accession NP_008967.1) is another GAM2608 target gene, herein designated TARGET GENE. ESM1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by ESM1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of ESM1 BINDING SITE, designated SEQ ID:4688, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43190] Another function of GAM2608 is therefore inhibition of Endothelial cell-specific molecule 1 (ESM1, Accession

NP_008967.1) . Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with ESM1.

[43191] Family with sequence similarity 3, member c (FAM3C, Accession NP_055703.1) is another GAM2608 target gene, herein designated TARGET GENE. FAM3C BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FAM3C, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FAM3C BINDING SITE, designated SEQ ID:8964, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43192] Another function of GAM2608 is therefore inhibition of Family with sequence similarity 3, member c (FAM3C, Accession NP_055703.1) . Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FAM3C.

[43193] F-box and leucine-rich repeat protein 3a (FBXL3A, Accession NP_036290.1) is another GAM2608 target gene, herein designated TARGET GENE. FBXL3A BINDING SITE is a target binding site found in the 3` untranslated region

of mRNA encoded by FBXL3A, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FBXL3A BINDING SITE, designated SEQ ID:14877, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43194] Another function of GAM2608 is therefore inhibition of F-box and leucine-rich repeat protein 3a (FBXL3A, Accession NP_036290.1), a gene which is a putative SCF ubiquitin ligase subunit involved in protein degradation. Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FBXL3A.

[43195] The function of FBXL3A and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM670.1.FLJ10898 (Accession NP_060733.1) is another GAM2608 target gene, herein designated TARGET GENE. FLJ10898 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ10898, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of

Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ10898 BINDING SITE, designated SEQ ID:16988, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43196] Another function of GAM2608 is therefore inhibition of FLJ10898 (Accession NP_060733.1) . Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ10898.

[43197] FLJ14810 (Accession NP_116232.2) is another GAM2608 target gene, herein designated TARGET GENE. FLJ14810 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ14810, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ14810 BINDING SITE, designated SEQ ID:4188, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43198] Another function of GAM2608 is therefore inhibition of FLJ14810 (Accession NP_116232.2) . Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment

of diseases and clinical conditions associated with FLJ14810.

[43199] FLJ14906 (Accession NP_116248.1) is another GAM2608 target gene, herein designated TARGET GENE. FLJ14906 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ14906, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ14906 BINDING SITE, designated SEQ ID:9840, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43200] Another function of GAM2608 is therefore inhibition of FLJ14906 (Accession NP_116248.1) . Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ14906.

[43201] FLJ33990 (Accession NP_694958.1) is another GAM2608 target gene, herein designated TARGET GENE. FLJ33990 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ33990, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illus-

trates the complementarity of the nucleotide sequences of FLJ33990 BINDING SITE, designated SEQ ID:13443, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43202] Another function of GAM2608 is therefore inhibition of FLJ33990 (Accession NP_694958.1) . Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ33990.

[43203] FLJ39821 (Accession NP_775971.1) is another GAM2608 target gene, herein designated TARGET GENE. FLJ39821 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ39821, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ39821 BINDING SITE, designated SEQ ID:12614, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43204] Another function of GAM2608 is therefore inhibition of FLJ39821 (Accession NP_775971.1) . Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with

FLJ39821.

[43205] FLJ40288 (Accession NP_775953.1) is another GAM2608 target gene, herein designated TARGET GENE. FLJ40288 BINDING SITE is a target binding site found in the 5` untranslated region of mRNA encoded by FLJ40288, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of FLJ40288 BINDING SITE, designated SEQ ID:4292, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43206] Another function of GAM2608 is therefore inhibition of FLJ40288 (Accession NP_775953.1) . Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ40288.

[43207] FLJ40584 (Accession XP_069189.2) is another GAM2608 target gene, herein designated TARGET GENE. FLJ40584 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by FLJ40584, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of

FLJ40584 BINDING SITE, designated SEQ ID:17085, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43208] Another function of GAM2608 is therefore inhibition of FLJ40584 (Accession XP_069189.2) . Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with FLJ40584.

[43209] Glutaminase (GLS, Accession NP_055720.2) is another GAM2608 target gene, herein designated TARGET GENE. GLS BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GLS, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GLS BINDING SITE, designated SEQ ID:9171, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43210] Another function of GAM2608 is therefore inhibition of Glutaminase (GLS, Accession NP_055720.2) . Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GLS.

[43211] Glutamate receptor, ionotropic, ampa 1 (GRIA1, Accession NP_000818.1) is another GAM2608 target gene, herein designated TARGET GENE. GRIA1 BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by GRIA1, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of GRIA1 BINDING SITE, designated SEQ ID:16531, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43212] Another function of GAM2608 is therefore inhibition of Glutamate receptor, ionotropic, ampa 1 (GRIA1, Accession NP_000818.1), a gene which acts as an excitatory neurotransmitter at many synapses in the central nervous system. Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of diseases and clinical conditions associated with GRIA1.

[43213] The function of GRIA1 and its association with various diseases and clinical conditions, has been established by previous studies, as described hereinabove with reference to GAM412.1.Heparanase (HPSE, Accession NP_006656.1) is another GAM2608 target gene, herein designated TAR-

GET GENE. HPSE BINDING SITE is a target binding site found in the 3` untranslated region of mRNA encoded by HPSE, corresponding to a target binding site such as BINDING SITE I, BINDING SITE II or BINDING SITE III of Fig.8. Table 4 illustrates the complementarity of the nucleotide sequences of HPSE BINDING SITE, designated SEQ ID:6950, to the nucleotide sequence of GAM2608 RNA, herein designated GAM RNA, also designated SEQ ID:245.

[43214] Another function of GAM2608 is therefore inhibition of Heparanase (HPSE, Accession NP_006656.1), a gene which is an endoglycosidase that cleaves heparan sulfate, and therefore may be associated with Breast cancer. Accordingly, utilities of GAM2608 include diagnosis, prevention and treatment of Breast cancer, and of other diseases and clinical conditions associated with HPSE.
